Inelastic Analysis of Solids and Structures M. Kojic, Klaus-Jurgen Bathe. 2006-03-30 Inelastic Analysis of Solids and Structures presents in a unified manner the physical and theoretical background of inelastic material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

Clio's Battles Jeremy Black. 2015-07-01 A survey of the variety of readings we have of the past and of how those readings are used in the present day to validate, discredit, unite, or divide. To write history is to consider how to explicate the past, to weigh the myriad possible approaches to the past, and to come to terms with how the past can be and has been used. In this book, prize-winning historian Jeremy Black considers both popular and academic approaches to the past. His focus is on the interaction between the presentation of the past and current circumstances, on how history is used to validate one view of the present or to discredit another, and on readings of the past that unite and those that divide. Black opens with an account that underscores the differences and developments in traditions of writing history from the ancient world to the present. Subsequent chapters take up more recent decades, notably the post-Cold War period, discussing how different perspectives can fuel discussions of the past by individuals interested in shaping public opinion or public perceptions of the past. Black then turns to the possible future uses of the then past as a way to gain perspective on how we use the past today. *Clio's Battles* is an ambitious account of the engagement with the past across world history and of the clash over the content and interpretation of history and its implications for the present and future. "Remarkable both for its geographical scope and historical scale, and for its command of scholarship on a breathtaking range of subjects. I can't imagine another historian who could attempt such an ambitious work or pull it off with such aplomb." —William Gibson, Oxford Brookes University "Refreshing . . . Black eschews "Eurocentricism" and includes considerable material on other areas of the world that one does not usually find in such a work. Typical of Black's writing, there is much to learn in the numerous small asides throughout the text. Taken together these form an impressive whole." —Spencer C. Tucker, VMI

Kissing Architecture Sylvia Lavin.2011-05-09 Architecture's growing intimacy with new types of art Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of kissing to describe the growing intimacy between architecture and new types of art—particularly multimedia installations that take place in and on the surfaces of buildings—and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

Sakura's Cherry Blossoms Robert Paul Weston.2018-02-20 A warm, gorgeous exploration of a little girl's experience immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. Sakura's Cherry Blossoms captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

Apocalypse Jacques Ellul.2020-05-05 "There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." —Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby

reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, Apocalypse is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.

Un patrimoine de lumière, 1830-2000 Laurence de Finance.2003 Cet ouvrage offre, pour la première fois, une étude des verrières franciliennes des XIXe et XXe siècles, tant religieuses que civiles. Embrassant toute la petite couronne parisienne, il met en lumière le rôle déterminant de l'Ile-de-France en matière de technique du vitrail : en 1830, d'une part, les manufactures de Sèvres et de Choisy-le-Roi travaillent à la redécouverte d'un art négligé depuis deux siècles ; en 1889, d'autre part, sont fabriqués à Clichy. pour la première fois en France, les verres américains . Simultanément, l'expansion urbaine et l'évangélisation de la population mettent en place un important marché, à la clientèle privée et publique. Les champs analysés - iconographiques, techniques et stylistiques - s'appuient sur un corpus, en majeure partie inédit, de plus de 3 000 verrières, qui permet non seulement de découvrir l'un des domaines majeurs de l'apparat religieux, mais aussi de renouveler certaines idées sur la vie des ateliers des maîtres verriers, enfin, de révéler les lignes de force d'une identité régionale.

Angels and Demons in Art Rosa Giorgi.2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Maps and Politics Jeremy Black.2000-09-01 ?We all rely on the apparent accuracy and objectivity of maps, but often do not see the very process of mapping as political. Are the power and purpose of maps inherently political? Maps and Politics addresses this important question and seeks to emphasize that the apparent 'objectivity' of the map-making and map-using process cannot be divorced from aspects of the politics of representation. Maps have played, and continue to play, a major role in both international and domestic politics. They show how visual geographical representations can be made to reflect and advance political agendas in powerful ways. The major developments in this field over the last century are responses both to cartographic progression and to a greater emphasis on graphic imagery in societies affected by politicization, democratization, and consumer and cultural shifts. Jeremy Black asks whether bias-free cartography is possible and demonstrates that maps are not straightforward visual texts, but contain political and politicizing subtexts that need to be read with care.

Death Waits in the Dark Mark Edward Langley.2020-08-04 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Investigative Journalism in China David Bandurski,Martin Hala.2010-06-01 Despite persistent pressure from state censors and other tools of political control, investigative journalism has flourished in China over the last decade. This volume offers a comprehensive, first-hand look at investigative journalism in China, including insider accounts from reporters behind some of China's top stories in recent years. While many outsiders hold on to the stereotype of Chinese journalists as docile, subservient Party hacks, a number of brave Chinese reporters have exposed corruption and official misconduct with striking ingenuity and often at considerable personal sacrifice. Subjects have included officials pilfering state funds, directors of public charities pocketing private donations, businesses fleecing unsuspecting consumers - even the misdeeds of journalists themselves. These case studies address critical issues of commercialization of the media, the development of ethical journalism practices, the rising specter of news blackmail, negotiating China's mystifying bureaucracy, the dangers of libel suits, and how political pressures impact different stories. During fellowships at the Journalism & Media Studies Centre of the University of Hong Kong, these narratives and other background materials were fact-checked and edited by JMSC staff to address critical issues related to the media transitions currently under way in the PRC. This engaging narrative gives readers a vivid sense of how journalism is practiced in China. --David Bandurski is a scholar at the University of Hong Kong's China Media Project, a research and fellowship initiative of the Journalism & Media Studies Centre. Martin Hala has taught journalism at the Universities in Prague and Bratislava. -
