Scaling and Uncertainty Analysis in Ecology Jianguo Wu, K. Bruce Jones, Harbin Li, Orië L. Loucks. 2006-07-02 This is the first book of its kind - explicitly considering uncertainty and error analysis as an integral part of scaling. The book draws together a series of important case studies to provide a comprehensive review and synthesis of the most recent concepts, theories and methods in scaling and uncertainty analysis. It includes case studies illustrating how scaling and uncertainty analysis are being conducted in ecology and environmental science.

Mathematics, Education and History Kathleen M. Clark, Tinne Hoff Kjeldsen, Sebastian Schorcht, Constantinos Tzanakis. 2018-03-30 This book includes 18 peer-reviewed papers from nine countries, originally presented in a shorter form at TSG 25 The Role of History of Mathematics in Mathematics Education, as part of ICME-13 during. It also features an introductory chapter, by its co-editors, on the structure and main points of the book with an outline of recent developments in exploring the role of history and epistemology in mathematics education. It serves as a valuable contribution in this domain, by making reports on recent developments in this field available to the international educational community, with a special focus on relevant research results since 2000. The 18 chapters of the book are divided into five interrelated parts that underlie the central issues of research in this domain: 1. Theoretical and conceptual frameworks for integrating history and epistemology in mathematics in mathematics education; 2. Courses and didactical material: Design, implementation and evaluation; 3. Empirical investigations on implementing history and epistemology in mathematics education; 4. Original historical sources in teaching and learning of and about mathematics; 5. History and epistemology of mathematics: Interdisciplinary teaching and sociocultural aspects. This book covers all levels of education, from primary school to tertiary education, with a particular focus on teacher education. Additionally, each chapter refers to and/or is based on empirical research, in order to support, illuminate, clarify and evaluate key issues, main questions, and conjectured theses raised by the authors or in the literature on the basis of historical-epistemological or didactical-cognitive arguments.

The Semantic Sphere 1 Pierre Lévy. 2013-01-22 The new digital media offers us an unprecedented memory capacity, an ubiquitous communication channel and a growing computing power. How can we exploit this medium to augment our personal and social cognitive processes at the service of human development? Combining a deep knowledge of humanities and social sciences as well as areal familiarity with computer science issues, this book explains the collaborative construction of a global hypercortex coordinated by a computable metalanguage. By recognizing fully the symbolic and social nature of human cognition, we could transform our current opaque global brain into a reflexive collective intelligence.

Syntax-Based Collocation Extraction Violeta Seretan. 2011-01-04 Syntax-Based Collocation Extraction is the first book to offer a comprehensive, up-to-date review of the theoretical and applied work on word collocations. Backed by solid theoretical results, the computational experiments described based on data in four languages provide support for the book's basic argument for using syntax-driven extraction as an alternative to the current cooccurrence-based extraction techniques to efficiently extract collocational data. The work described in Syntax-Based Collocation Extraction focuses on using linguistic tools for corpus-based identification of collocations. It takes advantage of recent advances in parsing to propose a novel deep syntactic analytic collocation extraction that has applicability to a range of important core tasks in Computational Linguistics. The book is useful

for anyone interested in computational analysis of texts, collocation phenomena, and multi-word expressions in general.

Adoration and Glory Emma C. Bunker, Douglas Latchford. 2004 Adoration and Glory is a celebration of centuries of artistic achievements of the Khmer peoples, a civilization nearly forgotten. The Khmer empire created one of the world's most glorious traditions of sculpture and architecture, inspired and influenced by the spiritual and in particular the Tantric, Hindu and Buddhist cultures and religions of India. The domains of the Khmer grew from a collection of small kingdoms to an empire that encompassed much of present day Cambodia, Thailand, Laos and Vietnam. Due to Cambodia's more recent historic past, decades of political turbulence and isolation the public hardly got a chance to admire the magnificent artistic creations of this nearly forgotten culture. For the first time now this book offers a comprehensive overview of the outstanding capabilities and craftsmanship of ancient Khmer artists. Many important pieces in stone, bronze, silver and gold are published here for the very first time. As the book brings together the wealth of the Khmer culture, the authors were able to gain access to private as well as public collections worldwide to give unparalleled access to more than 150 objects. With the inclusion of Tantric Hindu and Buddhist images never seen in public and new technical research into manufacturing techniques by leading museum scientist Dr Pieter Meyers, the publication suggests many fresh interpretations of Khmer art and culture particularly at a time when the authenticity of newly excavated material is often in question. From the beginning, the book gained the support of HRH Princess Norodom Buppha Devi, Minister of Culture and Fine Arts, Kingdom of Cambodia as well as the Directors and teams at the National Museum of Cambodia. Both accessible and scholarly, this book represents an important resource for connoisseurs and aficionados of art, art historians, collectors and all those interested in the cultures of South East Asia. It contributes to a new and deeper understanding of Khmer art, and encourages further research and worldwide interest in helping Cambodia to protect and celebrate its rich artistic past. - Description by Crunruh Books.

Pillaging Cambodia Masha Lafont. 2015-02-13 The illicit traffic of art is an important problem that affects modern life all over the world. This work addresses the issue using the showcase of Cambodia, where looters systematically destroy cultural heritage. Beginning with an overview of Cambodian history and culture, it explores every aspect of the illicit traffic of Cambodian art. It analyzes the history, size, and structure of art trafficking in Cambodia, its growth and profit margins, and the participants and international crime syndicate involved. It also describes the "demand" side of the story: antique dealers, collectors, auction houses, and museums. The work deals with the impact of the illicit trafficking on the legal, political, and economic systems of Cambodia, as well as its effect on archeological, historical, and religious values and the cultural identity of the nation. The work also analyzes the current long-term and short-term policies proposed by the Cambodian government and suggests policy alternatives that may be implemented by the Cambodian authorities. An appendix includes the description of all cases of the restitution of objects of Khmer art.

Women Reinventing Globalisation Caroline Sweetman, Joanna Kerr. 2003 This volume analyses approaches to economic and political change and propose ways of ensuring that ideas are translated into concrete actions. The aim is to re-politicise the gender and development community with a solutions-oriented approach which looks at globalisation through women's eyes, and finds energising ideas.

Khmer Bronzes Emma C. Bunker, Douglas Latchford. 2011 A range of sacred Khmer bronze images appeared during the third quarter of the first millennium CE unlike anything previously produced in the Kingdom of Cambodia. This cultural explosion developed during an elegant and glittering period of commerce and diplomacy in a Southeast Asian world related economically by trade and spiritually by faith. In *Khmer Bronzes: New Interpretations of the Past*, the authors explore this flowering of Khmer sacred art.--Publisher's description.

Building New Bridges - Bâtir de nouveaux ponts Jeff Keshen, Sylvie Perrier.2005-06-30 Questions of methodology and the use of sources are fundamental to all academic disciplines. In recent years, this topic has become far more challenging as scholars are increasingly adopting an interdisciplinary approach to achieve richer and deeper analyses, particularly in the humanities and social sciences. *Building New Bridges / Bâtir de nouveaux ponts* is a collection of scholarly papers that deals with the first principles of source identification and their effective utilization. The contributors to the volume come from a wide range of disciplines and represent both French and English Canada. Together, they explore and encourage the interdisciplinarity trend - around which considerable academic trepidation remains - and seek to explain, for example, how historians and those in English or *Lettres françaises* analyze texts, how scholars approach paintings, photography, and film, and how the study of music relates tempo and lyrics to wider societal trends. They utilize their respective research to elucidate means of effectively employing evidences and methods to achieve richer, deeper, and more nuanced results. As a whole, the collection provides an excellent primer for scholars of methodology.

Empirical Methods for Exploiting Parallel Texts I. Dan Melamed.2001 This book lays out the theory and the practical techniques for discovering and applying translational equivalence at the lexical level. Parallel texts (bitexts) are a goldmine of linguistic knowledge, because the translation of a text into another language can be viewed as a detailed annotation of what that text means. Knowledge about translational equivalence, which can be gleaned from bitexts, is of central importance for applications such as manual and machine translation, cross-language information retrieval, and corpus linguistics. The availability of bitexts has increased dramatically since the advent of the Web, making their study an exciting new area of research in natural language processing. This book lays out the theory and the practical techniques for discovering and applying translational equivalence at the lexical level. It is a start-to-finish guide to designing and evaluating many translingual applications.

Achtung-Panzer! Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The In-Between World of Vikram Lall M.G. Vassanji.2009-02-24 Giller Prize-winner M.G. Vassanji's *The In-Between World of Vikram Lall* is a haunting novel of corruption and regret that brings to life the complexity and turbulence of Kenyan society in the last five decades. Rich in sensuous detail and historical insight, this is a powerful story of passionate betrayals and political violence, racial tension and the strictures of tradition, told in elegant, assured prose. The novel begins in 1953, with eight-year-old Vikram Lall a witness to the celebrations around the coronation of Queen Elizabeth II, just as the Mau Mau guerilla war for independence from Britain begins to gain strength. In a land torn apart by idealism, doubt, political upheaval and terrible acts of violence, Vic and his sister Deepa must find their place among a new generation. Neither colonists nor African, neither white nor black, the Indian brother and sister find themselves somewhere in between in their band of playmates: Bill and Annie, British children, and Njoroge, an African boy. These are the relationships that will shape the rest of their lives. We follow Vikram through the changes in East African

society, the immense promise of the fifties and sixties. But when that hope is betrayed by the corruption and violence of the following decades, Vic is drawn into the Kenyatta government's orbit of graft and power-broking. Njoroge, his childhood friend, can abandon neither the idealism of his youth nor his love for Vic's sister Deepa. But neither the idealism of the one nor the passive cynicism of the other can avert the tragedies that await them. The In-Between World of Vikram Lall is a profound and careful examination of one man's search for his place in the world, with themes that have run through Vassanji's work: the nature of community in a volatile society, the relations between colony and colonizer, and the inescapable presence of the past. It is also, finally, a deeply personal book speaking to the people who are in the in-between.

Age at Marriage, Age at First Birth, and Fertility in Africa Charles F. Westoff.1992 This report derives estimates from national sample surveys conducted in Africa over the past dozen years of the trends in age at first marriage and at first birth. By splicing together cohorts from the earlier World Fertility Survey and the more recent Demographic and Health Surveys, a pattern of rapidly increasing age at marriage and at first birth is depicted for some African countries, while for some others there is evidence of the beginnings of such change. The demographic significance of such changes is explained, and a model of fertility is constructed in which the role of these variables in the association between socioeconomic background factors and reproductive intentions and contraceptive prevalence is described. The units of observation are the provinces or regions of the countries based on a special data bank created for these analyses. The importance of women's education is highlighted, and the trends in educational achievement are reconstructed from these surveys over a 40-year span. The report concludes with some population policy reflections and emphasizes the potential importance of delaying the first birth by increasing the age at marriage. Population policies aimed at reducing fertility should certainly include efforts to raise the age at marriage.

Angkor Claude Jacques.1997 This pictorial record celebrates the cities and temples of Angkor in Southeast Asia. Ever since explorer and naturalist Henri Mouhot rediscovered the centre of Khmer civilization in Cambodia over a hundred years ago, the buildings, which date from the 9th to the 13th century, have become a source of great interest.

Context in Literary and Cultural Studies Jakob Ladegaard, Jakob Gaardbo Nielsen.2019-06-24 Context in Literary and Cultural Studies is an interdisciplinary volume that deals with the challenges of studying works of art and literature in their historical context today. The relationship between artworks and context has long been a central concern for aesthetic and cultural disciplines, and the question of context has been asked anew in all eras. Developments in contemporary culture and technology, as well as new theoretical and methodological orientations in the humanities, once again prompt us to rethink context in literary and cultural studies. This volume takes up that challenge. Introducing readers to new developments in literary and cultural theory, Context in Literary and Cultural Studies connects all disciplines related to these areas to provide an interdisciplinary overview of the challenges different scholarly fields today meet in their studies of artworks in context. Spanning a number of countries, and covering subjects from nineteenth-century novels to rave culture, the chapters together constitute an informed, diverse and wide-ranging discussion. The volume is written for scholarly readers at all levels in the fields of Literary Studies, Comparative Literature, Cultural Studies, Art History, Film, Theatre Studies and Digital Humanities.

World Heritage Angkor and Beyond Brigitta Hauser-Schäublin.2011 Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access

and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other. Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor--

Free Verse Charles O. Hartman. 2014-07-14 To make sense of free verse in theory or in practice, the whole study of prosody--the function of rhythm in poetry--must be revised and rethought. Stating this as the issue that poets and critics have faced in the past century, Charles Hartman takes up the challenge and develops a theory of prosody that includes the most characteristic forms of twentieth-century poetry. The Semantics of Relationships R. Green, C.A. Bean, Sung Hyon Myaeng. 2013-04-18 The genesis of this volume was the participation of the editors in an ACMISIGIR (Association for Computing Machinery/Special Interest Group on Information Retrieval) workshop entitled Beyond Word Relations (Hetzler, 1997). This workshop examined a number of relationship types with significance for information retrieval beyond the conventional topic-matching relationship. From this shared participation came the idea for an edited volume on relationships, with chapters to be solicited from researchers and practitioners throughout the world. Ultimately, one volume became two volumes. The first volume, *Relationships in the Organization of Knowledge* (Bean & Green, 2001), examines the role of relationships in knowledge organization theory and practice, with emphasis given to thesaural relationships and integration across systems, languages, cultures, and disciplines. This second volume examines relationships in a broader

array of contexts. The two volumes should be seen as companions, each informing the other. As with the companion volume, we are especially grateful to the authors who willingly accepted challenges of space and time to produce chapters that summarize extensive bodies of research. The value of the volume clearly resides in the quality of the individual chapters. In naming this volume *The Semantics of Relationships: An Interdisciplinary Perspective*, we wanted to highlight the fact that relationships are not just empty connectives. Relationships constitute important conceptual units and make significant contributions to meaning.

The Work of Revision Hannah Sullivan.2013-01-01 Revision might seem to be an intrinsic part of good writing. But Hannah Sullivan argues that we inherit our faith in the virtues of redrafting from early-twentieth-century modernism. Closely examining changes made in manuscripts, typescripts, and proofs by T. S. Eliot, Ezra Pound, Ernest Hemingway, James Joyce, Virginia Woolf, and others, she shows how modernist approaches to rewriting shaped literary style, and how the impulse to touch up, alter, and correct can sometimes go too far. In the nineteenth century, revision was thought to mar a composition's originality—a prejudice cultivated especially by the Romantics, who believed writing should be spontaneous and organic, and that rewriting indicated a failure of inspiration. Rejecting such views, avant-garde writers of the twentieth century devoted themselves to laborious acts of rewriting, both before and after publishing their work. The great pains undertaken in revision became a badge of honor for writers anxious to justify the value and difficulty of their work. In turn, many of the distinctive effects of modernist style—ellipsis, fragmentation, parataxis—were produced by zealous, experimental acts of excision and addition. The early twentieth century also saw the advent of the typewriter. It proved the ideal tool for extensive, multi-stage revisions—superior even to the word processor in fostering self-scrutiny and rereading across multiple drafts. Tracing how master stylists from Henry James to Allen Ginsberg have approached their craft, *The Work of Revision* reveals how techniques developed in the service of avant-garde experiment have become compositional orthodoxy.

Formalizing Natural Languages Max Silberztein.2016-02-08 This book is at the very heart of linguistics. It provides the theoretical and methodological framework needed to create a successful linguistic project. Potential applications of descriptive linguistics include spell-checkers, intelligent search engines, information extractors and annotators, automatic summary producers, automatic translators, and more. These applications have considerable economic potential, and it is therefore important for linguists to make use of these technologies and to be able to contribute to them. The author provides linguists with tools to help them formalize natural languages and aid in the building of software able to automatically process texts written in natural language (Natural Language Processing, or NLP). Computers are a vital tool for this, as characterizing a phenomenon using mathematical rules leads to its formalization. NooJ - a linguistic development environment software developed by the author - is described and practically applied to examples of NLP.

Yeats's Legacies Warwick Gould.2020-10-09 The two great Yeats Family Sales of 2017 and the legacy of the Yeats family's 80-year tradition of generosity to Ireland's great cultural institutions provide the kaleidoscope through which these advanced research essays find their theme. Hannah

Sullivan's brilliant history of Yeats's versecraft challenges Poundian definitions of Modernism; Denis Donoghue offers unique family memories of 1916 whilst tracing the political significance of the Easter Rising; Anita Feldman addresses Yeats's responses to the Rising's appropriation of his symbols and myths, the daring artistry of his ritual drama developed from Noh, his poetry of personal utterance, and his vision of art as a body reborn rather than a treasure preserved amid the testing of the illusions that hold civilizations together in ensuing wars. Warwick Gould looks at Yeats as founding Senator in the new Free State, and his valiant struggle against the literary censorship law of 1929 (with its present-day legacy of Irish anti-blasphemy law still presenting a constitutional challenge). Drawing on Gregory Estate documents, James Pethica looks at the evictions which preceded Yeats's purchase of Thoor Ballylee in Galway; Lauren Arrington looks back at Yeats, Ezra Pound, and the Ghosts of The Winding Stair (1929) in Rapallo. Having co-edited both versions of *A Vision*, Catherine Paul offers some profound reflections on 'Yeats and Belief'. Grevel Lindop provides a pioneering view of Yeats's impact on English mystical verse and on Charles Williams who, while at Oxford University Press, helped publish the Oxford Book of Modern Verse. Stanley van der Ziel looks at the presence of Shakespeare in Yeats's Purgatory. William H. O'Donnell examines the vexed textual legacy of his late work, *On the Boiler* while Gould considers the challenge Yeats's intentionalism posed for once-fashionable post-structuralist editorial theory. John Kelly recovers a startling autobiographical short story by Maud Gonne. While nine works of current biographical, textual and literary scholarship are reviewed, Maud Gonne is the focus of debate for two reviewers, as are Eva Gore-Booth, Constance and Casimir Markievicz, Rudyard Kipling, David Jones, T. S. Eliot and his presence on the radio. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use.
