Caves in Context Knut Andreas Bergsvik, Robin Skeates.2012 *Caves in Context* provides the thriving inter-disciplinary field of cave studies with a European-scale survey of current research in cave archaeology. It is unified by a contemporary theoretical emphasis on the cultural significance and diversity of caves over space and time. Caves and rockshelters are found all over Europe, and have frequently been occupied by human groups, from prehistory right up to the present day. Some appear to have only traces of short occupations, while others contain deep cultural deposits, indicating longer and multiple occupations. Above all, there is great variability in their human use, both secular and sacred. The aim of this book is to explore the multiple significances of these natural places in a range of chronological, spatial, and cultural contexts across Europe. The volume demonstrates, through a diversity of archaeological approaches and examples, that cave studies, whilst necessarily focussed, can also be of significance to wider, contemporary, archaeological research agendas, particularly when a contextual approach is adopted. The book is also of relevance to other scholars working in the related fields of speleology, earth sciences, landscape studies, and anthropology, which together comprise the inter-disciplinary field of cave studies.

Animals in Greek and Roman Religion and Myth Patricia A. Johnston, Attilio Mastrocinque.2016-08-17 This volume brings together a variety of approaches to the different ways in which the role of animals was understood in ancient Greco-Roman myth and religion, across a period of several centuries, from Preclassical Greece to Late Antique Rome. Animals in Greco-Roman antiquity were thought to be intermediaries between men and gods, and they played a pivotal role in sacrificial rituals and divination, the foundations of pagan religion. The studies in the first part of the volume examine the role of the animals in sacrifice and divination. The second part explores the similarities between animals, on the one hand, and men and gods, on the other. Indeed, in antiquity, the behaviour of several animals was perceived to mirror human behaviour, while the selection of the various animals as sacrificial victims to specific deities often was determined on account of some peculiar habit that echoed a special attribute of the particular deity. The last part of this volume is devoted to the study of animal metamorphosis, and to this end a number of myths that associate various animals with transformation are examined from a variety of perspectives.

Playing with Form Alexander Alland.1983 The development of the child's ability to draw is an inherently fascinating and complex subject. Many theories have been proposed to explain this development, but until now no one has undertaken a cross-cultural, controlled study of children in the act of drawing. *Playing with Form* is the first empirical study of children drawing in diverse cultures. Alexander Alland, Jr. spent eight months observing and filming children six cultures - Japan, Bali, Taiwan, Ponape, France, and the U.S. - as they drew. Attempting to determine the accuracy of current generalizations about the development of drawing skills as well as to understand the step-by-step process of drawing, Alland amassed 240 drawings (100 of which are reproduced here) by children ranging from two to eight years old. The author uses this wealth of primary material to dispute much current thinking about children's drawing, particular theories about specific universal stages of development. While he does suggest some general rules which underlie the process of drawing, Alland argues that cultural differences reflect rules which are specific to the culture in which children play with form. An invaluable first step toward understanding the exact role culture plays in the development of style in children's drawing, *Playing with Form* will be of fundamental interest to anthropologists, developmental psychologists, art historians, and elementary school teachers. -- back cover

Far from My Father Véronique Tadjo.2014-04-07 To attain some sort of universal value, Véronique Tadjo has said, a piece of work has to go deep into the particular in order to reveal our shared humanity. In *Far from My Father*, the latest novel from this internationally acclaimed author, a woman returns to the Côte d'Ivoire after her father's death. She confronts not only unresolved family issues that she had left behind but also questions about her own identity that arise amidst the tensions between traditional and modern worlds. The drama that unfolds tells us much about the evolving role of women, the legacy of polygamy, and the economic challenges of daily life in Abidjan. On a more autobiographical level, the author depicts a daughter's efforts to come to terms with what she knew and did not know about her father. Set against the backdrop of civil strife that has wracked the Côte d'Ivoire since the turn of the century, this story shows Tadjo's remarkable ability to inhabit a character's inner world and emotional landscape while creating a narrative of great historic and cultural dimensions. What Is Art For? Ellen Dissanayake.2015-09-01 Every human society displays some form of behavior that can be called "art," and in most societies other than our own the arts play an integral part in social life. Those who wish to understand art in its broadest sense, as a universal human endowment, need to go beyond modern Western elitist notions that disregard other cultures and ignore the human species' four-million-year evolutionary history. This book offers a new and unprecedentedly comprehensive theory of the evolutionary significance of art. Art, meaning not only visual art, but music, poetic language, dance, and performance, is for the first time regarded from a biobehavioral or ethical viewpoint. It is shown to

be a biological necessity in human existence and fundamental characteristic of the human species. In this provocative study, Ellen Dissanayake examines art along with play and ritual as human behaviors that “make special,” and proposes that making special is an inherited tendency as intrinsic to the human species as speech and toolmaking. She claims that the arts evolved as means of making socially important activities memorable and pleasurable, and thus have been essential to human survival. Avoiding simplism and reductionism, this original synthetic approach permits a fresh look at old questions about the origins, nature, purpose, and value of art. It crosses disciplinary boundaries and integrates a number of diverse fields: human ethology; evolutionary biology; the psychology and philosophy of art; physical and cultural anthropology; “primitive” and prehistoric art; Western cultural history; and children’s art. The final chapter, “From Tradition to Aestheticism,” explores some of the ways in which modern Western society has diverged from other societies—particularly the type of society in which human beings evolved—and considers the effects of the aberrance on our art and our attitudes toward art. This book is addressed to readers who have a concerned interest in the arts or in human nature and the state of modern society.

Gardens of the Roman Empire Wilhelmina F. Jashemski,Kathryn L. Gleason,Kim J. Hartswick,Amina-Aïcha Malek.2017-12-28 In *Gardens of the Roman Empire*, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. In the Company of Men Véronique Tadjo.2021-02-23 WINNER OF THE LOS ANGELES TIMES BOOK PRIZE Harper’s Bazaar: Best Book of the Year Boston Globe: Best Book of the Year Ms. Magazine: Best Feminist Book of the Year Words Without Borders: Best Translated Book of the Year Drawing on real accounts of the Ebola outbreak that devastated West Africa, this poignant, timely fable reflects on both the strength and the fragility of life and humanity’s place in the world. Two boys venture from their village to hunt in a nearby forest, where they shoot down bats with glee, and cook their prey over an open fire. Within a month, they are dead, bodies ravaged by an insidious disease that neither the local healer’s potions nor the medical team’s treatments could cure. Compounding the family’s grief, experts warn against touching the sick. But this caution comes too late: the virus spreads rapidly, and the boys’ father is barely able to send his eldest daughter away for a chance at survival. In a series of moving snapshots, Véronique Tadjo illustrates the terrible extent of the Ebola epidemic, through the eyes of those affected in myriad ways: the doctor who tirelessly treats patients day after day in a sweltering tent, protected from the virus only by a plastic suit; the student who volunteers to work as a gravedigger while universities are closed, helping the teams overwhelmed by the sheer number of bodies; the grandmother who agrees to take in an orphaned boy cast out of his village for fear of infection. And watching over them all is the ancient and wise Baobab tree, mourning the dire state of the earth yet providing a sense of hope for the future. Acutely relevant to our times in light of the coronavirus pandemic, *In the Company of Men* explores critical questions about how we cope with a global crisis and how we can combat fear and prejudice.

The Acharnians Aristophanes.2021-04-25 *Acharnians* is the earliest of the existent comedies of Aristophanes, produced in 425 BCE. It is a direct attack on the folly of war. The story deals with an Athenian farmer, Dikaiopolis, who surprisingly obtains a private peace treaty with the Spartans and enjoys the benefits of peace despite resistance from some of his fellow Athenians. This drama is celebrated for its absurd humor and its innovative appeal for an end to the Peloponnesian War.

Brave New War John Robb.2008-04-28 For my money, John Robb, a former Air Force officer and tech guru, is the futurists' futurist. —Slate The counterterrorism expert John Robb reveals how the same technology that has enabled globalization also allows terrorists and criminals to join forces against larger adversaries with relative ease and to carry out small, inexpensive actions—like sabotaging an oil pipeline—that generate a huge return. He shows how combating the shutdown of the world’s oil, high-tech, and financial markets could cost us the thing we’ve come to value the most—worldwide economic and cultural integration—and what we must do now to safeguard against this new method of warfare.

Medieval London Houses John Schofield.2003 A comprehensive study of domestic buildings in London from about 1200 to the Great Fire in 1666. John Schofield describes houses and such related buildings as almshouses, taverns, inns, shops and livery company halls, drawing on evidence from surviving buildings, archaeological excavations, documents, panoramas, drawn surveys and plans, contemporary descriptions, and later engravings and photographs. Schofield presents an overview of the topography of the medieval city, reconstructing its streets, defences, many religious houses and fine civic buildings. He then provides details about the mediaeval and Tudor London house: its plan, individual rooms and spaces and their functions, the roofs, floors and windows, the materials of construction and decoration, and the internal fittings and furniture. Throughout the text he discusses what this evidence tells us about the special restrictions or pleasures of living in the capital; how certain innovations of plan and construction first occurred in London before spreading to other towns; and how notions of privacy developed. in the City of London and its immediate environs.

Land and Taxes in Ptolemaic Egypt .2017-10-12 This book provides the first edition with an extensive introduction and full commentary of a unique

land survey written on papyrus in Greek which derives from that area of southern (Upper) Egypt known as the Apollonopolite (or Edfu) nome and is now preserved in Copenhagen. Dating from the late second century BC, this survey provides a new picture of both landholding and taxation in the area which differs significantly from that currently accepted. The introduction sets this new evidence in its contemporary context, drawing particular attention to what it reveals about the nature of the relations of the Ptolemaic royal administration with local grandees, Egyptian temples and the army. No student of Hellenistic Egypt can afford to ignore this text, which importantly extends our knowledge of Upper Egypt under the Ptolemaic kings and involves some modification to the prevailing picture of landholding in Hellenistic Egypt.

Medieval Heraldry Terence Wise.2012-04-20 Coats of arms were at first used only by kings and princes, then by their great nobles, but by the mid-13th century arms were being used extensively by the lesser nobility, knights and those who later came to be styled gentlemen. In some countries the use of arms spread even to merchants, townspeople and the peasantry. From the mundane to the fantastic, from simple geometric patterns to elaborate mythological beasts, this fascinating work by Terence Wise explores the origins and appearance of medieval heraldic devices in an engagingly readable style accompanied by numerous illustrations including eight full page colour plates by Richard Hook.

If you're already invested in Amazon's ecosystem, its assortment of freebies are extremely convenient. As soon as you click the Buy button, the ebook will be sent to any Kindle ebook readers you own, or devices with the Kindle app installed. However, converting Kindle ebooks to other formats can be a hassle, even if they're not protected by DRM, so users of other readers are better off looking elsewhere. Another site that isn't strictly for free books, Slideshare does offer a large amount of free content for you to read. It is an online forum where anyone can upload a digital presentation on any subject. Millions of people utilize SlideShare for research, sharing ideas, and learning about new technologies. SlideShare supports documents and PDF files, and all these are available for free download (after free registration). We provide a wide range of services to streamline and improve book production, online services and distribution. For more than 40 years, \$domain has been providing exceptional levels of quality pre-press, production and design services to book publishers. Today, we bring the advantages of leading-edge technology to thousands of publishers ranging from small businesses to industry giants throughout the world. Free-eBooks is an online source for free ebook downloads, ebook resources and ebook authors. Besides free ebooks, you also download free magazines or submit your own ebook. You need to become a Free-EBooks.Net member to access their library. Registration is free. In some cases, you may also find free books that are not public domain. Not all free books are copyright free. There are other reasons publishers may choose to make a book free, such as for a promotion or because the author/publisher just wants to get the information in front of an audience. Here's how to find free books (both public domain and otherwise) through Google Books.
