**Albion's Seed** David Hackett Fischer.1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

*Conversations with a Dead Man* Mark Abley.2024-02-13 The second edition of Mark Abley's acclaimed creative biography, revised and expanded with a new introduction by the author. When he died in 1947, Duncan Campbell Scott was revered as one of his country's finest poets and honoured as a devoted civil servant. Today, because of his work as head of the Department of Indian Affairs, he's widely considered one of history's worst Canadians. When word of this reaches Scott's ghost, he returns to the land of the living to ask poet and journalist Mark Abley to clear his name, and in the ensuing research, Abley learns of a man who could somehow write vibrant poems about Indigenous people in one moment, and in another institute policies designed to destroy Indigenous culture and force assimilation. With intelligence, moral ferocity, and a hunger for truth, Abley delves into Scott's professional and personal lives while also exploring the hostile government policies — including the residential school system — that damaged and continue to damage the lives of hundreds of thousands of Indigenous people. By mixing traditional non-fiction with an imagined debate

between the author and Scott's ghost, *Conversations with a Dead Man* makes it clear that "the villain was a man, and his nation is our nation. Abley's act of radical empathy makes it harder to turn the page on a chapter of our history we might otherwise slam shut" (Andrew Stobo Sniderman, Maclean's).

Environmental Law in Canada Jamie Benidickson.2020-01-14 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Canada. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation, and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise, and radiation. Then, a section on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil, and minerals. Further treatment includes the application of zoning and land-use planning, rules on liability, and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Canada. Academics and researchers, as well as business investors and the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative environmental law and policy.

Performance Measurement in State Departments of Transportation Theodore H. Poister.1997 This synthesis will be of interest to state transportation agency administrators, division and functional area managers, program managers, financial and human resources personnel, and others, including state legislators, who are concerned with implementing innovative programs in state departments of transportation (DOTs). It presents information on the degree to which state DOTs have developed and implemented performance measures in all transport modes for which they are responsible. With the advent of the Intermodal Surface Transportation Efficiency Act (ISTEA), as well as pressure from state governments for greater accountability of state funds, DOTs are increasingly endeavoring to develop performance measures to improve their productivity, and to respond to outside demands from state government and the public. This report of the Transportation Research Board describes how performance measures have evolved in state DOTs, the types of initiatives that have been developed, and the effectiveness of such measures in assessing performance and improving productivity, as perceived by the DOTs.

**Accountability and Performance Indicators for Mental Health Services and Supports** Kimberley L. McEwan,Canada. Health Canada, Elliot Michael Goldner, Federal/Provincial/Territorial Advisory Network on Mental Health (Canada).2001 This resource kit is designed to introduce key concepts in accountability & performance monitoring, with emphasis on performance appraisals of care related to the population of adults with

serious mental illness. The focus of the kit is on mental health services & supports that have as their primary function the provision of treatment, rehabilitation, and community support. After an introduction on the project that developed this kit, part two discusses conceptual aspects of accountability & performance monitoring and defines key terms. Part three outlines components of the performance management cycle while the final part lays out the specific tools for successful monitoring. The majority of this part is devoted to an inventory of possible performance indicators that reflect both objective & value-based performance. The indicators are presented in eight domains of performance such as acceptability, accessibility, appropriateness, continuity, competence, effectiveness, efficiency, and safety. Input, process, and outcome indicators are included reflecting performance at the system, program, and client level.

**Multi-Criteria Decision-Making Techniques in Waste Management** Suchismita Satapathy, Debesh Mishra, Prasenjit Chatterjee. 2021-09-30 This book addresses the problem of waste management by using multi-criteria decision-making (MCDM) methods. The authors discuss how to apply MCDM, a complex decision-making tool that involves both quantitative and qualitative factors, to develop strategies for effective waste management using various optimization models to rank alternatives, while also incorporating the concerns and needs of multiple stakeholders to find the most optimal decisions for various types of wastes. Typically, there does not exist a single optimal solution to waste problems; with help of MCDM, far better solutions can often be found and utilized to facilitate sustainable waste management techniques in various industries. This book provides unique, effective, and quick decision-making strategies for waste management. With the ever-increasing population and continuing human development, the problem of managing waste becomes increasingly essential, and this volume helps lead the way to finding sustainable solutions.

**Measuring the Performance of Public Services** Michael Pidd. 2012-02-02 Measuring the performance of public agencies and programmes is essential to ensure that citizens enjoy quality services and that governments can be sure that taxpayers receive value for money. As such, good performance measurement is a crucial component of improvement and planning, monitoring and control, comparison and benchmarking and also ensures democratic accountability. This book shows how the principles, uses and practice of performance measurement for public services differ from those in for-profit organisations, being based on the need to add public value rather than profit. It describes methods and approaches for measuring performance through time, for constructing and using scorecards, composite indicators, the use of league tables and rankings and argues that data-envelopment analysis is a useful tool when thinking about performance. This demonstrates the importance of allowing for the multidimensional nature of performance, as well as the need to base measurement on a sound technical footing.

*Improving Health in the Community* Institute of Medicine, Committee on Using Performance Monitoring to Improve Community Health. 1997-05-21  
How do communities protect and improve the health of their populations? Health care is part of the answer but so are environmental protections, social and educational services, adequate nutrition, and a host of other activities. With concern over funding constraints, making sure such activities are efficient and effective is becoming a high priority. *Improving Health in the Community* explains how population-based performance monitoring programs can help communities point their efforts in the right direction. Within a broad definition of community health, the committee addresses factors surrounding the implementation of performance monitoring and explores the why and how to of establishing mechanisms to monitor the performance of those who can influence community health. The book offers a policy framework, applies a multidimensional model of the determinants of health, and provides sets of prototype performance indicators for specific health issues. *Improving Health in the Community* presents an attainable vision of a process that can achieve community-wide health benefits.
