*Food Security and Safety* Olubukola Oluranti Babalola.2021-09-01 This book focuses on food security and safety issues in Africa, a continent presently challenged with malnutrition and food insecurity. The continuous increase in the human population of Africa will lead to higher food demands, and climate change has already affected food production in most parts of Africa, resulting in drought, reduced crop yields, and loss of livestock and income. For Africa to be food-secure, safe and nutritious food has to be available, well-distributed, and sufficient to meet people's food requirements. Contributors to Food Security and Safety: African Perspectives offer solutions to the lack of adequate safe and nutritious food in sub-Saharan Africa, as well as highlight the positive efforts being made to address this lack through a holistic approach. The book discusses the various methods used to enhance food security, such as food fortification, fermentation, genetic modification, and plant breeding for improved yield and resistance to diseases. Authors emphasize the importance of hygiene and food safety in food preparation and preservation, and address how the constraints of climate change could be overcome using smart crops. As a comprehensive reference text, Food Security and Safety: African Perspectives seeks to address challenges specific to the African continent while enhancing the global knowledge base around food security, food safety, and food production in an era of rapid climate change.

**Tabletop and Full-scale Emergency Exercises for General Aviation, Non-hub, and Small Hub Airports** James Fielding Smith,Ricardo E. Garcia,John M. Sawyer (Transportation consultant),Kimberly A. The committee that produced the report called such a program essential to ensuring airport security, efficiency, safety, and environmental compatibility.

**Runway Safety** Iain McCreary.2010-10-31 This report is the single best analysis of runway safety, FOD, and on-runway strikes presently available. It is data driven, values neutral, and draws together information from airlines, airports, regulators, and service/technology. It, for the first time, knits together an industry-wide perspective that allows like-for-like comparison of runway safety incidents, including incursions and excursions.Chapters detail the characteristics and statistics behind strike damage; direct and indirect costs; expected costs for the leading airlines and airports; a step-by-step airport investment case; an airline investment case; and details on the minimum required performance standards for scanning systems.The results are compelling and, for many readers, surprising. Long held assumptions about what is and is not important, about what works to reduce risks and what does not, are turned upside down. Structured for easy reading, and quickly digestible with tools to support your own analyses, the report is quickly becoming 'required reading' in the aviation community. Whether read by a regulator, airport operator, airline, service provider, or technology vendors, this report has the answers to your questions about FOD, bird strikes, and automated runway scanning.

**Using Evidence in Policy and Practice** Ian Goldman,Mine Pabari.2020-06-10 This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa.
