Berkshire Encyclopedia of Sustainability 2/10 Chris Laszlo, Karen Christensen, Daniel S. Fogel, Gernot Wagner, Peter J. Whitehouse. 2010-01-01 The Business of Sustainability is a core resource for policy makers, members of the development community, entrepreneurs, and corporate executives, as well as business and economics students and their professors. It contains rich analysis of how sustainability is being factored into industries across the globe, with enlightening case studies of businesses serving as agents of change. Contributing authors provide a groundbreaking body of research-based knowledge. They explain that the concept of sustainability is being re-framed to be positive about business instead of being tied to the old notion of a trade-off between business and society (that is, if business wins, society and the environment must lose), and they explore how economic development can contribute to building our common future.

An Introduction to Accountancy, 11th Edition S.N. Maheshwari, S.K. Maheshwari & Sharad K. Maheswari. 2013 This well-known textbook provides students with the knowledge of basic accounting principles and practices in a systematic manner. The unique feature that has made this book popular among students is the simplicity of presentation which enables them to understand the subject and solve practical problems with ease. The main strengths of the book are updated text, plentiful illustrative examples and the end-of-chapter exercises with answers. The wide coverage and user-friendly approach help the book to meet the course content requirements for BCom, BBA, MCom, MCA examinations of different universities and examinations conducted by professional institutions. KEY FEATURES □ Updated text in view of new and withdrawn accounting standards and their interpretation. □ Formulation of the roadmap for convergence of Indian Accounting Standards to IFRS. □ Incorporation of the New Schedule VI in place of Old Schedule VI with appropriate notes, wherever necessary. □ Complete overhauling of solutions to all Illustrations and requisite changes in the answers to Practical Problems required due to the substitution of New Schedule VI in place of Old Schedule VI. □ Latest questions and problems from examinations conducted by different professional bodies and universities.

Ethical Reporting of Sensitive Topics Ann Luce. 2019-02-22 Ethical Reporting of Sensitive Topics explores the underlying complexities that journalists may face when covering difficult news stories. Reporting on issues such as suicide, sexual abuse, or migration is a skill that is often glossed over in a journalist's education. By combining theory and practice, this collection will correct this oversight and give journalists the expertise and understanding to report on these subjects responsibly and ethically. Contributors to this volume are an international group of journalists-turned-academics, who share their first-hand experiences and unique professional insight into best ethical journalistic practice for reporting on sensitive topics. Drawing from a range of case studies, contributors discuss the most appropriate approach to, for example, describing a shooter who has killed a group of schoolchildren or interviewing someone who has lost everything in a natural disaster. Readers are invited to consider factors which have the potential to influence the reporting of these sorts of topics, including bias, sensationalism, conflict of interest, grief, vulnerability, and ignorance of one's own privilege. Ethical Reporting of Sensitive Topics aims to support all journalists, from students of journalism and individuals encountering a newsroom for the first time, to those veteran journalists or specialist journalists who seek to better their reporting skills.

The Law of the Sea and Climate Change Elise Johansen, Signe Veierud Busch, Ingvild Ulrikke Jakobsen. 2020-12-17 Explores how the law of the sea can develop in support of the objectives of the United Nations climate regime.

Empirical Agent-Based Modelling - Challenges and Solutions Alexander Smajgl, Olivier Barreteau. 2013-09-12 This instructional book

showcases techniques to parameterise human agents in empirical agent-based models (ABM). In doing so, it provides a timely overview of key ABM methodologies and the most innovative approaches through a variety of empirical applications. It features cutting-edge research from leading academics and practitioners, and will provide a guide for characterising and parameterising human agents in empirical ABM. In order to facilitate learning, this text shares the valuable experiences of other modellers in particular modelling situations. Very little has been published in the area of empirical ABM, and this contributed volume will appeal to graduate-level students and researchers studying simulation modeling in economics, sociology, ecology, and trans-disciplinary studies, such as topics related to sustainability. In a similar vein to the instruction found in a cookbook, this text provides the empirical modeller with a set of 'recipes' ready to be implemented. Agent-based modeling (ABM) is a powerful, simulation-modeling technique that has seen a dramatic increase in real-world applications in recent years. In ABM, a system is modeled as a collection of autonomous decision-making entities called "agents." Each agent individually assesses its situation and makes decisions on the basis of a set of rules. Agents may execute various behaviors appropriate for the system they represent—for example, producing, consuming, or selling. ABM is increasingly used for simulating real-world systems, such as natural resource use, transportation, public health, and conflict. Decision makers increasingly demand support that covers a multitude of indicators that can be effectively addressed using ABM. This is especially the case in situations where human behavior is identified as a critical element. As a result, ABM will only continue its rapid growth. This is the first volume in a series of books that aims to contribute to a cultural change in the community of empirical agent-based modelling. This series will bring together representational experiences and solutions in empirical agent-based modelling. Creating a platform to exchange such experiences allows comparison of solutions and facilitates learning in the empirical agent-based modelling community. Ultimately, the community requires such exchange and learning to test approaches and, thereby, to develop a robust set of techniques within the domain of empirical agent-based modelling. Based on robust and defensible methods, agent-based modelling will become a critical tool for research agencies, decision making and decision supporting agencies, and funding agencies. This series will contribute to more robust and defensible empirical agent-based modelling.

Smart Solutions to Climate Change Bjørn Lomborg. 2010-09-09 The failure of the Copenhagen climate conference in December 2009 revealed major flaws in the way the world's policy makers have attempted to prevent dangerous levels of increases in global temperatures. The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options, including geo-engineering, mitigation of CO₂, methane and 'black carbon', expanding forest, research and development of low-carbon energy and encouraging green technology transfer. For each policy, authors outline all of the costs, benefits and likely outcomes, in fully referenced, clearly presented chapters accompanied by shorter, critical alternative perspectives. To further stimulate debate, a panel of economists, including three Nobel laureates, evaluate and rank the attractiveness of the policies. This authoritative and thought-provoking book will challenge readers to form their own conclusions about the best ways to respond to global warming.

Young People and Stories for the Anthropocene Peter Kelly, Peter Kraftl, Diego Carbajo Padilla, Rosalyn Black, Deborah MacDonald, Meave Noonan, Ana Sofia Ribeiro. 2022-11-15 This edited collection presents stories of children and young people's entanglements with times of ongoing crisis in the Anthropocene. The authors use biographical narratives and arts-based methodologies to further the discussion surrounding young people's well-being, resilience, and enterprise. Through these stories, they seek to critically engage with the literature on the Anthropocene and interrogate concepts such as agency, structure, and belonging.

Solar Planetary Systems Asit B. Bhattacharya, Jeffrey M. Lichtman. 2016-11-25 The authors have put forth great efforts in gathering present day

knowledge about different objects within our solar system and universe. This book features the most current information on the subject with information acquired from noted scientists in this area. The main objective is to convey the importance of the subject and provide detailed information on the physical makeup of our planetary system and technologies used for research. Information on educational projects has also been included in the Radio Astronomy chapters. This information is a real plus for students and educators considering a career in Planetary Science or for increasing their knowledge about our planetary system.

Environmental Change, Forced Displacement and International Law Isabel M. Borges. 2018-12-07 This book explores the increasing concern over the extent to which those suffering from forced cross-border displacement as a result of environmental change are protected under international human rights law. Formally they are not entitled to admission or stay in a third state country, a situation that has been identified as an international legal protection gap. The book seeks to provide answers to two basic questions: whether and to what extent existing international law protects cross-border environmental displacement, and whether and how existing formalized regional complementary protection standards can interpretively solidify and conceptualize protection for cross-border environmental displacement. The discussion outlines that the protection of the human person is not only an ex post facto obligation of states, but must be increasingly seen as an ex ante one. The analysis further suggests that the European Union regionally orientated protection regime can help states to consolidate an evolving protection paradigm of proactive and reactive measures being erected at the international level. It can also narrow the identified legal protection gaps. In so doing, it helps states to reconceptualise protection as a holistic and dynamic enterprise. This book will be of great interest to academics in law, political science and human rights, policy makers and civil society organisations both at national and international level.

Renewable Energy Sources and Climate Change Mitigation Ottmar Edenhofer, Ramón Pichs Madruga. 2012 This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector and academic researchers.

Structuring an Energy Technology Revolution Charles Weiss, William B. Bonvillian. 2012-01-13 An argument for a major federal program to stimulate innovation in energy technology and a proposal for a policy approach to implement it. America is addicted to fossil fuels, and the environmental and geopolitical costs are mounting. A public-private program—at an expanded scale—to stimulate innovation in energy policy seems essential. In *Structuring an Energy Technology Revolution*, Charles Weiss and William Bonvillian make the case for just such a program. Their proposal backs measures to stimulate private investment in new technology, within a revamped energy innovation system. It would encourage a broad range of innovations that would give policymakers a variety of technological options over the long implementation period and at the huge scale required, faster than could be accomplished by market forces alone. Even if the nation can't make progress at this time on pricing carbon, a technology strategy remains critical and can go ahead now. Strong leadership and public support will be needed to resist the pressure of entrenched interests

against putting new technology pathways into practice in the complex and established energy sector. This book has helped start the process.

Urban Heat Stress and Mitigation Solutions Vincenzo Costanzo, Gianpiero Evola, Luigi Marletta. 2021-09-08 This book provides the reader with an understanding of the impact that different morphologies, construction materials and green coverage solutions have on the urban microclimate, thus affecting the comfort conditions of urban inhabitants and the energy needs of buildings in urban areas. The book covers the latest approaches to energy and outdoor comfort measurement and modelling on an urban scale, and describes possible measures and strategies to mitigate the effects of the mutual interaction between urban settlements and local microclimate. Despite its relevance, only limited literature is currently devoted to appraising—from an engineering perspective—the intertwining relationships between urban geometry and fabrics, energy fluxes between buildings and their surroundings, outdoor microclimate conditions and building energy demands in urban areas. This book fills this gap by first discussing the physical processes that govern heat and mass transfer at an urban scale, while emphasizing the role played by different spatial arrangements, manmade materials and green infrastructures on the outdoor microclimate. The first chapters also address the implications of these factors on the outdoor comfort conditions experienced by pedestrians, and on the buildings' energy demand for space heating and cooling. Then, based upon cutting-edge experimental activities and simulation work, this book demonstrates current and forthcoming adaptation and mitigation strategies to improve the urban microclimate and its impact on the built environment, such as cool materials, thermochromic and retroreflective finishing materials, and green infrastructures applied either at a building scale or at the urban scale. The effect of these solutions is demonstrated for different cities worldwide under a range of climate conditions. Finally, the book opens a wider perspective by introducing the basic elements that allow fuel poverty, raw materials consumption, and the principles of circular economy in the definition of a resilient urban settlement.

Financial Accounting for BBA, 2nd Edition Maheshwari S.N. & Maheshwari S.K.. Financial Accounting for BBA has been written to meet the requirements of undergraduate students, particularly at the BBA level. This book covers the syllabi of major universities across the country, providing basic knowledge of accounting principles and practices in a systematic manner. The topics have been dealt with in a lucid manner to enable better understanding, especially for those students who do not have an accounting background. The text is examination-oriented and is supplemented with relevant solved illustrations for all the topics.

Pathways to Our Sustainable Future Patricia M. DeMarco. 2017-11-10 Pittsburgh has a rich history of social consciousness in calls for justice and equity. Today, the movement for more sustainable practices is rising in Pittsburgh. Against a backdrop of Marcellus shale gas development, initiatives emerge for a sustainable and resilient response to the climate change and pollution challenges of the twenty-first century. People, institutions, communities and corporations in Pittsburgh are leading the way to a more sustainable future. Examining the experience of a single city, with all of its social and political complexities and long industrial history, allows a deeper understanding of the challenges and opportunities inherent in adapting to a changing world. Choices for more sustainable pathways for the future include transforming the energy system, restoring infertile ground, and preventing pollution through green chemistry production. Throughout the book, case studies responding to ethical challenges give specific examples of successful ways forward. Inspired by Rachel Carson's voice of precaution in protecting the Earth, this is a book about empowerment and hope.

Nature-Based Solutions for Cities Timon McPhearson, Nadja Kabisch, Niki Frantzeskaki. 2023-08-14 This is an open access title available under the terms of a CC BY-NC-ND 4.0 License. It is free to read, download and share on Elgaronline.com. Nature-based solutions (NBS) are increasingly being adopted to address climate change, health, and urban sustainability, yet ensuring they are effective and inclusive remains a challenge. Addressing

these challenges through chapters by leading experts in both global south and north contexts, this forward-looking book advances the science of NBS in cities and discusses the frontiers for next-generation urban NBS.

Berkshire Encyclopedia of Sustainability 3/10 Klaus Bosselmann, Daniel S. Fogel, J.B. Ruhl, Patricia Wouters. 2010-11-30 The Law and Politics of Sustainability explores efforts made to address pressing environmental concerns through legislation, conventions, directives, treaties, and protocols. Articles explain the mechanics of environmental law, the concepts that shape sustainable development, case studies and rulings that have set precedents, approaches to sustainable development taken by legal systems around the world, and more. Experts and scholars in the field raise provocative questions about the effectiveness of international law versus national law in protecting the environment, and about the effect of current laws on future generations. They analyze the successes and shortcomings of present legal instruments, corporate and public policies, social movements, and conceptual strategies, offering readers a preview of the steps necessary to develop laws and policies that will promote genuine sustainability.

Ocean Law and Policy Carlos Espósito, James Kraska, Harry N. Scheiber, Moon-Sang Kwon. 2016-11-03 In Ocean Law and Policy: Twenty Years of Development under the UNCLOS Regime, experts from fourteen countries present nineteen papers that provide insightful analyses of these wide-ranging issues that form the emerging new context of UNCLOS as a keystone to a working regime system.

Policy analysis of Nationally Determined Contributions in the Europe and Central Asia region Van't Wout, T., Celikyilmaz, G., Arguello, C.. 2021-12-21 This publication has the objective of providing a comprehensive analysis of the key trends in greenhouse gas (GHG) emissions and vulnerability to climate change in the Europe and Central Asia (ECA) region, compiling the most relevant efforts and progress reported by countries in the implementation of mitigation and adaptation goals and measures in recent years. Considering the areas of the FAO mandate, this document aims to provide information with relevance for the agricultural, and land use, land-use change, and forestry (LULUCF) sectors as key contributors to country gross domestic product (GDP) and one of the most vulnerable areas of economic activity to the impacts of climate change. This policy analysis report consists of three main sections that consider the levels of economic development, as well as diverse geopolitical contexts, in the region. To reflect this diversity of country realities, the information is structured and presented by sub-regions, including the Caucasus, Central Asia, (European part of) the Commonwealth of the Independent States and Ukraine 2 (hereinafter referred to as CIS), EU27+UK, 3 European Free Trade Association (EFTA), and Southeastern Europe (SEE).

Sustainable Solutions for Urban Water Security Binaya Kumar Mishra, Shamik Chakraborty, Pankaj Kumar, Chitresh Saraswat. 2020-08-14 This book presents solutions to address water security in rapidly urbanizing cities, and explores the new paradigms of water security in changing contexts. Highlighting the latest developments in water research, changes in water policy, and current discourses on water security, the book also provides information and tools for local stakeholders, water managers, and policymakers to build the capacity for sustainable water governance. The book discusses a wide range of sustainable solutions and their implementation to ensure that the balance between water supply and demand remains sustainable in the long term, with a focus on local solutions to build capacity and developing policy awareness for a wide range of stakeholders. As the concept of urban water security in changing contexts is open to multiple interpretations, the authors set out various approaches. Providing an overview of the changing perspectives of urban water security in different contexts, the book is based on findings of the Asia-Pacific Network water security project at the United Nations University, Tokyo, as well as the authors' current research-based at Pokhara University, Nepal, Hosei University, Tokyo, Institute for the Global Environmental Strategies, Japan and the Australian National University, Australia. The book also includes the views of international authorities (such as water experts) on the subject. The solutions are complemented by analysis of case studies of various

localized sustainable solutions at different scales. The book is a valuable resource for water professionals and policymakers around the globe, academics, teachers working in water-related areas, NGOs, think tanks, water research institutes, donor organizations, and international and local water utility services.

Theme Cities: Solutions for Urban Problems Wayne K.D. Davies.2015-03-23 This book reviews a series of new urban ideas or themes designed to help make cities more liveable, sustainable, safe and inclusive. Featuring examples drawn from cities all over the world, the various chapters provide critical assessments of each of the various approaches and their potential to improve urban life. New Urbanism: creating new areas based on a more humane scale with neighbourhood cohesion Just Cities: creating more fairness in decision-making so all residents can participate and benefit. Green Cities: helping places become greener with environmental rehabilitation and protection Sustainable Cities: avoiding the waste of resources and harmful pollution in settlements Transition Towns: developing local initiatives for more sustainable actions Winter Cities: making cities in cold climates more comfortable and enjoyable Resilient Cities: strengthening cities to better enable them to withstand natural hazards Creative Cities: supporting cultural industries and attracting talented individuals Knowledge Cities: creating, renewing and spreading knowledge and innovation Safe Cities: ensuring that citizens are better protected against criminal actions Healthy Cities: making improvements in the health of people in cities Festive Cities: rediscovering the utility of festive events in settlements Slow Cities: enhancing locally unique activities, such as local cuisines and community interactions This volume offers a host of approaches designed to give a new direction and focus to planning policies, helping readers to fully understand the advantages and disadvantages of each potential idea. It seeks to solve the many current problems associated with urban developments, making it a valuable resource for university and college students in urban geography, urban planning, urban sociology and urban studies as well as to planners and the general public.

Research Handbook on Intellectual Property and Climate Change Joshua D. Sarnoff.2016-04-29 Written by a global group of leading scholars, this wide-ranging Research Handbook provides insightful analysis, useful historical perspective, and a point of reference on the controversial nexus of climate change law and policy, intellectual property law and policy, innovation policy, technology transfer, and trade. The contributors provide a unique review of the scientific background, international treaties, and political and institutional contexts of climate change and intellectual property law. They further identify critical conflicts and differences of approach between developed and developing countries. Finally they put forward and analyse the relevant intellectual property law doctrines and policy options for funding, developing, disseminating, and regulating the required technologies and their associated activities and business practices. The book will serve as a resource and reference tool for scholars, policymakers and practitioners looking to understand the issues at the interface of intellectual property and climate change.

The Climate Solutions Consensus National Council for Science and the Environment.2012-06-22 In 2007, the Intergovernmental Panel on Climate Change shared the 2007 Nobel Peace Prize (with former Vice President Al Gore) for its reporting on the human causes of climate change. In 2008, the National Council for Science and the Environment reported that the acceleration of climate change is already faster than the IPCC projected only a year earlier. How we deal with the rapid environmental changes, and the human forces that are driving these changes, will be among the defining issues of our generation. Climate Solutions Consensus presents an agenda for America. It is the first major consensus statement by the nation's leading scientists, and it provides specific recommendations for federal policies, for state and local governments, for businesses, and for colleges and universities that are preparing future generations who will be dealing with a radically changed climate. The book draws upon the recommendations developed by more than 1200 scientists, educators and decision makers who participated in the National Council for Science and the Environment's 8th National Conference on Science, Policy and the Environment. After presenting a lucid narrative of the science behind climate change and its

solutions, Climate Solutions Consensus presents 35 practical, results-oriented approaches for minimizing climate change and its impacts. It clearly spells out options for technological, societal, and policy actions. And it deals head-on with controversial topics, including nuclear energy, ocean fertilization and atmospheric geo-engineering. One of the book's key conclusions is that climate solutions are about much more than energy sources. They involve re-examining everything people do with an eye toward minimizing climate impacts. This includes our eating habits, consumption patterns, transportation, building and housing, forestry, land use, education, and more. According to these scientists, the time to act is now. With clarity and urgency, they tell us exactly what needs to be done to start reversing the driving factors behind climate change, minimizing their consequences, and adapting to what is beyond our power to stop.

Third Coast Atlas Daniel Ibanez, Clare Lyster, Charles Waldheim, Mason White. 2017-09-15 Measuring over 10,000 miles, the Great Lakes coastline, known as the "third coast," is longer than the Atlantic and Pacific coastlines of the United States combined. It is difficult to overstate the history and future of the region as both a contested and opportunistic site for urbanism. Envisaged as a comprehensive "atlas," this publication comprises in-depth analysis of the landscapes, hydrology, infrastructure, urban form, and ecologies of the region, delivered through a series of analytical cartographies supported by scholarly and design research from internationally renowned scholars, photographers, and practitioners from the disciplines of architecture, landscape, geography, planning, and ecology. This publication was awarded with a grant from the Graham Foundation for Advanced Studies in the Fine Arts.

Soil-Specific Farming Rattan Lal, B.A. Stewart. 2015-08-20 Faced with challenges of resource scarcity and environmental degradation, it is important to adopt innovative farming systems that maximize resource efficiency while protecting the environment. Soil-Specific Farming: Precision Agriculture focuses on principles and applications of soil-specific farming, providing information on rapidly evolving agricultural technologies. It addresses assessments of soil variability and application of modern innovations to enhance use efficiency of fertilizers, irrigation, tillage, and pesticides through targeted management of soils and crops. This book provides the technological basis of adopting and promoting precision agriculture (PA) for addressing the issues of resource scarcity, environmental pollution, and climate change. It focuses specifically on PA technologies and discusses historical evolution, soil variability at different scales, soil fertility and nutrient management, water quality, land leveling techniques, and special ecosystems involving small landholders and coastal regions. Highlighting the scale-related issues and concerns of small landholders, the text details the efficient use of resources on the basis of soil/field variability and site-specific conditions. It examines how PA technology can increase productivity, enhance profitability, and minimize environmental degradation. Woven throughout is the theme of sustainable use of resources.

Routledge Handbook of Sustainable Real Estate Sara Wilkinson, Tim Dixon, Norm Miller, Sarah Sayce. 2018-03-21 With the built environment contributing almost half of global greenhouse emissions, there is a pressing need for the property and real estate discipline to thoroughly investigate sustainability concerns. The Routledge Handbook of Sustainable Real Estate brings together the latest research of leading academics globally, demonstrating the nature and extent of the impact as well as suggesting means of mitigating humankind's impact and building resilience. Four sections examine the different aspects of sustainable real estate: governance and policy valuation, investment and finance management redevelopment and adaptation. Covering all land uses from residential to commercial, retail and industrial, the Routledge Handbook of Sustainable Real Estate is an exciting mixture of received wisdom and emerging ideas and approaches from both the developed and developing world. Academics, upper-level students and researchers will find this book an essential guide to the very best of sustainable real estate research.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC). 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular

assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Global Problems, Global Solutions JoAnn Chirico.2018-10-11 Global Problems, Global Solutions: Prospects for a Better World by JoAnn Chirico approaches social problems from a global perspective with an emphasis on using one's sociological imagination. Perfect for instructors who involve students in research, this text connects problems borne by individuals to regional, global, and historical forces, and stresses the importance of evidence in forming opinions and policies addressing social issues. The book introduces readers to the complexities of the major problems that confront us today such as violent conflict, poverty, climate change, human trafficking and other issues that we encounter in our lives. It book concludes with a chapter on politics and government, underscoring the need for good governance at all levels—and cooperation among many layers of government—to build a better world.

Independent Police Complaints Commission Great Britain: Parliament: House of Commons: Home Affairs Committee.2013-02 When public trust in the police is tested by complaints of negligence, misconduct and corruption, a strong watchdog is vital to get to the truth: but the IPCC leaves the public frustrated and faithless. The public are bewildered by its continued reliance on the very forces it is investigating. The IPCC investigated just a handful of cases and often arrived at the scene late, when the trail had gone cold. Serious cases involving police corruption or misconduct are left underinvestigated, while the Commission devotes resources to less serious complaints. It is woefully underequipped to supervise the 43 forces of England and Wales, never mind the UKBA, HMRC, NCA and all the private sector agencies involved in policing. It is buried under the weight of poor police investigations and bound by its limited powers. The Committee makes a number of recommendations including: that the Commission should be given a statutory power to require a force to implement its findings and in the most serious cases, the Commission should instigate a year on review to ensure that its recommendations have been properly carried out, the Commission should be given a statutory power to require a force to implement its findings and the most serious cases, the Commission should instigate a 'year on review', the Commission's jurisdiction should be extended to cover private sector contractors

MANAGEMENT ACCOUNTING SURENDER SINGH.2016-09-03 This book on Management Accounting has been written to serve as a useful text for undergraduate courses in commerce and management— B.Com. (Hons.), B.Com., B.B.A., B.B.S., B.B.M., B.B.E.—offered by Indian Universities and Institutes. Besides, the students pursuing M.Com., M.B.A., M.I.B., C.A., C.M.A. and C.S. will also find the book equally beneficial for their course curriculum.**SALIENT FEATURES** • Written in a simple, lucid and easy to comprehend style, to facilitate learning even for the first time readers. • Topics have been presented and organised systematically. • Concepts are supported with numerous graphs, tables and diagrams, wherever required. • Incorporates more than 260 solved examples/illustrations/questions from previous examination papers of various universities and professional institutes. • Considerable number of objective type, multiple choice questions (MCQs), and theoretical and practical questions have been provided in each chapter for the students to learn and practice. The book has already found place in the recommended list of the UGC curriculum under its Choice Based Credit System.

Causes, Impacts and Solutions to Global Warming Ibrahim Dincer,Can Ozgur Colpan,Fethi Kadioglu.2013-10-29 Global Warming: Causes,

Impacts and Solutions covers all aspects of global warming including its causes, impacts, and engineering solutions. Energy and environment policies and strategies are scientifically discussed to expose the best ways to reduce global warming effects and protect the environment and energy sources affected by human activities. The importance of green energy consumption on the reduction of global warming, energy saving and energy security are also discussed. This book also focuses on energy management and conservation strategies for better utilization of energy sources and technologies in buildings and industry as well as ways of improving energy efficiency at the end use, and introduces basic methods for designing and sizing cost-effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects, and describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities. These features and more provide the tools necessary to reduce global warming and to improve energy management leading to higher energy efficiencies. In order to reduce the negative effects of global warming due to excessive use of fossil fuel technologies, the following alternative technologies are introduced from the engineering perspective: fuel cells, solar power generation technologies, energy recovery technologies, hydrogen energy technologies, wind energy technologies, geothermal energy technologies, and biomass energy technologies. These technologies are presented in detail and modeling studies including case studies can also be found in this book.

Eating Earth Lisa Kemmerer.2014-09-30 Exploring the environmental effects of animal agriculture, fishing, and hunting, *Eating Earth* exposes critical common ground between earth and animal advocacy. The first chapter (animal agriculture) examines greenhouse gas emissions and climate change, manure and dead zones, freshwater depletion, deforestation, predator control, land and use--including the ranching industries public lands subsidies. Chapter two first examines whether or not the consumption of fish is healthy and outlines morally relevant aspects of fish physiology, then scrutinizes the fishing industry, documenting the silent collapse of ocean ecosystems and calling attention to the indiscriminate nature of hooks and nets, including the problem of bycatch and what this means for endangered species and fragile seascapes. Chapter three outlines the historic link between the U. S. Government, wildlife management, and hunters, then systematically unravels common beliefs about sport hunting, such as the belief that hunters are essential to wildlife conservation, that contemporary hunting qualifies as a tradition, and that hunting is merciful, economical, or rooted in fair chase. At the end of each chapter, Kemmerer examines possible solutions to problems presented, such as sustainable meats, organic and local, grass fed, aquaculture, new fishing technologies, and enhanced regulations. *Eating Earth* offers a concise examination of the environmental effects of dietary choice, clearly presenting the many reasons why dietary choice ought to be front and center for environmentalists. Kemmerer's writing, supported by nearly 80 graphs and summary slides, is clear, straightforward, and punctuated with wry humor.

Adapting to Climate Change Amanda Lanser.2014-08-01 This title examines how climate change affects individuals and society, investigates how people are working to respond and adapt to climate change, and analyzes the controversies and conflicting viewpoints surrounding the issue. Features include a glossary, selected bibliography, websites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

International Energy Governance Rafael Leal-Arcas,Andrew Filis,Ehab S. Abu Gosh.2014-11-28 Selected legal deficiencies relating to international energy governance are identified in this salient book. The currently fragmented and multi-layered international energy governance regime is exposed and reviewed. If governance were streamlined for

Can Business Save the Earth? Michael Lenox,Aaron Chatterji.2018-05-22 Increasingly, business leaders are tasked with developing new products, services, and business models that minimize environmental impact while driving economic growth. It's a tall order—and a call that is only getting louder. In *Can Business Save the Earth?*, Michael Lenox and Aaron Chatterji explain just how the private sector can help. Many believe that markets

will inevitably demand sustainable practices and force them to emerge. But Lenox and Chatterji see it differently. Based on more than a decade of research and work with companies, they argue that a bright green future is only possible with dramatic innovation across multiple sectors at the same time. To achieve this, a broader ecosystem of players—including inventors, executives, customers, investors, activists, and governments—all must play a role. The book outlines how and the extent to which each group can serve as a driver of green growth. Then, Lenox and Chatterji identify where economic incentives currently exist, or could exist with institutional change, and ultimately address the larger question of how far well-coordinated efforts can take us in addressing the current environmental crisis.

Sustainability in the Hospitality Industry Willy Legrand, Joseph S. Chen, Gabriel C. M. Laeis. 2022-07-29 Approach/Focus & Coverage: This is the only current textbook available to introduce students to economic, environmental and social sustainable issues specifically facing the hospitality industry as well as exploring ideas, solutions, and strategies of how to manage operations in a sustainable way. Other books focus just on environmental management in hospitality or are 'how to' guides aimed at practitioners/hotel managers. International: It takes a global approach in content and examples. Offers good balance between theory and practice: Integrates excellent case studies from a variety of settings and geographical locations to showcase the successes and failures. Other specific hospitality books tend to be practical how to guides. Accessibility: Peppared with features throughout to aid understanding & spur critical thinking & unrivalled online resources including video interviews with practitioners.

Renewable Energy Based Solutions Tanay Sidki Uyar, Nader Javani. 2022-11-01 This book discusses the main renewable energy resources, along with the current challenges that make it difficult achieve 100% decarbonized energy sources. It presents the perspectives of international expert authors in the field, giving readers a multi-dimensional view of the subject. The book explores numerous approaches for a smooth transition from fossil fuels to renewable energies, including those based on engineering methods, as well as policies, strategies, and social perceptions. It presents several case studies and examples from industry, showcasing the potential role of renewable sources and their challenges. The inclusion of both established methods and cutting-edge developments will make this book of interest to academics, industry professionals, policy makers, and graduate students alike.
