Introduction to Investor-State Arbitration Yves Derains, Josefa Sicard-Mirabal. 2018-10-17 Today thousands of investors act globally in markets providing services, technology or capital in countries all around the world. This activity can be peacefully accomplished when both the investor and the host State know that the disputes will be resolved under the aegis of the investor-State arbitration regime, wherein an investor is provided with a direct right of action against a State, most commonly stemming from a bilateral or multilateral investment treaty. This book approaches the substantive and sometimes difficult concepts of investor-State arbitration in a clear and concise explanatory fashion. In the course of acquainting the reader with the basic legal concepts and policies of the regime, the authors address such issues as the following: • consent to jurisdiction; • State responsibility; • possible conflict of interests; • mechanisms for reviewing an award; • damages and costs; and • enforcement. The book examines a number of arbitration procedures arising from various perspectives with differing underlying assumptions while highlighting important cases. Given that investor-State arbitration is now under the public watch and facing many challenges, this remarkably clear and concise overview of the regime will prove to be of great value to in-house counsel and other practitioners, as well as to government policymakers and students.x`

Economic Analysis and Infrastructure Investment Edward L. Glaeser,James M. Poterba.2021-11-11 Policy-makers often call for expanding public spending on infrastructure, which includes a broad range of investments from roads and bridges to digital networks that will expand access to high-speed broadband. Some point to near-term macro-economic benefits and job creation, others focus on long-term effects on productivity and economic growth. This volume explores the links between infrastructure spending and economic outcomes, as well as key economic issues in the funding and management of infrastructure projects. It draws together research studies that describe the short-run stimulus effects of infrastructure spending, develop new estimates of the stock of U.S. infrastructure capital, and explore the incentive aspects of public-private partnerships (PPPs). A salient issue is the treatment of risk in evaluating publicly-funded infrastructure projects and in connection with PPPs. The goal of the volume is to provide a reference for researchers seeking to expand research on infrastructure issues, and for policy-makers tasked with determining the appropriate level of infrastructure spending--

An Introduction to the Law on Financial Investment Iain G MacNeil.2012-01-20 Since the publication of the first edition of this book in 2005, the world of financial investment has experienced an unprecedented boom followed by a spectacular bust. Significant changes have been proposed and in some cases implemented in areas such as the structure of regulation, the organisation of markets, supervision of market participants and the protection of consumers. The second edition takes account of these developments, integrating them into an analytical framework that enables the reader to develop a critical overview of the role of general legal rules and specialised systems of regulation in financial investment. The framework focuses on the role of contract, trusts and regulation as the primary legal influences for financial investment. The first part explores the relationship between investment, law and regulation. The second part examines the nature of investments and investors, both professional and private. The third part discusses the central role of corporate finance and corporate governance in linking investors with enterprises that require external capital. The fourth part examines the nature, operation and regulation of markets and the participants that support the functioning of the markets. The objective remains to provide a broadly-based and critical account of the role of law in financial investment. MacNeil's eloquent and informative distillation of
