**Reproductive Health in Developing Countries** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Reproductive Health. 1997-07-02 Sexually transmitted diseases, unintended pregnancies, infertility, and other reproductive problems are a growing concern around the world, especially in developing countries. *Reproductive Health in Developing Countries* describes the magnitude of these problems and what is known about the effectiveness of interventions in the following areas: Infection-free sex. Immediate priorities for combating sexually transmitted and reproductive tract diseases are identified. Intended pregnancies and births. The panel reports on the state of family planning and ways to provide services. Healthy pregnancy and delivery. The book explores the myths and substantive socio-economic problems that underlie maternal deaths. Healthy sexuality. Such issues as sexual violence and the practice of female genital mutilation are discussed in terms of the cultural contexts in which they occur. Addressing the design and delivery of reproductive health services, this volume presents lessons learned from past programs and offers principles for deciding how to spend limited available funds. *Reproductive Health in Developing Countries* will be of special interest to policymakers, health care professionals, and researchers working on reproductive issues in the developing world.

*Selected Practice Recommendations for Contraceptive Use* World Health Organization. Reproductive Health and Research, World Health Organization, World Health Organization. Family and Community Health. 2005 This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004.

*Family Planning in the Legacy of Islam* Abdel-Rahim Omran. 2012-09-10 How has the Islamic view of marriage, family formation and child rearing developed and adapted over the centuries? Is contraception just permitted or actively encouraged? The family is the basic social unit of Islamic society. Even without compelling population pressures, there has been concern with spacing and family planning. This book is the result of a massive research project, gathering fourteen centuries (the seventh to the twentieth) of views on family formation and planning, as expressed by leading Islamic theologians and jurists. The work has been discussed and shaped at each stage by a committee of Islamic experts representing the majority of the Muslim countries. The book provides a much needed source of reference and will be of equal value and interest to professionals in health care and development work and to those working in the academic disciplines of Middle East studies, religion and population studies.

**Medical Eligibility Criteria for Contraceptive Use** .2010 Medical Eligibility Criteria for Contraceptive Use reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic reviews of available clinical and epidemiological research. It is a companion guideline to *Selected Practice Recommendations for Contraceptive Use*. Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs in the preparation of service delivery guidelines. The fourth edition of this useful resource supersedes previous editions, and has been fully updated and expanded. It includes over 86 new recommendations and 165 updates to recommendations in the previous edition. Guidance for populations with special needs is now provided, and a new annex details evidence on drug interactions from concomitant use of antiretroviral therapies and hormonal contraceptives. To assist users familiar with the third edition, new and updated recommendations are highlighted. Everyone involved in providing family planning services and contraception should have the fourth edition of *Medical Eligibility Criteria for Contraceptive Use* at hand.

**Current Contraceptive Status Among Women Aged 15-44;: United States, 2011-2013** Kimberly Daniels. 2014

**Global and Regional Estimates of Violence Against Women** Claudia García-Moreno, World Health Organization, Christina Pallitto, Karen Devries, Heidi Stöckl, Charlotte Watts, Naeema Abrahams. 2013 World Health Organization, London School of Hygiene and Tropical Medicine, South African Medical Research Council--Title page.

**The Best Intentions** Institute of Medicine, Committee on Unintended Pregnancy. 1995-07-02 Experts estimate that nearly 60 percent of all U.S. pregnancies—and 81 percent of pregnancies among adolescents—are unintended. Yet the topic of preventing these unintended pregnancies has long been treated gingerly because of personal sensitivities and public controversies, especially the angry debate over abortion. Additionally, child welfare advocates long have overlooked the connection between pregnancy planning and the improved well-being of families and communities that results when children are wanted. Now, current issues—health care and welfare reform, and the new international focus on population—are drawing attention to the consequences of unintended pregnancy. In this climate *The Best Intentions* offers a timely exploration of family planning issues from a distinguished panel of experts. This committee sheds much-needed light on the questions and controversies surrounding unintended pregnancy. The book offers specific recommendations to put the United States on par with other developed nations in terms of contraceptive attitudes and policies, and it considers the effectiveness of over 20 pregnancy prevention programs. *The Best Intentions* explores problematic definitions—unintended versus unwanted versus mistimed—and presents data on pregnancy rates and trends. The book also summarizes the health and social consequences of unintended pregnancies, for both men and women, and for the children they bear. Why does unintended pregnancy occur? In discussions of reasons behind the rates, the book examines Americans' ambivalence about sexuality and the many other social, cultural, religious, and economic factors that affect our approach to contraception. The committee explores the complicated web of peer pressure, life aspirations, and notions of romance that shape an individual's decisions about sex, contraception, and pregnancy. And the book looks at such practical issues as the attitudes of doctors toward birth control and the place of contraception in both health insurance and managed care. *The Best Intentions* offers frank discussion, synthesis of data, and policy recommendations on one of today's most sensitive social topics. This book will be important to policymakers, health and social service personnel, foundation executives, opinion leaders, researchers, and concerned individuals.

**Factors Affecting Preferred Use of Modern Contraceptives** Suprich Sapkota, Munawar Hussain Soomro. 2015-01-16 Improving reproductive health is central to achieving Millennium Development Goals on improving maternal health and reducing child mortality. This requires access of the women to safe and effective methods of fertility control. The promotion of family planning strategies are required, so that women can avoid unwanted pregnancies. A qualitative study was conducted in the District Dang, Nepal to identify various factors that affect the preferred use of modern contraceptives. Knowledge about contraceptives, educational status of married women, number of children and fear of side effects were the most common factors we observed.

**Family Planning and Reproductive Health** Zouhair Amarin, Hassan Abduljabbar. 2020-12-02 Female reproductive topics are very common and can affect the patient's quality of life. Such topics include puberty, endometriosis, breastfeeding, subfertility, menstrual problems, polycystic ovary syndrome, problems during pregnancy, uterine fibroids, various benign and malignant conditions of the reproductive organs, various sexually transmitted infections, family planning, and contraception. Good reproductive health covers the physical, mental, and social well-being. However, to

maintain it, women need to be informed and empowered to protect themselves through access to services that can help them have a fit pregnancy, safe delivery, and healthy baby. This book is intended to cover some of the female reproductive issues for all specialties involved in health care for women.

**Women and Sustainable Human Development** Maty Konte, Nyasha Tirivayi. 2019-06-29 This book adds significantly to the discourse surrounding the progress made in empowering women in Africa over the last decade, providing strong research evidence on diverse and timely gender issues in varied African countries. Topics covered include climate change and environmental degradation, agriculture and land rights, access to – and quality of – education, maternal and reproductive health, unpaid care and women’s labor market participation, financial inclusion and women’s political participation. Cross cutting issues such as migration, masculinities and social norms are also addressed in this volume, which is aimed at policy makers, academics, and indeed anyone else interested in the UN Sustainable Development Goal of the empowerment of women and girls.

**Covert Contraceptive Use** Ann E. Biddlecom. 1998

**Ensuring Human Rights in the Provision of Contraceptive Information and Services** Maria Isabel Rodriguez, Eszter Kismodi, Jane Cottingham, World Health Organization. Reproductive Health and Research. 2014 These WHO guidelines provide recommendations for programmes as to how they can ensure that human rights are respected, protected and fulfilled, while services are scaled up to reduce unmet need for contraception. Both health data and international human rights laws and treaties were incorporated into the guidance. This guidance is complementary to existing WHO recommendations for sexual and reproductive health programmes, including guidance on family planning, maternal and newborn health, safe abortion, and core competencies for primary health care.

**New Frontiers in Contraceptive Research** Institute of Medicine, Board on Health Sciences Policy, Committee on New Frontiers in Contraceptive Research. 2004-04-12 More than a quarter of pregnancies worldwide are unintended. Between 1995 and 2000, nearly 700,000 women died and many more experienced illness, injury, and disability as a result of unintended pregnancy. Children born from unplanned conception are at greater risk of low birth weight, of being abused, and of not receiving sufficient resources for healthy development. A wider range of contraceptive options is needed to address the changing needs of the populations of the world across the reproductive life cycle, but this unmet need has not been a major priority of the research community and pharmaceutical industry. *New Frontiers in Contraceptive Research: A Blueprint for Action*, a new report from the Institute of Medicine of the National Academies, identifies priority areas for research to develop new contraceptives. The report highlights new technologies and approaches to biomedical research, including genomics and proteomics, which hold particular promise for developing new products. It also identifies impediments to drug development that must be addressed. Research sponsors, both public and private, will find topics of interest among the recommendations, which are diverse but interconnected and important for improving the range of contraceptive products, their efficacy, and their acceptability.

**Contraception and Adolescents** Robert T. Brown, Paula K. Braverman. 2005 This issue will provide an update on contraception for adolescents. The content will include an overview of contraceptive practices among adolescents with specific articles on hormonal and nonhormonal methods including barrier contraceptives, emergency contraception and the IUD. One article will address contraceptive issues for teens in the developing world. The issue will also include a review of the noncontraceptive benefits of hormonal methods and potential interactions with other medications including herbal products. Specific concerns for teens with chronic illnesses and disabilities will be discussed along with new contraceptive methods under development.

*Nigeria Demographic and Health Survey*. 2008

*Contraceptive Methods Women Have Ever Used: United States, 1982-2010* Kimberly Daniels, Jo Jones (Ph. D.). 2013

**International technical guidance on sexuality education** UNESCO, UNAIDS, UNFPA, UNICEF, UN Women, WHO. 2018-01-15

**Consolidated Guideline on Sexual and Reproductive Health and Rights of Women Living with HIV** World Health Organization. 2017-02-20 The starting point for this guideline is the point at which a woman has learnt that she is living with HIV and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities as well as from the health-care institutions where they seek care particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan, develop and monitor programmes and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

*Factors Influencing Family Planning Uptake Among Women Aged 18-49 Years in the Moyo District, Uganda* Mercy Masudio. 2022-11-13 Bachelor Thesis from the year 2022 in the subject Health - Public Health, grade: 1, language: English, abstract: The major purpose of the study was to determine prevalence and factors influencing family planning uptake in Moyo Sub-County, Moyo District. A cross-sectional study was carried out among women aged 18-49 years. The study employed structured questionnaire and KII to collect the data. The data will be analyzed using SPSS version 23 and thematic content analysis for quantitative and qualitative data, respectively. Sub-Saharan Africa continues to have the highest fertility rate due to low contraceptive uptake compared to other regions. Uganda continues to present an undesirable fertility rate of 4.96 births per woman and maternal mortality ratios of 336 maternal deaths per 100,000 live births that are associated with contraceptive non-use. The high fertility rates have contributed to a population growth rate of 3.02%. Moyo has an estimated contraceptive prevalence rate of 22%, uptake rate of 16% and an unmet need for family planning at 21.9%.

**A New Era in Global Health** William Rosa, MS, RN, AGPCNP-BC, ACHPN, FCCM, Caritas Coach. 2017-06-26 Explores the great potential for nursing involvement in promoting global health. This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses’ contributions in furthering the Post-2015 Agenda of the United Nations regarding global health infrastructures, and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide. While past nursing literature has emphasized nursing’s potential involvement and influence in the global arena, this is the first book to identify, validate, and promote nurses’ proactive and multidimensional work in furthering current transnational goals for advancing health on a global scale. The book includes an introduction to global health, clarification of terms and roles, perspectives on education, research, and theory related to global nursing, a history of the partnership between the United Nations and the nursing profession, an in-depth exploration of the 17 SDGs and relevant nursing tasks, as well as several chapters on creating a vision for 2030 and beyond. It is based on recent and emerging developments in the transnational nursing community, and establishes, through the writings of esteemed global health and nursing scholars, a holistic dialogue about opportunities for nurses to expand their roles as change agents and leaders in the cross-cultural and global context. The personal reflections of contributors animate such topics as global health ethics, the role of caring in a sustainable world, creating a shared humanity, cultural humility, and many others. Key Features: Examines, for the first time, nursing’s role in each of the 17 SDGs Integrates international initiatives delineating nursing’s role in the future of global health Creates opportunities for nurses to redefine their contributions to global health Includes personal reflections to broaden perspectives and invite transnational approaches to professional development Distills short, practical, and evidence-based

chapters describing global opportunities for nurses in practice, education, and research

*Disease Control Priorities in Developing Countries* Dean T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove. 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

*The Ecology Of Health And Disease In Ethiopia* Helmut Kloos, Zein Ahmed Zein. 2019-07-11 This book examines prevailing human health problems in political, socioeconomic, cultural, and physical/biotic settings of health practitioners and planners in Ethiopia. It also evaluates modern and traditional health resources and examines the occurrence of nonvector-borne communicable diseases.

**Family Planning and the 2030 Agenda for Sustainable Development (Data Booklet)** United Nations Publications. 2019-10-31 This booklet is based on the Estimates and Projections of Family Planning Indicators 2019, which includes estimates at the global, regional and country level of contraceptive prevalence, unmet need for family planning and SDG indicator 3.7.1 Proportion of women who have their need for family planning satisfied by modern methods.

*Clinical Practice Handbook for Safe Abortion* World Health Organization. 2014 The Clinical practice handbook for safe abortion care is intended to facilitate the practical application of the clinical recommendations from the second edition of Safe abortion: technical and policy guidance for health systems (World Health Organization [WHO] 2012). While legal, regulatory, policy and service-delivery contexts may vary from country to country, the recommendations and best practices described in both of these documents aim to enable evidence-based decision-making with respect to safe abortion care.

*Comparative Quantification of Health Risks: Sexual and reproductive health* Majid Ezzati. 2004 Provides a comprehensive assessment of the scientific evidence on prevalence and the resulting health effects of a range of exposures that are known to be hazardous to human health, including childhood and maternal undernutrition, nutritional and physiological risk factors for adult health, addictive substances, sexual and reproductive health risks, and risks in the physical environments of households and communities, as well as among workers. This book is the culmination of over four years of scientific enquiry and data collection, known as the comparative risk assessment (CRA) project.

**The Contraceptive Revolution** Charles F. Westoff, Norman B. Ryder. 2015-03-08 Here is the full report of the 1970 National Fertility Study, a national sample survey for which thousands of women were interviewed who had been married at some time and were of reproductive age when they were interviewed. The book assesses the growth in the use of the pill and the IUD, the increasing reliance on contraceptive sterilization, and both the intended and the unwanted fertility of American women. The volume opens with an introduction to the survey and its methods. Contraceptive practice in 1970 is then compared with data for 1965, and an analysis is supplied of trends since 1955 in the attitudes of Roman Catholics. Originally published in 1977. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*Contraceptive Research and Development* Institute of Medicine, Committee on Contraceptive Research and Development. 1996-11-04 The contraceptive revolution of the 1960s and 1970s introduced totally new contraceptive options and launched an era of research and product development. Yet by the late 1980s, conditions had changed and improvements in contraceptive products, while very important in relation to improved oral contraceptives, IUDs, implants, and injectables, had become primarily incremental. Is it time for a second contraceptive revolution and how might it happen? Contraceptive Research and Development explores the frontiers of science where the contraceptives of the future are likely to be found and lays out criteria for deciding where to make the next R&D investments. The book comprehensively examines today's contraceptive needs, identifies niches in those needs that seem most readily translatable into market terms, and scrutinizes issues that shape the market: method side effects and contraceptive failure, the challenge of HIV/AIDS and other sexually transmitted diseases, and the implications of the women's agenda. Contraceptive Research and Development analyzes the response of the pharmaceutical industry to current dynamics in regulation, liability, public opinion, and the economics of the health sector and offers an integrated set of recommendations for public- and private-sector action to meet a whole new generation of demand.

*Clinic-based Family Planning and Reproductive Health Services in Africa* Kate Miller. 1998

**Contraception and Reproduction** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population. 1989-02-01 This book examines how changes in reproductive patterns (such as the number and timing of births and spacing between births) have affected the health of women and children in the developing world. It reviews the relationships between contraceptive use, reproductive patterns, and health; the effects of differences and changes in reproductive patterns; as well as the role of family planning in women's fertility and health.

**Contraceptive Use by Method 2019** United Nations. 2020-01-10 This data booklet highlights estimates of the prevalence of individual contraceptive methods based on the World Contraceptive Use 2019 (which draws from 1,247 surveys for 195 countries or areas of the world) and additional tabulations obtained from microdata sets and survey reports. The estimates are presented for female and male sterilisation, intrauterine device (IUD), implant, injectable, pill, male condom, withdrawal, rhythm and other methods combined.

**World Fertility and Family Planning 2020: Highlights** United Nations. 2021-01-06 The main contents are key findings and messages regarding the relationship between contraceptive use and fertility, for 195 countries or areas of the world. These highlights will draw mainly from World Population Prospects 2019, and model-based estimates and projections of family planning indicators 2019. Policy-related implications of and responses to trends in family planning and fertility will be integrated throughout the text. In particular, these issues are of relevance for contextualizing Sustainable Development Goals 3.7.1. and 3.7.2. and the achievement of the 2030 Agenda.

Each book has a full description and a direct link to Amazon for the download. DailyCheapReads.com has daily posts on the latest Kindle book deals available for download at Amazon, and will sometimes post free books. Bootastik's free Kindle books have links to where you can download them, like on Amazon, iTunes, Barnes & Noble, etc., as well as a full description of the book. BookGoodies has lots of fiction and non-fiction Kindle books in a variety of genres, like Paranormal, Women's Fiction, Humor, and Travel, that are completely free to download from Amazon. After you register at Book Lending (which is free) you'll have the ability to borrow books that other individuals are loaning or to loan one of your Kindle books. You can search through the titles, browse through the list of recently loaned books, and find eBook by genre. Kindle books can only be loaned once, so if you see a title you want, get it before it's gone. Monthly "all you can eat" subscription services are now mainstream for music, movies, and TV. Will they be as popular for e-books as well? Librivox.org is a dream come true for audiobook lovers. All the books here are absolutely free, which is good news for those of us who have had to pony up ridiculously high fees for substandard audiobooks. Librivox has many volunteers that work to release quality recordings of classic books, all free for anyone to download. If you've been looking for a great place to find free audio books, Librivox is a good place to start.
