The SAGE Handbook of New Approaches in Management and Organization Daved

Barry,Hans Hansen.2008-04-30 Ten years ago, critical theory and postmodernism were considered new and emerging theories in business and management. What will be the next new important theories to shape the field? In one edited volume, Daved Barry and Hans Hansen have commissioned new chapters that will allow readers to stay one step ahead of the latest thinking. Contributors draw on research and practice to introduce ideas that are considered 'fringe' and controversial today, but may be key theoretical contributions tomorrow. Each chapter sets these ideas in their historical

context, lays out the key theoretical positions taken by each new approach and makes it clear why these approaches are different to more mainstream concepts. Throughout, contributors refer to existing studies that show how these developing themes will change the business and management arena. Researchers, teachers and advanced students who are interested in the future of Business and Management scholarship will want to read this Handbook.

Developing Healthcare Skills through Simulation Matthew Aldridge, Stephen Wanless. 2012-03-01
'This book provides an essential resource for educators of clinical skills who want to utilise simulation based education to provide optimal learning opportunities for their students.' Andrew Bland, University of Huddersfield 'In this book, a team of experienced authors have put together a much needed text that takes an evidence-based, practical approach to skills development.' Lauren Mawson, University of Cumbria 'A really exciting new text.' Sarah Burden, Leeds Metropolitan University Practice educators and mentors are now expected to have the skills and techniques needed to implement a 'learning skills through simulation' programme into established curricula, yet using simulation to teach - while of huge importance - requires careful and time-consuming planning. This valuable resource takes away some of that burden by providing clear, ready-made activities and guidance from leading practitioners in a range of fields, which healthcare and practice educators and mentors can use to enhance their teaching of all the essential and commonly-taught clinical and management skills and knowledge. Dedicated chapters, which all follow a defined step-

by-step format, provide simulation scenarios, alongside facilitator guidance, which will help develop confidence in the teaching of key skills such as: - Drug administration - Conflict management - Infection control - Breaking bad news - Catheter and bowel care These scenarios and accompanying guidance can be used as a framework for teaching, promoting a greater understanding of the skill being taught, and providing a risk-free opportunity for the student to practice their clinical and managerial skills and judgement.

Social and Behavioral Research and the Internet Marcel Das, Peter Ester, Lars Kaczmirek. 2018-10-24 Highlighting the progress made by researchers in using Web-based surveys for data collection, this timely volume summarizes the experiences of leading behavioral and social scientists from Europe and the US who collected data using the Internet. Some chapters present theory, methodology, design, and implementation, while others focus on best practice examples and/or issues such as data quality and understanding paradata. A number of contributors applied innovative Web-based research methods to the LISS panel of CentERdata collected from over 5,000 Dutch households.

Their findings are presented in the book. Some of the data is available on the book website. The book addresses practical issues such as data quality, how to reach difficult target groups, how to design a survey to maximize response, and ethical issues that need to be considered. Innovative applications such as the use of biomarkers and eye-tracking techniques are also explored. Part 1 provides an overview of Internet survey research including its methodologies, strengths, challenges, and best practices. Innovative ways to minimize sources of error are provided along with a review of mixed-mode designs, how to design a scientifically sound longitudinal panel and avoid sampling problems, and address ethical requirements in Web surveys. Part 2 focuses on advanced applications including the impact of visual design on the interpretability of survey questions, the impact survey usability has on respondents' answers, design features that increase interaction, and how Internet surveys can be effectively used to study sensitive issues. Part 3 addresses data quality, sample selection, measurement and non-response error, and new applications for collecting online data. The issue of underrepresentation of certain groups in Internet research and the measures most effective at reducing it are also addressed. The book concludes with a discussion of the importance of paradata and the Web data collection process in general, followed by chapters with innovative experiments using eye-tracking techniques and biomarker data. This practical book appeals to practitioners from market survey research institutes and researchers in disciplines such as psychology, education, sociology, political science, health studies, marketing, economics, and business who use the Internet for data collection, but is also an ideal supplement for graduate and/or upper level undergraduate courses on (Internet) research methods and/or data collection taught in these fields.

Inclusion, Disability and Culture Elsayed Elshabrawy Ahmad Hassanein. 2015-02-03 This book examines some theoretical and empirical aspects about complexities of inclusion, disability and culture. It challenges the globalized technical and reductionist approach of inclusion and argues that concepts of disability and inclusion are culturally constructed. Disability and inclusion are concepts which do not define a global agenda, in the sense that one size fits all. Rather they should be seen as being completely context dependent and that they should be deconstructed with respect to specific cultural contexts, with respects to society, ethics, religion and history. The main argument of the book is that many cultural backgrounds, including Egyptians, have their own long-standing beliefs and practices which do not define or address disability in the same way as western culture. Such cultural differences in understanding disability may lead to different understandings, conceptualizations and practices of inclusion. The book articulates disability and inclusion within a socio-ethical-religious discourse based on the Islamic underpinnings of equality and differences. This discourse enhances and supports the calls for considering inclusion and disability within a cultural model that takes into account the common values about disability in any given context which consequently will affect the way educational provision is provided in that context. Finally, the book

challenges the “psychological” concept of “attitude” that has been represented in the literature simply as a matter of acceptance or rejection. Inclusion, Disability and Culture shows that “attitude” is a complex and context-dependent issue that can’t be understood in isolation from the wider context within which such responses were created. Specifically, the role of the social views about disability, religious values, school cultures, educational system and structural and organizational constraints can’t be underestimated in understanding teachers’ attitudes towards a complex issue like inclusion.
