Approche Psychanalytique

Manuel de Psychologie Et de Psychopathologie Clinique Générale
René Roussillon.2014-07 Ce manuel présente la logique des processus de la vie psychique à tous les âges de la vie, de la naissance à la vieillesse. Les auteurs, issus de la pensée psychanalytique, retracent tout d'abord l'histoire de la réalité psychique de la subjectivité. Ils présentent ensuite les logiques, en large partie inconscientes, qui sous-tendent les formes d'expression de la psychopathologie. L'apport des neurosciences dans le champ de la psychopathologie est également abordé. Une approche projective complète enfin cette démarche d'ensemble et fournit une méthode pour médiatiser la subjectivité propre du clinicien. Ainsi composé, ce manuel s'adresse à tous ceux qui, étudiants, jeunes professionnels et psychologues confirmés, sont soucieux d'une vue d'ensemble et actualisée de l'approche clinique de la vie psychique et des formes de sa pathologie. Cette deuxième édition a été enrichie des nouvelles thématiques suivantes: le travail de psychothérapie et les médiations thérapeutiques, ainsi que la psychopathologie du sujet vieillissant.

Perspectives internationales sur la gestation pour autrui

Isabel Côté, Kévin Lavoie, Jérôme

Courduriès.2018-02-28T00:00:00-05:00 Parmi les techniques de reproduction assistée, la gestation pour autrui (GPA) - également appelée «maternité de substitution» - demeure sans contredit la plus controversée. À partir de recherches empiriques conduites dans différents contextes sociolégislatifs, le présent ouvrage fait état des débats qui entourent la pratique de la GPA. Le lecteur y découvrira comment cette pratique interroge les normes de parenté et de genre de même que la construction de la maternité.

Evaluating and Treating Families Christine E. Ryan,Nathan B. Epstein,Gabor I. Keitner,Ivan W. Miller,Duane S.

Bishop.2012-10-12 This comprehensive text is organized into two parts, the first of which presents an overview of the history, development, and theory of the model, and its specific applications to treatment, training, assessment, and research. Part II includes the instruments and assessment tools originally developed by the authors during their extensive clinical and research experience. Clinical case examples drawn from over four decades of family therapy work enrich the text, and an entire chapter is devoted to the authors' own research findings, current research plans, and new directions in their work.

S'entraîner à la cotation du Rorschach et du TAT François-David Camps,Gaëlle Malle.2020-10-21 Les psychologues et étudiants en psychologie qui s'initient à la pratique des méthodes projectives se posent très souvent des questions face à l'exercice de la cotation du Rorschach et du TAT : comment coter les réponses au Rorschach et au TAT et comprendre le sens de leur cotation ? Comment comprendre les processus psychiques en jeu et les traduire dans des éléments quantifiables ? Cet ouvrage propose, de façon très pédagogique et didactique, de les accompagner dans leur découverte de la cotation du Rorschach et du TAT grâce à des exercices et des entraînements de difficulté croissante.

dessine-t-il ? Ses premières traces recouvrent-elles une signification autre qu'un simple indicateur de développement ? Quelles sont les étapes de la représentation de l'être humain, miroir du devenir-soi ? À quelles organisations psychodynamiques renvoient-elles ? L'évaluation diagnostique des agresseurs sexuels Thierry Pham. 2013-10-24 Instruments d'évaluation des troubles sexuels. Depuis plus d'une décennie, les agresseurs sexuels font la une de l'actualité judiciaire et confrontent les professionnels de terrain à des défis de taille. D'une part, nos sociétés veulent se protéger contre la récurrence sexuelle, et des dispositions légales ont été prises dans de nombreux pays pour encadrer le suivi de ces délinquants particuliers. D'autre part, l'hétérogénéité des agresseurs sexuels sur les plans criminologique et clinique est évidente. Elle implique une réactualisation de leur évaluation clinique à la lueur des recherches récentes. Cet ouvrage présente très concrètement les spécificités cliniques et criminologiques des agresseurs sexuels telles qu'elles apparaissent au travers des méthodes actuelles d'évaluation. Les auteurs proposent aussi un regard critique sur des méthodes potentiellement prometteuses, soit déjà validées, soit en cours de validation. L'ouvrage fait le point sur les connaissances actuelles dans plusieurs domaines interdépendants : les expériences vécues durant l'enfance ; les troubles de la personnalité ; les préférences sexuelles ; la récurrence. Il revisite l'agression sexuelle à la lumière des techniques projectives et présente les instruments prometteurs pour l'évaluation et la gestion du risque de récurrence ; à partir des outils standardisés, il traite de l'évaluation du déni, des

distorsions cognitives et de l'empathie. Le livre aborde aussi le domaine encore peu connu des particularités neuropsychologiques des agresseurs sexuels. Finalement, il examine les particularités de l'évaluation clinique des agresseurs sexuels déficients mentaux. Destiné aux professionnels du monde de la psychologie, cet ouvrage de référence permet d'interpréter les résultats des outils d'évaluation des pathologies du délinquant sexuel. À PROPOS DE L'AUTEUR Thierry H. Pham est Docteur en psychologie. Il dirige le Centre de Recherche en Défense Sociale et est Professeur de psychologie légale à l'Université de Mons-Hainaut. Il est Professeur associé à l'Université du Québec à Trois-Rivières et Chercheur associé à l'Institut Philippe-Pinel de Montréal. Ses champs de recherche concernent notamment la psychopathie, ses corrélats émotionnels et cognitifs ainsi que l'évaluation du risque chez les agresseurs sexuels.

In Search of Self in India and Japan Alan Roland.2021-04-13

Drawing on work with Indian and Japanese patients, a prominent American psychoanalyst explores inner worlds that are markedly different from the Western psyche. A series of fascinating case studies illustrates Alan Roland's argument: the familial self, rooted in the subtle emotional hierarchical relationships of the family and group, predominates in Indian and Japanese psyches and contrasts strongly with the Western individualized self. In perceptive and sympathetic terms Roland describes the emotional problems that occur when Indians and Japanese encounter Western culture and the resulting successful integration of new patterns that he calls the expanding self. Of particular interest are descriptions of the special problems of women in changing society and of the paradoxical relationship of the spiritual self of Indians and Japanese to the familial self.? Also described is Roland's own response to the broadening of his emotional and intellectual horizons as he talked to patients and supervised therapists in India and Japan. As we were coming in for a landing to Bombay, he writes, the plane banked so sharply that when I

supposedly looked down all I could see were the stars, while if I looked up, there were the lights of the city. This is the world turned upside down that he describes so eloquently in this book. What he has learned will fascinate those who wish to deepen their understanding of a different way of being.

The Development of Defense Mechanisms Phebe

Cramer.2012-12-06 The idea that the human mind-that faculty of the intellect which we use to define and discern the truth-might also be used to deceive itself is not new. The classic orator Demosthenes warned of this possibility in 349 B.C. when he wrote that Nothing is more easy than to deceive one's self; what a man wishes he generally believes to be true. 1 Even Jean Jacques Rousseau, who suggested the possibility of man as noble savage,

alerts us to this paradox, when he writes *Jamais fa nature ne nous trompe; c'est toujours nous qui nous trompons* (Nature never deceives us; it is always we who deceive ourselves).² But it was Sigmund Freud who placed this idea firmly into the field of psychopathology and then, later, into a general psychological theory. According to Freud, understanding the function of a defense mechanism means not only fathoming the origin of pathological symptoms but also comprehending a model of the mind that includes both conscious and unconscious mental processes. From this initial focus on the general process of defense, Freud and his followers went on to identify various forms this process might take, with the result that today we have a list of 3 more than 37 defense mechanisms described in the literature.

L'évaluation neuropsychologique Hélène Amieva.2016-05-09

L'activité principale de la neuropsychologie consiste à évaluer les troubles dont souffre un patient (Alzheimer, Parkinson, troubles de la mémoire suite à un traumatisme crânien, etc.). Cette pratique, malgré la panoplie d'outils dont disposent les neuropsychologues, est complexe, car de nombreuses variables peuvent influencer les résultats des tests et rendre leur interprétation difficile : âge, sexe, niveau d'études, état psycho-affectif, régime alimentaire, prise de médicaments, patrimoine génétique, conditions de passation des tests. Afin de mieux comprendre la pratique neuropsychologique actuelle, les auteurs passent en revue dans cet ouvrage les problématiques fréquemment rencontrées et tentent de déterminer ce qu'est un bilan neuropsychologique normal et anormal, de montrer l'influence des données culturelles sur l'évaluation neuropsychologique, sans oublier d'étudier les relations entre évaluation neuropsychologique et expertise judiciaire.--

The Social Cognition and Object Relations Scale-Global Rating Method (SCORS-G) Michelle Stein, Jenelle Slavin-

Mulford.2017-12-14 The Social Cognition and Object Relations Scale-Global Rating Method (SCORS-G) is a clinician rated measure that can be used to code various forms of narrative material. It is comprised of eight dimensions which are scored using a seven-point Likert scale, where lower scores are indicative of more pathological aspects of object representations and higher scores are suggestive of more mature and adaptive functioning. The volume is a comprehensive reference on the 1) validity and reliability of the SCORS-G rating system; 2) in depth review of the empirical literature; 3) administration and intricacies of scoring; and 4) the implications and clinical utility of the system across settings and disciplines for clinicians and researchers.

Motivational Interviewing with Adolescents and Young Adults

Sylvie Naar, Mariann Suarez. 2021-08-16 The significantly revised second edition of this unique practitioner guide features 65% new material and a new organizing structure. The authors show how to use motivational interviewing (MI) to have productive conversations about behavior change with adolescents and young adults in any clinical context. Noted for its clarity, the book includes extended case examples, sample dialogues, quick-reference tables, and dos and don'ts. It provides vital tools for helping young people open up about their struggles, explore alternatives, and make healthier choices around such concerns as substance use, smoking, anxiety, medication adherence, and obesity. New to This Edition *More integrative and cohesive: every chapter weaves in diverse clinical issues, replacing the prior edition's population-specific chapters. *Chapters on MI in groups and involving caregivers in treatment. *Restructured around the current four-process model of MI, and proposes maintenance of change as a fifth process. *Incorporates the rapidly growing research base on MI with youth. *Reflects the ongoing refinement of the authors' training approach; includes skill-building activities at the end of each chapter. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

Nouveau manuel du TAT Françoise Brelet-Foulard, Catherine Chabert. 2019-06-05 Consacré à l'utilisation du T. A. T. -Thematic Apperception Test - cet ouvrage expose la méthode d'analyse et d'interprétation élaborée à partir des travaux de Vica Shentoub et de ses successeurs. Conçu comme un manuel, il propose une méthodologie rigoureuse pour l'utilisation clinique du test et comporte de nombreuses illustrations cliniques.

Épreuves thématiques en clinique infantile Monika Boekholt. 2006 Cet ouvrage présente quatre épreuves parmi les plus utilisées en psychologie clinique auprès des enfants de 3 à 12 ans : une épreuve de jeu - le scénotest - et trois épreuves verbales - le CAT

(Children Apperception Test), le PN (les aventures de Patte Noire) et le TAT (Thematic Apperception Test). Il s'adresse aux futurs psychologues et aux praticiens qui, à travers les épreuves projectives, thématiques et Rorschach, s'intéressent au fonctionnement normal et pathologique et à la façon dont le psychisme s'organise durant l'enfance. La perspective psychanalytique adoptée s'inscrit en droite ligne des travaux de Vica Shentoub et du Groupe de recherche en Psychologie projective (université Paris V), auteurs du Manuel d'utilisation du TAT puis du Nouveau Manuel du TAT. Approche psychanalytique parus dans la même collection. Au choix théorique correspond une méthodologie : elle consiste à privilégier, par delà les thèmes, les modalités utilisées pour construire un jeu ou un récit à partir d'un matériel donné. Mais ce qui est valable pour l'adulte et l'adolescent n'est pas directement transposable chez l'enfant. Deux modèles de dépouillement, très voisins et susceptibles de recouplements, sont donc proposés. L'un, destiné aux techniques de jeu standardisées, dont le scéno-test, représente un prototype et permet de dégager une psychologie et une psychopathologie du jeu. L'autre, applicable à toute épreuve thématique faisant appel à la verbalisation, laisse entrevoir les germes de ce qui se noue et se dénoue avant l'adoption de procédés adultes. Il s'agit dans tous les cas de repérer l'installation des principales configurations défensives et leur articulation en fonction de l'état maturatif du sujet.

Les méthodes projectives en psychopathologie de l'enfant Jean-Yves Chagnon. 2021-09-22 Cet ouvrage synthétise les travaux sur la démarche d'analyse et d'interprétation des épreuves projectives en clinique et psychopathologie de l'enfant. Une première partie présente la théorie de la méthode projective spécifique à l'École de Paris et les principales épreuves projectives utilisées : Rorschach, épreuves thématiques,

méthodes de jeu, etc. Une seconde partie traite des principaux modes d'organisation psychopathologique (névroses, fonctionnements limites, psychoses, autismes) et des troubles rencontrés fréquemment en clinique infantile : dépressions, recours aux agirs, inhibitions.

Transsexualism Colette Chiland.2003-01-01 Transsexualism is a stimulating, proactive and important book. Colette Chiland does not back away from difficult issues. She forces all of us to look at our assumptions about t'sexualism and to re-examine what gender and sex really mean' - Christine Ware, author of Where I'd Was: Challenging Normalization in Psychoanalysis 'In a nutshell, the book offers a much-needed alternative view of transsexuality from a psychiatric and European point of view... Chiland's interesting and well presented book is a valued reminder of how different the same topic can appear in an alternative perspective' - Transgender Tapestry Colette Chiland exhibits a masterful and encyclopedic knowledge of transsexualism, drawing together the insights of depth psychology, psychoanalysis, history, anthropology and sociology for rethinking transsexualism in terms of identity, subjectivity and the wider socio-historical world. This book is written with considerable precision on complex, technical issues, whilst at the same time keeping the broader question of the relationship between transsexualism and society firmly in mind.

Cliniques du sujet âgé Benoît Verdon.2012-06-13 Amplement

marquée par le spectre de la maladie d'Alzheimer, ainsi que par les revendications de vieillesse évitée, ou sinon performante, réussie, l'avancée en âge mobilise tout à la fois la préoccupation de chacun et l'attention collective. Vieillir engage en effet intensément un regard sur soi, sur le chemin propre emprunté par chacun pour mener sa vie, et bientôt la conclure, dans une tension compliquée entre le constat d'un irréductible inachèvement des actes posés et le vœu d'un accomplissement des idéaux nourris, tension fort susceptible de participer au déploiement d'états de souffrance psychique importants. Formés à des degrés divers, de façon plus ou moins spécifique, à la psychologie clinique, à la psychopathologie, à la neuropsychologie cognitive, les psychologues qui interviennent auprès des adultes âgés, de leurs proches et des professionnels, sont sollicités pour des missions d'une très grande diversité en des lieux cliniques eux-mêmes fort différents. Cet ouvrage propose une réflexion argumentée sur les pratiques psychologiques auprès de l'adulte âgé rapportées par des praticiens de terrain et des enseignants-chercheurs. Articulant réflexions théoriques, méthodes cliniques, expériences concrètes de l'activité professionnelle, les divers chapitres qui le constituent illustrent la variété et la richesse des pratiques professionnelles du psychologue dans la société d'aujourd'hui. Benoît VERDON est professeur de psychologie clinique et de psychopathologie à l'Institut de psychologie, université Paris-Descartes.

Psychoanalysis and Projective Methods in Personality Assessment Benoît Verdon, Catherine Azoulay.2019-10-15 This unique book synthesizes the work of leading thinkers of the French School of psychoanalytical projective methods in personality assessment. The French School is a direct successor to Rorschach's and Murray's original approaches using the

Rorschach Test and the Thematic Apperception Test (TAT). Underlying this method is the idea of the coexistence of conscious and unconscious processes, of opposite instinctual pairs, and of agents that are ruled by conflicts (Freud). Transitional activity is seen as part of an intermediate space, a mediator space, and bearer of messages between the subject and the clinician (Winnicott). This book brings to life the important contributions of the French School, firstly exploring its theories and methods and then its clinical applications. Detailed case studies from different stages of life examine the psychopathology of everyday life with its severe and disabling states of suffering. Contemporary advances in research and clinical work are presented, and the groundbreaking early work of Nina Rausch de Traubenberg, Vica Shentoub, and Rosine Debray are also critically reread and discussed. Clinical tools adapted for clinicians and researchers in the appendices include a useful schema to facilitate the interpretation of the Rorschach and TAT together, a list of latent solicitations for the TAT, and the current version of the TAT Scoring Grid. This book is essential reading for clinical psychologists, psychiatrists, psychotherapists, researchers, and students interested in applying psychoanalytical theory to projective methods.

Nouveau manuel du TAT Françoise Brelet-Foulard, Catherine Chabert. 2003 Consacré à l'utilisation du TAT - Thematic Apperception Test - cet ouvrage, destiné aux étudiants en psychologie clinique et en psychopathologie ainsi qu'aux psychologues praticiens, expose la méthode d'analyse et d'interprétation élaborée à partir des travaux de Vica Shentoub et de ses successeurs. Cette épreuve projective, en complémentarité avec le test de Rorschach, se révèle particulièrement pertinente dans l'exploration approfondie du fonctionnement psychique individuel. C'est dans une perspective psychanalytique que les auteurs ont développé leurs travaux en présentant une théorie du processus-TAT et en analysant les différentes conduites

psychiques qui permettent au sujet de construire un récit. Les auteurs proposent une méthodologie rigoureuse pour l'utilisation clinique du test. Conçu comme un manuel, le livre s'attache à présenter : la spécificité du matériel TAT dans ses aspects manifestes et latents, dimension originale rarement prise en compte; la feuille de dépouillement (nouvelle version) qui permet de suivre la construction des histoires, de repérer finement les mécanismes de défense et leurs articulations; des illustrations cliniques qui montrent les modalités de fonctionnement de différentes organisations psychopathologiques.

Manuel du Rorschach et du TAT Catherine Chabert, Catherine Azoulay, Benoît Verdon, Estelle Louët. 2020-09-16 Cet ouvrage rassemble, en un seul volume, la présentation de deux tests projectifs majeurs, le Rorschach et le TAT. Il présente précisément et de manière approfondie, pour l'un et pour l'autre, la méthode de cotation, l'analyse et l'interprétation des données recueillies lors de la passation de ces tests par des patients. Tout en respectant leur singularité et en consacrant des développements substantiels à ces deux tests, il détaille les étapes essentielles de leur analyse différentielle et de leurs apports complémentaires.

L'examen psychologique au fil des âges .2013-10-23 Cet ouvrage, à la fois pratique et conceptuel, présente les aspects fondamentaux de l'examen psychologique. C'est au fil des âges que les contributeurs définissent les particularités des dispositifs selon cinq périodes de la vie : l'examen psychologique du bébé, de l'enfant, de l'adolescent, de l'adulte et du sujet vieillissant. Chacun des chapitres précise comment s'organisent les étapes de l'évaluation, quels en sont les enjeux et la méthodologie envisagée en fonction des cliniques étudiées. En prenant toujours appui sur des illustrations cliniques, l'ouvrage rend compte des différents domaines d'application de l'examen psychologique, en ayant pour objectif de présenter les épreuves incontournables et les apports méthodologiques essentiels de cette pratique.

Comprendre et interpréter les dessins d'enfants Georges Cagnet.2011-07-06 Pourquoi l'enfant dessine-t-il ? Ses premières traces recouvrent-elles une signification autre qu'un simple indicateur de développement ? Quelles sont les étapes de la représentation de l'être humain, miroir du devenir-soi ? A quelles organisations psychodynamiques renvoient-elles ? Comment s'expriment l'angoisse, la dépression, le vécu traumatique, les violences sexuelles à travers les productions graphiques ? Autant de questions sur lesquelles cet ouvrage apporte les éclairages de la recherche et de l'expérience clinique de son auteur, qui partage plus de vingt années d'étude et de pratique du dessin avec les enfants et les jeunes adolescents. L'originalité de ses recherches, particulièrement dans le parallèle fait entre l'analyse des procédés du discours dans le TAT et les procédés graphiques du dessin libre, son expérience clinique dans l'utilisation du dessin dans l'examen psychologique et en psychothérapie, ainsi que le désir de transmettre qui l'anime, font de ce document un incontournable pour tous ceux qui souhaitent comprendre et interpréter les réalisations graphiques des enfants.
