The game plan, as ingenious as it was ad hoc, seemed workable, and to have worked. Unless...it failed to take into account a defining quality of the target, his very *raison d'Étre*. It's not as if they've never noticed this in him before.

Concept Development and the Development of Word Meaning T. B. Seiler, W. Wannemacher.2012-12-06 This volume owes its existence to many different sources and influences. It is based on a meeting that took place from April 30 to May 2, 1982 at the University of Technology in Darmstadt. The idea for that meeting came while we were elaborating a research program on concept development and the development of word meaning; we were inspired by Werner Deutsch of the Max Planck Institute for Psycholinguistics in Nijmegen (The Netherlands) and by the Volkswagen Foundation in Hannover (Federal Republic of Germany) to organize an international conference on the same topic. We set out to invite a long list of colleagues, and we only regret that not all of them were able to attend. This volume should not be viewed as the proceedings of that conference. On the one hand, it does not include all of the papers presented there, and on the other hand, some of our colleagues who were unable to attend were nevertheless willing to write contributions.

Furthermore, some who did present papers at the conference revised and reformulated them or even submitted completely new ones for this book. We feel, however, that in the end we have arranged a valuable collection of work in the theory and research of a field that has occupied not only psychologists and linguists, but also philosophers, anthropologists, and many others for a long time.

Forgotten Children Linda A. Pollock.1983-11-24 'The history of childhood is an area so full of errors, distortion and misinterpretation that I thought it vital, if progress were to be made, to supply a clear review of the information on childhood contained in such sources as diaries and autobiographies.' Dr Pollock's statement in her Preface will startle readers who have not questioned the validity of recent theories on the evolution of childhood and the treatment of children, theories which see a movement from a situation where the concept of childhood was almost absent, and children were cruelly treated, to our present western recognition that children are different and should be treated with love and affection. Linda examines this thesis particularly through the close and careful analysis of some hundreds of English and American primary sources. Through these sources, she has been able to reconstruct, probably for the first time, a genuine picture of childhood in the past, and it is a much more humane and optimistic picture than the current stereotype. Her book contains a mass of novel and original material on child-rearing practices and the relations of parents and children, and sets this in the wider framework of developmental psychology, socio-biology and social anthropology. *Forgotten Children* admirably fulfils the aim of its author. In the face of this scholarly and elegant account of the continuity of parental care, few will now be able to argue for dramatic transformations in the twentieth century.

The New Spoon River Edgar Lee Masters.1973

Mister Morgen Igor Hofbauer.2017-05-10 Legendary Croatian poster artist Igor Hofbauer has created a book of graphic stories which are dark and visionary, based on a combination of classic American underground comics and film noir, pop art, German Expressionism, and Russian Constructivism. Hofbauer's comics are often surreal and nightmarish stories in strange cityscapes

that will be recognized by anyone who has spent time in the concrete housing and brutish planned neighborhoods of the former Eastern Bloc.

Titian's 'Venus of Urbino' Rona Goffen.1997-02-28 Arguably the quintessential work of the High Renaissance in Venice, Titian's Venus of Urbino also represents one of the major themes of western art: the female nude. But how did Titian intend this work to be received? Is she Venus, as the popular title - a modern invention - implies; or is she merely a courtesan? This book tackles this and other questions in six essays by European and American art historians. Examining the work within the context of Renaissance art theory, as well as the psychology and society of sixteenth-century Italy, and even in relation to Manet's nineteenth-century 'translation' of the work, their observations begin and end with the painting itself, and with appreciation of Titian's great achievement in creating this archetypal image of feminine beauty.

The Nice Old Man and the Pretty Girl Italo Svevo.2011-06-21

...the sin of an old man is equal to about two sins of a young man.

The fable-like story of an old man's sexual obsession with a young woman is a distillation of Italo Svevo's concerns--attraction of an older man to a younger woman, individual conscience versus social convention, and the cost of sexual desire. This novella is a marvel of psychological insight, following the man's vacillations and tortuous self-justifications to their tragic-comic end. It is presented here in a translation first commissioned and published by Virginia Woolf for her Hogarth Press. The Art of The Novella Series Too short to be a novel, too long to be a short story, the novella is generally unrecognized by academics and publishers. Nonetheless, it is a form beloved and practiced by literature's greatest writers. In the Art Of The Novella series, Melville House celebrates this renegade art form and its practitioners with titles that are, in many instances, presented in book form for the first time.

Ayrton Senna Giorgio Terruzzi.2016 Telling the story of Ayrton Senna is not easy. It means retracing an intense competitive career, looking into the vulnerable soul of a complex man, and reliving his tragic death, which came during the bloodiest weekend in the history of modern motor racing. It also means paying homage to a truly heroic figure, whose grace and appeal remain intact. In other words, we are talking about a journey into the collective memory, within which each racing fan cherishes particular moments, personal memories, emotions and grief related to a figure who in some way continues to appear and to race in a highly colourful firmament. This brings us to Ercole Colombo. His photos. His passion for Formula 1, and his innate ability as a reporter, combined with the aesthetic touch of a great photographer.

Untitled II Patrick Potter.2009 This book about street art has

again been created without the collaboration of the artists and certainly without the 'permission' of the wall owners. Works featured are all recent creations and many exhibit the vile passions that rage between old schools and new. There are blatant statements that embody outrageous lies, articles laced with satire, plus cynical synopses of attempts to commercialize street art and make it fashionable via celebrity endorsement. Consideration is given to the question What the hell is it about the color grey that makes it appeal the powers that be and their ridiculous minions? and Outsider Art is it an expression of artistic impulse without interference from the idea of personal gain? All of this amongst a collection of graffiti collected from all over the world and preserved on these pages before the legions employed to destroy them chip them off the walls. Artists include Banksy, Swoon, Os Gemeos and more.

Dynamic Aspects of Language Processing Johannes

Engelkamp, H. D. Zimmer. 2013-03-12 This book deals with the conditions and the consequences of the production of different syntactic sentence structures. During the sixties the syntactic structure of sentences was one of the most intensively studied topics in psycholinguistic research. The dominant interest did not, however, lie in the function of syntactic structures but in the ability to understand and to utter them. Later, in the seventies the interest shifted to the semantic structure of sentences. Many studies centred around the structural aspects of the representation of knowledge. The leading question was: how can the meaning of an utterance be described? The widely accepted answer was: the central unit of meaning is the proposition. From this point of view, the aim of an utterance is to transmit propositional meaning, and syntactic structure is of interest only insofar as it influences the comprehension of propositional meaning. In this book both aspects, i. e. the syntactic and the semantic structure of sentences have been considered. The dynamic aspects of knowledge use and its relationship to the

syntactic structure of sentences are thoroughly analysed and studied empirically. The main question is how semantic knowledge is communicated through syntactic structure. Syntactic structure has causes and consequences. In general we assume that the syntactic structure reflects dynamic aspects of the knowledge base of the speaker and determines dynamic states in the listener.

Muralismo Morte Jens Besser.2010 'Muralism Morte' features some of the best artists involved in this underground art movement, revealing the vibrancy of new muralism as it rises from the shadows of urban spaces. It delves deep into the world of contemporary muralism, featuring large-scale murals that grace the streets of cities everywhere.

Star Wars: Darth Vader by Gillen and Larroca Omnibus Kieron Gillen,Jason Aaron.2022-04-26 One of the greatest antagonists in all of fiction rises again! Fresh from a stinging defeat at the hands of the Rebel Alliance, Darth Vader must reassert the Empire's iron grip on the galaxy. But will his personal desire for vengeance against the young Jedi who destroyed the Death Star distract from Vader's duty to the Emperor? As a fateful quest begins, the Dark Lord of the Sith will face fresh threats to his power. And, as other villains old and new play their part -- from Boba Fett and Jabba the Hutt to diabolical debutant Doctor Aphra and the killer droids Triple-Zero and BeeTee-One -- will Vader's imperial march continue, or will his schemes prove his undoing? The Good Wife's Guide (Le Ménagier de Paris) .2012-08-22 In the closing years of the fourteenth century, an anonymous French writer compiled a book addressed to a fifteen-year-old bride, narrated in the voice of her husband, a wealthy, aging Parisian. The book was designed to teach this young wife the moral attributes, duties, and conduct befitting a woman of her station in society, in the almost certain event of her widowhood and

subsequent remarriage. The work also provides a rich assembly of practical materials for the wife's use and for her household, including treatises on gardening and shopping, tips on choosing servants, directions on the medical care of horses and the training of hawks, plus menus for elaborate feasts, and more than 380 recipes. The Good Wife's Guide is the first complete modern English translation of this important medieval text also known as *Le Ménagier de Paris* (the Parisian household book), a work long recognized for its unique insights into the domestic life of the bourgeoisie during the later Middle Ages. The Good Wife's Guide, expertly rendered into modern English by Gina L. Greco and Christine M. Rose, is accompanied by an informative critical introduction setting the work in its proper medieval context as a conduct manual. This edition presents the book in its entirety, as it must have existed for its earliest readers. The Guide is now a treasure for the classroom, appealing to anyone studying medieval literature or history or considering the complex lives of medieval women. It illuminates the milieu and composition process of medieval authors and will in turn fascinate cooking or horticulture enthusiasts. The work illustrates how a (perhaps fictional) Parisian householder of the late fourteenth century might well have trained his wife so that her behavior could reflect honorably on him and enhance his reputation.

The Sun is Feminine Traute Taeschner.2012-12-06 Lisa is 4 years and 5 months old and Giulia 3 years and 4 months. One morning, the girls' father is taking them to nursery school. L: ... e bravissima, ha riscaldato l'auto. E' bravissima, vera? In praising the sun for having warmed up the car, Lisa has referred to it in the feminine gender, as in the German *die Sonne*. Her father corrects her by using the masculine gender. F: E' bravissimo. E' if sale. L: E' un maschietto, if sale? (Is the sun a little boy?) F: E'maschife. (It's masculine.) G [determined]: E' una femmina! (No, it's a girl!) F: Forse in tedesco. (Perhaps it is in German.) is left disoriented, speechless. Giulia This book is devoted to

language acquisition in children who have been exposed to two languages since birth. It has often been said that the study of simultaneous bilingualism is the most fertile ground for the formulation of general theories on language acquisition processes, and indeed, most of the studies on early bilingualism aim in this direction. But in a sense this book serves the reverse purpose. Using the results of psycholinguistic research as a basis, I have sought to understand the peculiarities of the process of language organization in the child who faces the problem of learning two languages when other children are learning only one. Thus, the recurring theme of my study is the diversity of bilingual as opposed to monolingual acquisition.

Modelling Language Behaviour R. Narasimhan.2013-03-12 This book studies language behaviour in the larger context of modelling or organismic behaviour more generally. It starts out from the basic premise that what is characteristic of organismic behaviour is that an organism uses its behavioural acts to accomplish something in its interactions with the world in which it finds itself. These two features, that an organism has a behavioural repertoire and that it deploys specific behavioural acts from its repertoire in an intentional way, define the agentic nature of an organism. The study of organismic behaviour, then, must primarily concern itself with this agentic aspect of an organism and determine what structures and processes underlie these intentional organismic acts. We should be able to say what primitive structures and what primitive processes put together in what ways can give rise to the kinds of behavioural acts an organism engages in. Any explanation of behaviour that we formulate in terms of underlying structures and processes must be testable and must be consonant with the observed phenomenological aspects of such behaviour.

Language in Primates J. de Luce, H.T. Wilder. 2012-12-06 This anthology was originally planned in connection with a symposium Language in Primates: Implications for Linguistics, Anthropology, Psychology, and Philosophy, at Miami University, Oxford, Ohio. Publication of the book would not have been possible without the support given to the Symposium by many individuals and groups. The Editors thank everyone involved for their kind and generous assistance. Specifically, we thank the invited speakers at the Symposium, Thomas A. Sebeok, H. Lyn Miles, Roger S. Fouts, and Thomas Simon. The chapters in this book by Miles, Fouts, and Simon are revised versions of their lectures at the Symposium. We thank Edward Simmel for his encouragement, his patience with our efforts, and his help in planning and directing the Symposium. For their financial assistance, we thank the co-sponsors of the Symposium: the Sigma Chi Foundation/William P. Huffman Scholar-in Residence Program at Miami University, as well as the Departments of Classics, Philosophy, Psychology, and Sociology and Anthropology at Miami. We thank Barbara Johnson, Polly J. Harris and Brenda Shaw for their secretarial and editorial help, and Shirley Gallimore for her patience, care, good humor, and hard work in typing the manuscript. Finally, we thank the contributors to this volume.

Education for a Democratic Society .2007-01-01 This book is the third volume of selected papers from the Central European Pragmatist Forum (CEPF). It deals with the general question of education, and the papers are organized into sections on Education and Democracy, Education and Values, Education and Social Reconstruction, and Education and the Self. The authors are among the leading specialists in American philosophy from universities across the U.S. and in Central and Eastern Europe. The series Studies in Pragmatism and Values promotes the study of pragmatism's traditions and figures, and the explorations of pragmatic inquiries in all areas of philosophical thought.

Bezimena Nina Bunjevac.2019-05-29 The author's jumping-off point is the myth of Artemis and Siproites, in which a young man is turned into a woman as a punishment for the attempted rape of one of Artemis's virgin cohorts. Bunjevac's retelling follows Benny, a sexually deviant man who, coming across an alluring former classmate, concocts an elaborate, disturbing rape fantasy. Inked in her lush, stippled, illustrative style, Bunjevac crafts a gripping, noirish, Nabokovian tale, by turns surreal and harrowing, that turns the male gaze inside-out. Bezimena is both a radical examination of the misconceptions surrounding rape culture and an artistic and psychological tour de force.

Monet and His Muse Mary Mathews Gedo.2010-09-30 What sets this study apart from the vast literature on Monet is Gedo's focused, jargon-free, accessible, psychoanalytic assessment of Monet and his relationship with his first wife and mistress, Camille Doncieux, and the impact of this complex relationship on the artist's work. Using this psychobiographical approach in conducting a careful reading of primary source material and Monet's paintings, Gedo (independent scholar) does much to debunk a good deal of the mythology surrounding the artist's life at this period. She offers fresh insights into the content of many of Monet's major paintings, particularly his figurative works that feature Camille as a model or subject. So, for example, Gedo proposes that Monet's *Camille (or The Woman in the Green Dress)* from 1866, via its composition, functioned as a metaphor for the uncertainty characterizing the relationship between lovers, in addition to exposing publicly Camille as Monet's mistress. As is the danger when applying psychoanalysis to the study of art history, some of Gedo's assertions and interpretations approach the level of implausibility; however, these flights of psychoanalytic fancy are few and far between. The writing is engaging, endnotes are extensive but not oppressive, and the book is sufficiently illustrated with many images in color.

Breakthroughs in Melanoma Research Yohei Tanaka.2011-11-14 Melanoma is considered to be one of the most aggressive forms of

skin neoplasms. Despite aggressive researches towards finding treatments, no effective therapy exists to inhibit the metastatic spread of malignant melanoma. The 5-year survival rate of metastatic melanoma is still significantly low, and there has been an earnest need to develop more effective therapies with greater anti-melanoma activity. Through the accomplishment of over 100 distinguished and respected researchers from 19 different countries, this book covers a wide range of aspects from various standpoints and issues related to melanoma. These include the biology of melanoma, pigmentations, pathways, receptors and diagnosis, and the latest treatments and therapies to make potential new therapies. Not only will this be beneficial for readers, but it will also contribute to scientists making further breakthroughs in melanoma research.

Speech Act Classification T. Ballmer, W. Brennstuhl. 2013-03-07

This book presents a new classification of speech acts. It is an alter native to all previously published classifications of speech acts. The classification proposed here is based on an extensive set of data, name lyon all the verbs designating linguistic activities and aspects thereof. A theoretically and methodologically justifiable method is used to proceed in a number of steps from these data to the classification. The classification is documented in a lexicon with two sections. The first section exhibits the classification in all its details. Each verb is listed to its meaning at the appropriate place in the classification. according The second, alphabetically ordered section enables one to locate the verbs classified in the first part. The speech act classification as presented in this book has a number of consequences for linguistic theorizing: the book makes advances in three linguistically relevant fields - speech act theory, lexicology, and theory of meaning. In speech act theory firstly of course a classifica tion is proposed which is theoretically justified and which is simul taneously based explicitly and systematically on linguistic data. Second ly, a wider concept of speech acts is

introduced which proves its value by making possible a linguistically justified classification. Thirdly, the concept of speech act sequence (or more generally partial order) is brought into focus as a major organizational principle of the semantic relation between speech acts.

Developing Grammars Willemijn M. Klein,N. Dittmar.2012-12-06

This study deals with variation in grammar both from a theoretical and an empirical point of view. In Part I (Chaps. 1-4), an attempt is made to characterize this phenomenon within the broader context of what might be called the fluctuating character of natural language, and to develop suitable and precise descriptive techniques that account for it. The method which is proposed here is called variety grammar - roughly speaking, this is a formal grammar with probabilistic weighting for an ordered set of varieties, such as dialects, sociolects, registers, or developmental stages. In Part II (Chaps. 5-8), this technique is applied to an important area of grammatical variation - to the process of second language acquisition in social context, based on a large investigation of the language behavior of foreign migrant workers acquiring German through everyday contacts. We have tried to characterize their developing grammars and to relate this complex developmental process to social and individual factors that determine it.

Retrieval from Semantic Memory W. Noordman-Vonk.2013-03-07

The area of concern to Dr. Wietske Noordman-Vonk has been variously seen as an aspect of long-term memory [F. 1], secondary memory [F. 2], memory without record [F. 3], and semantic memory [F. 4], the latter term being the one preferred by Dr. Noordman-Vonk herself. This proliferation of terminology is not an entirely trivial matter, for although the expressions clearly overlap in range, they do draw attention to different features of the phenomena under consideration. The work reported here is concerned with the form of representation and manipulation of our knowledge that, for example, a dog is an animal, or that mothers and daughters are parents and children. To put it more generally, the experiments attempt to elucidate the psychological processes involved in the semantics of class-inclusion and, most importantly, to extend the explanatory principles there invoked to a new domain, that of kinship relations. Clearly, the connections between ant and insect, or flower and plant have been known to us - as adults - for some considerable period of time; in the absence of brain injury or degeneration we are unlikely to forget that fathers and sons are kin of the same sex. We may therefore pretheoretically - distinguish between retrieval of such knowledge and. retrieval of a rapidly fading sequence of random numbers that we are asked to recall after a single presentation. It is in this sense that the current work is concerned with long-term and not short-term memory.
