Holisms of communication James McElvenny ,Andrea Ploder. A central pillar of contemporary communication research is the analysis of filmed interactions between people. The techniques employed in such analysis first took on a recognizably modern form in the 1970s, but their roots go back to the earliest days of motion picture technology in the late nineteenth century. This book presents original essays accompanied by written responses which together create a dialogue exploring early efforts at audio-visual sequence analysis and their common goal to capture the whole of the communicative situation. The first three chapters of this volume look at the film-based research of Gestalt psychologists in Berlin as well as psychologists in the orbit of Karl and Charlotte Bühler in Vienna in the first decades of the twentieth century. Most of these figures - along with many other Central European scholars of this era - were driven into exile in the United States after the rise of National Socialism in the 1930s. This scientific migration led to the cross-pollination of communication studies in America, an outcome visible in the leading project in interaction research of the mid-twentieth century, the Natural History of an Interview. The following two chapters examine this project in its historical context. The volume closes with a critical edition of a treasure from the archives: the transcript of a speech delivered by Ray Birdwhistell, a key participant in the Natural History of an Interview project and founder of kinesics.

Promises of Citizenship Kathleen M. German.2017-06-07 Since the earliest days of the nation, US citizenship has been linked to military service. Even though blacks fought and died in all American wars, their own freedom was usually restricted or denied. In many ways, World War II exposed this contradiction. As demand for manpower grew during the war, government officials and military leaders realized that the war could not be won without black support. To generate African American enthusiasm, the federal government turned to mass media. Several government films were produced and distributed, movies that have remained largely unexamined by scholars. Kathleen M. German delves into the dilemma of race and the federal government's attempts to appeal to black patriotism and pride even while postponing demands for equality and integration until victory was

achieved. German's study intersects three disciplines: the history of the African American experience in World War II, the theory of documentary film, and the study of rhetoric. One of the main films of the war era, *The Negro Soldier*, fractured the long tradition of degrading minstrel caricatures by presenting a more dignified public image of African Americans. Along with other government films, the narrative within *The Negro Soldier* transformed the black volunteer into an able soldier. It included African Americans in the national mythology by retelling American history to recognize black participation. As German reveals, through this new narrative with more dignified images, *The Negro Soldier* and other films performed rhetorical work by advancing the agenda of black citizenship.

Community and Society Ferdinand Tonnies,C.P. Loomis.2017-07-12 This extraordinary prescient work by Ferdinand Toennies was written in 1887 for a small coterie of scholars, and over the next fifty years continued to grow in importance and adherents. Its translator into English, Charles P. Loomis, well described it as a volume which pointed back into the Middle Ages and ahead into the future in its attempt to answer the questions: What are we? Where are we? Whence did we come? Where are we going? If the questions seem portentous in the extreme, the answers Toennies provides are modest and compelling. Every major field from sociology, to psychology, to anthropology, has found this to be a praiseworthy book. The admirable translation by Professor Loomis did much to transfer praise for the Toennies text from the German to the English-speaking world. Now, outfitted with a brilliant new opening essay by John Samples, the author of a recent full-scale biographical work on Toennies, 'Community and Society' is back in print; a welcome reminder of the glorious past of German social science.

The Teaching American History Project Rachel G. Ragland,Kelly A. Woestman.2010-05-26 The premise of the Teaching American History (TAH) project—a discretionary grant program funded under the U.S. Department of Education's Elementary and Secondary Education Act—is that in order to teach history better, teachers need to know more history. Unique among professional development programs in emphasizing specific content to be

taught over a particular pedagogical approach, TAH grants assist schools in implementing scientifically-based research methods for improving the quality of instruction, professional development, and teacher education in American history. Illustrating the diversity of these programs as they have been implemented in local education agencies throughout the nation, this collection of essays and research reports from TAH participants provides models for historians, teachers, teacher educators, and others interested in the teaching and learning of American History, and presents examples of lessons learned from a cross-section of TAH projects. Each chapter presents a narrative of innovation, documenting collaboration between classroom, community, and the academy that gives immediate and obvious relevance to the teaching and learning process of American history. By sharing these narratives, this book expands the impact of emerging practices from individual TAH projects to reach a larger audience across the nation.

American Hometown Renewal Gary A. Mattson.2016-09-13 Before the interstates, Main Street America was the small town's commercial spine and served as the linchpin for community social solidarity. Yet, during the past three decades, a series of economic downturns has left many of the great small cities barely viable. *American Hometown Renewal* is the first book to combine administrative, budgetary, and economic analysis to examine the economic and fiscal plight currently facing America's small towns. Featuring a blend of theory, applications, and case studies, it provides a comprehensive, single-source textbook covering the key issues facing small town officials in today's uncertain economy. Written by a former public manager, university professor, and consultant to numerous small towns in the Heartland, this book demonstrates the ways in which contemporary small towns throughout the nation are facing economic challenges brought about by the financial shocks that began in 2008. Each chapter explores a theme related to small town revival and provides a related tool or technique to enable small town officials to meet the challenges of the 21st Century. Encouraging local small town officials to look at the economic orbit of communities in a similar manner as a town's budget or a family's personal wealth, examining its specific competitive advantages in terms of relative assets to those of competing communities, this book provides the reader with step-by-step instructions on how to conduct an asset inventory and apply key asset tools to devise a strategy for overcoming the challenges and constraints imposed upon spatially-fixed communities. *American Hometown Renewal* is an essential primer for students studying city management, economic community development, and city planning, and will be a trusted handbook for city managers, geographers, city planners, urban or rural sociologists, political scientists, and regional microeconomists.

Right Turn Raymond Wolters.2018-04-17 In the spirit of the time, the Civil Rights Act of 1964 and the Voting Rights Act of 1965 called for nondiscrimination for American citizens, seeking equality without regard for race, color, or creed. After the mid-1960s, to make amends for wrongs of

the past, some people called for benign discrimination to give blacks a special boost. In business and government this could be accomplished through racial preferences or quotas; in public education, by considering race when assigning students to schools. By 1980 this course reached a crossroads. Raymond Wolters maintains that Ronald Reagan and William Bradford Reynolds made the right turn when they questioned and limited the use of racial considerations in drawing electoral boundaries. He also documents the Reagan administration's considerable success in reinforcing within the country, and reviving within the judiciary, the conviction that every person black or white should be considered an individual with unique talents and inalienable rights. This book begins with a biographical chapter on William Bradford Reynolds, the Assistant Attorney General who was the principal architect of Reagan's civil rights policies. It then analyzes three main civil rights issues: voting rights, affirmative action, and school desegregation. Wolters describes specific cases: at-large elections and minority vote dilutions; congressional districting in New Orleans; legislative districting in North Carolina; the debates over the Civil Rights Act of 1964; social science critiques of affirmative action; the question of quotas; and school desegregation and forced busing. Because Ronald Reagan and William Bradford Reynolds were men of the right, and because most journalists and historians are on the left, Wolters feels the people of words have dealt harshly with the Reagan administration. In writing this book, he hopes to correct the record on a subject that has been badly represented. Wolters points out that, beginning in the 1980s and continuing in the 1990s, the Supreme Court endorsed the legal arguments that Reagan's lawyers developed in the fields of voting rights, affirmative action, and school desegregation. In *Right Turn*, Wolters responds to those who claimed that Reagan and Reynolds were racists who wanted to turn back the clock on civil rights, and he describes civil rights cases and controversies in a way that is comprehensible to general readers as well as to lawyers and historians.
