The Revised Nomenclature for Museum Cataloging James R. Blackaby,Patricia

Greeno,Nomenclature Committee.1995 Chenhall's System for Classifying Man-Made Objects created the first common cataloging language for museums and other historical collections. Now The Revised Nomenclature for Museum Cataloging develops Chenhall's ideas to provide updated material so museums can use their collections to the fullest extent. The Revised Nomenclature provides a universally accepted classification system with terminology that allows curators, registrars, and catalogers to describe artifacts precisely. It also creates a standard for cataloging so that in-house record keeping is complete and accurate for use by all staff members and the exchange of cultural objects and information between museums is possible on both a national and international scale. This system deals with information, not with methods of recording that information, and enables even the smallest museum's terminology to be in synchronization with the largest metropolitan museum. No museum can afford to be without this book.

Secrets of Warfare William Weir.2011-08-15 From the battles of Ancient Greece and Rome to WWII and Vietnam, this volume uncovers the surprising truth behind the history of war. Many are familiar the first Civil War battle between the ironclad warships the Monitor and the Merrimac, but

few have heard about the airship that Dr. Solomon Andrews offered to Abraham Lincoln during the Civil War. *Secrets of Warfare* exposes the hidden history of human combat, exposing many of myths that have kept the public misinformed about warfare. Some myths are the result of deliberate misrepresentation while others persist through ignorance or bigotry. In *Secrets of Warfare*, historian William Weir sets the record straight on a number of topics, including: The alleged superiority of Western nations in the ancient world. The myth of the English longbow. The introduction of submarines to warfare prior to World War I. The deadliest American air raids of World War II. The supposed attack on U.S. destroyers in the Gulf of Tonkin.

Weapons & Armor Harold H. Hart.1982 A misericorde is a medieval poniard or dagger made for one purpose--to give the coup de grace or killing stroke. It was a beautiful, deadly instrument with a graphic mission; its very shape and cut graphically manifest its age and those who used it. Weapons throughout history chronicle ages, styles, and approaches to life and death; for artists, a weapons archive is a pictorial arsenal of powerful imagery. Here is such an arsenal: over 1,400 copyright-free illustrations of weapons and armor epitomizing the warlike times and peoples of this planet. Twenty-two categories of offensive and defensive arms and armor include battle-axes, bows and arrows, cannons, catapults, clubs, daggers, handguns, machine guns, powder horns, rifles, spears, swords, tanks, suits of armor, helmets, shields, and other means of combat. These copyright-free black-and-white illustrations (with a few half-tones) have been culled from almost 50 separate sources, ranging from books of ancient armor to scarce foreign periodicals and engravings. Along with the arms themselves are those who wield them--soldiers, warriors, knights, horsemen, hunters, jousters, duelists, arms manufacturers, aborigines, centurions, dragoons, musketeers, samurai, crusaders, in full period regalia. One plate identifies all the parts of a 17th-century suit of armor--visor, gorget,

tassets, epauliere, cuisse, chain mail, gauntlet, etc.; many show details of intricate Renaissance and modern carving on pommels, blades, rifle butts, and boomerangs. Some remarkable devices include the Chinese Tartar 2-handed sword, Malay creese, Tormentum, Maxim gun, 16th-century Italian cross-bow, Soviet tank from World War II, Indian damascened cuirass, bamboo lance, halberd, and the scimitar. Unusual strokes may be visually delivered by such instruments as the Patagonian bola, a cane sword, the Zarabatana native blow gun, and the infamous holy water sprinkler. Artists and designers will not find these rare emblems of warfare gathered together elsewhere in such a clearly printed format, so quickly accessible; historians of art, industry, and war as well as weapons fanciers will marvel at all the picturesque means here depicted of giving the coup de grace. Unabridged Dover (1982) republication of *Weapons & Armor*, originally published by the Hart Publishing Company, Inc., New York, 1978.

Chivalry and the Perfect Prince Braden Frieder.2008-01-25 Chivalry and the Perfect Prince is a survey of the ceremonial armor crafted for the Spanish Habsburg monarchs of the sixteenth century. It examines notable tournaments and pageantry held at the courts of Charles V and Philip II, and the artworks associated with them. Braden Frieder guides the reader through these tournaments, jousting, and other knightly exercises as part of a larger aristocratic culture that included arms and armor, paintings, tapestries, medals, and sculptures with chivalric themes. Frieder presents Habsburg tournaments in their proper historical context as an extension of imperial politics, drawing comparisons with popular chivalric literature of the period. Frieder's study utilizes extensive

primary source material and contemporary documents, many appearing for the first time in English. Included in this book are eighty-one illustrations of fine art and armor from the sixteenth century, the crescendo of the armorer's art in Europe. For the first time in print, these artworks are treated collectively, as integral parts of aristocratic life and culture during the Renaissance.
