Big Data and Learning Analytics in Higher Education Ben Kei Daniel.2018-04-21 This book focuses on the uses of big data in the context of higher education. The book describes a wide range of administrative and operational data gathering processes aimed at assessing institutional performance and progress in order to predict future performance, and identifies potential issues related to academic programming, research, teaching and learning. Big data refers to data which is fundamentally too big and complex and moves too fast for the processing capacity of conventional database systems. The value of big data is the ability to identify useful data and turn it into useable information by identifying patterns and deviations from patterns.

The Peak Performing Organization Ronald J. Burke,Cary L. Cooper.2008-11-26 Building a peak performing organization is not easy or else everybody would be achieving this goal. Organizations today are facing heightened challenges in remaining competitive in a more demanding global business environment. New technology, customer expectation, outsourcing, low cost competitors and needs for both higher performance and more innovation from employees are only a few of these. In this book Burke and Cooper present an international collection of current research and new perspectives, examining why people and human resource management matter to the success of organizations and presenting examples of efforts to build more satisfying and effective organizations that have worked. The book includes chapters on organizational processes as well as organizational strategies and design. The former includes performance management, building employee engagement, developing psychological capital (e.g., resilience, self-esteem), managing talent, supporting teams and inspiring leaders at all levels of the organization. The latter tackles how to develop and sustain an ethical organizational culture, fostering the ability to work across cultures (cultural agility), employer branding, the sustainable organization and improving corporate governance practices. These chapters offer suggestions as to how organizations can embrace the need for continual change.

Research for Universal Health Coverage Christopher Dye,World Health Organization.2013 The World Health Report: research for universal health coverage focuses on the importance of research in advancing progress towards universal health coverage. In addition, it identifies the benefits of increased investment in health research by low- and middle-income countries using case studies from around the world, and proposes ways to further strengthen this type of research.

Advances in Human Factors, Business Management and Leadership Jussi Ilari Kantola,Salman Nazir,Vesa Salminen.2021-07-07 This book analyzes new theories and practical approaches for promoting excellence in human resource management and leadership. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development and social renewal. In particular, it presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. Gathering the proceedings of the AHFE 2021 Conferences on Human Factors, Business Management and Society, and Human Factors in Management and Leadership, held virtually on July 25-29, 2021, from USA, this book provides researchers and professionals with extensive information, practical tools and inspiring ideas for achieving excellence in a broad spectrum of business and societal activities.

Cervical, Breast and Prostate Cancer (Black and White) iConcept Press.2014-07-16 Cervical cancer and breast cancer are two of the most common cancers found in women. Cervical cancer is when cancer arises from the cervix. Early on there are typically no symptoms. Later symptoms

may include abnormal vaginal bleeding, pelvic pain or pain during sex. Breast cancer is when cancer develops from breast tissue. Signs of breast cancer may include a lump in the breast, a change in breast shape, dimpling of the skin, fluid coming from the nipple, or a red scaly patch of skin. Prostate cancer is when cancer develops in the prostate, a gland in the male reproductive system. It may initially cause no symptoms. In later stages it can cause difficulty urinating, blood in the urine, or pain in the pelvis, back or when urinating. This book provides some latest research and findings on breast cancer, cervical cancer and prostate cancer. The aim of this book is to serve as an important reference book for individuals working in biomedical laboratories, and for clinical professionals. There are totally 13 chapters in this book. Chapter 1 proposes an outlook on different endoscopic surgical procedures to treat cervical cancer, using traditional laparoscopy and robotics. Chapter 2 reviews the clinical results of carbon ion radiotherapy (C-ion RT) for uterine cervical cancer. Carbon-ion RT has been established as a safe short-term treatment for locally advanced uterine cervical cancer. Chapter 3 summarises chrysin inhibits proliferation, induces apoptosis and reduce angiogenesis in most tested cancer cells, including cervical cancer cells. Chapter 4 shows that involving physicians in the promotion of public health programs and initiatives is a viable option. Chapter 5 summarizes the published findings about the controversial role of METCAM, a cell adhesion molecule, in the progression of human breast cancer. Chapter 6 focuses on the biology of neu in breast cancer - the potential mechanisms that may contribute to tumor resistance and the numerous uncertainties that persist despite the bona-fide progress made in treating this particular subtype of breast cancer. Chapter 7 describes the mechanisms by which estrogen can exert its role in estrogenresponsive cells, focusing on specific aspects of estrogen receptor signaling. Moreover, this chapter shows how some of the proteins involved in estrogen receptor signaling can be used as predictive markers in breast cancer and describes a proposed clinical study related to the combined use of two drugs (bortezomib and tamoxifen) as therapeutic agents for estrogen receptor negative breast cancers. Chapter 8 summarizes the recent studies indicating that AngII facilitates breast cancer metastasis by contributing to the cross-talk between cancer cells and the host stroma. Chapter 9 focuses on a rationale pharmaceutical development along with a detailed understanding of biological effects so as to accelerate the incorporation of nanocarriers in breast cancer therapy. Chapter 10 summarizes the mTOR pathway and the clinical results in breast cancer treatment, relating them to results obtained using cultured MCF-7 breast cancer tamoxifen resistant sublines. Chapter 11 discusses how to develop a standard extraction method, yielding tomato products which are suitable for cell cultures, and enable product comparison of different tomato varieties. Chapter 12 describes principles and processes that are involved in investigating biological or clinical problems with nuclear magnetic resonance (NMR) based metabolomics - an approach that involves the global analysis of metabolites. The authors use prostate cancer as a case study to outline the processes, applications and potential of metabolomics for inform scientists and clinicians. Chapter 13 discusses the epidemiology, screening, diagnosis and treatment options of prostate cancer and its association with osteoporosis.

Proceedings of Sixth International Congress on Information and Communication Technology Xin-She Yang, Simon Sherratt, Nilanjan Dey, Amit Joshi. 2021-09-09 This book gathers selected high-quality research papers presented at the Sixth International Congress on Information and Communication Technology, held at Brunel University, London, on February 25-26, 2021. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The book is presented in four volumes.

Management and Leadership Skills that Affect Small Business Survival Jamey M. Long.2019-04-30 Have you ever wondered why many of the over 28 million small businesses in operation in the United States do not survive past the first five years? Is it the economy? The stock market? Or is it something else? Two years of research by Jamey Long on factors affecting small business survival revealed a direct relationship linking management and leadership skills. Management and Leadership Skills That Affect Small Business Survival presents the research leading to this discovery that focuses solely on small businesses in the United States and teaches them how to improve management and leadership skills so that they can survive past the historical five-year failure mark.

Gas, Water and Solid Waste Treatment Technology Zhien Zhang,Avelino Núñez-Delgado,Wenxiang Zhang.2021-09-01 This book introduces a variety of treatment technologies, such as physical, chemical, and biological methods for the treatment of gas emissions, wastewater, and solid waste. It provides a useful source of information for engineers and specialists, as well as for undergraduate and postgraduate students, in the areas of environmental science and engineering.

The Principles and Practice of Nurse Education Francis M. Quinn.2000 This book, now in its fourth edition, has been updated to include material focused on evidence-based practice. Covering the complete spectrum of education as applied to nursing and health care professions, this book maintains the blend of theoretical principles and practical applications that has proved successful over the preceding three editions. Among the important developments discussed are the replacement of UKCC and the four National Boards with a new Nursing and Midwifery Council, the initiative to establish the National Institute for Clinical Excellence and the move to incorporate clinical effectiveness into the clinical governance framework. Frank Quinn brings together all the major changes that apply to educators within the National Health Service, making this essential textbook an authoritative source of guidance, up-to-date information and reference.

Achtung-Panzer! Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Science Communication in South Africa Peter Weingart,Marina Joubert.2020-01-07 Why do we need to communicate science? Is science, with its highly specialised language and its arcane methods, too distant to be understood by the public? Is it really possible for citizens to participate meaningfully in scientific research projects and debate? Should scientists be mandated to engage with the public to facilitate better understanding of science? How can they best communicate their special knowledge to be intelligible? These and a plethora of related questions are being raised by researchers and politicians alike as they have become convinced that science and society need to draw nearer to one another. Once the persuasion took hold that science should open up to the public and these questions were raised, it became clear that coming up with satisfactory answers would be a complex challenge. The inaccessibility of scientific language and methods, due to ever increasing specialisation, is at the base of its very success. Thus, translating specialised knowledge to become understandable, interesting and relevant to various publics creates particular perils. This is exacerbated by the ongoing disruption of the public discourse through the digitisation of communication platforms. For example, the availability of medical knowledge on the internet and the immense opportunities to inform oneself about health risks via social media are undermined by the

manipulable nature of this technology that does not allow its users to distinguish between credible content and misinformation. In countries around the world, scientists, policy-makers and the public have high hopes for science communication: that it may elevate its populations educationally, that it may raise the level of sound decision-making for people in their daily lives, and that it may contribute to innovation and economic well-being. This collection of current reflections gives an insight into the issues that have to be addressed by research to reach these noble goals, for South Africa and by South Africans in particular.

Root Cause Analysis Mark A. Latino, Robert J. Latino, Kenneth C. Latino. 2019-06-26 This book comprehensively outlines what a holistic and effective Root Cause Analysis (RCA) system looks like. From the designing of the support infrastructure to the measuring of effectiveness on the bottom-line, this book provides the blueprint for making it happen. While traditionally RCA is viewed as a reactive tool, the authors will show how it can be applied proactively to prevent failures from occurring in the first place. RCA is a key element of any successful Reliability Engineering initiative. Such initiatives are comprised of equipment, process and human reliability foundations. Human reliability is critical to the success of a true RCA approach. This book explores the anatomy of a failure (undesirable outcome) as well as a potential failure (high risks). Virtually all failures are triggered by errors of omission or commission by human beings. The methodologies described in this book are applicable to any industry because the focus is on the human being's ability to think through why things go wrong, not on the industry or the nature of the failure. This book correlates reliability to safety as well as human performance improvement efforts. The author has provided a healthy balance between theory and practical application, wrapping up with case studies demonstrating bottom-line results. Features Outlines in detail every aspect of an effective RCA 'system' Displays appreciation for the role of understanding the physics of a failure as well as the human and system's contribution Demonstrates the role of RCA in a comprehensive Asset Performance Management (APM) system Explores the correlation between Reliability Engineering and Safety Integrates the concepts of Human Performance Improvement, Learning Teams, and Human Error Reduction approaches into RCA

Fuzzy Sets, Fuzzy Logic and Their Applications Michael Gr. Voskoglou. 2020-03-25 The present book contains 20 articles collected from amongst the 53 total submitted manuscripts for the Special Issue "Fuzzy Sets, Fuzzy Logic and Their Applications" of the MDPI journal Mathematics. The articles, which appear in the book in the series in which they were accepted, published in Volumes 7 (2019) and 8 (2020) of the journal, cover a wide range of topics connected to the theory and applications of fuzzy systems and their extensions and generalizations. This range includes, among others, management of the uncertainty in a fuzzy environment; fuzzy assessment methods of human-machine performance; fuzzy graphs; fuzzy topological and convergence spaces; bipolar fuzzy relations; type-2 fuzzy; and intuitionistic, interval-valued, complex, picture, and Pythagorean fuzzy sets, soft sets and algebras, etc. The applications presented are oriented to finance, fuzzy analytic hierarchy, green supply chain industries, smart health practice, and hotel selection. This wide range of topics makes the book interesting for all those working in the wider area of Fuzzy sets and systems and of fuzzy logic and for those who have the proper mathematical background who wish to become familiar with recent advances in fuzzy mathematics, which has entered to almost all sectors of human life and activity.

Clinical Supervision for Nurses Lisa Lynch, Kerrie Hancox, Brenda Happell, Judith Parker. 2009-03-16 Clinical supervision provides a framework within which nurses can reflect on their practice, enabling them to face professional challenges with renewed energy and a clearer perspective. Clinical Supervision for Nurses is an accessible, practical guide to clinical supervision itself and implementing the supervision process in nursing practice. Clinical Supervision for Nurses explores the role of clinical supervision, its contribution to practice development and implementation in practice. It discusses the range of approaches to clinical supervision and models of supervision, organisational readiness and other factors influencing success, legal and ethical issues, and perspectives of supervisors and the supervisees.

Battle Scarred Anthony Feinstein.2011 With only a few weeks' training in this field, Anthony Feinstein is thrust into the army's psychiatric unit. Battle Scarred is his revealing account of his experiences treating bossies soldiers and all manner of war -induced psychosis in a largely hostile environment. He starts out at 1 Military Hospital in Pretoria where his first patients are talking to the stars or claiming to be Jesus. Next, he is dispatched to Oshakati, home to the largest military base in the war zone, to screen troops for post-traumatic stress disorder. He steps into a world of alcoholism, insomnia, family violence and venereal disease. The consequences of war and the idiosyncrasies of army life present themselves in strange ailments. Chilling stories are told not only by the conscripts, but also by the wives of the permanent force soldiers who live on the base. During a stint at an outpost manned by Koevoet, Feinstein experiences the soldiers' shocking cruelty - and what it does to their psyche. This honest personal account sheds light on the widespread but seldom talked about fall-out from the Border War. It demands to be read, not only by the thousands of ex-soldiers still carrying the invisible scars, but by all South Africans.

Resilience in Education Marold Wosnitza,Francisco Peixoto,Susan Beltman,Caroline F. Mansfield.2018-06-22 This volume focuses on resilience in educational contexts which has emerged as an important field of research, with recent investigation into resilience of school students teachers, and post-secondary students and staff. The book integrates theoretically diverse viewpoints and research advancing relevant theory. It furthermore presents interventions which aim enhancing resilience in the educational context. The interplay between more basic research and actual practice in the classroom, university or workplace enriches relevant theory and research. Each chapter includes an explanation of how resilience is conceptualized in the research and the methods used to examine resilience. The chapters also provide a description of the context in which the research was conducted and how particular aspects of context influence the resilience process. Innovative approaches to exploring resilience are highlighted as well as directions for future research.

Parenting Across Cultures Helaine Selin.2013-11-19 There is a strong connection between culture and parenting. What is acceptable in one culture is frowned upon in another. This applies to behavior after birth, encouragement in early childhood, and regulation and freedom during adolescence. There are differences in affection and distance, harshness and repression, and acceptance and criticism. Some parents insist on obedience; others are concerned with individual development. This clearly differs from parent to parent, but there is just as clearly a connection to culture. This book includes chapters on China, Colombia, Jordan, Kenya, the Philippines, Thailand, Korea, Vietnam, Brazil, Native Americans and Australians, Argentina, Chile, Mexico, Ecuador, Cuba, Pakistan, Nigeria, Morocco, and several other countries. Beside this, the authors address depression, academic achievement, behavior, adolescent identity, abusive parenting, grandparents as parents, fatherhood, parental agreement and disagreement, emotional availability and stepparents.

Hospital-Based Health Technology Assessment Laura Sampietro-Colom,Janet Martin.2017-01-23 A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to

hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

Neonatal Tetanus Elimination Pan American Health Organization.2005 This publication is one of a series of practical field guides produced by the Pan American Health Organization with best practice guidance for immunisation programmes in the region. This guide describes the strategies that have made the elimination of neonatal tetanus in the Americas possible, highlighting the progress made in surveillance to identify and monitor high-risk areas as well as immunisation activities geared towards women of childbearing age who live in those areas. Sections cover: epidemiology, clinical aspects, case definitions and investigations, surveillance, data analysis, control in high risk areas, programme monitoring, vaccine storage and supply.

Transition to Professional Nursing Practice Rob Burton,Graham Ormrod.2020-09-30 Provides final year nursing students with comprehensive guidance on how to make the leap from student to registered nurse, helping you to master the skills needed to progress from supervised to professional practice. Packed with key information, theory and advice, this book covers essential topics such as leadership and management, decision-making, professional development, assessment, law and ethics. It also provides you with an insightful overview of global nursing, exploring the issues of nurse migration and outlining the specific requirements for registering as a nurse in countries outside of the UK. To further support your learning, the book includes engaging activities that encourage you to use critical reflection, real-life example scenarios to help improve your decision-making, and references to the author's personal experiences of professional development.

Handbook of the Recognition of Prior Learning Judy Harris (Lecturer),Joy Van Kleef,Christine Wihak.2014 This handbook consolidates the major research findings of experienced recognition of prior learning (RPL) researchers from around the world, identifying future research directions and drawing together evidence-based implications for policy and practice.

Nursing Research Geri LoBiondo-Wood,Judith Haber.2017-07-26 This easy-to-understand textbook offers a comprehensive introduction to nursing research concepts and methods. Evidence-based practice is emphasised throughout, with clear guidelines for evaluating research and applying scientific evidence to practice. Coverage includes qualitative and quantitative research, appraising and critiquing research, critical thinking, and clinical decision-making using research information.

Decolonizing Social Work Mel Gray,John Coates,Michael Yellow Bird,Tiani Hetherington.2016-05-13 Riding on the success of Indigenous Social Work Around the World, this book provides case studies to further scholarship on decolonization, a major analytical and activist paradigm among many of the world's Indigenous Peoples, including educators, tribal leaders, activists, scholars, politicians, and citizens at the grassroots level. Decolonization seeks to weaken the effects of colonialism and create opportunities to promote traditional practices in contemporary settings. Establishing language and cultural programs; honouring land claims, teaching Indigenous history, science, and ways of knowing; self-esteem programs, celebrating ceremonies, restoring traditional parenting approaches, tribal rites of passage, traditional foods, and helping and healing using tribal approaches are central to decolonization. These insights are brought to the arena of international social work still dominated by western-

based approaches. Decolonization draws attention to the effects of globalization and the universalization of education, methods of practice, and international 'development' that fail to embrace and recognize local knowledges and methods. In this volume, Indigenous and non-Indigenous social work scholars examine local cultures, beliefs, values, and practices as central to decolonization. Supported by a growing interest in spirituality and ecological awareness in international social work, they interrogate trends, issues, and debates in Indigenous social work theory, practice methods, and education models including a section on Indigenous research approaches. The diversity of perspectives, decolonizing methodologies, and the shared struggle to provide effective professional social work interventions is reflected in the international nature of the subject matter and in the mix of contributors who write from their contexts in different countries and cultures, including Australia, Canada, Cuba, Japan, Jordan, Mexico, New Zealand, South Africa, and the USA.

Social Welfare and Social Development in South Africa .2016

Skills Shortages in South Africa Johan Erasmus, Mignon Breier. 2009 Skills shortages in South Africa are widely seen as a major obstacle to the achievement of targeted economic growth rates. Yet there is some dispute as to the nature and extent of these shortages, given the large number of unemployed graduates. The case studies presented here explore the question of shortage in nine key professions and artisanal trades, and find evidence of skills scarcity in most fields. The case studies provide insight into the reasons for shortages and surpluses in relation to South Africa's own context and history. They also consider the international market for knowledge and skills, in which South African qualifications are highly prized. The monograph emanates from a study on sector specific research and related skills requirements commissioned by the South African Department of Labour in 2006. It formed part of a wider research project on scarce and critical skills related to the National Skills Development Strategy and the National Industrial Policy Framework of 2007, for which the Human Sciences Research Council led a research consortium comprising the Development Policy Research Unit at the University of Cape Town and the Sociology of Work Unit at the University of the Witwatersrand.

Industrial Engineering and Operations Management Antônio Márcio Tavares Thomé, Rafael Garcia Barbastefano, Luiz Felipe Scavarda, João Carlos Gonçalves dos Reis, Marlene Paula Castro Amorim. 2020-10-29 This volume gathers selected peer-reviewed papers presented at the XXVI International Joint Conference on Industrial Engineering and Operations Management (IJCIEOM), held on July 8-11, 2020 in Rio de Janeiro, Brazil. The respective chapters address a range of timely topics in industrial engineering, including operations and process management, global operations, managerial economics, data science and stochastic optimization, logistics and supply chain management, quality management, product development, strategy and organizational engineering, knowledge and information management, work and human factors, sustainability, production engineering education, healthcare operations management, disaster management, and more. These topics broadly involve fields like operations, manufacturing, industrial and production engineering, and management. Given its scope, the book offers a valuable resource for those engaged in optimization research, operations research, and practitioners alike.

Bioethics, Human Rights and Health Law 2e Ames Dhai, David Jan McQuoid-Mason. 2020-10-13 The book is intended to be an introductory guide for healthcare practitioners, legal practitioners, healthcare students and law students who are concerned with the delivery of healthcare services in South Africa. The book emphasises the ethical and legal aspects of healthcare in the country while making references to international human rights and ethical standards applicable to healthcare services. As the book is a guide, it does not deal exhaustively with the topics discussed. Instead it aims to give healthcare and legal practitioners some general guidelines. New edition update: - an updated ethics chapter that includes a robust section on African indigenous values in the context of health care. - a chapter on universal health care coverage and the NHI. - the legislation need to be

reviewed and updated. - a section on alternate dispute resolution. - the section on research also requires updating. - the case studies also need to be made more recent to include current contextually relevant issues like the Life Esidimeni Tragedy. Table of contents: Part 1: Introduction to Bioethics, Human Rights and Health Law: Principles and Practice - Background Chapter 1 Ethical concepts, theories and principles and their application to healthcare Chapter 2. Codes of healthcare ethics Chapter 3. Health and human rights Chapter 4. Health law - the basics Part 2: Specific Topics Chapter 5. Professionalism and the healthcare practitioner-patient relationship Chapter 6. Consent Chapter 7. Confidentiality Chapter 8. Medical malpractice and professional negligence Chapter 9. Reproductive health Chapter 10. Issues in genetics Chapter 11. Use of human tissue Chapter 12. End of life issues Chapter 13. HIV and AIDS Chapter 14. Resource allocation Chapter 15. Business ethics - the healthcare context Chapter 16. Human health and the environment Chapter 17. The ethics of research

Going to University Case, Jennifer, Marshall, Delia. 2018-02-09 Around the world, more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families, higher education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture and costing of public higher education abound from student activists, academics, parents, civil society and policy-makers. We know, from macro research, that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people, six years after they began their university studies. It traces how going to university influences not only their employment options, but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good, and it provides significant conclusions pertinent to anyone who works in - and cares about - universities.

Burns and Grove's The Practice of Nursing Research - E-Book Jennifer R. Gray, Susan K. Grove. 2020-07-21 NEW! Extensively updated content reflects the most current quantitative and qualitative approaches to nursing research, as well as the most current research tools and techniques used in the digital era. NEW! Updated research examples throughout incorporate the best examples of current literature, with increased emphasis on international examples to reflect the increasingly global nature of nursing research. NEW! Increased use of visuals includes the addition of more illustrations, tables, and boxes to help break up long passages of text for today's more visually oriented learners of all levels. NEW! Revised chapters offer improved clarity and usability in the areas of research problems and purpose, quantitative research design, quantitative methodology, and qualitative methodology. NEW! Increased emphasis on hospital magnet status reflects the effect this status has on improving nursing competency and quality outcomes. UPDATED! Coverage of certain qualitative research content has been de-emphasized to reflect the decreased use of certain methodologies (e.g., historical research) and to allow the introduction of additional methodologies that are growing in use.

Qualitative Research in Nursing and Healthcare Immy Holloway, Stephanie Wheeler. 2013-05-09 '...a wonderfully easy-to-follow text which manages to combine practical procedures with clear explanations of the underlying theoretical concepts.' Nursing Standard (from review of first edition) The third edition of this successful book incorporates recent developments in nursing research, with updates to every chapter. Abstract ideas in qualitative research are clearly explained and more complex theories are included. Structured into four clear sections, the book looks at initial stages, methods of data collection, qualitative approaches and analysis of collected data. Brand new chapter on Mixed Methods Research Considers a variety of approaches from Ethnography to Action Research Allows the reader to dip in and out depending on their choice of approach Detailed reference lists provide guidance for further reading Links research with real nursing practice through relevant examples throughout Professor Immy

Holloway has been at Bournemouth University since its inception and works in the School of Health and Social Care. Though now retired from full-time work, she still takes an active in teaching and PhD supervision. She wrote, edited and co-wrote several books in the field of qualitative research which have been translated into several languages and published articles in peer reviewed journals. Her latest book is A-Z of Qualitative Research in Healthcare. (2008) Oxford: Blackwell. Stephanie Wheeler, an academic with a nursing and health visiting background, is a specialist in healthcare ethics and was for many years chair of an ethics committee. She has given lectures on ethics all over the UK, organised research conferences in qualitative research and also published in this field.

Nursing Education Jennifer Boore,Patrick Deeny.2012-09-18 Nursing Education provides a strategic guide and practical focus to curriculum planning and development. It will help all those involved in the provision of nursing education to understand the issues involved at the different stages of preparing a nursing curriculum which: - meets both professional and academic requirements; - integrates theory and practice; - enables students to achieve the skills and competencies they need for professional practice; - includes different methods of teaching and learning; - provides clear guidance for student selection and assessment. Balancing theoretical principles with practical application, and linked closely to the NMC's 2010 standards for pre-registration nursing, Jennifer Boore and Pat Deeny illustrate clearly and accessibly how to develop tailored education programmes so that nurse educators and clinicians in practice can enable their students to provide up-to-date and appropriate patient care.

GMOs Anurag Chaurasia,David L. Hawksworth,Manoela Pessoa de Miranda.2020-11-30 This book covers a broad spectrum of topics related to GMOs and allied new gene-based technologies, biodiversity, and ecosystem processes, bringing together the contributions of researchers and regulators from around the world. The aim is to offer a clear view of the benefits and effects of genetically modified crops, insects, and other animals on the soil microbiome and ecological processes. Contributors examine issues related to the development of risk assessment procedures and regulations designed to maximize benefits while minimizing risks. Beyond the scientific challenges of GMOs, the book explores the broad and contentious terrain of ethical considerations. The contributors discuss such questions as the unintended, possibly unforeseen, consequences of releasing GMOs into ecosystems, and the likelihood that the full effects of GMOs could take years, even decades, of close monitoring to become evident. The importance of developing a precautionary approach is stressed. The final chapter describes the critical issues of governance and regulation of new and emerging gene-based technologies, as nations grapple with the consequences of adopting the Cartagena Protocol on Biosafety (CPB). The volume includes an extensive Annex which outlines legal perspectives on the state of GMO governance around the world, with more than 20 examples from nations in Africa, South and Central America, Asia, Australasia, and Europe.

Interpretive Description Sally Thorne.2016-06-03 This book is designed to guide both new and more seasoned researchers through the steps of conceiving, designing, and implementing coherent research capable of generating new insights in clinical settings. Drawing from a variety of theoretical, methodological, and substantive strands, interpretive description provides a bridge between objective neutrality and abject theorizing, producing results that are academically credible, imaginative, and clinically practical. Replete with examples from a host of research settings in health care and other arenas, the volume will be an ideal text for applied research programs.

Season of Hope Alan Hirsch,Sally Hines.2005 Offers an insight into the circumstances under which the policies were developed, implemented and reviewed, as well as a study of the outcomes. This book addresses questions such as: How could an organisation with no previous experience of governing accomplish a peaceful transition to democracy? How did they do it and where are they going?

Field Instruction in Social Work Education Roshni Nair, Srilatha Juvva, Vimla V. Nadkarni. 2019-10-28 A comprehensive guide to social work praxis, this book provides a clear conceptual understanding of fieldwork supervision in India. It elaborates on the dynamic components of fieldwork instruction - the methodologies and effective strategies, the supervisor-student-agency triad, challenges and the future. The volume underlines the importance of student mentoring and the imperative need to develop creative and competent strategies to make fieldwork education more responsive and effective. It also emphasises the need for the inclusion of social justice-oriented perspectives and approaches in fieldwork training in India. Instructive and anecdotal, the chapters in this volume reflect on the challenges which students and supervisors face on a regular basis in different environments while dealing with critical circumstances. The focus of the book is to delineate strategies and approaches which promote skill building and the ability in students to understand sociocultural contexts of the field and engage with them effectively. This volume will be an essential resource for social work educators, field practitioners and students of social work, law, public policy, sociology and social entrepreneurship.
