To Sell Is Human Daniel H. Pink.2012-12-31 Look out for Daniel Pink's new book, *When: The Scientific Secrets of Perfect Timing* #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of *Drive* and *A Whole New Mind*, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we're all in sales now. *To Sell Is Human* offers a fresh look at the art and science of selling. As he did in *Drive* and *A Whole New Mind*, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer Always Be Closing), explains why extraverts don't make the best salespeople, and shows how giving people an off-ramp for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

Solving Tough Problems Adam Kahane.2004 Adam Kahane spent years working in the world's hotspots, and came away with a new understanding of how to resolve conflict in a way that seems reasonable - and doable - to all parties. The result is *Solving Tough Problems*. Written in a relaxed, persuasive style, this is not a how-to book with glib answers, but rather, a very personal story of the author's progress from a young expert convinced of the need to provide cold, correct answers to an effective facilitator of positive change - by learning how to create environments that enable new ideas and creative solutions to emerge. The book explores the connection between individual learning and institutional change, and how leaders can move beyond politeness and formal statements, beyond routine debate and defensiveness, toward deeper and more productive dialogue. Both tough and inspiring, the book explores models, technologies, and examples that foster and facilitate dialogues of the heart.

The handbook's research components include quantitative, qualitative, and arts-based research, covering diverse discourses, methodologies, and perspectives that add to the development of a complete picture of the topic. Assessing Young Learners of English: Global and Local Perspectives Marianne Nikolov.2015-10-29 This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self- perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.
