Maintenance Costs and Life Cycle Cost Analysis Diego Galar, Peter Sandborn, Uday Kumar. 2017-09-18 Authors have attempted to create coherent chapters and sections on how the fundamentals of maintenance cost should be organized, to present them in a logical and sequential order. Necessarily, the text starts with importance of maintenance function in the organization and moves to life cycle cost (LCC) considerations followed by the budgeting constraints. In the process, they have intentionally postponed the discussion about intangible costs and downtime costs later on in the book mainly due to the controversial part of it when arguing with managers. The book will be concluding with a short description of a number of sectors where maintenance cost is of critical importance. The goal is to train the readers for a deeper study and understanding of these elements for decision making in maintenance, more specifically in the context of asset management. This book is intended for managers, engineers, researchers, and practitioners, directly or indirectly involved in the area of maintenance. The book is focused to contribute towards better understanding of maintenance cost and use of this knowledge to improve the maintenance process. Key Features: • Emphasis on maintenance cost and life cycle cost especially under uncertainty. • Systematic approach of how cost models can be applied and used in the maintenance field. • Compiles and reviews existing maintenance cost models. • Consequential and direct costs considered. • Comparison of maintenance costs in different sectors, infrastructure, manufacturing, transport.

Pavement Inspection Reference Manual Mohamed Y. Shahin, Michael I. Darter, Francine M. Rozanski. 1975 This report is designed as an aid for the individual performing pavement inspections as part of an overall pavement maintenance and repair system. The types of distress found in asphalt- and concrete-surfaced pavements are presented; severity levels for each distress type are established and illustrated. The severity levels were based on the effect of the distress on maintenance and repair needs and priorities, ride quality, safety, and structural integrity.

Development of an Installation Surfaced Area Maintenance and Repair Management System Mohamed Y. Shahin, Construction Engineering Research Laboratory, Michael I. Darter, Francine M. Rozanski, Robert M. Stark, ARMY CONSTRUCTION ENGINEERING RESEARCH LAB CHAMPAIGN ILL.. 1975 This pamphlet describes a newly developed pavement maintenance and repair management system designed to help maintenance personnel at an installation achieve the greatest benefit from funds expended. Procedures for the following six basic activities are detailed: dividing the pavement network into sections, inspecting pavement sections, recording pavement information, determining maintenance and repair needs, determining maintenance and repair priorities, and developing work plans. Although the system is designed for paved systems, it can be adapted for unpaved surfaces.

Predicting Outcomes of Investments in Maintenance and Repair of Federal Facilities National Research Council, Division on Engineering and Physical Sciences, Board on Infrastructure and the Constructed Environment, Committee on Predicting Outcomes of Investments in Maintenance and Repair for Federal Facilities. 2012-03-01 The deteriorating condition of federal facilities poses economic, safety, operational, and environmental risks to the federal government, to the achievement of the missions of federal agencies, and to the achievement of public policy goals. Primary factors underlying this deterioration are the age of federal facilities—about half are at least 50 years old—and decades of inadequate investment for their maintenance and repair. These issues are not new and there are no quick fixes. However, the current operating environment provides both the impetus and the opportunity to place investments in federal facilities' maintenance and repair on a new, more sustainable course for the 21st Century. Despite the magnitude of investments, funding for the maintenance and repair of federal facilities has been inadequate for many years, and myriad projects have been deferred. Predicting Outcomes of Investments in Maintenance and Repair of Federal Facilities identifies processes and practices for transforming the current portfolio of federal facilities into one that is more economically, physically, and environmentally sustainable. This report addresses ways to predict or quantify the outcomes that can be expected from a given level of maintenance and repair investments in federal facilities or facilities' systems, and what strategies, measures, and data should be in place to determine the actual outcomes of facilities maintenance and repair investments.

PAVEMENT MAINTENANCE AND MANAGEMENT Faiq M. Sarhan Al-Zwainy, Esam Hewayde, Firas Jaber. 2020-03 This book was written by academic's and practitioners who have lead the implementation of highway management processes and tools at several major corporations. The contents of this book have been presented in an interesting and enjoyable way, enhanced by real pictures of highway projects and pavement maintenance. The third chapter, entitled PAVEMENT DETERIORATION: The researchers reviewed the types of DETERIORATION in the rigid and asphalt pavement, and explained the methods of treatment and maintenance necessary for each type. While the fourth chapter was entitled HIGHWAY MAINTENANCE OPERATIONS: It reviewed the methods of maintenance and importance in highway project, the fifth chapter entitled: PAVEMENT MAINTENANCE MANAGEMENT SYSTEM: This chapter reviewed the most important global strategies in the management of pavement maintenance.

Automated Pavement Maintenance and Repair Management System Mohamed Y. Shahin, Francine M. Rozanski. 1977 This report describes the use of a computer system designed to aid the facilities engineer in managing pavement maintenance and repair. The system, called PAVER, consists of a computer data base for storage of relevant pavement information, forms for collecting data, and a set of report-generator programs to retrieve information from the data base in an organized format. Adoption of the system will help the facilities engineer achieve the following benefits: prevention of over- or undermaintenance of pavements, more efficient utilization of funds, more efficient scheduling of maintenance activities, rapid retrieval of pavement information (especially important in determining work requirements for submission to the shop or contractor), and documentation of pavement performance. Procedures are presently being developed to interface PAVER with the Integrated Facilities System (IFS). (Author).
