Ancient Egyptian Materials and Technology Paul T. Nicholson, Ian Shaw. 2009-10-01 Aimed primarily at Egyptologists and archaeologists, this book covers all aspects of craftwork in ancient Egypt, from the construction of the pyramids and the carving of statues to techniques of mummification, boat-building, jewelry making, ancient brewing, carpentry, hairstyling, tailoring and basket weaving. Drawing on archaeological, experimental, ethnographic and laboratory work, it is the first book since the 1920s to describe current research into the actual basics of life in Pharaonic Egypt. The twenty-five chapters, by well-regarded scholars, present up-to-date and accessible information on a wide array of techniques.

The Oxford Handbook of Egyptology Ian Shaw,Elizabeth Bloxam.2020-11-10 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period. It seeks to place Egyptology within its theoretical, methodological, and historical contexts, indicating how the subject has evolved and discussing its distinctive contemporary problems, issues, and potential. Transcending conventional

boundaries between archaeological and ancient textual analysis, the volume brings together 63 chapters that range widely across archaeological, philological, and cultural sub-disciplines, highlighting the extent to which Egyptology as a subject has diversified and stressing the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Organized into ten parts, it offers a comprehensive synthesis of the various sub-topics and specializations that make up the field as a whole, from the historical and geographical perspectives that have influenced its development and current characteristics, to aspects of museology and conservation, and from materials and technology - as evidenced in domestic architecture and religious and funerary items - to textual and iconographic approaches to Egyptian culture. Authoritative yet accessible, it serves not only as an invaluable reference work for scholars and students working within the discipline, but also as a gateway into Egyptology for classicists, archaeologists, anthropologists, sociologists, and linguists.

Amarna City of Akhenaten and Nefertiti Julia Sampson.2023-09-30 Tell el-Amarna is the modern name for the ancient Egyptian city of Akhenaten, situated in a bay of hills formed by the cliffs of the eastern desert about halfway between Cairo and Luxor. The city was founded in the 14th century BC by the Pharaoh Akhenaten to be a royal palace for himself and his wife Nefertiti, the capital of all

Egypt and the center of the state cult of the Sun God in the form of Aten (sun disc), which became an obsession of the Pharaoh. The city contained temples, palaces, state buildings and great private mansions, but was abandoned by Akhenaten's successor, his son Tutankhamen, and the city was demolished, never to be re-inhabited. This volume presents a detailed, illustrated catalog of the many statues, statuettes, reliefs, inlays and inscriptions recorded and collected by Flinders Petrie, together with glass and faience objects and moulds. Part II provides a summary of developments in royal names and titles with a discussion on research into names and evidence of royal status.

A Year in the Life of Ancient Egypt Ann Rosalie David.2015-04-16 An overview of daily life in ancient Egypt, its society, and culture. Based on years of prestigious academic work, Professor Rosalie David cleverly presents every aspect of life in ancient Egypt through the lives of various characters, all based on mummies from the Manchester Museum whom Professor Rosalie David has led the study of. Characters hail from all walks of life, including royalty, nobles, officials, craftsmen and peasants, allowing us an insight into absolutely every aspect of everyday, ritual and religious life in ancient Egypt. The book provides an overview of the many dynasties and kingdoms of ancient Egypt before beginning to tell the story of the lives of one family. All three seasons of inundation, planting and growing, and harvesting are covered as well as all ritual and religious events, including birth and death. The book is extremely easy to read and digest, however, the attention to detail and the vivid picture of life which we are able to build makes it clear that this book has been written by one of the leading authorities in Egyptology and mummy research.

An Introduction to Ancient Egypt British Museum. Dept. of Egyptian Antiquities,Thomas Garnet Henry James.1979

Vitreous Materials at Amarna Andrew J. Shortland.2000 The earliest vitreous materials in Egypt date to c.4000 BC although the production of glass, faience, frit or 'Egyptian blue' does not really

take off until the 18th dynasty. Andrew Shortland combines descriptions of various objects made from vitreous materials with an analysis of the processes and techniques used in their production. The Arts and Crafts of Ancient Egypt W. M. Flinders Petrie.2018-10-05 This present handbook is intended to aid in the understanding of Egyptian art, and the illustrations and descriptions are selected for that purpose only. The history of the art would require a far greater range of examples, in order to illustrate the growth and decay of each of the great periods; whereas here only the most striking works of each period are shown, in order to contrast the different civilisations. The origins and connections of the art in each age are scarcely touched, and the technical details are only such as are needed to see the conditions of the art. The archaeology of the subject would need as wide a treatment as the history, and these subjects can only appear here incidentally. It should be noticed that the divisions of artistic periods are often not the same as those of political history. Politically, the history divides at the XVIIth dynasty with the fall of the Hyksos, and at the XXIIInd dynasty with the rise of the Delta government. But artistically the changes are under Tahutmes I, when Syrian influences broke in, and under the XXVIth dynasty, when the classical Greeks began to dominate the art.

A Manual of Egyptian Pottery, Volume 1 Anna Wodzińska.2011-04-15 This is the first volume in a four-book set covering all Egyptian pottery, ranging from the earliest (Fayum A) ceramics to pottery made in Egypt today, organised by historical periods. The manuals are quick identification guides as well as starting points for more extensive research. For each period, ceramic types are illustrated with a line drawing, accompanied by a description that includes information on the pot's material, manufacturing techniques, surface treatment and shape. Colour plates of representative ceramic types are included to give the clearest sense of the colour, composition and surface treatment. All four volumes provide an extensive list of suggested readings as well as a bibliography for each period. Introductory chapters in each book discuss the basics of pottery manufacture and analysis. This second edition boasts a new, expanded introduction. The first comprehensive guide to Egyptian pottery, this set will prove valuable to students as well as experienced field archaeologists. The volumes come in paperback and spiral-bound versions. The spiral bound versions, with hard laminated covers and tabs, are designed especially for the field and lab.

Conservation and Restoration of Glass Sandra Davison,R.G. Newton.2008-05-09 Conservation and Restoration of Glass is an in-depth guide to the materials and practices required for the care and preservation of glass objects. It provides thorough coverage of both theoretical and practical aspects of glass conservation. This new edition of Newton and Davison's original book, Conservation of Glass, includes sections on the nature of glass, the historical development and technology of glassmaking, and the deterioration of glass. Professional conservators will welcome the inclusion of recommendations for examination and documentation. Incorporating treatment of both excavated glass and historic and decorative glass, the book provides the knowledge required by conservators

and restorers and is invaluable for anyone with glass objects in their care.

Brilliant Things for Akhenaten Paul T. Nicholson, Rainer Gerisch. 2007 This book examines the coming of glass to Egypt and its relationship to the production of faience and pottery, particularly at Amarna site O45.1. The text combines excavated evidence with experimental archaeology and laboratory analyses to give a reconstruction of the production of glass and other materials at Amarna, both in terms of technology and social context. The excavations carried out by Flinders Petrie at Amarna (18912) are reassessed in the light of the new work and finds from that time put into a broader perspective.

The Experience of Ancient Egypt Ann Rosalie David. 2000 In this survey, Rosalie David shows how the attitudes, opinions and working practices of Egyptologists have shaped the structure of their subject. The Experience of Ancient Egypt provides a portrait of what we know about ancient Egypt today, examining issues of religion, beliefs and practices surrounding death, everyday life, and literature. David then looks at the history of Egyptology itself--tracing the discipline from its classical

roots, through the deciphering of hieroglyphs in the eighteenth and nineteenth centuries, to the most up-to-date biomedical and archaeological techniques. --From publisher's description.

A Manual of Egyptian Pottery Volume 3 Anna Wodzinska.2009-12-31 This is the third volume in a four-book set covering all Egyptian pottery, ranging from the earliest (Fayum A) ceramics to pottery made in Egypt today, organized by historical periods. The manuals are quick identification guides as well as starting points for more extensive research. For each period, ceramic types are illustrated with a line drawing, accompanied by a description that includes information on the pot's material, manufacturing techniques, surface treatment, and shape. Egyptian Faience and Glass Paul T. Nicholson.1993 This book examines the technology of making this vitreous material and outlines its long history, which stretches from early Predynastic times to the end of pharaonic Egypt and beyond. The range of uses found for faience, from amulets to large

vessels, is examined and some of the reasons for its popularity discussed. About the author Paul Nicholson studied Archaeology and Prehistory at the University of Sheffield. He has specialised in Egyptian crafts and technology, especially ceramics, and has led two ethno-archaeological expeditions to study contemporary pottery-making in Egypt.
