Formula 1 in Camera 1980-89 Quentin Spurring.2014-09-15 The 1980s was a momentous decade in Formula 1 and this all-colour book, featuring magnificent images by the renowned German photographer Rainer Schlegelmilch, captures the extraordinary drama of that period. Alain Prost, Ayrton Senna and Nigel Mansell all made their debuts in this decade and became, with Nelson Piquet, the stars of the era - they were arch rivals equipped, at one stage, with the most powerful racing engines of all time. McLaren and Williams first established themselves as regular winners in this period, and these teams, with Ferrari, remain big players today. This was a decade when Formula 1 was transformed by political upheaval, technical innovation and extended TV coverage, all of which laid the foundations for today's globally popular sport. - Visually lavish year-by-year coverage of ten Formula 1 seasons, presenting photographs, factual information and statistics for each year. - Rainer Schlegelmilch, who first photographed Formula 1 in 1962 and remains active today, is one of the best motor racing photographers ever. - All images are in color, with the emphasis on photographs that enthusiasts will not have seen before, the more obscure cars and drivers sharing space with the familiar and famous. - The story of each race is told through photographs and an accompanying commentary. - Data for each year comprises team/car/driver details, plus complete World Championship rankings for drivers and constructors. - The whole work is smartly designed and presented. - In series with titles covering the 1950s, 1960s and 1970s, as well as sister books on sports car racing in the same period.

Formula 1 Car by Car 1990-99 Peter Higham.2021-05-18 The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated, from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined Cooper playing the starring roles, and BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 11/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrolled the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).

Formula 1 in Camera 1970-79 Paul Parker.2012-07-01 Paul Parker's In Camera titles about motor racing have been so acclaimed by pundits and book buyers that he is returning to where he started - Formula 1 in Camera 1970-79 - by compiling 'Volume 2', containing a completely fresh selection of 250 images. Lola T70 Owner's Workshop Manual Chas Parker.2019-09-24 The Lola T70 was developed in 1965 for sports car racing - Lola built the chassis, which were typically powered by large American V8 engines, predominantly Chevrolets and Fords. The T70 was prolific throughout the mid- to late-1960s, and over 100 examples were built in three versions - both open-topped and coupé models. The first successes for the T70 were in the US, and in 1966, the T70 dominated the Can-Am championship, winning five of the six races in the series - with John Surtees becoming champion in a Chevrolet-powered example. In 1968, T70s finished 1 - 2 in the Daytona 24 Hours, and the T70 was highly successful in the domestic UK and European championships, winning regularly. Today, Lola T70s are regular competitors on the historic racing scene, and examples are highly sought after by collectors. This Lola T70 Owner's Workshop Manual looks at the design, evolution, anatomy and operation of the T70.

Formula 1 in Camera 1950-59 Paul Parker.2011-09-01 Building on the success of Haynes's three previous Formula 1 titles in this series, which cover the 1960s, 1970s and 1980s, this book takes a nostalgic look at the 1950s. Offering informative text, race statistics and glorious photography, much of it in color, it brings alive the heroic era of Juan Manuel Fangio, Stirling Moss, Alberto Ascari, Froilan Gonzalez, Peter Collins and Mike Hawthorn driving Maseratis, Alfa Romeos, Mercedes, and Ferraris. For many fans, this was the era when Formula 1 was at its peak - thrilling and dangerous, but still a sport.

Maserati 4CLT Cristian Bertschi.2019-04-09 The latest in the Exceptional Cars series tells the story of one of the two cars bought by The Automovil Club Argentino (ACA). Painted in the bright blue and yellow Argentine racing colours, 1600 was to play an important role in the Argentine team's international expeditions to Europe. Fangio won two races in the car, the most important being at Pau in 1950, where he repeated his win in the ACA sister car a year earlier. As well as a detailed chronicle of the car's highs and lows, the text includes profiles of the drivers who raced in 1600 and a personal account of driving and running the car by a former owner who describes the daunting task of re-creating a Maserati 4CLT engine from scratch.

Le Mans 1960-69 Quentin Spurring.2014-09-15 This was the defining decade for the Le Mans 24 Hours. It started with six consecutive victories by Ferrari, overwhelming Aston Martin and Maserati. But then Ford threw its all-American dollars at the race and won it four times in a technically exciting period that also brought the competitive emergence of brands such as Alfa Romeo, Matra, Porsche and Renault. The participation of great automobile manufacturers spurred the development of many iconic racing cars: Ferrari Testa Rossa and GTO, Ford GT40 and Daytona Cobra, Porsche 904 and 917. The machines that were specially built for Le Mans evolved through the decade from front-engined brutes to mid-engined monsters. By the end of the period, many of them could achieve more than 200mph on the awesome straights that defined the race, thrilling as many as 300,000 spectators at trackside. - Highly detailed year-by-year coverage of the decade's ten races, giving over 30 pages of information and photographs for each year. - Official status provides a number of unique features, including the reproduction of the full-colour race poster artwork for each year and photographs from the ACO's archives. - The images include rare color, and the emphasis is on photographs that enthusiasts will not have seen before. - The story of each race is told through photographs and an accompanying commentary. - Complete data for each year includes technical regulations, entry list, circuit changes (with diagram), lap chart, full results and category awards. - The whole work is beautifully designed and presented. - The 1960s was the decade of Ferrari and Ford: the Italian manufacturer took six consecutive wins until Ford finally came good,

winning the decade's other four races, including the 1969 thriller that saw the closest ever finish at Le Mans.

Gasoline and Magic Hilar Stadler, Martin Stollenwerk. 2015-02 Everything about them is cool. The baby blue Porsche 917, the Chevy Camaro, the blue-, red- and yellow-striped overalls, the boys in low-buttoned shirts, sporting moustaches and a full head of hair, with the sunshine in their faces. Women wearing thick eyeliner and bell-bottoms, girls in crocheted bikinis at the finishing line, garlands of flowers for the winner. Motor sports in the 1960s, '70s and '80s gave rise to a whole world of imagery that arouses a certain wistfulness nowadays. Not only a nostalgia for beautiful old racing cars, but a more comprehensive yearning for the days when even major auto races were still held on ordinary roads, when ambitious auto mechanics would tinker away at a racing car in the local garage and international Grand Prix stars were still approachable. Gilles Villeneuve pushes a strand of hair behind his ear, Pedro Rodriguez rests up on a little stone wall, Jo Siffert stands around in white jeans and cowboy boots, Ayrton Senna is absorbed in thought. The cars race through Monaco and Le Mans and over the hills of Palermo. Most of the pictures in *Gasoline and Magic*, often impressive and quasi intimate shots, were taken by amateur photographers, who now share with us their fascination with fast cars. Swiss filmmaker and collector Thomas Horat spent years tracking down, labeling and archiving these pictures, which he now presents for the first time to the world at large in *Gasoline and Magic*.

Real Racers Stuart Codling. 2011 The visceral sensations of driving a Formula 1 race car in the 1950s and 1960s are brought to life through the extraordinary images of the Klemantaski Collection and first-person accounts the drivers who experienced them. A must-have for all Formula 1 aficionados.

This instalment examines the 1970s, when the sport gained big new sponsors and grew into a television spectacle, with battles between Ferrari and Cosworth-powered opposition a continuing theme. As well as the big championship-winning teams--Lotus, Ferrari, McLaren and Tyrrell--this was a period when small teams and privateers continued to be involved in significant numbers and they are all included, down to the most obscure and unsuccessful. Hot Rod Empire Matt Stone. 2018-09-25 Hot Rod Empire details Robert E. Petersen's creation of Hot Rod Magazine in the 1940s and the Petersen Publishing empire that grew to the mainstream juggernaut we know today. The end of World War II marked the release of pent-up war-years energy and the desire to live. For many this meant indulging in long-denied purchases, like a new car. For another group, including young vets, it meant a return to car building and racing. Money, exciting new cars, and speed parts all flowed freely in post-war America. Robert Petersen, a young SoCal-based photographer and Army Air Corps vet, noted the rapidly growing hot rod scene in and around Los Angeles. His first move was to organize the Los Angeles Hot Rod Exhibition in 1948. His second, and brilliant, move was to launch at the same event the first edition of Hot Rod magazine. From this launch pad, Petersen Publishing Company would grow to become the most influential enthusiast publisher in America. Petersen's magazines were rallying points for all aspects of the car, truck, and motorcycle hobbies, well as nurturing and promoting all aspects from car building to racing to show events. Hot Rod, Motor Trend, Car Craft, Motorcyclist, Off-Road and Four Wheel Drive and some 75 other enthusiast titles dominated magazine racks and provided substantial influence over transportation and numerous other hobbies. Hot Rod Empire celebrates the birth and explosive growth of the transportation hobby under Petersen's watch.

Cycling and Cinema Bruce Bennett. 2019-04-30 A unique exploration of the history of the bicycle in cinema, from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films. *Cycling and Cinema* explores the history of the bicycle in cinema from the late nineteenth century through to the present day. In this new book from Goldsmiths Press, Bruce Bennett examines a wide variety of films from around the world, ranging from Hollywood blockbusters and slapstick comedies to documentaries, realist dramas, and experimental films, to consider the complex, shifting cultural significance of the bicycle. The bicycle is an everyday technology, but in examining the ways in which bicycles are used in films, Bennett reveals the rich social and cultural importance of this apparently unremarkable machine. The cinematic bicycles discussed in this book have various functions. They are the source of absurd comedy in silent films, and the vehicles that allow their owners to work in sports films and social realist cinema. They are a means of independence and escape for children in melodramas and kids' films, and the tools that offer political agency and freedom to women, as depicted in films from around the world. In recounting the cinematic history of the bicycle, Bennett reminds us that this machine is not just a practical means of transport or a child's toy, but the vehicle for a wide range of meanings concerning individual identity, social class, nationhood and belonging, family, gender, and sexuality and pleasure. As this book shows, two hundred years on from its invention, the bicycle is a revolutionary technology that retains the power to transform the world.

The First Three Shelby Cobras Gordon Bruce. 2018-04-17 *The First Three Shelby Cobras*, the third book in the acclaimed *Exceptional Cars* series, tells the story of three remarkable cars, the first AC Cobras created by the legendary Carroll Shelby in 1962 and now favorites of sports-car enthusiasts throughout the world. The prototype CSX2000 has been described as the "most important American car", although it was built on a British AC Ace chassis with an American Ford V8 engine. It was retained by the Shelby family until 2016, when it sold at auction for a record \$13.75

million. CSX2001 was the first production Cobra, and was delivered to American racing driver Ed Hugus. It was later sold to Frenchman Jean-Marie Vincent, who raced in the Tour de France and in numerous European hillclimbs. CSX2002 was the first Cobra to race and nearly won its inaugural outing at Riverside, driven by Bill Krause, until sidelined by a broken rear hub. It did take the first ever Cobra win, with Dave MacDonald at Tucson in March 1963. Its success led to a series of competition wins that made Shelby's Cobras famous and admired across the globe. All three cars are now the pride of car collections in the United States of America. Buoyed by this success a second car was built, with both entered on the Marathon de la Route but without success. Closure of MG Competitions Department at Abingdon was not far off, however the team gallantly prepared both cars for their final race in 1969. Under the banner of the American importer the newer car finished in fifteenth position. The MGC GTS Lightweights covers the development of the production road car, its conception, compromised design and subsequent failure to attract loyal MG customers. This is followed by an in-depth technical analysis of the development, construction and build of the MGC GTS. Specific attention is given to the specialised components utilised, particular emphasis placed on the unique aluminium bodyshell that for the first time is laid bare. Ferrari 250 LM James Page.2019-07-02 The Ferrari 250 LM was born of controversy. Enzo Ferrari wanted this compact mid-engined coupe to qualify as a GT car for world championship racing. The FIA, motor sport's rule-makers, disagreed and this new model, of which just 32 were made, was forced to run as a sports-prototype in 1964 and 1965. To everyone's surprise, the LM was to dominate the Le Mans 24 Hour race in 1965. 6313, entered by Ecurie Francorchamps, led for much of the race and finished second after a tyre failure in the closing stages. It was the high-spot of a busy season for a car that, 54 years later, is well-known as a successful contender in historic car racing. Author James Page covers the genesis of the 250 LM and its development, its technical details and specification, and the ongoing row about its homologation as a GT car. 6313 was driven at Le Mans in 1965 by Pierre Dumay and Gustave Gosselin, and led the race through Saturday night and Sunday morning, only to suffer a tyre blow-out with less than three hours to the finish, allowing the NART 250 LM of Jochen Rindt and Masten Gregory to take victory. For many years the identity of 6313 was confused with its team-mate 6023. Detective work by Ferrari specialist Keith Bluemel, consultant on this book, clarified the situation. This book unravels the mystery. The book is profusely illustrated with period photographs and documents, and a gallery of studio photographs of the car as it is today.
