Innovations in Magazine Publishing Simon Das,David Stam,Andrew Blake.2021-05-05 This book examines the key developments in the UK magazine industry since 2014 and explains in detail how the business has innovated to survive. Innovations in Magazine Publishing explores the key issues that publishers and editors have had to grapple with in recent years and demonstrates how they have changed their business models and encouraged innovation and creativity. Written in an engaging and accessible style, the authors and contributors have drawn on years of industry expertise and contacts to examine the massive changes that have taken place in the areas of content creation and advertising in the last decade. Beginning with a highly useful summary of UK magazine publishing history, the book then provides a detailed focus on how magazines have had to adapt to a declining revenue picture in both copy and advertisement sales. This discussion considers changes in ownership and the supply chain, mutual dependency on social media, the rapid growth of the independent sector, investing in brand and product extensions, and how media companies themselves have changed to meet the demands of the new era. The important issue of ethnic diversity within the UK publishing industry is addressed and the introduction also includes a discussion of the effects of the Covid-19 pandemic on the industry, and how the magazine business will need to respond to whatever the future may bring. This comprehensive overview of the current state of the industry is a vital resource for students, researchers and professionals in magazine journalism, as well as for those studying media and journalism studies more generally.

The Leader in Me Stephen R. Covey.2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

The Crisis of Connection Niobe Way,Alisha Ali,Carol Gilligan,Pedro Noguera.2020-01-07 Uncovers the roots and consequences of and offers solutions to the widespread alienation and disconnection that beset modern society Since the beginning of the 21st century, people have become increasingly disconnected from themselves, each other, and the world around them. A “crisis of connection” stemming from growing alienation, social isolation,

and fragmentation characterizes modern society. The signs of this crisis of connection are everywhere, from decreasing levels of empathy and trust, to burgeoning cases of suicide, depression and loneliness. The astronomical rise in inequality around the world has contributed to the critical nature of this moment. To delve into the heart of the crisis, leading researchers and practitioners draw from the science of human connection to tell a five-part story about its roots, consequences, and solutions. In doing so, they reveal how we, in modern society, have been captive to a false story about who we are as human. This false narrative that takes individualism as a universal truth, has contributed to many of the problems that we currently face. The new story now emerging from across the human sciences underscores our social and emotional capacities and needs. The science also reveals the ways in which the privileging of the self over relationships and of individual success over the common good as well as the perpetuation of dehumanizing stereotypes have led to a crisis of connection that is now widespread. Finally, the practitioners in the volume present concrete solutions that show ways we can create a more just and humane world. In a time of social distancing and enforced isolation, it is more important than ever to find ways to bridge the gaps among individuals and communities. The Crisis of Connection illuminates concrete pathways to enhancing our awareness of our common humanity, and offers important steps to coming together in unity, even across distances.

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse.2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children. 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of

happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Spectrum Sharing in Wireless Networks John D. Matyjias, Sunil Kumar, Fei Hu. 2016-11-17 Spectrum Sharing in Wireless Networks: Fairness, Efficiency, and Security provides a broad overview of wireless network spectrum sharing in seven distinct sections: The first section examines the big picture and basic principles, explaining the concepts of spectrum sharing, hardware/software function requirements for efficient sharing, and future trends of sharing strategies. The second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing. The authors introduce a new coexistence and sharing scheme for multi-hop networks, describe the space-time sharing concept, introduce LTE-U, and examine sharing in broadcast and unicast environments. They then talk about different cooperation strategies to achieve mutual benefits for primary users (PU) and secondary users (SU), discuss protocols in a spectrum sharing context, and provide different game theory models between PUs and SUs. The third section explains how to model the interactions of PUs and SUs, using an efficient calculation method to determine spectrum availability. Additionally, this section explains how to use scheduling models to achieve efficient SU traffic delivery. The subject of the fourth section is MIMO-oriented design. It focuses on how directional antennas and MIMO antennas greatly enhance wireless network performance. The authors include a few chapters on capacity/rate calculations as well as beamforming issues under MIMO antennas. Power control is covered in the fifth section which also describes the interference-aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios. The sixth section provides a comprehensive look at security issues, including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes. The seventh and final section covers issues pertaining to military applications and examines how the military task protects its data flows when sharing the spectrum with civilian applications.

The Race Controversy in American Education [2 volumes] Lillian Dowdell Drakeford Ph.D. 2015-07-28 In this unique two-volume work, expert scholars and practitioners examine race and racism in public education, tackling controversial educational issues such as the school-to-prison pipeline, charter schools, school funding, affirmative action, and racialized curricula. This work is built on the premise that recent efforts to advance color-blind, race-neutral educational policies and reforms have not only proven ineffective in achieving racial equity and equality of educational opportunities and outcomes in America's public schools but also exacerbated existing inequalities. That point is made through a collection of essays that examine the consequences of racial inequality on the school experience and success of students of color and other historically marginalized populations. Addressing K-12 education and higher education in historically black as well as predominantly white institutions, the work probes the impact of race and racism on education policies and reforms to determine the role schools, school processes, and school structures play in the perpetuation of racial inequality in American education. Each volume validates the impact of race on teaching and learning and exposes the ways in which racism manifests itself in U.S. schools. In addition, practical recommendations are presented that may be used to confront and eradicate racism in education. By exposing what happens when issues of race and racism are marginalized or ignored, this collection will prepare readers to resist—and perhaps finally overcome—the racial inequality that plagues America's schools.

The American Nonvoter Lyn Ragsdale, Jerrold G. Rusk. 2017-04-03 A diverse body of research exists to explain why eligible voters don't go to the polls on election day. Theories span from the psychological (nonvoters have limited emotional engagement with politics and therefore lack motivation), to the social (politics is inherently social and nonvoters have limited networks), and the personal (nonvoters tend to be young, less educated, poor, and highly mobile). Other scholars suggest that people don't vote because campaigns are uninspiring. This book poses a new theory: uncertainty about the national context at the time of the election. During times of national crisis, when uncertainty is high, citizens are motivated to sort through information about each candidate to figure out which would best mitigate their uncertainty. When external uncertainty is low, however, citizens spend less time learning about candidates and are equally unmotivated to vote. The American Nonvoter examines how uncertainty regarding changing economic conditions, dramatic national events, and U.S. international interventions influences people's decisions whether to vote or not. Using rigorous statistical tools and rich historical stories, Lyn Ragsdale and Jerrold G. Rusk test this theory on aggregate nonvoting patterns in the United States across presidential and midterm elections from 1920 to 2012. The authors also challenge the stereotype of nonvoters as poor, uneducated and apathetic. Instead, the book shows that nonvoters are, by and large, as politically knowledgeable as voters, but see no difference between candidates or view them negatively.

Solution Protocols to Festering Island Disputes Godfrey Baldacchino. 2017-04-28 Since the coming into force of the United Nations Law of the Sea, states have been targeting outlying islands to expand their exclusive economic zones, simultaneously stirring up strident nationalism when such

plans clash with those of neighbouring states. No such actions have brought the world closer to the brink of war than the ongoing face-off between China and Japan over the Diaoyu/Senkaku islands, an uninhabited archipelago in the East China Sea. In this timely and original book, Godfrey Baldacchino provides a detailed exploration of seven tried and tested solution protocols that have led to innovative 'win-win' solutions to island disputes over the last four centuries. A closer look at the circumstances and processes that brought contending regional powers to an honourable, even mutually advantageous, settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu/Senkaku islands need not conclude in a 'zero-sum' or 'winner takes all' solution, as is the likely outcome of both open conflict and international arbitration. The book will be of interest to scholars and practitioners concerned with the festering Diaoyu/Senkaku dispute, as well as students, scholars and policy specialists in geography, geopolitics, international relations, conflict studies, island studies, Asian studies and history.
