Create automation and COM add-ins with C# and C++ Call VBA add-ins and handle multi-threaded components with Excel Implement interpolators, pricers, and simulators in Excel Integrate C++ STL, Boost, and other libraries Haphazard multi-language interfacing slows down results, causes numerous errors, and can require complete reworking when changes are made. It has support for templates and generic programming, massive reusability using templates (?write once?) and support for legacy C applications. In this book, author Daniel J. Solving the Black Scholes equations, exact and approximate solutions Implementing the Finite Difference Method in C++ Integration with the ?Gang of Four?
