Toward a New Poetics Serge Gavronsky.1994-12-01 A quiet revolution is taking place in avant-garde French poetry and prose. In this collection of twelve interviews with some of France's most important poets and writers, Serge Gavronsky introduces American readers to these exciting new developments. As Gavronsky explains, a neolyricism is now replacing the formalism of the 1960s, '70s, and '80s. In his substantial introduction, Gavronsky notes how the ideological definition of writing (écriture) has given way to more open forms of writing. Human experiences of the most ordinary kinds are finding a place in the text. These interviews offer a view of the poets' and writers' creative processes and range over such topics as current literary theory, the impact of American poetry in France, and the place of feminism in contemporary French writing. Each interview is accompanied by samples of the writer's work in French and in Gavronsky's English translations. Toward a New Poetics provides a highly informative cultural and critical perspective on contemporary writing in France, introducing us to works which are now transforming the idea of literature itself.

The Brokered World Simon Schaffer.2009 Collection of essays focusing on the roles of intermediaries such as brokers and spies, messengers and translators, missionaries and entrepreneurs, in linking different parts of the ever more densely entangled systems of knowledge production and circulation at a key moment in the development of global scientific, commercial and political systems. The period 1770-1820 was decisive for the reformation of imperial projects in the wake of military catastrophe and politico-economic crisis, both in the Atlantic and the Asian/Pacific spheres -- economic and political worlds dominated by complex trade systems and violent contest. This conjuncture also saw the overhaul of networks and institutions of natural knowledge, whether commercial, voluntary or organs of state. Both the industrial and the second scientific revolutions have been dated to this moment. New and decisive relations were forged between different cultures' knowledge carriers. The authors consider knowledge movements of the epoch that escape simple models of metropolitan centre and remote colonial periphery. They question the immutable character of mediators and agents in knowledge communication.

Legend of a Suicide David Vann.2008 In *Ichthyology*, a young boy watches his father spiral from divorce to suicide. The story is told obliquely, often through the boy's observations of his tropical fish, yet also reveals his father's last desperate moves, including quitting dentistry for commercial fishing in the Bering Sea. Rhoda goes back to the beginning of the father's second marriage and the boy's fascination with his stepmother, who has one partially closed eye. This eye becomes a metaphor for the adult world the boy can't yet see into, including sexuality and despair, which feel like the key initiating elements of the father's eventual suicide. *A Legend of Good Men* tells the story of the boy's life with his mother after his father's death through the series of men she dates. In

Sukkwan Island, an extraordinary novella, the father invites the boy homesteading for a year on a remote island in the southeastern Alaskan wilderness. As the situation spins out of control, the son witnesses his father's despair and takes matters into his own hands. In Ketchikan, the boy is now thirty years old, searching for the origin of ruin. He tracks down Gloria, the woman his father first cheated with, and is left with the sense of a world held in place, as it turned out, by nothing at all. Set in Fairbanks, where the author's father actually killed himself, *The Higher Blue* provides an epilogue to the collection.--BOOK JACKET.

Ireland Frank Delaney.2009-10-13 "Dramatic, adventurous, heroic, romantic. . . these historical chronicles, legends, myths, tall tales and fables, featuring warriors, kings, monks, explorers and clever common folk, imaginatively tell the history of Ireland." — Philadelphia Inquirer This New York Times bestselling epic is an unforgettable tour de force that marries the intimate, passionate texture of the Irish spirit with a historical scope that is sweeping and resplendent. Storyteller extraordinaire Frank Delaney takes his readers on a journey through the history of Ireland, stopping along the way to evoke the dramatic events and personalities so critical to shaping the Irish experience. In the winter of 1951, a storyteller, the last practitioner of an honored, centuries-old tradition, arrives at the home of nine-year-old Ronan O'Mara in the Irish countryside. For three wonderful evenings, the old gentleman enralls his assembled local audience with narratives of foolish kings, fabled saints, and Ireland's enduring accomplishments before moving on. But these nights change young Ronan forever, setting him on a years-long pursuit of the elusive, itinerant storyteller and the glorious tales that are no less than the saga of his tenacious and extraordinary isle.

So Vast the Prison Assia Djébar.2011-01-04 *So Vast the Prison* is the double-threaded story of a modern, educated Algerian woman existing in a man's society, and, not surprisingly, living a life of contradictions. Djébar, too, tackles cross-cultural issues just by writing in French of an Arab society (the actual act of writing contrasting with the strong oral traditions of the indigenous culture), as a woman who has seen revolution in a now post-colonial country, and as an Algerian living in exile. In this new novel, Djébar brilliantly plays these contradictions against the bloody history of Carthage, a great civilization the Berbers were once compared to, and makes it both a tribute to the loss of Berber culture and a meeting-point of culture and language. As the story of one woman's experience in Algeria, it is a private tale, but one embedded in a vast history. A radically singular voice in the world of literature, Assia Djébar's work ultimately reaches beyond the particulars of Algeria to embrace, in stark yet sensuous language, the universal themes of violence, intimacy, ostracism, victimization, and exile.

Mobile and Wireless Networks Khaldoun Al Agha,Guy Pujolle,Tara Ali Yahiya.2016-08-29 This book presents the state of the art in the field of mobile and wireless networks, and anticipates the arrival of new standards and architectures. It focuses on wireless networks, starting with small personal area networks and progressing onto the very large cells of wireless regional area networks, via local area networks dominated by WiFi technology, and finally metropolitan networks. After a description of the existing 2G and 3G standards, with LTE being the latest release, LTE-A is addressed, which is the first 4G release, and a first indication of 5G is provided as seen through the standardizing bodies. 4G technology is described in detail along with the different LTE extensions related to the massive arrival of femtocells, the increase to a 1 Gbps capacity, and relay techniques. 5G is also discussed in order to show what can be expected in the near future. The Internet of Things is explained in a specific chapter due to its omnipresence in the literature, ad hoc and mesh networks form another important chapter as they have made a comeback after a long period of near hibernation, and the final chapter discusses a particularly recent topic: Mobile-Edge Computing (MEC) servers.

Aeromobilities Saulo Cwerner,Sven Kesselring,John Urry.2009-01-13 *Aeromobilities* is a collection

of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile, globalized world. Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace, from airline work to helicopters, and from movement in airports to software systems, *Aeromobilities* seeks to enhance our understanding of space, time and mobility in the age of mass air travel. From Sao Paulo to Sydney, *Aeromobilities* draws on local experiences of airspaces to generate theory and research that are global in scope. It is the first book of its kind, bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities, while emphasizing the central role of aeromobilities in contemporary social relations. In a world where virtually every aspect of social life is touched upon, in one way or another, by the complex global network of airline flows, with its large passenger aircraft and iconic international airports, *Aeromobilities* provides innovative analyses of some of the most fundamental and influential mobility networks of our time.

Accounting for Culture Caroline Andrew.2005-03-30 Many scholars, practitioners, and policy-makers in the cultural sector argue that Canadian cultural policy is at a crossroads: that the environment for cultural policy-making has evolved substantially and that traditional rationales for state intervention no longer apply. The concept of cultural citizenship is a relative newcomer to the cultural policy landscape, and offers a potentially compelling alternative rationale for government intervention in the cultural sector. Likewise, the articulation and use of cultural indicators and of governance concepts are also new arrivals, emerging as potentially powerful tools for policy and program development. *Accounting for Culture* is a unique collection of essays from leading Canadian and international scholars that critically examines cultural citizenship, cultural indicators, and governance in the context of evolving cultural practices and cultural policy-making. It will be of great interest to scholars of cultural policy, communications, cultural studies, and public administration alike.

Against Expression Craig Dworkin, Kenneth Goldsmith.2011-01-17 Charles Bernstein has described conceptual poetry pregnant with thought. Against Expression, the premier anthology of conceptual writing, presents work that is by turns thoughtful, funny, provocative, and disturbing. Editors Craig Dworkin and Kenneth Goldsmith chart the trajectory of the conceptual aesthetic from early precursors such as Samuel Beckett and Marcel Duchamp through major avant-garde groups of the past century, including Dada, Oulipo, Fluxus, and language poetry, to name just a few. The works of more than a hundred writers from Aasprong to Zykov demonstrate a remarkable variety of new ways of thinking about the nature of texts, information, and art, using found, appropriated, and randomly generated texts to explore the possibilities of non-expressive language. --Book Jacket.

Multi-Agent Programming: Rafael H. Bordini, Mehdi Dastani, Jürgen Dix, Amal El Fallah Seghrouchni.2009-06-13 Multi-Agent Systems are a promising technology to develop the next generation open distributed complex software systems. The main focus of the research community has been on the development of concepts (concerning both mental and social attitudes), architectures, techniques, and general approaches to the analysis and specification of multi-agent systems. This contribution has been fragmented, without any clear way of “putting it all together”, rendering it inaccessible to students and young researchers, non-experts, and practitioners.

Successful multi-agent systems development is guaranteed only if we can bridge the gap from analysis and design to effective implementation. *Multi-Agent Programming: Languages, Tools and Applications* presents a number of mature and influential multi-agent programming languages, platforms, development tools and methodologies, and realistic applications, summarizing the state of the art in an accessible manner for professionals and computer science students at all levels.

On the Death and Life of Languages Claude Hagège.2009-01-01 Twenty-five languages die each year; at this pace, half the world’s five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the world of ideas, Hagège shows how languages are themselves crucial repositories of culture; the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging

examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.
