21st Century Literacy Renita Schmidt,Paul Lee Thomas.2008-11-09 Renita Schmidt and P. L. Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders. While the intent of that mission is basically sound in theory—we instill the idea that teachers at all levels are professionals, always learning and growing in knowledge—that theory, that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching. In our unique program, students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching; the program is heavily field-based, and it depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full-time teaching. Students tell us this guidance and support is invaluable, and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings. Students hear “best practice” information from us in methods classes and they receive ample exposure to the research supporting our field, but have a hard time implementing research-based practices in their classroom settings and an even harder time finding it in the classrooms around them.

Pediatric and Neonatal Mechanical Ventilation Peter C. Rimensberger.2014-11-12 Written by outstanding authorities from all over the world, this comprehensive new textbook on pediatric and neonatal ventilation puts the focus on the effective delivery of respiratory support to children, infants and newborns. In the early chapters, developmental issues concerning the respiratory system are considered, physiological and mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed. Thereafter, the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained, with the emphasis on a practical step-by-step approach. Respiratory monitoring and safety issues in ventilated patients are considered in detail, and many other topics of interest to the bedside clinician are covered, including the ethics of withdrawal of respiratory support and educational issues. Throughout, the text is complemented by numerous illustrations and key information is clearly summarized in tables and lists.

Numbers Games Paul Lee Thomas.2004 American schools are often the victims of numbers games because its education is in the hands of politicians, the populace, and pundits. How Americans view numbers, science, and research profoundly impacts the ability of politicians to manipulate our schools from pre-K through graduate education. Even in classrooms, teachers are routinely implementing flawed assessment strategies based on misguided assumptions about numbers and commonly held statistical truths. American educators need to step out from under the restrictive mandates of politicians and their growing mania for measuring students - they need to leave the numbers games behind and take control of their profession.
