Post Memes Daniel Bristow, Alfie Bown. 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, lolololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. *POST MEMES: SEIZING THE MEMES OF PRODUCTION* takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). Children's Spaces Mark Dudek. 2012-05-04 This collection of essays is concerned with the experiences children have within the supervised worlds they inhabit, as well as with architecture and landscape architecture. International examples of innovative childcare practice are illustrated together with the design processes which informed their development. The emphasis here is on new and experimental childcare projects which set-out to reassert the rights of children to participate in a complex multi-faceted world, which is no longer available to them, unless under adult supervision. Research supports in depth recommendations regarding the ideal children's environment, across a range of contexts and dimensions. Until recent times, the needs of children within the urban environment were largely ignored. There is little tradition and no broadly agreed contemporary architectural or landscape theory as to how children should be provided for, beyond a limited functional agenda. There is a sense that architecture

for childhood is not taken seriously; it is either whimsical and ephemeral or largely designed for adults, an adjunct to the more important business of adult needs and aspirations. Yet children access much of their education and development through play and social interaction with their childhood counterparts. The spaces in and around childrens daycare centres, schools, supervised parks and other dedicated childrens environments are the subject of this collection. As more and more purpose designed buildings and gardens for children are opened, the need to listen to children and their carers is becoming more aparant. Mark Dudek gathers together a number of internationally recognized experts in the field of childcare environments to write about different aspects of the landscape. They have been chosen in particular because of their background in enquiring, research orientated work, both theoretical and practical. They listen to and watch children. Contributors have considered the childs environment as one which is secure and controlled yet offers additional environmental dimensions which extend developmental possibilities. Children often spend a great deal of time in daycare facilties and schools, as parents are absorbed in their own work and leisure activities. This places an emphasis on architects and planners to consider the needs of children in great detail. As such, the childrens environment must be conceived of as a rich, complex place; a world within a world. We use the word LANDSCAPE in recognition that children do not differentiate between the inside and the outside, private and public; every part of their perception is open to stimulation by a stimulating environment.

The Simpsons and Philosophy William Irwin, Mark T. Conard. 2001-02-01 This unconventional and lighthearted introduction to the ideas of the major Western philosophers examines The Simpsons — TV's favorite animated family. The authors look beyond the jokes, the crudeness, the attacks on society — and see a clever display of irony, social criticism, and philosophical thought. The writers begin with an examination of the characters. Does Homer actually display Aristotle's virtues of character? In what way does Bart exemplify American pragmatism? The book also examines the ethics and themes of the show, and concludes with discussions of how the series reflects the work of Aristotle, Marx, Camus, Sartre, and other thinkers.

Picture-Book Professors Melissa M. Terras. 2018-10-04 How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children. Professors are overwhelmingly white and male, tending to be elderly scientists who fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. The Element is also available, with additional material, as Open Access.
