**Energy: Sources, Utilization, Legislation, Sustainability, Illinois As Model State** G Ali Mansoori, Nader Enayati, L. Barnie Agyarko. 2015-11-05 This 800-page premier book on energy focuses on energy sources, utilizations, legislations and sustainability as it relates to a state, a province, or a country, or a community within a state. This book presents various kinds of energy sources, ways to convert energy for end use, better use of energy towards conservation and energy- and environmental-sustainability. As a very proper model-state the authors chose the State of Illinois which has the largest overall fossil energy reserves, including the largest strippable bituminous coal reserves; the largest user of nuclear energy in USA and has also been investing in all kinds of renewable energies including wind energy, solar energy, biofuels, geothermal energy, and various energy storage options. In the authors' opinion, State of Illinois is a pioneer in legislations for proper development and use of all kinds of energy. Their motivation to do this project was to educate the public (including students, energy engineers and planners, as well as state- and country-wide policy makers) about all aspects of energy. In this book, the authors present various energy sources, conversions technologies, and conservation possibilities. In every case, the authors have presented various options available for a country, for a state, or for a community to achieve its goal of energy sufficiency, clean environment and as a result, sustainability. Variety of schemes related to each energy source and its related conversion technologies are presented and sustainability of renewable energy sources is discussed. All the possible energy sources including coal, natural gas, petroleum, nuclear, solar, wind, biofuels and geothermal energy are presented in this book, as well as energy storage options. The authors have also presented various ways of dealing with carbon dioxide, which is produced from fossil fuels combustion, including its collection, transportation, storage and sequestration. The energy storage systems presented in this book will facilitate reliable and full integration of renewable power to the grid.

**The Emerging Middle East-East Asia Nexus** Anoushiravan Ehteshami, Yukiko Miyagi. 2015-03-27 As the economies of East Asia grow ever stronger, their need for energy resources increases, which in turn compels closer relations with the countries of the Middle East. This book examines the developing relations between the countries of East Asia, especially China and Japan, with the countries of the Middle East. It looks at various key bilateral relationships, including with Iran and Syria, discusses the impact on the United States' hegemony in both regions, considers whether the new relations represent a contribution to, or a threat to, peace and stability, and assesses the implications of the changes for patterns of regional and global international relations systems.

**Advanced Security and Safeguarding in the Nuclear Power Industry** Victor Nian. 2020-08-04 Advanced Security and Safeguarding in the Nuclear Power Industry: State of the art and future challenges presents an overview of a wide ranging scientific, engineering, policy, regulatory, and legal issues facing the nuclear power industry. Editor Victor Nian and his team of contributors deliver a much needed review of the latest developments in safety, security and safeguards ("Three S's") as well as other related and important subject matters within and beyond the nuclear power industry. This book is particularly insightful to countries with an interest in developing a nuclear power industry as well as countries where education to improve society's opinion on nuclear energy is crucial to its future success. Advanced Security and Safeguarding in the Nuclear Power Industry covers the foundations of nuclear power production as well as the benefits and impacts of radiation to human society, international conventions, treaties, and standards on the "Three S's", emergency preparedness and response, and civil liability in the event of a nuclear accident. The socio-technical and economic risks of civilian and military applications of atomic energy Putting into perspective the hazards of radioactive sources and health impacts of exposure to radiation Prevention and protection against severe nuclear accidents with a much needed update on lessons learnt from "Fukushima International conventions, treaties, legal frameworks, standards and best practices on "Three S's", emergency preparedness and response, and civil liability Evolving technological and institutional challenges facing the nuclear power industry in the future

**The ICT Teacher's Handbook** Roger Crawford.2013-06-26 The ICT Teacher's Handbook is an indispensable guide for all teachers responsible for the teaching and management of ICT in the secondary school, both as a comprehensive introduction for students learning to teach ICT and as a source of ongoing support for busy practising teachers. Illustrated throughout with case studies, key further reading and guidance on where to find and how to choose the best software and resources, the book also features a guide to specifications, software for whole school support and a useful glossary of key terms. Key topics covered include: Organising and delivering the ICT National Curriculum at key stages 3 and 4 and post 16 Teaching and learning with VLEs, IWBs, social networking and mobile technologies Assessment, record keeping and reporting Popular hardware, software and networks External assessment, target setting and tracking Managing technical support and technicians Preparing for promotion and managing an ICT department Strategies for whole school management of ICT Written for trainee and experienced ICT teachers and managers in both English and international schools, The ICT Teacher's Handbook is an authoritative guide designed to support effective teaching and learning, and efficient use of technology in all schools.

*Africa's Peacemakers* Adekaye Adebajo.2014-02-13 As Africa and its diaspora commemorate fifty years of post-independence Pan-Africanism, this unique volume provides profound insight into the thirteen prominent individuals of African descent who have won the Nobel Peace Prize since 1950. From the first American president of African descent, Barack Obama, whose career was inspired by the civil rights and anti-apartheid struggles promoted by fellow Nobel Peace laureates Martin Luther King, Jr., Nelson Mandela, Desmond Tutu, and Albert Luthuli; to influential figures in peacemaking such as Ralph Bunche, Anwar Sadat, Kofi Annan, and F.W. De Klerk; as well as Ellen Johnson Sirleaf, Leymah Gbowee, Wangari Maathai, and Mohamed El-Baradei, who have been variously involved in women's rights, environmental protection, and nuclear disarmament, *Africa's Peacemakers* reveals how this remarkable collection of individuals have changed the world - for better or worse.

**Low-Dose Radiation Effects on Animals and Ecosystems** Manabu Fukumoto.2019-11-14 This open access book summarizes the latest scientific findings regarding the biological effects of the Fukushima Daiichi Nuclear Power Plant (FNPP) accident in 2011. Various cases of changes in animals and organisms have been reported since the FNPP accident. However, it is often unknown whether they are actually due to radiation, since the dose or dose-rate are not necessarily associated with the changes observed. This book brings together the works of radiation biologists and ecologists to provide reliable radioecology data and gives insight into future radioprotection. The book examines the environmental pollution and radiation exposure, and contains valuable data from abandoned livestock in the ex-evacuation zone and from wild animals including invertebrates and vertebrates, aqueous and terrestrial animals, and plants that are subjected to long-term exposure in the area still affected by radiation. It also analyzes dose evaluation, and offers new perspectives gained from the accident, as well as an overview for future studies to promote radioprotection of humans and the ecosystem. Since the biological impact of radiation is influenced by various factors, it is difficult to scientifically define the effects of low-dose/low-dose-rate radiation. However, the detailed research data presented can be combined with the latest scientific and technological advances, such as artificial intelligence, to provide new insights in the future. This book is a unique and valuable resource for researchers, professionals and anyone interested in the impact of exposure to radiation or contamination with radioactive materials.

Retailing Principles Second Edition Lynda Rose Poloian.2013-03-15 What is retailing today? Who are the players and how do they operate? And what

will happen tomorrow? These are just some of the questions addressed by *Retailing Principles: Global, Multichannel and Managerial Viewpoints*, 2nd Edition, which has been thoroughly updated to reflect current trends and conditions in the global retail market. An essential companion for any student seeking a career in the world of retail, the text focuses on the strategies that retailers both large and small are employing to thrive in this challenging economic climate, and in a marketplace where globalization, multi-channel retailing, and issues of sustainability are dominant factors.

**Citadel of Shia Imams** Mahboob Illahi.2020-01-01 Unfairly demonized by its adversaries—including the Sunni Arab countries, along with the US and EU—Iran is wary of the world's powers, after having been preyed upon to achieve other countries' political aims. Iranians are Shia Muslims, a minority sect comprising only 10 to 15% of the billion-plus Muslims in the world. Shias' persecution and marginalization began in ancient times after the demise of the Prophet of Islam in 632, and has continued ever since. In modern times, their worldwide oppression has been spearheaded by Saudi Arabia—whose religion considers Shias to be apostates who deserve to be killed—and its allies, a persecution that began with the 1979 Iranian Revolution, which was followed by the unprovoked invasion of Iran by Iraq in 1980, and the successful defence of this invasion by Iran's revolutionary forces. Building upon this history, *The Citadel of Shia Imams* details the alarming aggression of the Sunni countries of the Middle East against the Shia-led regimes of Iraq, Syria, and Yemen—a relentless persecution of Shia Muslims and extreme injustice and aggression towards them, the details of which need to be brought to light. The unfortunate and reckless support of Saudi Arabia and its allies by the US and many other Western nations has perpetuated a blatant infringement upon the human rights of Iranians and Shia Muslims elsewhere. The oppression of Iranians continues in the form of toughened US sanctions, contrary to international law.

*Taiwan's Economic and Diplomatic Challenges and Opportunities* Mariah Thornton,Robert Ash,Dafydd Fell.2021-04-20 This book offers a diverse set of perspectives on the current state of Taiwan's economy and international relations, equally considering the challenges and opportunities that could forge Taiwan's future. Featuring a range of interdisciplinary approaches, this edited volume has been written by some of the leading scholars on Taiwan's economy and international relations, as well as emerging scholars and writers with practical diplomatic, political, and civil society experience. Contributors cover themes from political economy and international relations to gender studies and civil society-led LGBT diplomacy. Readers will benefit from chapters outlining both the historical overview of Taiwan's development and more recent developments, with several chapters offering focused case studies into Taiwan's economy and international space. A balanced set of conclusions are reached, affording scope for both optimism and pessimism about Taiwan's prospects. *Taiwan's Economic and Diplomatic Challenges and Opportunities* will appeal to students and scholars of international relations, economics, and Taiwan studies.

**Investigating Corruption in the Afghan Police Force** Singh, Danny.2020-08-05 Based on unprecedented empirical research conducted with lower levels of the Afghan police, this unique study assesses how institutional legacy and external intervention have shaped the structural conditions of corruption in the police force and the state. Taking a social constructivist approach, the book combines an in-depth analysis of internal political, cultural and economic drivers with references to several regime changes affecting policing and security, from the Soviet occupation and Mujahidin militias to Taliban religious police. Crossing disciplinary boundaries, Singh offers an invaluable contribution to the literature and to anti-corruption policy in developing and conflict-affected societies.

**Pollution, Politics, and Power** Thomas O. McGarity.2019-11-19 The electric power industry has been transformed over the past forty years, becoming more reliable and resilient while meeting environmental goals. A big question now is how to prevent backsliding. *Pollution, Politics, and Power* tells the story of the remarkable transformation of the electric power industry over the last four decades. Electric power companies have

morphed from highly polluting regulated monopolies into competitive, deregulated businesses that generate, transmit, and distribute cleaner electricity. Power companies are investing heavily in natural gas and utility-scale renewable resources and have stopped building new coal-fired plants. They facilitate end-use efficiency and purchase excess electricity produced by rooftop solar panels and backyard wind turbines, helping to reduce greenhouse-gas emissions. But these beneficial changes have come with costs. The once-powerful coal industry is on the edge of ruin, with existing coal-fired plants closing and coal mines shutting down. As a result, communities throughout Appalachia suffer from high unemployment and reduced resources, which have exacerbated a spiraling opioid epidemic. The Trump administration's efforts to revive the coal industry by scaling back environmental controls and reregulating electricity prices have had little effect on the coal industry's decline. Major advances therefore come with warning signs, which we must heed in charting the continuing course of sustainable electricity. In *Pollution, Politics, and Power*, Thomas O. McGarity examines the progress made, details lessons learned, and looks to the future with suggestions for building a more sustainable grid while easing the economic downsides of coal's demise.

**Macroeconomic Policy Formation in Africa - Country Cases** Karl Wohlmuth, Achim Gutowski, Magda Kandil, Tobias Knedlik, Osmund O.

Uzor. 2014 This Volume 17 of the African Development Perspectives Yearbook considers the following major issues: the macroeconomic policies in post-conflict countries (especially reviews of growth, social progress, and public finance strategies in medium-term frameworks) with Sudan and South Sudan as the country cases; and macroeconomic policy formation in West Africa -- with case studies presented on Senegal and Nigeria in the West African Monetary Zone and the CFA Zone. In addition, the book presents book reviews and book notes. (Series: African Development Perspectives Yearbook - Vol. 17) [Subject: African Studies, Economics]

**Regional Disorder** Sarah Raine. 2017-10-03 China's rise casts a vast and uncertain shadow over the regional balance of power in the Asia Pacific, and nowhere is this clearer than in the South China Sea. The significance of the fraught territorial disputes in this potentially resource-rich sea extends far beyond the small groupings of islands that are at their heart, and into the world of great-power politics. As the struggle for hegemony between the US and China intersects with the overlapping aspirations of emerging, smaller nations, the risk of escalation to regional conflict is real. Christian Le Mi and Sarah Raine cut through the complexities of these disputes with a clear-sighted, and much-needed, analysis of the assorted strategies deployed in support of the multiple and competing claims in the SCS. They make a compelling case that the course of these disputes will determine whether the regional order in Southeast Asia is one of cooperation, or one of competition and even conflict.

**Meltdown** Yoichi Funabashi. 2019-01-29 The human drama, and long-term lessons, of the Fukushima nuclear disaster The Fukushima nuclear disaster in March 2011 presented an enormous challenge even to Japan, one of the world's most advanced and organized countries. Failures at all levels—of both the government and the private sector—worsened the human and economic impact of the disaster and ensured that the consequences would continue for many years to come. Based on interviews with more than 300 government officials, power plant operators, and military personnel during the years since the disaster, *Meltdown* is a meticulous recounting and analysis of the human stories behind the response to the Fukushima disaster. While the people battling to deal with the crisis at the site of the power plant were risking their lives, the government at the highest levels in Tokyo was in disarray and the utility company that operated the plants seemed focused more on power struggles with the government than on dealing with the crisis. The author, one of Japan's most eminent journalists, provides an unrivaled chronological account of the immediate two weeks of human struggle to contain man-made technology that was overwhelmed by nature. Yoichi Funabashi gives insights into why Japan's decisionmaking process failed almost as dramatically as had the Fukushima nuclear reactors, which went into meltdown following a major tsunami.

Funabashi uses the Fukushima experience to draw lessons on leadership, governance, disaster resilience, and crisis management—lessons that have universal application and pertinence for an increasingly technology-driven and interconnected global society.

Learning to Teach in the Primary School Teresa Cremin, James Arthur. 2014-02-24 Flexible, effective and creative primary school teachers require subject knowledge, an understanding of their pupils and how they learn, a range of strategies for managing behaviour and organising environments for learning, and the ability to respond to dynamic classroom situations. This third edition of *Learning to Teach in the Primary School* is fully updated with reference to the new National Curriculum, and has been revised to provide even more practical advice and guidance to trainee primary teachers. Twenty-two new authors have been involved and connections are now made to Northern Irish, Welsh and Scottish policies. In addition, five new units have been included on: making the most of your placement play and exploration in learning behaviour management special educational needs phonics. With Masters-level reflective tasks and suggestions for research-based further reading, the book provides valuable support to trainee teachers engaged in learning through school-based experience and through reading, discussion and reflections as part of a teacher education course. It provides an accessible and engaging introduction to knowledge about teaching and learning that every student teacher needs to acquire in order to gain qualified teacher status (QTS). This comprehensive textbook is essential reading for all students training to be primary school teachers, including those on undergraduate teacher training courses (BEd, BA with QTS, BSc with QTS), postgraduate teacher training courses (PGCE, SCITT) and employment-based teacher training courses (Schools Direct, Teach First), plus those studying Education Studies. This textbook is supported by a free companion website with additional resources for instructors and students and can be accessed at [www.routledge.com/cw/Cremin](http://www.routledge.com/cw/Cremin).

**ICU Resource Allocation in the New Millennium** David Crippen. 2012-09-14 Intensive care medicine is one of the fastest growing services provided by hospitals and perhaps one of the most expensive. Yet in response to the global financial crisis of the last few years, healthcare funding is slowing or decreasing throughout the world. How we manage health care resources in the intensive care unit (ICU) now and in a future that promises only greater cost constraints is the subject of this book, the third in an informal series of volumes providing a global perspective on difficult issues arising in the ICU. Taking 12 developed countries as their focus, leading experts provide a country-by-country analysis of current ICU resource allocation. A second group of experts use the chapters as a departure point to analyze current ICU resource allocation at the level of the global medical village. The process is repeated, but with an eye toward the future – first country by country, then at the global level – that takes into account initiatives and reforms now underway. A fictional healthcare plan, the “Fair & Equitable Healthcare Plan,” is put forth to address weaknesses in existing approaches, and healthcare experts and ethicists are invited to respond to its often provocative provisions. Itself structured as a dialogue, the book is an excellent way to start or to continue serious discussion about the allocation of ICU healthcare resources now and in the years ahead.

*Emissions Trading Schemes under International Economic Law* James Munro. 2018-08-09 The announcement by China that it will implement a

national emissions trading scheme confirms the status of this instrument as the pre-eminent policy choice for mitigating climate change. China will join the dozens of existing and emerging schemes around the world - from the EU to California, South Korea to New Zealand - that use carbon units (otherwise known as emissions permits or carbon credits) to trade in greenhouse gas emissions in a multi-billion dollar global carbon market. However, to date, there has been no consensus about this pre-eminent policy instrument being regulated by international economic law through the World Trade Organization, international investment agreements, and free trade agreements. Munro addresses this issue by evaluating whether carbon units qualify as 'goods', 'services', 'financial services', and 'investments' under international economic law and showing how international economic law applies to emissions trading scheme in diverse and unexpected ways. Further, by engaging in a comparative assessment of schemes around the world, his book illustrates how and why all emissions trading schemes engage in various forms of violations of international economic law which would not, in most instances, be justified by environmental or other exceptions. In doing so, he demonstrates how such schemes can be designed or reformed in ways to ensure their future compliance.

**The practical guide to the eu labyrinth** Daniel Guéguen,Vicky Marissen.2024-01-08 The first edition of the Practical Guide to the EU Labyrinth was published in 1991. 32 years and 16 editions later, Daniel Guéguen and Vicky Marissen now offer an updated and adapted edition. The Treaty of Lisbon of 1 December 2009 requires a comprehensive reform of this guide to understand the new procedures, new ways of conduct and new practices of the EU. After reading this guide, enriched with diagrams, examples and summaries, the structures, competences and procedures of the European institutions will no longer hold any secrets for you. ABOUT THE AUTHORS Former Associate Partner of EPPA, Daniel Guéguen has dedicated his whole working life to European public affairs. Daniel set up several businesses specialised in European affairs and after disposing of them in 2012, he founded PACT European Affairs, specialised in the post-Lisbon comitology procedures. Alongside this activity, Daniel Guéguen has published books that have been translated into several languages. Via articles, blogs and tweets widely circulated in international press, he has campaigned for a more operational EU that is closer to citizens. Building upon the educational nature of his books on the EU, Daniel is still today involved in many university programmes, in the USA (Harvard, Georgetown) and across Europe (ULB, Paris Sciences-Po, EDHEC, HEC, INSEAD), and at the College of Europe in Bruges and Natolin. For his European activities, Daniel Guéguen was in 2005 awarded the rank of “Chevalier” in the order of the Légion d’honneur. Vicky Marissen’s legal background and long-standing experience in European Public Affairs make her the expert capable of assisting companies, trade associations and organisations active in highly regulated sectors such as food, pharmaceuticals and health, helping them close the procedural gap and regain impact on the EU decision-making process. Besides providing legal and procedural input on files and assistance in developing and deploying engagement strategies, Vicky provides support in communicating often technical arguments in an understandable form to different target audiences (public, private, media, etc.).

*Macroeconomic Policy Formation in Africa - General Issues* Karl Wohlmuth,Achim Gutowski,Magda Kandil,Tobias Knedlik,Osmund O. Uzor.2014 This book examines new macroeconomic policy frameworks for Africa, and it discusses the role of policies for generating sustainable and inclusive growth. The responses of the macroeconomic policymakers in Africa to the Euro crisis and to the recent globalization trends are reviewed and analyzed. The book also analyzes the economics of the Arab Spring countries by focusing on the socioeconomic conditions and the economic policy

factors that have led to the Arab Spring events. Highlighted are the cases of Egypt and Tunisia, and the new strategic and policy frameworks in these countries after the democratic changes. An agenda for comprehensive reforms is presented. (Series: African Development Perspectives Yearbook - Vol. 16)

Accounting Paul D. Kimmel, Jerry J. Weygandt, Donald E. Kieso. 2010-12-01 With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a macro- to micro- strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.
