The Religious Factor in Russia's Foreign Policy Alicja Curanović.2012-03-15 This book examines how religion interacts with Russian foreign policy, arguing that religion is an important and neglected factor in shaping Russia's outlook towards international relations. It surveys the importance of religion for social life in Russia, both historically and at present, and considers a wide range of Russian attitudes which are affected by religion - such as Russian nationalism, notions of Slavic solidarity, the divine mission of Russian Orthodox civilisation, Russian imperialism, Russia's special approach towards Islam. The book discusses how religious organizations, especially the Russian Orthodox Church, operate in international relations, pursuing their own interests and those of the Russian state; explores how religious ideas and culture linked to religion impinge on Russian attitudes and identity, and thereby affect policy; and demonstrates how policy influenced by religion impacts on Russian foreign policy in practice in a wide range of examples, including Russia's relations with other orthodox countries, non-orthodox Western countries, Muslim countries, Israel and the Vatican.

Advertising in MENA Goes Digital Ilhem Allagui.2019-03-29 An inside story of local, regional and global advertising in the Middle East. Grounded in empirical research and theories, this book explores the evolution of advertising practices, audiences, digital

media and communication technologies in increasingly complex MENA environments. Advertising in MENA Goes Digital draws on empirical research and theories to explore how the adoption of digital technology in the Middle East and North Africa, through information and communication technologies, social media and mobile, have shaped creative advertising solutions. Through key case studies of marketing in the pan-Arab market from regional and global brands as Procter & Gamble, Olay, Vimto, and MTV Arabia, the book sheds light on the intricate relationship between technological and societal development and advertising practice. It examines cultural constituents such as humor, religion and gender, political advertising driven by the new wave of democracy in the region and digital activism, technological and digital transformations and the economic ways advertising support new media start-ups. Supported by examples and campaigns, the book discusses the way global or regional brands standardized or localized their messaging while adopting international techniques but market-oriented solutions. The book will key reading for scholars and students in advertising, marketing, business, journalism, cultural studies and media in addition to Middle East Studies. It is also an essential text for media and marketing communication industry professionals, and will appeal to those interested in the global-local dichotomy and promotional communications.

No Longer Newsworthy Christopher R. Martin. 2019-05-15 Until the recent political shift pushed workers back into the media spotlight, the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades. Christopher R. Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so. The damning indictment of the mainstream media that flows through *No Longer Newsworthy* is a wakeup call about the critical role of the media in telling news stories about labor unions, workers, and

working-class readers. As Martin charts the decline of labor reporting from the late 1960s onwards, he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests. When newspapers, especially, wrote off working-class readers as useless for their business model, the American worker became invisible. In *No Longer Newsworthy*, Martin covers this shift in focus, the loss of political voice for the working class, and the emergence of a more conservative media in the form of Christian television, talk radio, Fox News, and conservative websites. Now, with our fractured society and news media, Martin offers the mainstream media recommendations for how to push back against right-wing media and once again embrace the working class as critical to its audience and its democratic function.

Knowledge Management and Innovation Pierre Barbaroux,Amel Attour,Erik Schenk.2016-07-18 This book explores the relationships between knowledge management (KM) processes and innovation management. The geographical extension of markets and intensification of competition have led firms to experiment with novel approaches to innovation. New organizational forms emerged in which firms collaborate with various stakeholders to create, absorb, integrate and protect knowledge. This book explores how knowledge management processes evolve with firms' implementation of interactive, collaborative and open innovation models and it identifies the various knowledge types and processes involved throughout the different phases of the innovation process. The authors provide operational typologies for understanding innovative firms' capabilities and knowledge management practices and also discuss the main properties of four models of interactive innovation, namely open innovation, user-centric innovation, community-based innovation and crowdsourcing.

Visual Political Communication Anastasia Veneti,Daniel Jackson,Darren G. Lilleker.2019-06-20 This book offers a

theoretically driven, empirically grounded survey of the role visual communication plays in political culture, enabling a better understanding of the significance and impact visuals can have as tools of political communication. The advent of new media technologies have created new ways of producing, disseminating and consuming visual communication, the book hence explores the theoretical and methodological underpinnings of visual political communication in the digital age, and how visual communication is employed in a number of key settings. The book is intended as a specialist reading and teaching resource for courses on media, politics, citizenship, activism, social movements, public policy, and communication.

The Limits of Partnership Angela E. Stent. 2015-03-29 A gripping account of U.S.-Russian relations since the end of the Soviet Union *The Limits of Partnership* is a riveting narrative about U.S.-Russian relations from the Soviet collapse through the Ukraine crisis and the difficult challenges ahead. It reflects the unique perspective of an insider who is also recognized as a leading expert on this troubled relationship. American presidents have repeatedly attempted to forge a strong and productive partnership only to be held hostage to the deep mistrust born of the Cold War. For the United States, Russia remains a priority because of its nuclear weapons arsenal, its strategic location bordering Europe and Asia, and its ability to support—or thwart—American interests. Why has it been so difficult to move the relationship forward? What are the prospects for doing so in the future? Is the effort doomed to fail again and again? What are the risks of a new Cold War? Angela Stent served as an adviser on Russia under Bill Clinton and George W. Bush, and maintains dialogues with key policymakers in both countries. Here, she argues that the same contentious issues—terrorism, missile defense, Iran, nuclear proliferation, Afghanistan, the former Soviet space, the greater Middle East—have been in every president's inbox, Democrat and Republican alike, since the

collapse of the USSR. Stent vividly describes how Clinton and Bush sought inroads with Russia and staked much on their personal ties to Boris Yeltsin and Vladimir Putin—only to leave office with relations at a low point—and how Barack Obama managed to restore ties only to see them undermined by a Putin regime resentful of American dominance and determined to restore Russia's great power status. *The Limits of Partnership* calls for a fundamental reassessment of the principles and practices that drive U.S.-Russian relations, and offers a path forward to meet the urgent challenges facing both countries. This edition includes a new chapter in which Stent provides her insights about dramatic recent developments in U.S.-Russian relations, particularly the annexation of Crimea, war in Ukraine, and the end of the Obama Reset.

The Spirits of Neoliberal Reforms and Everyday Politics of the State in Africa Béatrice Hibou, Boris Samuel, Laurent

Fourchard. 2017 This book proposes an original interpretation of neoliberalism in Africa. Instead of seeing neoliberal reforms as inherently destructive of the post-colonial state, the authors, who include some of Africa's best-known social scientists, focus on the resilience and adaptability of African state structures, economic systems and survival mechanisms.

Russian Foreign Policy Nikolas K. Gvosdev, Christopher Marsh. 2013-08-22 In a truly contemporary analysis of Moscow's relations with its neighbors and other strategic international actors, Nikolas K. Gvosdev and Christopher Marsh use a comprehensive vectors approach, dividing the world into eight geographic zones. Each vector chapter looks at the dynamics of key bilateral relationships while highlighting major topical issues—oil and energy, defense policy, economic policy, the role of international institutions, and the impact of major interest groups or influencers—demonstrating that Russia formulates multiple, sometimes contrasting, foreign policies. Providing rich historical context as well as exposure to the scholarly literature, *Russian Foreign Policy: Interests, Vectors, and Sectors* offers an incisive look at how and why Russia partners with some states while it counter-balances others.

[Polish Migrants in European Film 1918-2017](#) Kris Van

Heuckelom. 2019-04-23 This study explores the representation of international migration on screen and how it has gained prominence and salience in European filmmaking over the past 100 years. Using Polish migration as a key example due to its long-standing cultural resonance across the continent, this book moves beyond a director-oriented approach and beyond the dominant focus on postcolonial migrant cinemas. It succeeds in being both transnational and longitudinal by including a diverse corpus of more than 150 films from some twenty different countries, of which Roman Polański's *The Tenant*, Jean-Luc Godard's *Passion* and Krzysztof Kieślowski's *Trois couleurs: Blanc* are the best-known examples. Engaging with contemporary debates on modernisation and Europeanisation, the author proposes the notion of "close Otherness" to delineate the liminal position of fictional characters with a Polish background. *Polish Migrants in European Film 1918-2017* takes the reader through a wide range of genres, from interwar musicals to Cold War

Reporting China on the Rise Yuan Zeng.2019-04-10 Drawing on the structural-constructivist framework of journalistic field and habitus, Reporting China on the Rise examines the internal and external dynamics which are shaping the work of foreign correspondents in China during Xi Jinping's tenure. This study presents findings from extensive surveys and interviews with current and former correspondents based in China. It aims to explore how they have responded, and continue to respond, to pressures from within the journalistic field (such as a

transforming media industry), as well as from constant shifts in global geopolitics, and China's increasingly restrictive journalistic environment. These factors are shown to work together to relationally define the news production practice of these correspondents and, ultimately, shape the final news product. Journalism in modern China has become a widely discussed, yet gravely under-researched topic, both for policy-makers and academics. Reporting China on the Rise seeks to open up discussions around the role of the foreign press in generating meaningful media coverage of this growing superpower. It will be an invaluable resource for students and researchers of Journalism and Media Studies.

Serial Selves Frederik Byrn Køhlert. 2019-03-15 Autobiography is one of the most dynamic and quickly-growing genres in contemporary comics and graphic narratives. In *Serial Selves*, Frederik Byrn Køhlert examines the genre's potential for representing lives and perspectives that have been socially marginalized or excluded. With a focus on the comics form's ability to produce alternative and challenging autobiographical narratives, thematic chapters investigate the work of artists writing from perspectives of marginality including gender, sexuality, disability, and race, as well as trauma. Interdisciplinary in scope and attuned to theories and methods from both literary and visual studies, the book provides detailed formal analysis to show that the highly personal and hand-drawn aesthetics of comics can help artists push against established narrative and visual conventions, and in the process invent new ways of seeing and being seen. As the first comparative study of how comics artists from a wide range of backgrounds use the form to write and draw themselves into cultural visibility, *Serial Selves* will be of interest to anyone interested in the current boom in autobiographical comics, as well as issues of representation in comics and visual culture more broadly.

It looks at the state-owned and state-controlled Islamic Republic of Iran Broadcasting (IRIB), employing content analysis and multimodal critical discourse analysis to explore its underlying strategies in portraying the international rights norms. The book also features analysis of surveys and interviews of recent Iranian migrants to determine the extent to which the Iranian public is aware of human rights principles and their views on whether and how the international rights norms are portrayed on IRIB.

Media and Society James Curran,David

Hesmondhalgh.2019-05-16 *Media and Society* is an established textbook, popular worldwide for its insightful and accessible essays from leading international academics on the most pertinent issues in the media field today. With this updated edition, David Hesmondhalgh joins James Curran and a team of leading international scholars to speak to current issues relating to media and gender, media and democracy, sociology of news, the global internet, the political impact of the media, popular culture, the effects of digitisation on media industries, media and emotion, and other vital topics. The media are in a state of ferment, and are undergoing far-reaching change. The sixth edition tries to make sense of the media's transformation, and its wider implications. Purely descriptive accounts date fast, so the emphasis has been on identifying the central issues and problems arising from media change, and on evaluating its wider consequences. What is judged to be the staple elements of the field has evolved over time, as well as becoming more international in orientation. Yet the overriding aim of the book - to be useful to students - has remained constant. This text is an essential resource for all media, communication and film studies

Animated Personalities David McGowan.2019-02-26 This pioneering book makes the case that iconic cartoon characters, such as Mickey Mouse, are legitimate cinematic stars, just as popular human actors are. Mickey Mouse, Betty Boop, Donald Duck, Bugs Bunny, Felix the Cat, and other beloved cartoon characters have entertained media audiences for almost a century, outliving the human stars who were once their contemporaries in studio-era Hollywood. In *Animated Personalities*, David McGowan asserts that iconic American theatrical short cartoon characters should be legitimately regarded as stars, equal to their live-action counterparts, not only because they have enjoyed long careers, but also because their star personas have been created and marketed in ways also used for cinematic celebrities. Drawing on detailed archival research, McGowan analyzes how Hollywood studios constructed and manipulated the star personas of the animated characters they owned. He shows how cartoon actors frequently kept pace with their human counterparts, granting “interviews,” allowing “candid” photographs, endorsing products, and generally behaving as actual actors did—for example, Donald Duck served his country during World War II, and Mickey Mouse was even embroiled in scandal. Challenging the notion that studios needed actors with physical bodies and real off-screen lives to create stars, McGowan demonstrates that media texts have successfully articulated an off-screen existence for animated characters. Following cartoon stars from silent movies to contemporary film and television, this groundbreaking book broadens the scope of star studies to include animation, concluding with provocative questions about the nature of stardom in an age of digitally enhanced filmmaking technologies. “[*Animated Personalities*] is impressive for its lucid historical structure and exceptionally

enjoyable content . . . McGowan breathes life into celluloid figures, giving readers a backstory for some of the most enduring iconic characters of screen history. This is a truly gratifying book.” —Choice “Combining historical, formal, and theoretical modes of analysis, *Animated Personalities* represents a vital contribution to both star studies and the study of animation in classical Hollywood and beyond. By embracing a key problematic of the study of stardom—the inability to take any element of its construction as authentic—McGowan does not undermine the validity of this approach so much as craft a more honest and complete understanding of it.” —Synoptique

Organizational Capital John F. Tomer.1987-11-13 Tomer integrates economic analysis with behavioral and humanistic perspectives into a discussion of a new economic concept: organizational capital. The volume fills an important void in the economic literature and provides additional insights into how internal organizational structures and relationships affect economic as well as social outcomes. . . . All in all, must reading for both economic scholars and behaviorists. Choice Traditionally, internal organizational relationships have not been linked with the orthodox theory of the firm or with explanations for economic growth. *Organizational Capital* integrates organizational behavior with economic theory and offers a new unifying economic concept: organizational capital. Tomer shows how organizational capital contributes to economic growth, behavior, and the productivity of the firm. Companies investing in organizational capital are creating better functioning organizations, ones with improved structures and cultures. These improvements are embodied in the organization's relationships, its members, and its repositories of information. The author also explains how the organization can function as a guide for formulating better governmental policies with respect to economic growth. Moreover, he believes the concept of organizational capital can help us understand how institutional arrangements contribute to

economic as well as social outcomes. This book will help business professionals understand how the features of organizations relate to organizational performance and productivity. It facilitates understanding of the organizational reasons for the successes of leading Japanese companies, Mondragon cooperatives, and excellent U.S. companies.

Anamorphic Authorship in Canonical Film Adaptation Robert Geal.2019-05-21 This book develops a new approach for the study of films adapted from canonical 'originals' such as Shakespeare's plays. Departing from the current consensus that adaptation is a heightened example of how all texts inform and are informed by other texts, this book instead argues that film adaptations of canonical works extend cinema's inherent mystification and concealment of its own artifice. Film adaptation consistently manipulates and obfuscates its traces of 'original' authorial enunciation, and oscillates between overtly authored articulation and seemingly un-authored unfolding. To analyse this process, the book moves from a dialogic to a psychoanalytic poststructuralist account of film adaptations of Shakespeare's plays. The differences between these rival approaches to adaptation are explored in depth in the first part of the book, while the second part constructs a taxonomy of the various ways in which authorial signs are simultaneously foregrounded and concealed in adaptation's anamorphic drama of authorship.

Barriers to New Competition Joe S. Bain.2013-10

The Politics of Digital India Pradip Ninan Thomas.2019-07-11 Transforming India into a digital state has been an objective of successive governments in India. However, the digital, by its very nature, is a capricious, multi-dimensional entity. Its operationalization across multiple sectors in India has highlighted the fact that the digital compact with publics in India is a two-edged sword. On the one hand, devices such as mobile phones have enabled access and efficiencies, and on the other, they have increased the scope for surveillance capitalism and the expansion

of governmentality. The digital is at the same time a resource, commodity, and process that is absolutely fundamental to most if not all productive forces across multiple sectors. As a part of the Media Dynamics in South Asia series, this volume explores the making of digital India and specifically deals with the contradictions of an imperfect democracy, internal compulsions, and external pressures that continue to play crucial roles in the shaping of the same. Mindful of the key roles played by political economy and context and based on conversations with theory and practice, it makes a case for critical understanding of the digital embrace in India.

European Evidence Warrant John A. E. Vervaele.2005 The transnational gathering and use of criminal evidence is a complex and sensitive matter that affects basic principles inherent in national criminal justice systems. Replacing the mutual assistance regime (letters rogatory) by a mutual recognition regime intends to facilitate the admissibility of evidence obtained from the territory of another Member State. How much harmonization of criminal procedure is needed to guarantee the free movement of criminal evidence in the EU? Do we have to develop common procedural safeguards in the EU, or can we build in human rights clauses or procedural public order clauses by which respect for fundamental rights can be a ground for the non-recognition, non-execution or postponement of the order from the issuing state?

John Vervaele is Professor in Economic and Financial Criminal Law at the University of Utrecht and Professor in European Criminal Law at the College of Europe of Bruges. The main topics in his research field are: enforcement of Union law; standards of due law, procedural safeguards and human rights; criminal law and procedure an regional integration; comparative economic and financial criminal law. He has realized a lot of research in these

areas, both for Dutch Departments and European Institutions and also worked as a consultant for them.

Hard Diplomacy and Soft Coercion James Sherr.2013-10-11

During the Cold War, Soviet influence and Leninist ideology were inseparable. But the collapse of both systems threw Russian influence into limbo. In this book, James Sherr draws on his in-depth study of the country over many years to explain and analyse the factors that have brought Russian influence back into play. Today, Tsarist, Soviet and contemporary approaches combine in creative and discordant ways. The result is a policy based on a mixture of strategy, improvisation and habit. The novelty of this policy and its apparent successes pose possible dangers for Russia's neighbours, the West and Russia itself.

Lesbian Cinema after Queer Theory Bradbury-Rance Clara Bradbury-Rance.2019-01-30 The unprecedented increase in lesbian representation over the past two decades has, paradoxically, coincided with queer theory's radical transformation of the study of sexuality. close readings of key contemporary films such as *Blue Is the Warmest Colour*, *Water Lilies* and *Carol* alongside a broader filmography encompassing over 300 other films released between 1927 and 2018, the book provokes new ways of understanding a changing field of representation. Bradbury-Rance resists charting a narrative of representational progress or shoring up the lesbian's categorisation in the newly available terms of the visible. Instead, she argues for a feminist framework that can understand lesbianism's queerness. Drawing on a provocative theoretical and visual corpus, *Lesbian Cinema after Queer Theory* reveals the conditions of lesbian legibility in the twenty-first century.

Mapping the Digital Divide in Africa Bruce Mutsvairo, Massimo Ragnedda.2019-05-09 Despite issues associated with the digital divide, mobile telephony is growing on the continent and the rise of smartphones has given citizens easy access to social networking sites. But the digital divide, which mostly reflects on one's race, gender, socioeconomic status or geographical location, stands in the way of digital progress. What opportunities are available to tame digital disparities? How are different societies in Africa handling digital problems? What innovative methods are being used to provide citizens with access to critical information that can help improve their lives? Experiences from various locations in several sub-Saharan African countries have been carefully selected in this collection with the aim of providing an updated account on the digital divide and its impact in Africa.

revisits the key themes explored in the 1998 edited collection *News, Gender and Power*. It takes stock of progress made to date, and also breaks ground in advancing critical understandings of how and why gender matters for journalism and current democratic cultures. This new volume develops research insights into issues such as the influence of media ownership and control on sexism, women's employment, and macho news cultures, the gendering of objectivity and impartiality, tensions around the professional identities of journalists, news coverage of violence against women, the sexualization of women in the news, the everyday experience of normative hierarchies and biases in newswork, and the gendering of news audience expectations, amongst other issues. These issues prompt vital questions for feminist and gender-centred explorations concerned with reimagining journalism in the public interest. Contributors to this volume challenge familiar perspectives, and in so doing, extend current parameters of dialogue and debate in fresh directions relevant to the increasingly digitalized, interactive intersections of journalism with gender and power around the globe. *Journalism, Gender and Power* will inspire readers to rethink conventional assumptions around gender in news reporting—conceptual, professional, and strategic—with an eye to forging alternative, progressive ways forward.
