*The Right to Food Guidelines, Democracy and Citizen*

*Participation* Katharine S. E. Cresswell Riol.2016-11-10 It is now more than a decade since the Right to Food Guidelines were negotiated, agreed and adopted internationally by states. This book provides a review of its objectives and the extent of success of its implementation. The focus is on the first key guideline - Democracy, good governance, human rights and the rule of law - with an emphasis on civil society participation in global food governance. The five BRICS countries (Brazil, Russia, India, China and South Africa) are presented as case studies: representing major emerging economies, they blur the line between the Global North and South, and exhibit different levels of human rights realisation. The book first provides an overview of the right to adequate food, accountability and democracy, and an introduction to the history of the development of the right to adequate food and the Right to Food Guidelines. It presents a historical synopsis of each of the BRICS states' experiences with the right to adequate food and an analysis of their related periodic reporting to the Committee on Economic, Social and Cultural Rights, as well as a specific assessment of their progress in regard to the first guideline. The discussion then focuses on the effectiveness of the Right to Food Guidelines as both a policy-making and monitoring tool, based on the analysis of the

guidelines and the BRICS states.

The Future of Mobility Liisa Ecola, Johanna Zmud, Kun Gu, Peter

Phleps, Irene Feige. 2015-07-01 Researchers developed two

scenarios to envision the future of mobility in China in 2030. Economic growth, the presence of constraints on vehicle ownership and driving, and environmental conditions differentiate the scenarios. By making potential long-term mobility futures more vivid, the team sought to help decisionmakers at different levels of government and in the private sector better anticipate and prepare for change.

**Devolution and Localism in England** David M. Smith, Enid Wistrich. 2016-04-22 Combining historical and policy study with empirical research from a qualitative study of regional elites this book offers an original and timely insight into the progress of devolution of governance in England. With particular interest in how governments have tried and continue to engage English people in sub-national democratic processes while dealing with the realities of governance it uses in-depth interviews with key figures from three English regions to get the 'inside view' of how these processes are seen by the regional and local political, administrative, business and voluntary sector elites who have to make policies work in practice. Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation. Finally they consider the implications of the existing situation and speculate on possible issues for the future.

**The end of the experiment?** Mick Moran,Andrew Bowman,Julie Froud,Sukhdev Johal,John Law,Adam Leaver,Karel Williams.2014-05-31 For thirty years, the British economy has repeated the same old experiment of subjecting everything to competition and market because that is what works in the imagination of central government. This book demonstrates the repeated failure of that experiment by detailed examination of three sectors: broadband, food supply and retail banking. The book argues for a new experiment in social licensing whereby the

right to trade in foundational activities would be dependent on the discharge of social obligations in the form of sourcing, training and living wages. Written by a team of researchers and policy advocates based at the Centre for Research on Socio Cultural Change, this book combines rigour and readability, and will be relevant to practitioners, policy makers, academics and engaged citizens.

**Change Management for Sustainability** Huong Ha.2014-06-20  
Change management is a challenging and continuous process that requires a particular skill set for both leaders and managers. It is essential for leaders and change agents to understand and address the five most important questions: Why? What? Who? How? When? Inside, you'll learn the concept of change management, its impact on the company's business performance and sustainability, and the relevant issues associated with it. The author highlights the importance of sustainable development, including economic, environmental, and social elements and introduces different types of changes including planned, unplanned, incremental/marginal, transitional, and transformational ones. Various models of planned and unplanned changes are featured, including leaders as change agents; the concept of resistance, reasons, sources, and forms of resistance to change; definitions of values, attitudes, personalities, and perceptions of individuals; and how these determinants affect individuals' behaviors, attitudes, and responses toward organizational change. Several organizational examples are provided throughout the book to illustrate how high-performance organizations grow their business.

## **BRICS and International Tax Law** Peter Antony

Wilson.2016-04-24 With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) – and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit out flows – the respective governments, both individually and through cooperative initiatives, have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the out flow of revenue while strongly supporting FDI, both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: – information exchange procedures and pitfalls; – response to the OECD’s Base Erosion and Profit-Sharing (BEPS) initiative; – role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; – thin capitalization; – transfer pricing; – controlled foreign corporation rules; – shortcomings related to authorities’ limited manpower; – international audit and investigation procedures; – the BRICS approach to residence and mandatory and binding arbitration; and – the BRICS approach to shaping the developing world’s international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities, as well as with leading BRICS academics and practitioners. Tax cases, together with human rights and investment cases and administrative guidelines in all respective countries are also included in the analysis. The study concludes with recommendations for

improving each of the five countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS' international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance: an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.
