Life and Research Paris H. Grey, David G.

Oppenheimer.2022-10-26 Scientists embarking on a career in bench research need to develop an array of technical skills specific to lab settings. But beyond these skills they also need to learn what it means to work productively in a lab, how to manage their professional development, and how to achieve work-life balance. In this guidebook, an expert lab manager and a long-time principal investigator offer graduate students, postdocs, and other early-career scientists practical advice for developing the professional and personal skills needed to survive and thrive in lab settings. With an emphasis on issues such as healthy relationships, professional behavior, and self-care, the book coaches scientists on managing stress and avoiding burnout, factors that often interfere with the ability to carry out basic research and academic responsibilities. It also shows them how to deploy social and communication skills effectively in particular

aspects of lab life, from managing research projects and collaborating with labmates to writing about their work and attending professional conferences. Born out of the authors' social media accounts, most notably @TheLabMentor and @youinthelab, the book extends their platform for advising lab workers at all levels and welcomes early-career researchers into this friendly and supportive community--

Scientific Teaching Jo Handelsman, Sarah Miller, Christine Pfund.2007 Seasoned classroom veterans, pre-tenured faculty, and neophyte teaching assistants alike will find this book invaluable. HHMI Professor Jo Handelsman and her colleagues at the Wisconsin Program for Scientific Teaching (WPST) have distilled key findings from education, learning, and cognitive psychology and translated them into six chapters of digestible research points and practical classroom examples. The recommendations have been tried and tested in the National Academies Summer Institute on Undergraduate Education in Biology and through the WPST. Scientific Teaching is not a prescription for better teaching. Rather, it encourages the reader to approach teaching in a way that captures the spirit and rigor of scientific research and to contribute to transforming how students learn science.

Fight the Tower Kieu Linh Caroline Valverde,Wei Ming Dariotis.2019-10-11 Asian American women scholars experience shockingly low rates of tenure and promotion because of the ways they are marginalized by intersectionalities of race and gender in academia. Fight the Tower shows that Asian American women stand up for their rights and work for positive change for all within academic institutions. The essays provide powerful portraits, reflections, and analyses of a population often rendered invisible by the lies sustaining intersectional injustices to operate an oppressive system.
