Metaphor, Nation and Discourse Ljiljana Šarić, Mateusz-Milan Stanojević. 2019-05-20 This edited volume examines how metaphors and related phenomena (metonymies, symbols, cultural models, stereotypes) lead to the discursive construal of a common element that brings the nation together. The central idea is that metaphor use must be questioned to lay bare the processes and the discursive power behind them. The chapters examine a range of contemporary and historical, monomodal and multimodal discourses, including politicians' discourse, presidential speeches, newspapers, TV series, Catholic homilies, colonialist discourse, and various online sources. The approaches taken include political science, international relations, cultural studies, and linguistics. All contributions feature discursive constructivist views of metaphor, with clear sociocultural grounding, and the notion of metaphor as a framing device in constructing various aspects of nations and national identity. The volume will appeal to scholars in discourse analysis, metaphor studies, media studies, nationalism studies, and political science.

The Forgotten Half of Change Luc de Brabandere. 2016-09-27 Best-selling author of *Thinking in New Boxes* and *Fellow* in a \$5 billion international consulting firm, BCG, Luc de Brabandere shares the secrets to change that are not just vital to businesses, but life itself. Throughout history, human beings have adapted to improve their lives and shape the world as we know it. But as the world changes, so must our perception of it—even what we create. Using approachable, witty, and engaging examples from philosophy, science, technology and linguistics, Luc de Brabandere explores the dangers, both in business and in life, of relying on habit and repetition. Behaviors that work for us one day may not the next. To truly move forward, we must not just embrace what works, but constantly explore what could work better. This constant exploration is what drives change, inspires creativity, and fosters dynamic strategy in all facets of life, especially business, where innovation and out-of-the-box thinking has led and will lead to humankind's greatest tomorrows. Both a clever and eye-opening guide and an invaluable vault of knowledge, *The Forgotten Half of Change* provides tools for strategic management that adapt to the test of time.

Judith Marko Marulić. 1991 From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In *The Two Sign Painters*, TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. His *Son's Big Doll* introduces the tortured soul inside a walking advertisement, and in *Xiaoqi's Cap* a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters—generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty—come to life in all their human uniqueness, free from idealization.

Grammar and the Teaching of Writing Rei R. Noguchi. 1991 Intended for practitioners, this study has three principal aims: (1) to reduce the breadth of formal grammar instruction by first locating those areas where grammar and writing overlap and then identifying those kinds of writing problems most amenable to treatment with a grammar-based approach; (2) to decrease the classroom hours spent on formal grammar instruction by showing how to capitalize on the already acquired yet unconscious knowledge that all native writers have of their language; and (3) to make this streamlined writer's grammar more productive by showing how to integrate it with style, content, and organization. The book is directed toward teachers of writing who, to varying degrees, struggle with the unwieldy partnership of grammar and writing. Chapters 1 and 2 serve to examine some probable reasons why grammar instruction has failed to improve writing quality, to delimit radically the scope of grammar instruction, and to identify specific areas where a knowledge of a minimal set of grammatical categories might be of help. Chapters 3 and 4 focus on the use of native-speaker abilities in place of formal grammar instruction to treat certain kinds of sentence-level writing problems. Chapter 5 suggests a promising way to integrate the diminished focus on grammar with style, content, and organization. Finally, chapter 6 summarizes several pragmatic paradoxes that currently beset grammar instruction in the schools. (MG)

The Genesis of Grammar Bernd Heine, Tania Kuteva. 2007-10-05 This book reconstructs what the earliest grammars might have been and shows how

they could have led to the languages of modern humankind. Like other biological phenomena, language cannot be fully understood without reference to its evolution, whether proven or hypothesized, wrote Talmy Givón in 2002. As the languages spoken 8,000 years ago were typologically much the same as they are today and as no direct evidence exists for languages before then, evolutionary linguists are at a disadvantage compared to their counterparts in biology. Bernd Heine and Tania Kuteva seek to overcome this obstacle by combining grammaticalization theory, one of the main methods of historical linguistics, with work in animal communication and human evolution. The questions they address include: do the modern languages derive from one ancestral language or from more than one? What was the structure of language like when it first evolved? And how did the properties associated with modern human languages arise, in particular syntax and the recursive use of language structures? The authors proceed on the assumption that if language evolution is the result of language change then the reconstruction of the former can be explored by deploying the processes involved in the latter. Their measured arguments and crystal-clear exposition will appeal to all those interested in the evolution of language, from advanced undergraduates to linguists, cognitive scientists, human biologists, and archaeologists.

The Secret Diary of Adrian Mole, Aged 13 3/4 Sue Townsend.2018-01-02 British adolescent angst has never been so “laugh-out-loud funny” as in this first encounter with a sharp-witted, pining, and achingly honest underdog (The New York Times). Perhaps when I am famous and my diary is discovered, people will understand the torment of being a 13¾-year-old undiscovered intellectual. Adrian Mole is approaching fourteen, and like all radical intellectuals he must amass his grievances: His acne vulgaris is grotesque; his crush, Pandora, received seventeen Valentine’s Day cards; his PE teacher is a sadist; he fears his parents’ marriage is over since they no longer smoke together; his dog has gone AWOL; no one appreciates his poetry; and Animal Farm has set him off pork for good. If everyone were as appalled as Adrian Mole, it would be a better world. Introducing “one of literature’s most endearing figures”: a luckless adolescent of great expectations and dwindling patience who knows all—or believes he does—and tells all (The Observer). First published in 1982, Adrian’s chronicle of angst has sold more than twenty million copies worldwide, spawned seven sequels, and been adapted for television and staged as a musical. Here’s where it all began.

Love Virtually Daniel Glattauer.2013-12-03 It begins by chance: Leo receives emails in error from an unknown woman called Emmi. Being polite he replies, and Emmi writes back. A few brief exchanges are all it takes to spark a mutual interest in each other, and soon Emmi and Leo are sharing their innermost secrets and longings. The erotic tension simmers, and, despite Emmi being happily married it seems only a matter of time before they will meet in person. Will their feelings for each other survive the test of a real-life encounter? And if so, what then? Love Virtually is a funny, fast-paced and absorbing experience, with plenty of twists and turns, about a love affair conducted by email.

Modals in the Languages of Europe Björn Hansen,Ferdinand de Haan.2009 This book is the first comprehensive survey of modals and modal constructions in the languages of Europe. It is a collaborative effort between scholars from Europe and the United States, stemming from a workshop on Modals in the Languages of Europe in Valencia. The aim of this book is to describe the properties of modals and modal constructions in the European area and to compare the systems in individual languages or language families from an areal and genetic perspective. For the sake of contrast, the book also looks at the expression of modality in some languages just outside of Europe. The book consists of fourteen chapters on modal systems in individual languages or language families, written by experts in the respective languages, and an introductory and concluding chapter, written by the editors. The book gives both a description of the modals in the individual languages and an account of the nature and status of modals in general. It provides the reader with a theoretical account of how modals and modal constructions are grammaticalized. This theoretical account is informed by the parameters of grammaticalization of Christian Lehmann. These parameters were chosen because they are language-independent, as opposed to more language specific criteria (for instance, the NICE-criteria for English). The parameters themselves are examined as well for their suitability as part of any theory of grammaticalization. The book thus gives readers access to a collection of data on modality that surpasses most works in this field and also provides a fresh perspective on issues of grammaticalization and language contact. It is therefore of interest to scholars of modality, language contact and areal linguistics, grammaticalization theory and typology.

The contributions are examples of data-based research. They address several levels of the language system including morphology, syntax and lexicology, and put special emphasis on mechanisms of internal and contact-induced language change spanning different epochs and societal and textual strata.

The Road to Results Linda G. Morra-Imas,Linda G. Morra,Ray C. Rist.2009 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a rigorous quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results, ' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

The Syntax of Imperatives Asier Alcázar,Mario Saltarelli.2014-01-23 The imperative clause is one of three major sentence types that have been found to be universal across the languages of the world. Compared to declaratives and interrogatives, the imperative type has received comparatively less attention. Using compelling empirical evidence, this cutting-edge study presents a new linguistic theory of imperatives.
