The Essentials of Clinical Reasoning for Nurses: Using the Outcome-Present State Test Model for Reflective Practice RuthAnne Kuiper,Sandra M. O'Donnell,Daniel J. Pesut,Stephanie L. Turrise.2017-05-24 In today's healthcare environment of scarce resources and challenges related to safety and quality, nurses must make decision after decision to ensure timely, accurate, and efficient provision of care. Solid decision-making, or lack thereof, can significantly affect patient care and outcomes. Clinical reasoning - how a nurse processes information and chooses what action to take - is a skill vital to nursing practice and split-second decisions. And yet, developing the clinical reasoning to make good decisions takes time, education, experience, patience, and reflection. Along the way, nurses can benefit from a successful, practical model that demystifies and advances clinical reasoning skills. In The Essentials of Clinical Reasoning for Nurses, authors RuthAnne Kuiper, Sandra O'Donnell, Daniel Pesut, and Stephanie Turrise provide a model that supports learning and teaching clinical reasoning, development of reflective and complex thinking, clinical supervision, and care planning through scenarios, diagnostic cues, case webs, and more.

Un análisis del cuidado enfermero, desde los estudiantes y graduados Delicia Hilda Madoery, Laura Mabel Orosco, Rita Haydee Folgado. 2013 El uso de lenguajes enfermeros es de vital importancia para la profesión, constituyendo una buena práctica de la Enfermería. Desde investigaciones previas y con la convicción de la necesaria implementación curricular de los mismos, se realizó un estudio a fin de analizar las prácticas del cuidado enfermero, brindados por estudiantes y graduados de enfermería en servicios hospitalarios en 2011 y 2012, considerando el Patron Actividad/Ejercicio, con el fin de contribuir a enriquecer el marco teórico disciplinar. Estudio cuantitativo: Análisis documental de los TP de estudiantes de la Lic. en Enfermería y entrevistas de graduados. En los TP se identificaron los Diagnósticos Enfermeros y las NIC más trabajadas del patron Actividad/Ejercicio, surgiendo confusiones en la utilización de las NIC. Aun no se identificaron NOC en los TP. En los graduados no surge la utilización de lenguajes enfermeros. Aun es incipiente la aplicación de las NIC y NOC. Los docentes deben capacitarse y adoptar estrategias metodológicas efectivas y realizar talleres de reflexión y capacitación con los graduados sobre esta temática, para garantizar su correcta aplicación.

Human Issues in Translation Technology Dorothy Kenny. 2017-01-12 Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users - as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from 'traditional' translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators - in various contexts and with widely differing profiles - use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and psychological, and with empirical evidence of what the technologization of the workplace means to translators, Human Issues in Translation Technology is key reading for all those involved in translation and technology, translation theory and translation research methods.

A Labour of Love Janet Finch, Dulcie Groves. 2022-08-24 What are the realities of ‘community care’ – the unpaid care given by hundreds of thousands of women, often in their own homes – for children and adults who are handicapped or chronically sick, or for frail elderly people? Originally published in 1983, this book explores the experiences of such women and the dilemmas which ‘caring’ poses for them. At a time when most women needed to earn money from a paid job, how did ‘carers’ manage to juggle their caring and other domestic responsibilities, and what happened if they had to give up work? Against a background of government policies which favour care ‘by’ the community, the contributors to this book raise crucial issues for social and economic policy. Hilary Graham examines what caring really means and Clare Ungerson asks why women do it. Sally Baldwin and Caroline Glendinning focus on mothers with handicapped children and Fay Wright on single adults with elderly dependants. Alan Walker highlights the dependencies implicit in caring relationships with the elderly. Lesley Rimmer looks at the economic ‘costs’ of care, and Dulcie Groves and Janet Finch examine the invalid care allowance – a carers’ benefit for which married women can never qualify. In exploring the domestic sector of welfare, *A Labour of Love* was a highly topical contribution to the debate both on welfare provision and on the division of labour between men and women at the time.

Nursing Outcomes Classification (NOC) Marion Johnson, Sue Moorhead. 2000 This second edition of the Nursing Outcomes Classification (NOC) contains 260 outcomes. Each outcome includes a label name; a definition; a set of indicators that describe specific patient, caregiver, family, or community states related to the outcome; a 5-point Likert-type measurement scale; and selected references used in the development of the outcome. Although we encourage the use of the indicators and measurement scale associated with the outcomes, the goal of the research team is to standardize the label name and definition for each outcome, which assist nurses in evaluating and quantifying patient status in relation to a particular outcome. Clinical Guidelines for Advanced Practice Nursing Rebekah Kaplan, Karen G. Duderstadt. 2016-03-17 Clinical Guidelines for Advanced Practice Nursing: An Interdisciplinary Approach, Third Edition is an accessible and practical reference designed to help nurses and students with daily clinical decision making. Written in collaboration with certified nurse midwives, clinical nurse specialists, nurse practitioners, nutritionists, pharmacists, and physicians, it fosters a team approach to health care. Divided into four areas—Pediatrics, Gynecology, Obstetrics, and Adult General Medicine—and following a lifespan approach, it utilizes the S-O-A-P (Subjective-Objective-Assessment-Plan) format. Additionally, the authors explore complex chronic disease management, health promotion across the lifespan, and professional and legal issues such as reimbursement, billing, and the legal scope of practice. The Third Edition has a keen focus on gerontology to accommodate the AGNP specialty and to better assist the student or clinician in caring for the aging population. The authors follow the across the life span approach and focus on common complete disorders. Certain chapters have been revised and new chapters have been added which include: Health Maintenance for Older Adults; Frailty; Common Gerontology Syndromes; Cancer Survivorship; Lipid Disorders; Acne (pediatrics section). Please note that the 2016 CDC Guidelines for prescribing opioids for chronic pain in the United States were not yet available at the time the authors were updating the Third Edition. See the Instructor Resources tab to read a note from the authors about their recommendations for resources around these guidelines.

El Modelo Bifocal de Práctica Clínica de Lynda J. Carpenito en enfermería, aplicado en el Sistema d'Emergències Mèdiques de Catalunya Elena Castro Naval. 2017

Para reducir la variabilidad en las actividades de enfermería y aumentar la calidad en los cuidados de enfermería sería conveniente trabajar con un Modelo Conceptual Enfermero. La utilización de un lenguaje común y estandarizado sería de gran utilidad para el desarrollo de la profesión. La taxonomía NANDA-I, NOC y NIC como un lenguaje estandarizado se ha creado y refinado en los últimos años para cohesionarse entre sí. En el Sistema d'Emergències Mèdiques de Catalunya, se registran las actuaciones del equipo de trabajo en una hoja de asistencia con un modelo biomédico, por lo que el trabajo de enfermería queda difuminado. OBJETIVOS: Evaluar el efecto de una intervención formativa en el nivel de conocimientos de los enfermeros acerca del uso del proceso enfermero y lenguajes enfermeros y las actitudes de los enfermeros acerca de la utilidad y el significado de estos. Describir, identificar las etiquetas NANDA-I, NOC y NIC, así como el grado de mejora de la NOC. METODOLOGÍA: A) Diseño Fase I: casi experimental, analítico, transversal, de intervención antes y después sin grupo control Fase II: observacional, descriptivo, correlacional y prospectivo Ámbito de estudio: Lleida, Alt Pirineu, Camp de Tarragona y Terres de l'Ebre B) Población y muestra Fase I: población configurada por enfermeras que trabajaban en el SEMSA en las provincias de Lleida y Tarragona.
