The papers included in the first volume are organized in the following topical sections: Art Karshmer lectures in access to mathematics, science and engineering; technology for inclusion and participation; mobile apps and platforms; accessibility of web and graphics; ambient assisted living (AAL) for aging and disability; the impact of PDF/UA on accessible PDF; standard tools and procedures in accessible e-book production; accessible e-learning - e-learning for accessibility/AT; inclusive settings, pedagogies and approaches in ICT-based learning for disabled and non-disabled people; digital games accessibility; user experience and emotions for accessibility (UEE4A).

Energy Options Impact on Regional Security Frano Barbir,Sergio Ulgiati.2010-09-02 Energy appears to be a fundamental driving force of economic and political strategies as well as planetary stability. Energy-related issues such as (1) the availability of new energy sources and viable technologies, (2) the disparity in access to energy sources, (3) the role of energy in our societies (energy societal metabolism), (4) the energy support to the life of our cities (where about half of world population is going to live very soon), and (5) the energy demand for food security all over the world, are “hot” problems that humans will have to face within the framework of sustainability (ecologically sound production and consumption patterns associated with socially acceptable life styles), in terms of policies, technological development and economic processes. A coherent energy strategy is required, addressing both energy supply and demand, security of access, development problems, equity, market dynamics, by also taking into account the whole energy lifecycle including fuel production, transmission and distribution, energy conversion, and the impact on energy equipment manufacturers and the end-users of energy systems. Issues of energy efficiency and rebound effect must also be taken into proper account. In the short term, the aim should be to achieve higher energy efficiencies and increased supply from local energy sources, in particular renewable energy sources.

Literary Research and Irish Literature Greg J. Matthews.2008-12-04 Literary Research and Irish Literature: Strategies & Sources explores primary and secondary research resources relevant to the study of Irish literary authors, works, genres, and history. Sources covered include general literary research guides; union library catalogs; print and online bibliographies; manuscripts and archives; microfilm and digitization projects; scholarly journals; periodicals, newspapers, and reviews; and electronic and Web resources. To ease comparison and evaluation of references, each chapter addresses how to choose and utilize research methods and tools to yield the most relevant information. This guide also examines the strengths and weaknesses of core and specialized electronic and print research tools and standard search techniques and _when appropriate_ covers the historical and cultural contexts and usability issues of unique reference sources. This volume, number 5 in the series, raises trenchant issues in Irish literary scholarship, such as the problem of defining what Irish literature is; gaps in criticism and secondary literature devoted to Irish literature; neglected areas of scholarly inquiry, including Irish literature by women and lesser-known writers; and the rewards of interdisciplinary research. It concludes with a brief consideration of a scenario illustrating how a scholar might use strategies and sources covered in the text to solve a research problem.

Patents and Cartographic Inventions Mark Monmonier.2017-03-28 This book explores the US patent system, which helped practical minded innovators establish intellectual property rights and fulfill the need for achievement that motivates inventors and scholars alike. In this sense, the patent system was a parallel literature: a vetting institution similar to the conventional academic-scientific-technical journal insofar as the patent examiner was both editor and peer reviewer, while the patent attorney was a co-author or ghost writer. In probing evolving notions of novelty, non-obviousness, and cumulative innovation, Mark Monmonier examines rural address guides, folding schemes, world map projections, diverse improvements of the terrestrial globe, mechanical route-following machines that anticipated the GPS navigator, and the early electrical you-are-here map, which opened the way for digital cartography and provided fodder for patent trolls, who treat the patent largely as a license to litigate.

Urban Social Listening Justin B. Hollander,Erin Graves,Henry Renski,Cara Foster-Karim,Andrew Wiley,Dibyendu Das.2016-08-16 This book analyses new software tools and social media data that can be used to explore the attitudes of people in urban places. It reports on the findings of several research projects that have have experimented with using microblogging data in conjunction with diverse quantitative and qualitative methods, including content analysis and advanced multivariate statistics. Applied researchers, planners and policy makers have only recently begun to explore the potential of Big Data to help understand social attitudes and to potentially inform local policy and development decisions. This book provides an original analysis into how Twitter can be used to describe the urban experience and people's perception of place, as well as offering significant implications for public policy. It will be of great interest to researchers in human geography, social media, cultural studies and public policy.

Life and Character of Peter Cooper Charles Edwards Lester.2013-09 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 edition. Excerpt: ... long, laborious life. In the course of my endeavors I have written and printed more than a million of documents, which I have sent to Congress, to the President and members of the Cabinet, and to all parts of our common country. ' The burden of my theme has been to show, that the Constitution has made it the imperative duty of Congress to take and hold the entire control of all, that should ever be allowed or used as the money of the nation. If the plan, set forth in a petition to Congress, to the President and his Cabinet on the 14th of December, 1862, in which I showed, that my ideas of finance were based on the opinions of such men as Franklin, Jefferson, Madison, Calhoun, Webster, etc., whose words and warnings I quoted--as I do in this document--had been adopted, the Government would have all the means it wanted in Treasury notes, and we should not have an enormous bonded debt in 1882. A MONUMENT TO PETER COOPER. The glory of the nation consists chiefly in the virtues and achievements of its founders, whether it be a monarchy, an empire, or a republic. It becomes the duty of all writers and teachers of the young, to inculcate the excellence of their examples, and to preserve a lively memory of their noble deeds. Where this duty is neglected, a great wrong is done to the dead, the living, and the future. For this purpose all histories should be written, and all monuments erected. To secure this result all nations have held anniversaries, commemorating with joy the days of their birth, and executed great works of art in oil, marble, and bronze, erected temples and columns, and, above all, institutions of science and learning, and, to those worthy of it, gorgeous mausoleums adorn churches and burial-places. No nation in the whole...

UFOs Karl Svozil.2023-08-01 Unidentified phenomena in space, in the Earth's atmosphere, and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons; in particular, scientists and the public at large need to know the basic facts, to be informed about the way evidence is recorded, and to understand the difference between reliable evidence and fiction, as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are demystified in the process, this is not an exercise in rumor-bashing. An open and at the same time critical mindset is the key. Many narratives and hypothesis appear implausible relative to our present state of knowledge; but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer-space engineers, or technologies so far known only from science fiction.

The Physics of the Law: Legal Systems Through the Prism of Complexity Science Pierpaolo Vivo, Daniel Martin Katz, J. B. Ruhl.2022-05-05 *Multidimensional Journal Evaluation* Stefanie Hausteil.2012-04-26 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions, which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

Information Resources in Toxicology, Volume 1: Background, Resources, and Tools Steve Gilbert, Asish Mohapatra, Sol Bobst, Antoinette Hayes, Sara T. Humes. 2020-05-16 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles Includes chapters with an emphasis on format such as government reports, general interest

publications, blogs, and audiovisuals Explores recent internet trends, web-based databases, and software tools in a section on the online environment Concludes with a miscellany of special topics such as laws and regulations, chemical hazard communication resources, careers and professional education, K-12 resources, funding, poison control centers, and patents Paired with Volume Two, which focuses on global resources, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

Computer Information Systems and Industrial Management Khalid Saeed,Václav Snášel.2014-10-25 This book constitutes the proceedings of the 13th IFIP TC 8 International Conference on Computer Information Systems and Industrial Management, CISIM 2014, held in Ho Chi Minh City, Vietnam, in November 2014. Text Mining with MATLAB® Rafael E. Banchs.2021-10-21 Text Mining with MATLAB® provides a comprehensive introduction to text mining using MATLAB. It is designed to help text mining practitioners, as well as those with little-to-no experience with text mining in general, familiarize themselves with MATLAB and its complex applications. The book is structured in three main parts: The first part, Fundamentals, introduces basic procedures and methods for manipulating and operating with text within the MATLAB programming environment. The second part of the book, Mathematical Models, is devoted to motivating, introducing, and explaining the two main paradigms of mathematical models most commonly used for representing text data: the statistical and the geometrical approach. Eventually, the third part of the book, Techniques and Applications, addresses general problems in text mining and natural language processing applications such as document categorization, document search, content analysis, summarization, question answering, and conversational systems. This second edition includes updates in line with the recently released “Text Analytics Toolbox” within the MATLAB product and introduces three new chapters and six new sections in existing ones. All descriptions presented are supported with practical examples that are fully reproducible. Further reading, as well as additional exercises and projects, are proposed at the end of each chapter for those readers interested in conducting further experimentation.

Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze.2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Society and Education Stavros Moutsios.2017-07-20 Society and Education explores the relation of society to education in Europe, as well as its comparative perspective towards overseas societies and their institutions. It is an enquiry into the social-historical institution of education and cross-cultural studies in Europe. Elaborating on the Castoriadian ontology, the book delves into the magma of social imaginary significations that characterise and associate pivotal epochs of the continent's history, Classical Greece and Modernity, and exemplifies their incarnation in educational systems and in the formation of the European and, in general, the Western comparative gaze. With a particular focus on our epoch, Postmodernity and globalisation, the study traces the pervasive dominance of capitalist significations in social institutions, forms, and activities, as well as in education and the way it is compared across countries. Nevertheless, as Moutsios suggests, the European tradition, notwithstanding its ideological usage by much of social sciences, contains an indissoluble critical and self-reflective dimension, which needs to be sustained and advanced in education and its cross-cultural comparison, perhaps, more than ever before. The book demonstrates the embeddedness of education in its cultural context and should, therefore, be of great interest to academics, researchers and postgraduate students who are involved with comparative education, the sociology and history of education, education policy, and European studies.

Contemporary British Ceramics and the Influence of Sculpture Laura Gray.2018-01-02 This book investigates how British contemporary artists who work with clay have managed, in the space of a single generation, to take ceramics from niche-interest craft to the pristine territories of the contemporary art gallery. This development has been accompanied (and perhaps propelled) by the kind of critical discussion usually reserved for the 'higher' discipline of sculpture. Ceramics is now encountering and colliding with sculpture, both formally and intellectually. Laura Gray examines what this means for the old hierarchies between art and craft, the identity of the potter, and the character of a discipline tied to a specific material but wanting to participate in critical discussions that extend far beyond clay.

Unsight Chance J. B. Stallworth.2012-09-28 Fashioned after Mary Higgins Clarke's with an urban contemporary spin, J.B. Stallworth's pocketbook thriller serial 'Fear Me Not' is back dropped against the colorful and often corrupt world of the powerful and elite in historic Baltimore, Maryland. The series begins with part one... Unsight Chance. Returning home is never easy. Especially if every sordid, embarrassing detail of your Hollywood coupling gone-bad is headlined on all the celebrity magazines, entertainment TV shows and gossip blogs. That's what Nicole Harkem faces as she sheepishly returns home to Baltimore after ending her eight-year marriage to famed rap star Gynesis. Nicole soon realizes that going back means confronting her past and mending unkempt relationships with family, old friends and enemies alike; making starting over a challenge. However, thing gets even more complicated for the brokenhearted Nicole when a popular transgender nightclub performer is found murdered. Ironically, the trail leads to Nicole's former high school chum and mayoral candidate, Councilman Madison Shelly. Unexpectedly, she finds herself caught up in a web of secrets, corruption and lies as she and her buddy-stylist, Jared race to clear Madison's name in time... before they too end up in the morgue. Unsight Chance is full of colorful, engaging characters, plot twist and turns that serves up enough wit and suspense while leaving readers hungry for more in the follow-up installment... When It Rains, It Pours.

If you are looking for Indie books, Bibliotastic provides you just that for free. This platform is for Indie authors and they publish modern books. Though they are not so known publicly, the books range from romance,

historical or mystery to science fiction that can be of your interest. The books are available to read online for free, however, you need to create an account with Bibliotastic in order to download a book. The site they say will be closed by the end of June 2016, so grab your favorite books as soon as possible. As archive means, you can retrieve books from the Internet Archive that are no longer available elsewhere. This is a not for profit online library that allows you to download free eBooks from its online library. It is basically a search engine for that lets you search from more than 466 billion pages on the internet for the obsolete books for free, especially for historical and academic books. Beside each of these free eBook titles, you can quickly see the rating of the book along with the number of ratings. This makes it really easy to find the most popular free eBooks. eBook Writing: This category includes topics like cookbooks, diet books, self-help, spirituality, and fiction. Likewise, if you are looking for a basic overview of a resume from complete book, you may get it here in one touch. Since it's a search engine, browsing for books is almost impossible. The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. Large photos of the Kindle books covers makes it especially easy to quickly scroll through and stop to read the descriptions of books that you're interested in. You can search and download free books in categories like scientific, engineering, programming, fiction and many other books. No registration is required to download free e-books. Browse the free eBooks by authors, titles, or languages and then download the book as a Kindle file (.azw) or another file type if you prefer. You can also find ManyBooks' free eBooks from the genres page or recommended category. Want help designing a photo book? Shutterfly can create a book celebrating your children, family vacation, holiday, sports team, wedding albums and more.
