Estos eventos son expuestos en este libro a través de entretenidos relatos, escritos con lenguaje divulgativo, que permiten descubrir aspectos fascinantes de la ciencia, su historia y los científicos que la desarrollan. A través de estas páginas el lector encontrará una interesante guía acerca de momentos, personajes y hechos científicos representados por la imaginación artística, cuyo resultado es una serie de pinturas que reflejan la enorme aventura del conocimiento humano. Las historias están escritas para todo público, con fin de lograr interés y entusiasmo hacia la ciencia y las personas que la practican día a día, en centros de conocimiento alrededor del mundo. Did Lin Zexu Make Morphine? Volumes 1 and 2 G. W.. Robinette.2008 Soon to be banned in Beijing, this work suggests that Lin Zexu, often called the first modern Chinese nationalist, popular icon for present-day prohibitionists, who legend says caused the first Opium War (1839-1842) by destroying some 20,000 chests of British opium, may deserve a second look from historians. His method of using lime and salt to destroy the opium simply shares too many parallels with European methods for extracting morphine from opium. Morphine salts were sold in both China and Europe in the 19th century as substitutes for opium or as opium cures. Could the mandarin Lin Zexu have stolen from the British, conned the Americans, hastened the downfall of the parasitical Manchu dynasty, and manufactured a simple morphine salt? -- Graffii Milante, Valpaaiso, Chile -from book cover.

Química e investigación criminal Matthew E. Jhll.2008 La fascinación de la sociedad por las investigaciones criminales se refleja en la popularidad de las novelas y series de televisión de gran audiencia basadas en la resolución de crímenes y el trabajo policial. Las historias de Sherlock Colmes, las novelas de misterio de Agatha Christie, las aventuras de investigadores inolvidables como Nancy Drew, Dick Tracy, Perry Mason y Colombo, y últimamente, la exitosa serie de televisión CSI: Crime Scene Investigation, que intriga a millones de personas, son claros ejemplos. El profesor Matthew E. Jhll ha encontrado en este interés por la ciencia forense una excelente oportunidad para escribir su libro Química e investigación criminal con la finalidad de atraer a los estudiantes hacia el estudio de la química. Así, basándose en casos reales de la ciencia forense y la investigación criminal, explica los principios químicos básicos de una manera clara y accesible, sin olvidar los aspectos más cuantitativos de la química.

Ancient Maya Commerce Scott R. Hutson.2017-03-01 Ancient Maya Commerce presents nearly two decades of multidisciplinary research at Chunchucmil, Yucatan, Mexico—a thriving Classic period Maya center organized around commercial exchange rather than agriculture. An urban center without a king and unable to sustain agrarian independence, Chunchucmil is a rare example of a Maya city in which economics, not political rituals, served as the engine of growth. Trade was the *raison d'être* of the city itself. Using a variety of evidence—archaeological, botanical, geomorphological, and soil-based—contributors show how the city was a major center for both short- and long-distance trade, integrating the Guatemalan highlands, the Gulf of Mexico, and the interior of the northern Maya lowlands. By placing Chunchucmil into the broader context of emerging research at other Maya cities, the book reorients the understanding of ancient Maya economies. The book is accompanied by a highly detailed digital map that reveals the dense population of the city and the hundreds of streets its inhabitants constructed to make the city navigable, shifting the knowledge of urbanism among the ancient Maya. Ancient Maya Commerce is a pioneering, thoroughly documented case study of a premodern market center and makes a strong case for the importance of early market economies in the Maya region. It will be a valuable addition to the literature for Mayanists, Mesoamericanists, economic anthropologists, and environmental archaeologists. Contributors: Anthony P.
