**Clinical Psychology** David C.S. Richard, Steven K. Huprich. 2011-09-02 Clinical Psychology is a graduate-level introduction to the field of clinical psychology. While most textbooks focus on either assessment, treatment, or research, this textbook covers all three together specifically for the introductory level graduate course. Chapter coverage is diverse and contributors come from both PhD and PsyD programs and a variety of theoretical orientations. Chapter topics cover the major activities of the contemporary clinical psychologist with an introduction focusing on training models. The book has a mentoring style designed to highlight the relevance of the topics discussed to clinicians in training. Assessment and treatment chapters focus on evidence-based practice, comparing and contrasting different options, the basis for clinical choice between them, and efficacy of same. It will also introduce the business and ethical aspects of the clinical career that current introductory books do not include, such as ethics in assessment, treatment, and research; third party payers; technological developments; dissemination of research findings; cross-cultural issues; and the future of the profession. The text is designed for students in their first year of clinical psychology graduate training. \* Includes assessment, treatment, and practice issues \* Compares and contrasts different therapeutic styles \* Exemplifies practical application through case studies \* Focuses on evidence-based practice \* Orients future clinicians to contemporary issues facing psychological practices

**Falls in Older Adults: Prevention and Risk Evaluation** Tzvi Dwolatzky. 2023-10-16 Falls are a major health challenge and represent the leading cause of accidental death in older adults. It is essential to identify those factors associated with an increased risk for falls and to develop specific programs for fall prevention. The risk of falling can be assessed in older adults using different parameters, including biological, psychosocial, socioeconomic, behavioral, and environmental factors. For example, the risk of falls increases when vision is impaired, when sleep quality is poor, or when mood is depressed. Moreover, physical parameters, such as changes in body mass and blood pressure are risk factors for falls in older adults.

**Supporting Families of Children With Developmental Disabilities** Mian Wang, George H. S. Singer. 2016-02-11 Supporting Families of Children with Developmental Disabilities: Evidence-based and Emerging Practices provides a comprehensive review of the empirical evidence on interventions for families of individuals - ranging from post-preschool age to adulthood - with developmental disabilities. The book presents both narrative and meta-analytic syntheses of a large body of research to evaluate which interventions meet contemporary standards as evidence based practices. The body of studies reviewed in the book has not previously been gathered into one volume, nor evaluated as a whole for the quality and extent of the evidence. The research is presented in the context of contemporary social policy and practices aimed at maximizing the development of children with disabilities while increasing the quality of life of their families. The criteria and procedures followed for identifying, reviewing, evaluating, and categorizing the studies are articulated in line with other major professional standards. Individual chapters focus on several different schools of practice, including: group psycho-educational interventions, behavioral parent training, multiple component interventions, supportive interventions for families of children with autism, home- and school-based practices, self-help groups, and advocacy programs. Supporting Families of Children with Developmental Disabilities is an important tool for moving the disability field forward for future research, practice, and social policy.

**Comprehensive Handbook of Social Work and Social Welfare, The Profession of Social Work** .2008-05-16 Comprehensive Handbook of Social Work and Social Welfare, Volume 1: The Profession of Social Work features contributions from leading international researchers and practitioners and presents the most comprehensive, in-depth source of information on the field of social work and social welfare.

**Education and Training in Dementia Care: A Person-Centred Approach** Claire Surr, Isabelle Latham, Sarah Jane Smith. 2023-03-03 "This book is a must read for those wanting to understand, design and improve our approach to workforce knowledge in dementia care." Paul Edwards, Director of Clinical Services, Dementia UK "Its person-centred, theory and practice-based approaches to learning make it an essential book for everyone involved in the delivery, review and commissioning of dementia education. Dr Anna Jack-Waugh, Senior Lecturer in Dementia, Senior Fellow HEA, Alzheimer Scotland Centre for Policy, and Practice, the University of the West of Scotland, UK "A relevant, innovative, and important book that can underpin better education and training in dementia care." Jesper Bøgmose, Associate Professor, Cand. Cur., Faculty of Health, University College Copenhagen, Denmark In the last twenty years the evidence-base for how to provide person-centred care for people with dementia has grown significantly. Despite this until recently there has been little evidence as to how to provide training and education for the dementia workforce. This book provides an evidence-based practical resource for people intending to develop, deliver, review, or commission education and training for the dementia workforce. Throughout, the book: • Considers the importance of informal routes and mechanisms for workforce development • Examines the importance of context and setting conditions for successful implementation of training at individual, service and organisational level • Contains up-to-date international research evidence, case studies and vignettes Education and Training in Dementia Care: A Person-Centred Approach is an accessible text aimed at all levels of prior experience, from those studying and working in health and social care services and private and third sector organisations who are responsible for the training and development of their staff, to commissioners of training or those who wish to take advice to inform their practice. The Reconsidering Dementia Series is an interdisciplinary series published by Open University Press that covers contemporary issues to challenge and engage readers in thinking deeply about the topic. The dementia field has developed rapidly in its scope and practice over the past ten years and books in this series will unpack not only what this means for the student, academic and practitioner, but also for all those affected by dementia. Series Editors: Dr Keith Oliver and Professor Dawn Brooker MBE. Claire Surr is Professor of Dementia Studies and Director of the Centre for Dementia Research at Leeds Beckett University, UK. Isabelle Latham is Researcher-in-Residence for Hallmark Care Homes, UK and Honorary Senior Research Fellow for the Association for Dementia Studies at the University of Worcester, UK. Sarah Jane Smith is a Reader in Dementia Research at Leeds Beckett University, UK.

**Impact Evaluation in Practice, Second Edition** Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J.

Vermeersch. 2016-09-12 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

**Stroke Rehabilitation - E-Book** Glen Gillen. 2015-07-15 Learn to confidently manage the growing number of stroke rehabilitation clients with Gillen's Stroke Rehabilitation: A Function-Based Approach, 4th Edition. Using a holistic and multidisciplinary approach, this text remains the only comprehensive, evidence-based stroke rehabilitation resource for occupational therapists. The new edition has been extensively updated with the latest information, along with more evidence-based research added to every chapter. As with previous editions, this comprehensive reference uses an application-based method that integrates background medical information, samples of functionally based evaluations, and current treatment techniques and intervention strategies. Evidence-based clinical trials and outcome studies clearly outline the basis for stroke interventions. UNIQUE! Survivor's Perspectives help readers understand the stroke rehabilitation process from the client's point-of-view. UNIQUE! Case studies challenge readers to apply rehabilitation concepts to realistic scenarios. UNIQUE! A multidisciplinary approach highlights discipline-specific distinctions in

stroke rehabilitation among occupation and physical therapists, physicians, and speech-language pathologists. Review questions in each chapter help readers assess their understanding of rehabilitation concepts. Key terms and chapter objectives at the beginning of each chapter help readers study more efficiently. Three new chapters broaden your understanding of stroke intervention in the areas of Using Technology to Improve Limb Function, Managing Speech and Language Deficits after Stroke, and Parenting after Stroke. Learning activities and interactive references on a companion Evolve Resources website help you review textbook content and locate additional information.

**Applied Health Economics for Public Health Practice and Research** Rhiannon Tudor Edwards, Emma McIntosh. 2019-03-14 In today's world of scarce resources, determining the optimal allocation of funds to preventive health care interventions (PHIs) is a challenge. The upfront investments needed must be viewed as long term projects, the benefits of which we will experience in the future. The long term positive change to PHIs from economic investment can be seen across multiple sectors such as health care, education, employment and beyond. Applied Health Economics for Public Health Practice and Research is the fifth in the series of Handbooks in Health Economic Evaluation. It presents new research on health economics methodology and application to the evaluation of public health interventions. Looking at traditional as well as novel methods of economic evaluation, the book covers the history of economics of public health and the economic rationale for government investment in prevention. In addition, it looks at principles of health economics, evidence synthesis, key methods of economic evaluation with accompanying case studies, and much more. Looking to the future, Applied Health Economics for Public Health Practice and Research presents priorities for research in the field of public health economics. It acknowledges the role played by natural environment in promoting better health, and the place of genetics, environment and socioeconomic status in determining population health. Ideal for health economists, public health researchers, local government workers, health care professionals, and those responsible for health policy development. Applied Health Economics for Public Health Practice and Research is an important contribution to the economic discussion of public health and resource allocation.

**Healing Roots** Julie Laplante. 2015-02-01 Umhlonyanane, also known as Artemisia afra, is one of the oldest and best-documented indigenous medicines in South Africa. This bush, which grows wild throughout the sub-Saharan region, smells and tastes like "medicine," thus easily making its way into people's lives and becoming the choice of everyday healing for Xhosa healer-diviners and Rastafarian herbalists. This "natural" remedy has recently sparked curiosity as scientists search for new molecules against a tuberculosis pandemic while hoping to recognize indigenous medicine. Laplante follows umhlonyanane on its trails and trials of becoming a biopharmaceutical — from the "open air" to controlled environments — learning from the plant and from the people who use it with hopes in healing.

**Vibrant and Healthy Kids** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach. 2019-12-27 Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

**Handbook of Research on Emotional and Behavioral Disorders** Thomas W. Farmer, Maureen A. Conroy, Elizabeth M.Z. Farmer, Kevin S. Sutherland. 2020-03-26 The Handbook of Research on Emotional and Behavioral Disorders explores the factors necessary for successful implementation of interventions that foster productive relationships and ecologies to establish, reinforce, and sustain adaptive patterns of emotional and behavioral functioning across childhood and into adulthood. Although there has been a concerted focus on developing evidence-based programs and practices to support the needs of children and youth with emotional and behavioral disorders, there has been less emphasis on the developmental, social, and environmental factors that impact the implementation and effectiveness of these approaches. Chapters from leading experts tackle this complexity by drawing on a range of disciplines and perspectives including special education; mental health services; school, clinical, and community psychology; social work; developmental psychology and psychopathology; and prevention science. An essential resource for scholars and students interested in emotional and behavioral disorders, this volume crafts an essential framework to promote developmentally meaningful strategies for children and youth with even the most adverse experiences and intensive support needs.

**Life in Schools and Classrooms** Rupert Maclean. 2017-05-04 This book discusses key aspects of life in schools and classrooms, and surveys the changes that have occurred over the years in educational research, policy making and practice in these school and classroom settings. It not only examines cutting-edge research in these areas, but also showcases good practices in the field. Among the topics reviewed are recent developments in assessment, methods for collecting and analysing data on classroom practice, school leadership and the pros and cons of class size and small-class teaching; topics which are currently hotly debated in education systems around the globe. As such, the book objectively examines the various debates, and surveys the full range of evidence available. Education researchers, policy makers and practitioners often hold differing views about the reasons for teacher and student behaviour in classrooms and, for example, its relevance to class size. Many of these views are based on 'gut feelings' rather than hard evidence. Unfortunately, these three groups, with differing perspectives, often 'talk past each other' rather than engage in a productive, mutually beneficial dialogue. The book builds an effective bridge between researchers, policy makers and practitioners regarding the impact of these various aspects of classroom life, so that the viewpoints of each can be carefully considered and evaluated.

**Sport and Exercise Psychology** Stewart Cotterill, Neil Weston, Gavin Breslin. 2016-04-15 Sport and Exercise Psychology: Practitioner Case Studies focuses on the most current issues in the field, integrating research and practice to develop a coherent understanding of current knowledge, future research directions and applied implications within the field. This is the first book to include theory-based case studies for sport performance, exercise and skill acquisition in one publication. This text provides content that is directly applicable to those students wishing to enter the profession via various national accreditation schemes, in addition to providing chartered psychologists with a text that can directly inform their reflections of

their own practice. Sport and Exercise Psychology is supported by an online learning environment that includes 'talking heads' videos for each chapter, further resources, questions and links to relevant external materials.

Creating Caring and Supportive Educational Environments for Meaningful Learning Daniels, Kisha, Billingsley, Katrina. 2018-09-14 In a seemingly tumultuous time of political change, caring and healing are needed now more than ever. This is especially true in education, which has been criticized for a disproportionate focus on the technical aspects of teaching with less focus on its "human" aspects. *Creating Caring and Supportive Educational Environments for Meaningful Learning* is a collection of innovative research on the practical and theoretical questions involved in organizing traditional and nontraditional areas of study around themes of care and support for students within the framework of current educational systems and standards. While highlighting topics including service learning, ethics of care, and student mental health, this book is ideally designed for teachers, administrators, researchers, and academicians seeking current research on the importance and ethics of the human aspects of education.

**Posthumanist and New Materialist Methodologies** Claudia Diaz-Diaz, Paulina Semenec. 2020-03-13 This book features interviews with 19 scholars who do research with children in a variety of contexts. It examines how these key scholars address research 'after the child' by exploring the opportunities and challenges of drawing on posthumanist and materialist methodologies that unsettle humanist research practices. The book reflects on how posthumanist and materialist approaches have informed research in relation to de-centering the child, re-thinking methodological concepts of voice, agency, data, analysis and representation. It also explores what the future of research after the child might entail and offers suggestions to new and emerging scholars involved in research with children. Reviewing how posthumanist and materialist approaches have informed authors' thinking about children, research and knowledge production, the book will appeal to graduate students and emerging scholars in the field of childhood studies who wish to experiment with posthumanist methodologies and materialist approaches.

**Thinking inside the box** Jeroen Deenik. 2019-05-22

Movement Disorders in Dementias Marcelo Merello, Sergio E. Starkstein. 2014-03-18 This book focuses on extrapyramidal signs and symptoms of all types of dementia, and addresses the issue of the artificial boundary between dementias and Parkinsonism, which represent the two most common symptoms found in degenerative central nervous system diseases. In *Movement Disorders in Dementias*, movement disorder specialists from around the world write on topics generally restricted to dementia experts. Important motor issues related to either medication in demented patients (drug-induced movement disorders) or manifestations common to all forms of dementia, regardless of underlying cause (gait disorders, falls, fear of falling), is followed by analysis of the relationship between motor and cognitive symptoms, from their common pathogenesis to specific medical treatments. *Movement Disorders in Dementias* is aimed at general neurologists, dementia specialists, movement disorders specialists, neuropsychologists and geriatricians.

Transforming Residential Interventions Beth Caldwell, Robert Lieberman, Janice LeBel, Gary M. Blau. 2020-01-28 *Transforming Residential Interventions: Practical Strategies and Future Directions* captures the emerging changes, exciting innovations, and creative policies and practices informing ground-breaking residential programs. Building on the successful 2014 publication *Residential Interventions for Children, Adolescents, and Families*, this follow-up volume provides a contemporary framework to address the needs of young people and their families, alongside practical strategies that can be implemented at the program, community, system, and policy levels. Using the Building Bridges Initiative as a foundation, the book serves as a how-to manual for making bold changes to residential interventions. The reader will learn from a range of inspired leaders who, rather than riding the wave of change, jumped in and created the wave by truly listening to and partnering with their youth, families, advocates, and staff. Chapters provide real-time practice examples and specific strategies that are transformational and consider critical areas, such as family and youth voice, choice and roles, partnerships, permanency and equity, diversity, and inclusion. These methods benefit youth with behavioral and/or emotional challenges and their families and will improve an organization's long-term outcomes and fiscal bottom line. This book is for oversight agencies, managed care companies, providers of service, advocates, and youth/family leaders looking for an exemplar guide to the new frontier of residential intervention. In this era of accountability and measurement, it will become a trusted companion in leading residential interventions to improved practices and outcomes.

**Ophthalmic Epidemiology** Ching-Yu Cheng, Tien Yin Wong. 2022-05-25 *Ophthalmic Epidemiology: Current Concepts to Digital Strategies* provides a comprehensive guide to graduate students, ophthalmologists, and researchers in ophthalmic epidemiology. It covers recently developed new methodologies, technologies and resources in ocular epidemiological research, such as telemedicine, disease registries, EMR, bio-banks and omics. This book also summarizes recent epidemiological findings and provides up-to-date data on ocular diseases. Furthermore, it introduces and discusses the uses of epidemiology in the evaluation of health services and population screening programs and reviews the application of epidemiology in intervention trials in the communities. Key Features Comprehensive guide to the epidemiology of common eye diseases. Provides updates on the prevalence and risk factors of eye diseases. Outlines how epidemiological techniques can be utilized to evaluate ophthalmic health services and programs.

Philosophical Foundations of Medical Law Andelka M. Phillips, Thana C. de Campos, Jonathan Herring. 2019-11-28 With advances in personalised medicine, the field of medical law is being challenged and transformed. The nature of the doctor-patient relationship is shifting as patients simultaneously become consumers. The regulation of emerging technologies is being thrown into question, and we face new challenges in the context of global pandemics. This volume identifies significant questions and issues underlying the philosophy of medical law. It brings together leading philosophers, legal theorists, and medical specialists to discuss these questions in two parts. The first part deals with key foundational theories, and the second addresses a variety of topical issues, including euthanasia, abortion, and medical privacy. The wide range of perspectives and topics on offer provide a vital introduction to the philosophical underpinnings of medical law.

**Rural Families and Communities in the United States** Jennifer E. Glick, Susan M. McHale, Valarie King. 2020-03-06 This book examines the implications of rural residence for adolescents and families in the United States, addressing both the developmental and mental health difficulties they face. Special attention is given to the unique circumstances of minority families residing in rural areas and how these families navigate challenges as well as their sources of resilience. Chapters describe approaches for enhancing the well-being of rural minority youth and their families. In addition, chapters discuss the challenges of conducting research within rural populations and propose new frameworks for studying these diverse communities. Finally, the volume offers recommendations for reducing the barriers to health and positive development in rural settings. Featured topics include: Changes in work and family structures in the rural United States. Rural job loss to offshoring and automation. The opioid crisis in the rural United States. Prosocial behaviors in rural U.S. Latino/a youth. Demographic changes across nonmetropolitan areas. *Rural Families and Communities in the United States* is a must-have resource for researchers, professors, clinicians, professionals, and graduate students in developmental psychology, family studies, public health as well as numerous interrelated disciplines, including sociology, demography, social work, prevention science, educational policy, political science, and economics.

Principles of Manual Medicine for Sacroiliac Joint Dysfunction Shigehiko Katada. 2019-06-19 This book introduces physicians and physiotherapists around the world to the principles and techniques of the Arthrokinematic Approach (AKA)-Hakata method, which is currently being used to treat joint dysfunction, in particular sacroiliac joint dysfunction. Although manual medicine is not popular among young orthopaedic surgeons, it offers a number of benefits with regard to treating functional disorders. Further, the AKA-Hakata method is quite different from conventional manual techniques, as it takes into consideration articular neurology aspects, can prevent many patients from developing severe conditions, and can help avoid unnecessary sacroiliac joint surgery. The authors have extensive experience in this field and especially with this unique manual technique. As such, *Principles of Manual Medicine for Sacroiliac Joint Dysfunction* offers a valuable guide for physicians and physiotherapists alike, helping them achieve optimal outcomes in the treatment of sacroiliac joint dysfunction.

**Animal-Assisted Intervention** Angela K. Fournier. 2019-12-09 This book brings the animal into the scholarly discussion of animal-assisted therapy

and other interventions. Challenging the current reliance on outcome studies, the author offers a new way of thinking empirically about animal-assisted interventions—analysis of human-animal interaction as a critical component. Through empirical demonstrations from laboratory and applied settings, the book encourages practitioners and scholars to undergo a deeper examination of the basic interactions that occur between clients or patients and therapy animals. Dr. Fournier provides new ideas on measurement, experimentation, and interpretation of human-animal interaction, aimed at identifying the role of the animal in interventions for human health and well-being.

**Nutrition in Pregnancy and Childbirth** Lorna Davies, Ruth Deery. 2013-12-04 Making good nutritional choices can mean women optimise the outcomes of their birthing experience and offer their babies the best possible start in life. To support this, all health professionals who work with women during pregnancy, birth and the postnatal period need to have an appropriate knowledge of nutrition, healthy eating and other food related issues. This evidence-based text provides an informative and accessible introduction to nutrition in pregnancy and childbirth. As well as allowing readers to recognise when nutritional deficiency may be creating challenges, it explores the psychosocial and cultural context of food and considers their relevance for women's eating behaviour. Finally, important emerging issues, such as eating during labour, food supplements and maternal obesity, are discussed. An important reference for health professionals working in midwifery or public health contexts especially, this book is also the ideal companion for a course on nutrition in pregnancy and childbirth.

**Integrating Health Promotion and Mental Health** Vikki Vandiver. 2009 PART I -- FUNDAMENTAL CONCEPTS. 1. CHAPTER 1: Pursuing Wellness through Mental Health System Reform. 2. CHAPTER 2: Health Promotion. 3. CHAPTER 3: Evidence-based Mental Health for Health Promotion Practice. PART II -- THEORY, PRINCIPLES AND POLICIES. 4. CHAPTER 4: Health Promotion and Theories for Mental Health Practice. 5. CHAPTER 5: Connecting Health Promotion Principles to Mental Health Policies and Programs. PART III -- INTEGRATION AND APPLICATION. 6. CHAPTER 6: Using Health Promotion Principles to Guide Clinical and Community-Based Mental Health Assessment. 7. CHAPTER 7: Integrating Health.

**Biomedical Ethics** Olinda Timms. 2019-08-02 Each chapter focuses on a single area in a simple narrative. Illustrative case reports and case studies of ethical dilemmas are provided with points for reflection/discussion. In step with the curriculum in Medical Ethics already established in several medical colleges. The chapters can be used to develop modules in a medical ethics program. Additional resources (titles of relevant films, readings, and references) are provided. The chapters have been linked to the AETCOM modules for easy reference, providing content for teaching modules. This book provides the resource to create teaching modules in medical ethics. In this way, the book compliments the AETCOM modules and can be used to develop teaching-learning sessions.

**Music Therapy: Research and Evidence-Based Practice** Olivia Swedberg Yinger. 2017-08-27 Get a quick, expert overview of the clinical and evidence-based use of music interventions in health care. This practical resource compiled by Dr. Olivia Swedberg Yinger provides a concise, useful overview of the profession of music therapy, including a description of each of the research-support practices that occur in the settings where music therapists most commonly work. Features a wealth of information on music therapy and its relevance in education settings, mental health treatment, medical treatment and rehabilitation, hospice and palliative care, gerontology, and wellness. Includes a chapter on current trends and future directions in music therapy Consolidates today's available information and guidance in this timely area into one convenient resource.

**Safety and Security Science and Technology** Anthony J. Masys. 2023-03-01 Global security threats have created a complex risk landscape that is challenging and transforming society. These global security issues intersect and influence the political, economic, social, technological, ecological and legal dimensions of the complex risk landscape and are now transborder thereby becoming national security issues. Accessing the innovation space to support safety, security and defence capabilities is critical in order to mitigate new and evolving threats. Through real-world examples of innovation, this book provides a detailed examination of the innovation space as it pertains to the application of S&T to safety and security threats and challenges. This book is of most interest to public and private sector innovators as well as academician and graduate students working in the safety and security domain.

**Guide to Evidence-Based Physical Therapist Practice** Dianne Jewell. 2011-04-20 The latest version of this best-selling text includes updates and new information designed specifically for physical therapists to facilitate evidence-based practice in both the classroom and the clinical environment. Guide to Evidence-Based Physical Therapist Practice, Second Edition continues to provide students and professionals with comprehensive, accessible information to allow them to understand and critique studies as well as to apply evidence to actual patients in clinical settings. Guide to Evidence-Based Physical Therapist Practice, Second Edition includes user-friendly descriptions of research methods and statistical tests, clinically relevant examples specific to physical therapist practice, and worksheets for use during the evidence appraisal process. The Second Edition is formatted to be consistent with the American Physical Therapy Association's Guide to Physical Therapist Practice, Second Edition and includes terminology from the World Health Organization's International Classification of Functioning, Disability and Health. This is a comprehensive resource no physical therapist or student should be without.

**Fast Facts for Evidence-Based Practice in Nursing, Third Edition** Maryann Godshall, PhD, CNE, CCRN, CPN. 2019-06-21 Second Edition Designated a Doody's Core Title! This is a concise, pocket-sized resource for students and practicing nurses alike that delivers the fundamentals of evidence-based practice (EBP) and basic nursing research concepts in an easy-to-read, quick-access format. It demystifies the research process with straightforward information. The third edition is updated to deliver the most current information on research methods, database upgrades, and new resources. The reference serves as a succinct companion for students in EBP courses and provides practicing nurses with a resource for developing EBP on their units. It equips bedside nurses with fundamental concepts and explains basic research terms and how to conduct literature searches to "find the evidence." The third edition continues to deliver the most practical information on EBP, including how to get the best evidence quickly, using various databases, and coverage of both quantitative and qualitative methods. At-a-glance charts categorize research and abundant examples demonstrate concepts. This classroom-tested book also provides background information on defining the "compelling question," which is essential to finding the appropriate evidence-based material. New to the Third Edition: Updated with current information on research methods and new resources "Finding the Evidence" chapter completely updated with the latest databases and search engines Includes two new chapters, "The Iowa Model of Evidence-Based Practice to Promote Quality Care" and "Evidence-Based Practice in the Nurse Residency Program" Aligns with projects that are required by many undergraduate programs and residency/internship programs for new nurses Incorporates the Iowa Model of EBP into developing the project format Key Features: Provides step-by-step methods to implement evidence-based practice Includes examples of how hospitals and healthcare providers are integrating EBP into their practice Includes extensive coverage of how EBP can be used to improve patient care, with examples and cases to show readers practical application of content Reviews basic terms and principles Presents quantitative and qualitative research approaches Has been classroom tested and used in both live and online course formats

**Global Handbook of Health Promotion Research, Vol. 1** Louise Potvin, Didier Jourdan. 2022-05-13 While research teams are producing relevant and valid knowledge for health promotion, there is not yet a structured manual and distinct field of health promotion research. This timely state-of-the-art handbook contributes to the structuring of such a field of research. This collection of original contributions explores the major epistemological, methodological, and ethical challenges facing health promotion research. It brings together experts from different research traditions that coexist in the field. The handbook covers the existing knowledge production and sharing practices to delineate the discipline and its agenda for future research. Ultimately, it contributes to the creation of a global community of health promotion researchers. The handbook is organized by four types of practices (what people actually do) studied in health promotion; the practices of: Individuals and populations in relation to their health and its determinants Professionals who intervene to improve population health Policy-makers and institutions involved in the advocacy, design, and implementation of policies and programs Researchers and innovators (academic scholars and global agencies) through which investment in research and production of evidence-based guidelines are made. Global Handbook of Health Promotion Research, Vol. 1: Mapping Health Promotion Research is a highly relevant reference tool for researchers and graduate students in health promotion, public health, education and socio-

health sciences; practitioners in health, medical, and social sectors; policy-makers; and health research administrators.

**Parenting Matters** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children. 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Facilitating Daily Life Integration of Technologies for Active and Healthy Aging** Daryoush Daniel Vaziri. 2018-07-09 Daryoush Daniel Vaziri illustrates that the use of mixed methods designs may support the induction of more subtle and complete theories about older adults' use of technologies for the support of active and healthy aging. The results show that older adults' social contexts and environments considerably affect their perspectives, practices and attitudes with respect to health, quality of life, well-being and technology use for active and healthy aging support. Results were collected with older adults aged 60+ as well as relevant secondary stakeholders like caregivers, policy makers or health insurance companies.

**Smart Development in Smart Communities** Gilberto Antonelli, Giuseppe Cappiello. 2016-09-13 The concept of smart cities has become one of the most significant new lines of thinking to emerge in the social sciences in recent years, both from the research and policy angles. To date, the focus in smart specialization has been on what regions as a whole can do to bring about innovation, but it hasn't necessarily addressed the role cities play within the field. This book aims to address that gap, drawing together a team of leading contributors, to illustrate this process with particular focus on cities. Smart Development in Smart Communities discusses the cross-fertilization between smart specialization and cities in fostering smart development and its interactions with the macro-, micro- and meso-economic framework, from both a theoretical and applied perspective. Specific topics covered by the book include: human capital formation and utilization; centralized/decentralized industrial policies; innovation policies; collective learning; and the role of public utilities in sustaining smart development processes. This book tackles some of the most important questions that must be faced when investigating how structural change and innovation processes are shaping local and global economic development. It will be of interest to academics and researchers in the area of Development Economics, Urban Studies and Public Management.

**Feminist Perspectives on Social Work Practice** Shannon Butler-Mokoro, Laurie Grant. 2018 This book takes a contemporary look at the issues that affect women most from a feminist perspective. Going beyond the equal pay for equal work issue, we write about mental health, substance abuse, disabilities, parenting, relationships, criminal justice, and aging all from a holistic and intersectional perspective--

**State Assessment Policy and Practice for English Language Learners** Charlene Rivera, Eric Collum. 2014-05-12 State Assessment Policy and Practice for English Language Learners presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. \*an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; \*a Survey and Description of Test Translation Practices; and \*an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.
