Morphology Francis Katamba, John Stonham. 2018-05-29 This popular introductory textbook offers a lively and comprehensive introduction to current morphological theory and analysis, enabling beginners to approach current literature in the subject with confidence. Part I develops students' understanding of traditional and structuralist notions of word structure and provides them with a firm grounding in word structure and word formation. Part II explores the relationship between morphology and phonology, while Part III looks at morphology in relation to syntax and the lexicon. Numerous practical exercises which involve formulating hypotheses and testing them against linguistic data cement the reader's understanding of the field. This accessible introduction to morphology is an ideal resource for students of English and linguistics and their teachers. Kiswahili Rocha M. Chimera. 1998 Kiswahili is the fastest growing African language. The author, Professor of Kiswahili at Egerton University, here describes this growth and examines Kiswahili as an alternative to European languages in East Africa and as an international language for Africa. He covers the controversial theories of the origination and development of Kiswahili, the effects of the use of English as the language of instruction in Kenya and the status of Kiswahili in trade, religion and politics in East and Central Africa, within a continental context. A country analysis of

Tanzania, Kenya and Uganda reveals the spread of Kiswahili as a mother tongue and second language; its use in creative writing and music, and its status in language policies. The argument for Kiswahili as the language of Africa is also discussed.

Agreement in Natural Language Center for the Study of Language and Information (U.S.).1988-07 Although grammatical agreement or concord is widespread in human languages, linguistic theorists have generally treated agreement phenomena as secondary or even marginal. All the papers in this volume, however, take agreement phenomena seriously, as presenting either a general issue in theory construction or a descriptive problem in particular types of languages. The theoretical perspectives range from purportedly theory-neutral typological frameworks to assumptions about the validity of one or another current formal model. Further, the degree of generality ranges from a universalist nature-of-human-language agenda to concern with one or another aspect of grammatical agreement or with agreement in a single language or language group.

Lexical Semantics D. A. Cruse.1986-09-18 *Lexical Semantics* is about the meaning of words. Although obviously a central concern of linguistics, the semantic behaviour of words has been unduly neglected in the current literature, which has tended to emphasize sentential semantics and its relation to formal systems of logic. In this textbook D. A. Cruse establishes in a principled and disciplined way the descriptive and generalizable facts about lexical relations that any formal theory of semantics will have to encompass. Among the topics covered in depth are idiomaticity, lexical ambiguity,

synonymy, hierarchical relations such as hyponymy and meronymy, and various types of oppositeness. Syntagmatic relations are also treated in some detail. The discussions are richly illustrated by examples drawn almost entirely from English. Although a familiarity with traditional grammar is assumed, readers with no technical linguistic background will find the exposition always accessible. All readers with an interest in semantics will find in this original text not only essential background but a stimulating new perspective on the field.

The Language Web Jean Aitchison.1997 Language is like a vast spider's web. In this volume Jean Aitchison explores the different facets of this web. She begins with the cobweb of false worries which surrounds language. She then discusses how language evolved in the human species, how children acquire it, and how educated English speakers remember 50,000 or more words. Finally, she argues that people are right to be concerned about language, though not in the ways traditionally assumed. This is the text of the 1996 BBC Reith lectures, slightly revised for publication, with illustrations and full references, and an afterword which looks at the reception of the lectures.

Cohesion in English M.A.K. Halliday,Ruqaiya Hasan.2014-01-14 Cohesion in English is concerned with a relatively neglected part of the linguistic system: its resources for text construction, the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment. A principal component of these resources is 'cohesion'. This book studies the cohesion that arises from semantic relations between sentences. Reference from one to the other, repetition of word meanings, the conjunctive force of but, so, then and the like are considered. Further, it describes a method for analysing and coding sentences, which is applied to specimen texts.

Swahili and Sabaki Derek Nurse,Thomas J. Hinnebusch,Gérard Philipson.1993 The Sabaki languages form a major Bantu subgroup and are spoken

by 35 million East Africans in Somalia, Kenya, Tanzania, Mozambique, and the Comoro Islands. The authors provide a historical/comparative treatment of Swahili (and other Sabaki languages), an account of the relationship of Swahili to Sabaki and to other Bantu languages, and some data on contemporary Sabaki languages. Data sets, appendices, maps, and figures present essential information on phonology, lexical makeup, and tense/aspect morphology. The final chapter is a synthesis describing the linguistic and historical relationship of the Sabaki dialects to each other and to hypothetical proto-stages.

Kamusi Ya Kiingereza-Kiswahili Chuo Kikuu cha Dar es Salaam. Taasisi ya Uchunguzi wa Kiswahili.1996 This massive authoritative Swahili dictionary, is the most definitive and comprehensive in existence. It has taken a team of lexicographers and academics fourteen years to prepare, with the support of the Institute of Kiswahili Research in Dar es Salaam. The last comparable edition was in 1939, and was primarily intended to help the user to comprehend English texts. The dictionary records new words and meanings of words which the language has acquired since 1939; and provides lexicographical information needed by current dictionary users. There are more than 50,000 entries, with an attempt to give every English word an equivalent in Swahili, or otherwise a phrase; and the vocabulary covers both general and specialized language. Guidance is provided on use and connotation, word formation and syntax, and derivatives and compounds of a headword are explicitly shown in each entry. The full information and arrangement given for each entry is: headword, homographs, wordclass, alternative spelling of a headword, cross-reference, gloss, definition, subject label, usage label, regional label, senses separated by numbers, illustrative examples, compounds, derivatives, and adjectival complementation.
