The Coldest Coast P. J. Capelotti.2021-06-15 This book describes the 1873 voyage of the British explorer Benjamin Leigh Smith, based on the diaries and photographs of Lieutenant Herbert C. Chermerside, who joined the expedition of the seas around Svalbard. Chermerside's photographs, long believed lost, have recently been uncovered in Sweden and are being curated there by the Grenna Museum. The three unpublished diaries of Herbert Chermerside were lent to the Scott Polar Research Institute in 1939 by Mrs. Benjamin Leigh Smith. For the first time, Chermerside's diaries are published in their entirety, with the original photographs shown alongside modern images of the same locations. This includes the first photographic record of the north coast of Svalbard, images that are today being used as comparative data for the study of climate change in the archipelago. The diaries have been fully transcribed and edited. Introductory chapters are included, written by specialists in the history of exploration, history of science, and the history of photography from Penn State University, the University of Gothenburg, and UiT, the Arctic University of Norway, as well as contributors from the UK and Germany. This volume is published in association with Grenna Museum, which will present Chermerside's photographs in a 2022 exhibit on Leigh Smith and A.E. Nordenskiöld.

AU-18 Space Primer Air Command Staff College.2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Jointspacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar. Vanguard of Valor Combat Studies Institute Press.2012-02 From the foreword by Genral (ret.) David Petraeus: In 2010, as the scale and tempo of Coalition operations in Afghanistan increased, so did the need for historical accounts of small-unit actions. As commander of the International Security Assistance Force (ISAF), I commissioned the Combat Studies Institute to research and write the cases collected in this volume and in those that will follow. By capturing key insights from both lethal and non-lethal operations, I hoped these accounts would be of immediate utility to sergeants and lieutenants at the center of future operations. The eight actions described in these pages take the reader through a wide range of platoon-level operations, from an intense firefight near Kandahar to an intricate civic action project in Kunar Province. Drawing from dozens of Soldier interviews, these accounts vividly depict the actions themselves and offer critical insights of greatest benefit to the small-unit actions leaders of today and tomorrow. The US Army always has prided itself as an institution of constant learning, strongly committed to drawing lessons from its past. This volume from the Combat Studies Institute is an excellent example of that long and honorable tradition. I hope that you will find the actions n Vanguard of Valor to be both instructive and compelling. I am sure that you will find them to be inspirational.

Text, Speech and Dialogue Petr Sojka,Aleš Horak,Ivan Kopecek,Karel Pala.2012-08-08 This book constitutes the refereed proceedings of the 15th International Conference on Text, Speech and Dialogue, TSD 2012, held in Brno, Czech Republic, in September 2012. The 82 papers presented together with 2 invited talks were carefully reviewed and selected from 173 submissions. The papers are organized in topical sections on corpora and language resources, speech recognition, tagging, classification and parsing of text and speech, speech and spoken language generation, semantic processing of text and speech, integrating applications of text and speech processing, machine translation, automatic dialogue systems, multimodal techniques and modeling.

Bulk Material Handling Michael Rivkin Ph.D..2018-09-15 Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Space Systems Failures David M. Harland,Ralph Lorenz.2007-09-14 The very first book on space systems failures written from an engineering perspective. Focuses on the causes of the failures and discusses how the engineering knowledge base has been enhanced by the lessons learned. Discusses non-fatal anomalies which do not affect the ultimate success of a mission, but which are failures nevertheless. Describes engineering aspects of the spacecraft, making this a valuable complementary reference work to conventional engineering texts.

Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110) Boris Chertok.2005-01-01 Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was deputy to the founding figure of the Soviet space program, the mysterious Chief Designer Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

Best in Show Dolly Faibyshev.2020-02-04 Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of *The Dogist: Photographic Encounters with 1,000 Dogs* by Elias Weiss Friedman, *Dogs* by Lewis Blackwell and Tim Flach, and *Underwater Dogs* by Seth Casteel

Dorothy Molter Sarah Guy-Levar,Terri Schocke.2011-06 Her name is synonymous with the Boundary Waters and root beer. Her story is one of struggle and triumph. Dorothy Molter lived in the BWCA for over 50 years - 15 miles and five portages from the nearest road. In 1952, a Saturday Evening Post article even declared her The Loneliest Woman in America, though nothing could be further from the truth, as she received countless visitors over the years. This is the biography of the Nightingale of the Wilderness, of a woman who fought the government for her land, of a woman whose life inspired a museum in her honor.

Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Motorized Obsessions Paul R. Josephson.2007-09-02 2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The DARPA Robotics Challenge Finals: Humanoid Robots To The Rescue Matthew Spenko, Stephen Buerger, Karl Iagnemma.2018-04-09 The DARPA Robotics Challenge was a robotics competition that took place in Pomona, California USA in June 2015. The competition was the culmination of 33 months of demanding work by 23 teams and required humanoid robots to perform challenging locomotion and manipulation tasks in a mock disaster site. The challenge was conceived as a response to the Japanese Fukushima nuclear disaster of March 2011. The Fukushima disaster was seen as an ideal candidate for robotic intervention since the risk of exposure to radiation prevented human responders from accessing the site. This volume, edited by Matthew Spenko, Stephen Buerger, and Karl Iagnemma, includes commentary by the organizers, overall analysis of the results, and documentation of the technical efforts of 15 competing teams. The book provides an important record of the successes and failures involved in the DARPA Robotics Challenge and provides guidance for future needs to be addressed by policy makers, funding agencies, and the robotics research community. Many of the papers in this volume were initially published in a series of special issues of the Journal of Field Robotics. We have proudly collected versions of those papers in this STAR volume.
