The Experience of Language Teaching Rose Senior. 2006-02-23 Through the words of more than 100 practising language teachers, *The Experience of Language Teaching* provides a detailed picture of teaching and learning in communicative classrooms. Using a teacher-generated framework it covers a range of aspects of classroom life: how teachers create environments suitable for language practice, how they get students 'on-side', how they manage tricky students, how they enhance the learning experience, how they develop and maintain a spirit of community. The book demonstrates how paying attention to both the learning and social needs of their class groups enables language teachers to behave in flexible ways that promote learning. This book will be of interest to teachers, teacher educators, researchers and to anyone interested in finding out what it is like to be a language teacher at the present time. *The Experience of Language Teaching* was winner of the Ben Warren International Trust House Prize in 2005.

Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas Chevalier. 2016-04-01 Executive function refers to the goal-oriented regulation of one's own thoughts, actions, and emotions. Its importance is attested by its contribution to the development of other cognitive skills (e.g., theory of mind), social abilities (e.g., peer interactions), and academic achievement (e.g., mathematics), and by the consequences of deficits in executive function (which are observed in wide range of developmental disorders, such as attention-deficit hyperactivity disorder and autism). Over the last decade, there have been growing interest in the development of executive function, and an expanding body of research has shown that executive function develops rapidly during the preschool years, with adult-level performance being achieved during adolescence or later. This recent work, together with experimental research showing the effects of interventions targeting executive function, has yielded important insights into the neurocognitive processes underlying executive function. Given the complexity of the construct of executive function, however, and the multiplicity of underlying processes, there are often inconsistencies in the way that executive function is defined and studied. This inconsistency has hampered communication among researchers from various fields. This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function. Researchers using various methods, including, behavioral experiments, neuroimaging, eye-tracking, computer simulation, observational methods, and questionnaires, are encouraged to contribute original empirical research. In addition to original empirical articles, theoretical reviews and opinions/perspective articles on promising future directions are welcome. We hope that researchers from different areas, such as developmental psychology, educational psychology, experimental psychology, neuropsychology, neuroscience, psychiatry, computational science, etc., will be

represented in the Research Topic.

RTI and Socio-Economically Disadvantaged Students Angel Barrett.2013-01-01 In this six-page (tri-fold) laminated guide, Dr. Angel Barrett provides a range of evidence-based Tier 1 and Tier 2 Response To Intervention (RTI) strategies that are targeted to address the educational needs of students who are socio-economically disadvantaged. It identifies the greatest challenges these students face, which include · Lack of prior background knowledge and experience · Language deficits, especially in vocabulary and linguistic patterns · Lack of prior success in school Specific strategies are provided for overcoming each of these challenges and for improving access to the core curriculum. These include backwards lesson planning, pre-teaching, modeling strategies and reasoning aloud, guiding questions, choral reading, and sentence frames. The guide addresses the impact of the Common Core State Standards on students who are socio-economically disadvantaged, including the likelihood that scaffolding will be needed to narrow the proficiency gap, especially in English Language Arts (ELA). It includes an at-risk flowchart that identifies when and how to provide supports to help students with ELA skills such as reading fluency and comprehension and mathematics skills such as computation and problem-solving. Interventions specifically targeting language development in English Language Learners are included as well. Dr. Barrett draws from her extensive experience working with socio-economically disadvantaged youth as a teacher and principal to offer tips for creating a college and career-ready environment and involving parents.

Handbook of Response to Intervention and Multi-Tiered Systems of Support Paige C. Pullen,Michael J. Kennedy.2018-10-04 Of the many issues facing special education (and general education) today, it is difficult to imagine one more important or timely than response to intervention (RTI). Almost overnight RTI has become standard practice across the nation. Unfortunately, RTI remains ill-defined, falls far short of its evidence-based practice goal, is almost invariably misused, and often results in more harm than good. Nevertheless, as a conceptual framework RTI has great potential for ensuring that students with disabilities receive appropriate, evidence-based instruction. The mission of this handbook is to present a comprehensive and integrated discussion of response to intervention (RTI) and its relation to multi-tiered systems of support (MTSS) in both special education and general education. Although the two terms are currently used interchangeably, distinct differences exist between them. Therefore, chapters are dedicated to distinguishing the two concepts—RTI and MTSS—and describing each one's unique role in both general and special education. In addition, the authors recommend a third term, Multi-Tiered Instruction, to differentiate the practices related to the purpose of the specific intervention.
