Stats: Data and Models, Global Edition Paul Velleman, Richard D. De Veaux, David E.

Bock. 2016-09-29 Richard De Veaux, Paul Velleman, and David Bock wrote *Stats: Data and Models* with the goal that students and instructors have as much fun reading it as they did writing it.

Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. Introductory Statistics 2e (hardcover, Full Color) Barbara Illowsky, Susan Dean. 2023-12-14 Book Publication Date: Dec 13, 2023. Full color. *Introductory Statistics 2e* provides an engaging, practical, and thorough overview of the core concepts and skills taught in most one-semester statistics courses. The text focuses on diverse applications from a variety of fields and societal contexts, including business, healthcare, sciences, sociology, political science, computing, and several others. The material supports students with conceptual narratives, detailed step-by-step examples, and a wealth of illustrations, as well as collaborative exercises, technology integration problems, and statistics labs. The text assumes some knowledge of intermediate algebra, and includes thousands of problems and exercises that offer instructors and students ample opportunity to explore and reinforce useful statistical skills.

Economics in One Lesson Henry Hazlitt. 2010-08-11 With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the "Austrian School," which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to

dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt's focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication.

Exploring Creation with Astronomy Jeannie K. Fulbright.2004 This wonderful book uses the classical and Charlotte Mason methodology to give elementary school students an introduction to our solar system and the universe that contains it. Narration and notebooking are used to encourage critical thinking, logical ordering, retention, and record keeping. Each lesson in the book is organized with a narrative, some notebook work, an activity, and a project. The activities and projects use easy-to-find household items and truly make the lessons come alive! They include making a solar eclipse, making craters like those found on Mercury, simulating the use of radar to determine hidden landscape, keeping track of the phases of the moon, making a telescope, making fog, and making an astrometer to measure the brightness of a star. Although designed to be read by the parent to elementary students of various grade levels, it is possible for students with a 4th-grade reading level to read this book on their own. Grades K-6.

Hidden Figures Margot Lee Shetterly.2018-05-08 Based on the New York Times bestselling book and the Academy Award-nominated movie, author Margot Lee Shetterly and Coretta Scott King Illustrator Honor Award winner Laura Freeman bring the incredibly inspiring true story of four black women who helped NASA launch men into space to picture book readers! Dorothy Vaughan, Mary Jackson, Katherine Johnson, and Christine Darden were good at math...really good. They participated in some of NASA's greatest successes, like providing the calculations for America's first journeys into space. And they did so during a time when being black and a woman limited what they could do. But they worked hard. They persisted. And they used their genius minds to change the

world. In this beautifully illustrated picture book edition, we explore the story of four female African American mathematicians at NASA, known as colored computers, and how they overcame gender and racial barriers to succeed in a highly challenging STEM-based career. Finally, the extraordinary lives of four African American women who helped NASA put the first men in space is available for picture book readers, proclaims Brightly in their article 18 Must-Read Picture Books of 2018. Will inspire girls and boys alike to love math, believe in themselves, and reach for the stars.

Roadside Picnic Arkady Strugatsky,Boris Strugatsky,Olena Bormashenko.2012-05-01 Red Schuhart is a stalker, one of those young rebels who are compelled, in spite of extreme danger, to venture

illegally into the Zone to collect the mysterious artifacts that the alien visitors left scattered around. His life is dominated by the place and the thriving black market in the alien products. But when he and his friend Kirill go into the Zone together to pick up a &“full empty,&” something goes wrong. And the news he gets from his girlfriend upon his return makes it inevitable that he'll keep going back to the Zone, again and again, until he finds the answer to all his problems. First published in 1972, *Roadside Picnic* is still widely regarded as one of the greatest science fiction novels, despite the fact that it has been out of print in the United States for almost thirty years. This authoritative new translation corrects many errors and omissions and has been supplemented with a foreword by Ursula K. Le Guin and a new afterword by Boris Strugatsky explaining the strange history of the novel's publication in Russia.

Testimonios: Stories of Latinx and Hispanic Mathematicians Pamela E. Harris.2021-08-16

Testimonios brings together first-person narratives from the vibrant, diverse, and complex Latinx and Hispanic mathematical community. Starting with childhood and family, the authors recount their own individual stories, highlighting their upbringing, education, and career paths. Their particular stories, told in their own voices, from their own perspectives, give visibility to some of the experiences of Latinx/Hispanic mathematicians. *Testimonios* seeks to inspire the next generation of Latinx and Hispanic mathematicians by featuring the stories of people like them, holding a mirror up to our own community. It also aims to provide a window for mathematicians (and aspiring mathematicians) from all ethnicities, with the hope of inspiring a better understanding of the diversity of the mathematical community.
