Lifelines Stephane Hallegatte, Jun Rentschler, Julie Rozenberg. 2019-07-16 Infrastructure—electricity, telecommunications, roads, water, and sanitation—are central to people's lives. Without it, they cannot make a living, stay healthy, and maintain a good quality of life. Access to basic infrastructure is also a key driver of economic development. This report lays out a framework for understanding infrastructure resilience - the ability of infrastructure systems to function and meet users' needs during and after a natural hazard. It focuses on four infrastructure systems that are essential to economic activity and people's well-being: power systems, including the generation, transmission, and distribution of electricity; water and sanitation—especially water utilities; transport systems—multiple modes such as road, rail, waterway, and airports, and multiple scales, including urban transit and rural access; and telecommunications, including telephone and Internet connections.

Strategic Latency Unleashed Zachary Davis, Frank Gac, Philip Reiner, Christopher Rager, Jennifer Snow. 2021-01-30 The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

Expedition Everest Evan Pedone. 2008-12 Joseph Corso, the world's greatest mountain climber and CEO of Xtreme Adventures, had called it a season on Mount Everest. He wasn't expecting to lead any more expeditions on the mountain because the hurricane-like monsoon season had started. Corso, back in Seattle and far away from the likes of the Himalayas, is contacted unexpectedly by Jonathan Drake. Drake, a celebrity-style billionaire, wants Joseph to lead an expedition on the greatest mountain, during the most dangerous season of the year, with almost no details about why the expedition is taking place. Drake reveals little other than a discovery has been made, a discovery of epic proportions! Joseph soon finds himself flanked by a world-class paleoanthropologist, a tough-as-nails game warden from Mozambique, and a team of expedition members, which Jonathan Drake has taken a spare at no expense to approach to their gear. Sherpas? Check. Security Team? Check. World-class scientists, trackers, and most importantly a guide? Check. A billionaire who can afford the best? Check. An insurmountable mountain that can kill you just by its sheer height? Check. Expedition Everest embarks on the greatest journey, the greatest adventure, with possibly the greatest treasure at stake in mankind's history.

Moisture Control Guidance for Building Design, Construction and Maintenance American Society of Heating, Refrigerating and Air-Conditioning Engineers, Ashrae, United States Environmental Protection Agency. 2016-06-21 Moisture control is fundamental to the proper functioning of any building. Controlling moisture is important to protect occupants from adverse health effects and to protect the building, its mechanical systems and its contents from physical or chemical damage. Yet, moisture problems are so common in buildings, many people consider them inevitable. Excessive moisture accumulation plagues buildings throughout the United States, from tropical Hawaii to arctic Alaska and from the hot, humid Gulf Coast to the hot, dry Sonoran Desert. Between 1994 and 1998, the U.S. Environmental Protection Agency (EPA) Building Assessment Survey and Evaluation (BASE) study collected information about the indoor air quality of 100 randomly selected public and private office buildings in the 10 U.S. climatic regions.

The Fingerprint U. S. Department Justice.2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Extreme Financial Risks and Asset Allocation Olivier Le Courtois,Christian Walter.2014-01-21 Each financial crisis calls for — by its novelty and the mechanisms it shares with preceding crises — appropriate means to analyze financial risks. In *Extreme Financial Risks and Asset Allocation*, the authors present in an accessible and timely manner the concepts, methods, and techniques that are essential for an understanding of these risks in an environment where asset prices are subject to sudden, rough, and unpredictable changes. These phenomena, mathematically known as “jumps”, play an important role in practice. Their quantitative treatment is generally tricky and is sparsely tackled in similar books. One of the main appeals of this book lies in its approachable and concise presentation of the ad hoc mathematical tools without sacrificing the necessary rigor and precision. This book contains theories and methods which are usually found in highly technical mathematics books or in scattered, often very recent, research articles. It is a remarkable pedagogical work that makes these difficult results accessible to a large readership. Researchers, Masters and PhD students, and financial engineers alike will find this book highly useful. Contents:IntroductionMarket FrameworkStatistical Description of MarketsLévy ProcessesStable Distributions and ProcessesLaplace Distributions and ProcessesThe Time Change FrameworkTail DistributionsRisk BudgetsThe Psychology of RiskMonoperiodic Portfolio ChoiceDynamic Portfolio ChoiceConclusion Readership: Researchers, graduate students and financial engineers in the field of mathematical and quantitative finance. Key Features:This book offers an excellent synthesis of the academic literature in a clear, ordered, and intuitive wayThe continuous-time theory of the choice of portfolio is exposed with particular care when asset dynamics are modeled with processes admitting a jump component. This is a technically difficult topic that is tackled here with a lot of clarityThe collated works in this book facilitates access to the most recent techniques, making it user-friendly for readersKeywords:Lévy Process;Extreme Risks;Risk Management;Portfolio Management;Asset AllocationReviews: “A pedagogical work of updated financial models using Lévy processes. Very well written, very well explained and argued with examples and appropriate simulations. Agile Processes in Software Engineering and Extreme Programming - Workshops Rashina Hoda.2019-08-30 This open access book constitutes the research workshops, doctoral symposium and panel summaries presented at the 20th International Conference on Agile Software Development, XP 2019, held in Montreal, QC, Canada, in May 2019. XP is the premier agile software development conference combining research and practice. It is a hybrid forum where agile researchers, academics, practitioners, thought leaders, coaches, and trainers get together to present and discuss their most recent innovations, research results, experiences, concerns, challenges, and trends. Following this history, for both researchers and seasoned practitioners XP 2019 provided an informal environment to network, share, and discover trends in Agile for the next 20 years. Research papers and talks submissions were invited for the three XP 2019 research workshops, namely, agile transformation, autonomous teams, and large scale agile. This book includes 15 related papers. In addition, a summary for each of the four panels at XP 2019 is included. The panels were on security and privacy; the impact of the agile manifesto on culture, education, and software practices; business agility - agile's next frontier; and Agile - the next 20 years.

Collins IGCSE Geography - Cambridge IGCSE Geography Student Book John Belfield.2012 Synopsis coming soon.....

Others Will Enter the Gates Abayomi Animashaun.2015 Literary Nonfiction. Essays. Poetry. Introduction by Kazim Ali. No two immigrant poets are the same. Even those from the same country don't necessarily answer to the same poetics or, for that matter, speak to the same concerns. How, then, do immigrant poets in America define themselves? How do they see and position themselves within the landscape of American poetry or the poetic traditions of their own country? Who might they consider their influences? Answers to these questions are complex, individual, and varied, as seen with the essays included in this anthology. Contributors: Zubair Ahmed, Kazim Ali, Abayomi Animashaun, Lisa Birman, Ewa Chrusciel, Kwame Dawes, Michael Dumanis, Megan Fernandes, Cristian Flores Garcia, Danielle Legros Georges, Rigoberto Gonzalez, Maria Victoria A. Grageda-Smith, Andrei Guriuanu, Piotr Gwiazda, Fady Joudah, Pauline Kaldas, Ilya Kaminsky, Vandana Khanna, Jee Leong Koh, Vasyl Makhno, Gerardo Pacheco Matus, David McLoughlin, Majid Naficy, Marilene Phipps-Kettlewell, Shabnam Piryaee, Barbara Jane Reyes, Jose Antonio Rodriguez, Matthew Shenoda, Sun Yung Shin, Anis Shivani, Ocean Vuong, and Sholeh Volpe. Nerval once said that you ought to travel so much that even your home becomes strange to you, but I have no hope other than the opposite that is to say: once you cross borders often enough you find really that every place must be somehow home. The poets collected here testify, both in these statements and in their own work, that such a home is possible. Kazim Ali, from the Introduction The range of voices and the experiences those voices represent in OTHERS WILL ENTER THE GATES: IMMIGRANT POETS ON POETRY, INFLUENCES, AND WRITING IN AMERICA provide the reader with an entrance into other worlds and other ways of seeing and walking in those worlds. Our notions of identity, of transition and transformation, of the translation of language and culture, of the very idea of documenting who or what a person fundamentally is, are called into question by these probing and provocative essays. This is a striking and essential collection, one in which the reader vicariously becomes an immigrant of sorts, allowed to pass over personal and national borders, ferried along by the beautiful and vital prose of some of the finest poets working in the U.S. today. Todd Davis OTHERS WILL ENTER THE GATES is a timely and necessary collection and to say that it is thought-provoking and versatile is an understatement. I urge everyone who cares about and loves the exiled and immigrant voices that constantly provide the new blood that keeps contemporary American Poetry lively and exciting to read and share this book, and to the teachers I say please don't miss out on this great opportunity to use this wonderful collection in your courses. Virgil Suarez Each time I open this book, each time I follow one of these fine poets through another gate in this country of a thousand gates, I feel like an immigrant again, realigned with my own Huguenot ancestors fleeing the religious tyrannies of France three centuries ago. To read these essays is to have your faith in the poetic future of this land restored, over and over again. David Shumate OTHERS WILL ENTER THE GATES is a multilayered exploration by writers of different generations and backgrounds that passionately offers an urgent and daring insight into America's ever-expanding literature on the immigrant experience... Dike Okoro The great irony and most fabulous beauty of this very real and readable collection of essays are testament to why poetry has lasted for tens of thousands of years. No matter one's circumstance, it's outlived everything every economic theory, every political ideology. Poetry exists because it is the language for which we have no language. What do we do when we can't explain profound and genuine grief? What do we do when we can't articulate profound and genuine joy? These poets, like all poets, make poems. Ralph Angel

Handbook of Research on Digital Violence and Discrimination Studies Özsungur, Fahri.2022-04-08 Digital violence continues to increase, especially during times of crisis. Racism, bullying, ageism, sexism, child pornography, cybercrime, and digital tracking raise critical social and digital security issues that have lasting effects. Digital violence can cause children to be dragged into crime, create social isolation for the elderly, generate inter-communal conflicts, and increase cyber warfare. A closer study of digital violence and its effects is necessary to develop lasting solutions. The Handbook of Research on Digital Violence and Discrimination Studies introduces the current best practices, laboratory methods, policies, and protocols surrounding international digital violence and discrimination. Covering a range of topics such as abuse and harassment, this major reference work is ideal for researchers, academicians, policymakers, practitioners, professionals, instructors, and students.

Hive Mind Garrett Jones.2015-11-11 Over the last few decades, economists and psychologists have quietly documented the many ways in which a person's IQ matters. But, research suggests that a nation's IQ matters so

much more. As Garrett Jones argues in *Hive Mind*, modest differences in national IQ can explain most cross-country inequalities. Whereas IQ scores do a moderately good job of predicting individual wages, information processing power, and brain size, a country's average score is a much stronger bellwether of its overall prosperity. Drawing on an expansive array of research from psychology, economics, management, and political science, Jones argues that intelligence and cognitive skill are significantly more important on a national level than on an individual one because they have positive spillovers. On average, people who do better on standardized tests are more patient, more cooperative, and have better memories. As a result, these qualities—and others necessary to take on the complexity of a modern economy—become more prevalent in a society as national test scores rise. What's more, when we are surrounded by slightly more patient, informed, and cooperative neighbors we take on these qualities a bit more ourselves. In other words, the worker bees in every nation create a hive mind with a power all its own. Once the hive is established, each individual has only a tiny impact on his or her own life. Jones makes the case that, through better nutrition and schooling, we can raise IQ, thereby fostering higher savings rates, more productive teams, and more effective bureaucracies. After demonstrating how test scores that matter little for individuals can mean a world of difference for nations, the book leaves readers with policy-oriented conclusions and hopeful speculation: Whether we lift up the bottom through changing the nature of work, institutional improvements, or freer immigration, it is possible that this period of massive global inequality will be a short season by the standards of human history if we raise our global IQ.

Extreme Origami Won Park.2012-10-15 Won Park has taken the ancient art of origami to a whole new level. Using American currency, Park transforms dollar bills into creative works of art. He relies on the fibrous quality of the paper to fold, bend and twist hundreds of times per model without tearing. With no cutting and no pasting, Park is able to incorporate the details on the bills into his model designs. His signature koi fish is folded in such a way that the patterns on the dollar bill become the scales on the fish, and even the facial features fall in exactly the right place. His designs include a wide array of vehicles, animals, and mythical creatures. In this book, step-by-step instructions are provided for 20 distinct models that are bound to challenge even the most proficient folders. The challenge includes a Formula 1 race car, a toilet, a butterfly, a koi fish, a scorpion, a sea turtle, a fox, an ox, a marlin, a car, a praying mantis, a dragon, a spider, a stag beetle, a stegosaurus, a bat, Pegasus, a fighter jet, a battle tank, and a pig. All models can be made with either one or two dollar bills. Why worry about the declining value of the U.S. dollar? Follow the instructions in this book, and you can transform your dollars into works of art!

Cambridge International AS & A Level Mathematics: Pure Mathematics 2 & 3 matches the corresponding units of the syllabus. It clearly indicates materials required for P3 study only, and contains materials on topics such as logarithmic and exponential functions, trigonometry, differentiation, integration, numerical solutions of equations, vectors and complex numbers. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Physics at a Glance Tim Mills.2008-10-30 This book aims to cover all the GCSE Physics material needed to meet the specifications of the examining boards Edexcel, AQA, WJEC and OCR (both 21st Century Science and Gateway) both for single and double awards. The content also covers the additional topics necessary for the Physics GCSE single award. It is the third book in the series following 'Biology at a Glance' and 'Chemistry at a Glance' and it encourages learners to use a mind mapping approach to revision. Just like the other books in the series, each page contains clear annotated illustrations that will help the reader to assimilate the facts quickly and commit them to memory. The book covers force and energy, energy and its transfer (including waves, electrical and thermal energy), electromagnetism and radioactivity. It goes on to describe a wide range of the practical applications of physics and concludes with material on our place in the universe. To comply with the latest GCSE specifications, 'How Science Works' permeates all aspects of the book which also provides questions on all the topics covered, to reinforce skills and understanding.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field, Vicente Barros, Thomas F. Stocker, Qin Dahe. 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
