**The Meaning of Contemplation for Social Qualitative Research** Krzysztof T.

Konecki.2021-12-30 This book offers an account of contemplative reflection in qualitative social research. Focusing on the experiences of the researcher – including sensory and emotional experiences – and the work of the mind in the investigative process, it considers the means by which the researcher’s basic assumptions can be analyzed and bracketed, so as to shed light on the process by which knowledge is produced. Through an exploration of the methods of meditation, auto-observation and self-reports, epoché, contemplative memo-ing, and the contemplative diary, the author explores the essential role of subjectivity in qualitative research, providing inspiration for more mindful research. As such, it will appeal to scholars of sociology, anthropology, and geography with interests in phenomenology, research methods, and the role of the mind in the research process.

**Modern Sensing Technologies** Subhas Chandra Mukhopadhyay,Krishanthi P.

Jayasundera,Octavian Adrian Postolache.2018-08-24 This book provides an overview of modern sensing technologies and reflects the remarkable advances that have been made in the field of intelligent and smart sensors, environmental monitoring, health monitoring, and many other sensing and monitoring contexts in today’s world. It addresses a broad range of aspects, from human health monitoring to the monitoring of environmental conditions, from wireless sensor networks and the

Internet of Things to structural health monitoring. Given its breadth of scope, the book will benefit researchers, practitioners, technologists and graduate students involved in the monitoring of systems within the human body, functions and activities, healthcare technologies and services, the environment, etc.

**Human Exploitation and Biodiversity Conservation** David L. Hawksworth, Alan T.

Bull.2008-01-03 This book presents a wide range of contributions addressing diverse aspects of biodiversity exploitation and conservation. These collectively provide a snapshot of ongoing action and state-of-the-art research, rather than a series of necessarily more superficial overviews. Examples presented here derive from studies in 17 countries including Africa, Asia, Europe, and North and South America. These reports will stimulate future work toward attaining a sustainable balance between the conservation and exploitation of biodiversity.

GIS for Environmental Monitoring Hans-Peter Bähr, Thomas Vögtle. 1999 GIS for Environmental Monitoring is a gentle but thorough introduction to those fields of which a basic understanding is a must for using, designing, and understanding geoinformation systems. These include introductions to reference systems, surveying and its techniques, cartography, digital imaging, data quality assessment. Audience: GIS for Environmental Monitoring addresses all users of geographical information systems and related techniques, that is engineers, geoscientists, surveyors, civil engineers, hydrologists as well as students of these fields.

*Routledge Handbook of Leisure Studies* Tony Blackshaw.2020-07-26 This landmark publication brings together some of the most perceptive commentators of the present moment to explore core ideas and cutting edge developments in the field of Leisure Studies. It offers important new insights into the dynamics of the transformation of leisure in contemporary societies, tracing the emergent issues at stake in the discipline and examining Leisure Studies' fundamental connections with cognate disciplines such as Sociology, Cultural Studies, History, Sport Studies and Tourism. This book contains original work from key scholars across the globe, including those working outside the Leisure Studies mainstream. It showcases the state of the art of contemporary Leisure Studies, covering key topics and key thinkers from the psychology of leisure to leisure policy, from Bourdieu to Baudrillard, and suggests that leisure in the 21st century should be understood as centring on a new 'Big Seven' (holidays, drink, drugs, sex, gambling, TV and shopping). No other book has gone as far in redefining the identity of the discipline of Leisure Studies, or in suggesting how the substantive ideas of Leisure Studies need to be rethought. The Routledge Handbook of Leisure Studies should therefore be the intellectual guide of first choice for all scholars, academics, researchers and students working in this subject area.

**ENGINEERING ECONOMICS** R. PANNEERSELVAM.2013-10-21 Designed as a textbook for undergraduate students in various engineering disciplines—Mechanical, Civil, Industrial Engineering, Electronics Engineer-ing and Computer Science—and for postgraduate students in

Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition • Discusses different types of costs such as average cost, recurring cost, and life cycle cost. • Deals with different types of cost estimating models, index numbers and capital allowance. • Covers the basics of nondeterministic decision making. • Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation. • Discusses the basic concepts of Accounting. This book, which is profusely illustrated with worked-out examples and a number of diagrams and tables, should prove extremely useful not only as a text but also as a reference for those offering courses in such areas as Project Management, Production Management, and Financial Management.

**Natural Products** Lixin Zhang,Arnold L. Demain.2007-11-17 A fresh examination of the past successes of natural products as medicines and their new future from both conventional and new technologies. High-performance liquid chromatography profiling, combinatorial synthesis, genomics, proteomics, DNA shuffling, bioinformatics, and genetic manipulation all now make it possible to rapidly evaluate the activities of extracts as well as purified components derived from microbes, plants, and marine organisms. The authors apply these methods to new natural product drug discoveries, to microbial diversity, to specific groups of products (Chinese herbal drugs, antitumor drugs from microbes and plants, terpenoids, and arsenic compounds), and to specific sources (the sea, rainforest, and endophytes). These new opportunities show how research and development trends in the pharmaceutical industry can advance to include both synthetic compounds and natural products, and how this paradigm shift can be more productive and efficacious.
