Lime and Other Alternative Cements Neville Hill,Stafford Holmes,David Mather.1992 A recurring theme in the book is the need to work towards the wider acceptance of lime, and alternative binders by: establishing realistic performance standards for alternative cements and getting these standards accepted in international, national and local building codes and standards.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

La Figlia Di Lorio: Tragedia Pastorale Gabriele D'Annunzio.2023-07-18 This poetic and lyrical play by the Italian writer Gabriele D'Annunzio tells the story of the tragic love affair between Lorio, a young shepherd, and his beloved daughter. Set in the mountains of southern Italy, the play explores themes of love, death, and sacrifice, and features some of D'Annunzio's most beautiful and evocative writing. The play is considered a masterpiece of Italian literature and a classic of the pastoral genre. The Viking in the Wheat Field Susan Dworkin.2010-12-21 For thirty years, Danish plant scientist Bent Skovmand served as adviser to dozens of countries and hunted for seeds with genes to resist disease and such environmental stresses as drought, flooding, and global warming. In an era when multinational corporations often jealously guarded patents on plant breeding, Skovmand fought to keep his seed bank a free, open scientific exchange for breeders and farmers everywhere. By telling the story of Skovmand and his colleagues, *The Viking in the Wheat Field* sheds welcome light on an agricultural sector--plant genetic resources--on which our food supply is crucially dependent.

Museums and the Future of Collecting Simon J. Knell.2017-03-02 Collecting is a key function of museums. Its apparent simplicity belies a complexity of questions and issues which make all collecting imprecise and unrepresentative. This book exposes the many meanings of collections, the different perspectives taken by different cultures, and the institutional response to the collecting problem. One major concern is omission, whether this be determined by politics, professional ethics, the law or social agenda. How did curators collect during the war in Croatia? What were the problems of trying to collect the 'old' South Africa when the new one was born? Can museums collect from groups which seem to 'deviate' from society's norms? How has the function of museums affected the practices of international trade? Can museums collect successfully if collecting agenda are being set externally? *Museums and the Future of Collecting* encourages museums to move away from the collecting of isolated tokens; to move beyond the collecting policy and to understand more clearly the intellectual function of what they do. Here examples are given from Australia, Sweden, Canada, Spain, Britain and Croatia which provide this intellectual understanding and many practical tools for evaluating a future collecting strategy.

Grooming, Gossip, and the Evolution of Language Robin Ian MacDonald Dunbar.1996 Here, the author examines gossip as a form of 'verbal grooming', and as a means of strengthening relationships. He challenges the idea that language developed during male activities such as hunting, and that it was actually amongst women that it evolved.

The Surreptitious Speech V. Y. Mudimbe.1992-09 Distinguished scholar V. Y. Mudimbe assembles a lively tribute to *Presence Africaine*, the landmark African studies journal begun in 1947 Paris. While it celebrates the project's forty-year history, *The Surreptitious Speech* does not naively canonize the journal but rather offers a vibrant discussion and critical reading of its context, characteristics, and significance.

Science and Technology Policy for Development Louk de la Rive Box,Rutger Engelhard.2006-05-01 This book is about changing social relationships. The authors focus on the question of what social relations make for successful science and technology policies. In particular, the various chapters illustrate what happens at different social interfaces, such as between policy makers and researchers, and between the users and producers of knowledge. In other words, they are interested in the knowledge networks that are emerging between the many different actors involved in the development of science and technology.

Transnational Transcendence Thomas J. Csordas.2023-09-01 This innovative collection examines the transnational movements, effects, and transformations of religion in the contemporary world, offering a fresh perspective on the interrelation between globalization and religion. *Transnational Transcendence* challenges some widely accepted ideas about this relationship—in particular, that globalization can be understood solely as an economic phenomenon and that its religious manifestations are secondary. The book points out that religion's role remains understudied and undertheorized as an element in debates about globalization, and it raises questions about how and why certain forms of religious practice and intersubjectivity succeed as they cross national and cultural boundaries. Framed by Thomas J. Csordas's introduction, this timely volume both urges further development of a theory of religion and globalization and constitutes an important step toward that theory.

Impostures Innocentes; Or, a Collection of Prints from the Most Celebrated Painters, Viz. Rafael, Guido, Engraved in Imitation of These Masters, with a Discourse on the Prejudices of Certain

Critics, in Regard to Engraving BERNARD. PICART.2018-04-24 The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. The eighteenth-century fascination with Greek and Roman antiquity followed the systematic excavation of the ruins at Pompeii and Herculaneum in southern Italy; and after 1750 a neoclassical style dominated all artistic fields. The titles here trace developments in mostly English-language works on painting, sculpture, architecture, music, theater, and other disciplines. Instructional works on musical instruments, catalogs of art objects, comic operas, and more are also included. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. The Tomb of Rekh-mi-Rē' at Thebes Norman de Garis Davies.1973

Field manual for African archaeology Alexandre Livingstone-Smith.2017 This manual aims at explaining essential concepts pertaining to the practice of conducting archaeological field work in Africa. No fewer than 63 authors draw on their practical experience in the field to cover specific topics. It seeks to provide concise and readable notes that can be consulted in the field. Each chapter corresponds to a specific phase in the investigative process, from locating and excavating a site, to cataloguing and interpreting findings, and then publishing the results. --Home page

War and Economy in the Third Reich R. J. Overy.1995-06-29 War and Economy in the Third Reich examines the nature of the German economy in the 1930s and the Second World War. Richard Overy's essays, collected here for the first time with a substantial new introduction, explore the tension between Hitler's vision of an armed economy and the reality of German economic and social life. Often thought-provoking, always informed, War and Economy opens a window on an essential aspect of Hitler's Germany.

Ceramic Ethnoarchaeology William A. Longacre.2016 Ethnoarchaeology, the study of material culture in a living society by archaeologists, facilitates the extraction of information from prehistoric materials as well. Studies of contemporary pottery-making were initiated in the southwestern United States toward the end of the nineteenth century, then abandoned as a result of changes in archaeological theory. Now a resurgence in ethnoarchaeology over the past twenty-five years offers a new set of directions for the discipline. This volume presents the results of such work with pottery, a class of materials that occurs abundantly in many archaeological sites. Drawing on projects undertaken around the world, in the Phillipines, East Africa, Mesoamerica, India, in both traditional and complex societies, the contributors focus on identifying social and behavioral sources of ceramic variation to show how analogical reasoning is fundamental to archaeological interpretation. As the number of pottery-making societies declines, opportunities for such research must be seized. By bringing together a variety of ceramic ethnoarchaeological analyses, this volume offers the profession a much-needed touchstone on method and theory for the study of pottery-making among living peoples.

East Africa and the Orient Harvard University. Center for International Affairs,British Institute in Eastern Africa,University of Nairobi.1975 It is now apparent that East Africa cannot be viewed in isolation if its early history is to be adequately understood. Arabic, Indian, and Chinese influences have been discovered in the East African cultures, and evidence has shown that from about 100 B.C. the coastal fringe of eastern Africa was economically and culturally an integral part of the Indian Ocean basin. The available evidence relating to these early con-tacts is so scattered, however, that historians and archaeologists must rely on the findings of numerous related disciplines. The contributors to this volume make ingenious use of anthropological, geographical, ethnographical, zoological, linguistic, numismatic, and musicol-ogical evidence as they develop new historio-graphical techniques to open this challenging area of inquiry. Among them are the leading specialists in their respective fields: H Neville Chittick, Vinigi Grottanelli, Paul Wheatley, J S Trimmingham, Gervase Mathew, Pierre Wrin, Aldan Southall, Merrick Posnansky, James Kirkman, and Michael Gwynne. The topics in-vestigated include: the peopling of the East African coast, Chinese knowledge of East Africa, the Arab geographers, the problem of Malagasy origins, connections between the lacustrine peoples and the coast, and the origin and spread of various domestic food plants. Although there remain as many questions as answers, this volume serves as a vital summa-tion of our current knowledge and points the way toward further fruitful research in African history.

Art in the Hellenistic World Andrew Stewart.2014-10-06 What was Hellenistic art, and what were its contexts, aims, achievements, and impact? This textbook introduces students to these questions and offers a series of answers to them. Its twelve chapters and two 'focus' sections examine Hellenistic sculpture, painting, luxury arts, and architecture. Thematically organized, spanning the three centuries from Alexander to Augustus, and ranging geographically from Italy to India and the Black Sea to Nubia, the book examines key monuments of Hellenistic art in relation to the great political, social, cultural, and intellectual issues of the time. It is illustrated with 170 photographs (mostly in color, and many never before published) and contextualized through excerpts from Hellenistic literature and inscriptions. Helpful ancillary features include maps, appendices with background on Hellenistic artists and translations of key documents, a full glossary, a timeline, brief biographies of key figures, suggestions for further reading, and bibliographical references.

The Arts of Making in Ancient Egypt Gianluca Miniaci,Juan Carlos Moreno Garcia,Stephen Quirke,Andréas Stauder.2018 This book provides an innovative analysis of the conditions of ancient Egyptian craftsmanship in the light of the archaeology of production, linguistic analysis, visual representation and ethnographic research. During the past decades, the imaginative figure of ancient Egyptian material producers has moved from workers to artisans and, most recently, to artists. In a search for a fuller understanding of the pragmatics of material production in past societies, and moving away from a series of modern preconceptions, this volume aims to analyse the mechanisms of material production in Egypt during the Middle Bronze Age (2000-1550 BC), to approach the profile of ancient Egyptian craftsmen through their own words, images and artefacts, and to trace possible modes of circulation of ideas among craftsmen in material production. The studies in the volume address the mechanisms of ancient production in Middle Bronze Age Egypt, the circulation of ideas among craftsmen, and the profiles of the people involved, based on the material traces, including depictions and writings, the ancient craftsmen themselves left and produced.

While With advancement in technology we are slowly doing away with the need of a paperback and entering the world of eBooks. Yes, many may argue on the tradition of reading books made of paper, the real feel of it or the unusual smell of the books that make us nostalgic, but the fact is that with the evolution of eBooks we are also saving some trees. Ebooks are available as PDF, EPUB, Kindle and plain text files, though not all titles are available in all formats. LibGen is a unique concept in the category of eBooks, as this Russia based website is actually a search engine that helps you download books and articles related to science. It allows you to download paywalled content for free including PDF downloads for the stuff on Elsevier's Science Direct website. Even though the site continues to face legal issues due to the pirated access provided to books and articles, the site is still functional through various domains.
