The Cambridge History of South Africa: Volume 1, From Early Times to 1885 Carolyn Hamilton, Bernard K. Mbenga, Robert Ross. 2020-01-16 Reflecting on South Africa's achievement of majority rule, this book takes a critical and searching look at the country's past. It presents South Africa's past in an objective, clear, and refreshing manner. With chapters contributed by ten of the best historians of the country, the book elaborately weaves together new data, interpretations, and perspectives on the South African past, from the Early Iron Age to the eve of the mineral revolution on the Rand. Its findings incorporate new sources, methods, and concepts, for example providing new data on the relations between Africans and colonial invaders and rethinking crucial issues of identity and consciousness. This book represents an important reassessment of all the major historical events, developments, and records of South Africa - written, oral, and archaeological - and will be an important new tool for students and professors of African history worldwide.

Yoruba Ritual Margaret Thompson Drewal. 1992-03-22 Yoruba peoples of southwestern Nigeria

conceive of rituals as journeys -- sometimes actual, sometimes virtual. Performed as a parade or a procession, a pilgrimage, a masking display, or possession trance, the journey evokes the reflexive, progressive, transformative experience of ritual participation. Yoruba Ritual is an original and provocative study of these practices. Using a performance paradigm, Margaret Thompson Drewal forges a new theoretical and methodological approach to the study of ritual that is thoroughly grounded in close analysis of the thoughts and actions of the participants. Challenging traditional notions of ritual as rigid, stereotypic, and invariant, Drewal reveals ritual to be progressive, transformative, generative, and reflexive and replete with simultaneity, multifocality, contingency, indeterminacy, and intertextuality. Throughout the book prominence is given to the intentionality of actors as knowledgeable agents who transform ritual itself through play and improvisation. Integral to the narrative are interpolations about performances and their meanings by Kolawole Ositola, a scholar of Yoruba oral tradition, ritual practitioner, diviner, and master performer. Rich descriptions of rituals relating to birth, death, reincarnation, divination, and constructions of gender are rendered all the more vivid by a generous selection of field photos of actual performances.

African Archaeology D. W. Phillipson.2005-05-05 Research in Africa is now accepted as an integral part of global archaeological studies. As well as providing archaeologists with the oldest material, Africa is also widely recognised as the birthplace of modern man and his characteristic cultural patterns. Archaeological study of later periods provides unique and valuable evidence for the development of African culture and society, while ongoing research in Africa provides insights relevant to the interpretation of the archaeological record in other parts of the world. In this fully revised and expanded 2005 edition of his seminal archaeological survey, David Phillipson presents a lucid and fully illustrated account of African archaeology from prehistory and the origins of humanity to the age of European colonisation. The work spans the entire continent from the Mediterranean to the Cape of Good Hope and demonstrates the relevance of archaeological research to the understanding of Africa today.

History of Education in Nigeria A. Babs Fafunwa.2018-10-03 Originally published in 1974, a

comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

The African Experience with Higher Education J. F. Ade Ajayi, L. K. H. Goma, Ampah G. Johnson. 1996 There have been institutions of higher learning for centuries in Africa, but the phenomenal growth has taken place in the last fifty years, first in the later days of colonialism and then in the heady days of independence and commodity boom. Without them, there would have been no development. The three highly distinguished authors have written the first comprehensive assessment of universities and higher education in Africa south of the Sahara. As can be seen from their biographies, they draw on experience from both francophone and anglophone Africa and from teaching in both the sciences and the arts.

Language and Linguistics John Lyons.1981-05-29 This 1981 book is a general introduction to linguistics and the study of language, intended particularly for beginning students and readers with no previous knowledge or training in the subject. There is first a general account of the nature of language and of the aims, methods and basic principles of linguistic theory. John Lyons then introduces in turn each of the main sub-fields of linguistics: the sounds of language, grammar, semantics, language change, psycholinguistics: the sounds of language, grammar, semantics, language change, psycholinguistics, language and culture. Throughout the book he emphasizes particularly those aspects of the discipline that seem fundamental and most likely to remain important. He stresses throughout the cultural at least as much as the biological context of human language, and shows how the linguist's concerns connect productively with those of the traditional humanities and the social sciences. Each chapter has a wide-ranging set of discussion questions and revision exercises, and extensive suggestions for further reading. The exposition is marked throughout by the author's characteristic clarity, balance and authority.
