**Simple & Direct** Jacques Barzun.1985 After a lifetime of writing and editing prose, Jacques Barzun has set down his view of the best ways to improve one's style. His discussions of diction, syntax, tone, meaning, composition, and revision guide the reader through the technique of making the written word clear and agreeable to read. **Collision Course** Russel K. Durst.1999 This book presents an ethnographic study which examines the ways first-year college students make sense of, engage, resist, and learn from the critical literacy approach practiced in the composition program at one Midwestern college. It argues that first-year students typically enter composition classes with an idea of writing and an understanding of what they need to learn about writing that is dramatically at odds with views and approaches of the teacher. It offers a pedagogy of reflective instrumentalism as a solution to this conflict; an approach which accepts students' pragmatic reasons for studying composition but then attempts to add a critical, socially aware dimension to that careerist orientation. The book's 8 chapters are: (1) Introduction; (2) The Research: Contexts, Participants, and Methods; (3) The Enigma of Arrival; (4) Ground Rules in College Composition; (5) Flashpoints: Developing an Analytic Stance; (6) Persuasion, Politics, and Writing Instruction; (7) The Dangerous Intersection of Home and School (by Sherry Cook Stanforth); and (8) Conclusion: Reflective Instrumentalism and the Teaching of Composition. Contains approximately 100 references. (SR)

The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M.

Williams.2008-04-15 Since 1995, more than 150,000 students and researchers have turned to The Craft of Research for clear and helpful guidance on how to conduct research and report it effectively . Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, The Craft of Research explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made The Craft of Research an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

**Uncommon Law of Learned Writing 2.0** Chinua Asuzu.2023-09-10 As lawyers, we must not, in hot pursuit of common law, outrun common sense. The dread of that eventuality prompted this book. Uncommon Law of Learned Writing 2.0 promotes common sense in legal language. Plain language, which is commonsensical, broadens access to legal documents, thus democratizing the law. If

democracy is government of the people, by the people, and for the people, law is the language in which government interacts with the people—it's the language of democracy. The people whose government speaks through law must understand what is said. No democratic society should brook legalese—a dense, verbose dialect known only to lawyers. What then should society do to redress the lawyer-induced obscurity? A Shakespearean character had an alarming proposal: “The first thing we do, let's kill all the lawyers.” Apparently, that proposal was not enthusiastically endorsed, which explains why we're still here. A milder remedy—enrolling lawyers in language classes—has been mooted, which explains why this book is in your hands. *Uncommon Law of Learned Writing* 2.0 motivates lawyers to prefer plain language to the legalese and verbosity that have besmirched legal writing for centuries. This book is as sweeping and authoritative a treatment of its subject as you can find anywhere.

**Rewriting** Joseph Harris.2006-07-15 What are the moves that an academic writer makes? How does writing as an intellectual change the way we work from sources? In *Rewriting*, a textbook for the undergraduate classroom, Joseph Harris draws the college writing student away from static ideas of thesis, support, and structure, and toward a more mature and dynamic understanding. Harris wants college writers to think of intellectual writing as an adaptive and social activity, and he offers them a clear set of strategies—a set of moves—for participating in it.

*Writing With Power* Peter Elbow.1998-07-09 A classic handbook for anyone who needs to write, *Writing With Power* speaks to everyone who has wrestled with words while seeking to gain power with them. Here, Peter Elbow emphasizes that the essential activities underlying good writing and the essential exercises promoting it are really not difficult at all. Employing a cookbook approach, Elbow provides the reader (and writer) with various recipes: for getting words down on paper, for revising, for dealing with an audience, for getting feedback on a piece of writing, and still other recipes for approaching the mystery of power in writing. In a new introduction, he offers his reflections on the original edition, discusses the responses from people who have followed his techniques, how his methods may differ from other processes, and how his original topics are still pertinent to today's writer. By taking risks and embracing mistakes, Elbow hopes the writer may somehow find a hold on the creative process and be able to heighten two mentalities--the production of writing and the revision of it. From students and teachers to novelists and poets, *Writing with Power* reminds us that we can celebrate the uses of mystery, chaos, nonplanning, and magic, while achieving analysis, conscious control, explicitness, and care in whatever it is we set down on paper.

**Create Your School Library Writing Center** Timothy Horan.2016-10-16 Colleges typically have writing centers to which students can bring their writing assignments to a peer tutor for assistance, but most high schools and middle schools do not. This book advocates for the creation of writing centers in 7-12 schools and explains why the school library is the best place for the writing center. There is a glaring absence of writing centers in today's K-12 schools. More and more students are being asked in college entrance testing to submit samples of their writing, and employers are expecting their workers to write correctly and clearly. This book addresses the critical lack of writing centers below the undergraduate level. It demonstrates how middle school and high school librarians can create writing centers in their school libraries, explains how to assist students through a one-on-one writing tutorial method, and gives students and teachers the tools for learning and understanding the complex art of writing. Author Timothy Horan—inventor of the School Library Writing Center—establishes why school libraries represent the best—and most logical—places to create writing centers, and why school librarians are the natural choice to direct writing center operations. He then takes readers through the process of creating a writing center from original conception up through opening day. Additional topics covered include how to publicize and grow

your School Library Writing Center; maintaining your writing center for efficient operation on a daily basis as well as for years to come; how to become an effective writing center director and writing tutor; the most current technology that can be used to assist in the writing, composition, and research process; and working with English language learner (ELL) students within your writing center.

**Writing about Literature - Second Edition** W.F. Garrett-Petts.2013-06-13 *Writing about Literature* introduces students to critical reading and writing through a thorough and engaging discussion of the field, but also through exercises, interviews, exemplary student and scholarly essays, and visual material. It offers students an insider's guide to the language, issues, approaches, styles, assumptions, and traditions that inform the writing of successful critical essays, and aims to make student writers a part of the world of professional literary criticism. Much of the discussion is structured around ways to analyze and respond to a single work, Stephen Crane's story "The Bride Comes to Yellow Sky." This second edition is updated throughout and includes a new chapter on "Reading and Writing About Poetry"; the chapter uses Robert Kroetsch's poem "This Part of the Country" as the unit of analysis and includes an interview with the poet about his process.

**Writing without Teachers** Peter Elbow.1998-06-25 In *Writing Without Teachers*, well-known advocate of innovative teaching methods Peter Elbow outlines a practical program for learning how to write. His approach is especially helpful to people who get stuck or blocked in their writing, and is equally useful for writing fiction, poetry, and essays, as well as reports, lectures, and memos. The core of Elbow's thinking is a challenge against traditional writing methods. Instead of editing and outlining material in the initial steps of the writing process, Elbow celebrates non-stop or free uncensored writing, without editorial checkpoints first, followed much later by the editorial process. This approach turns the focus towards encouraging ways of developing confidence and inspiration through free writing, multiple drafts, diaries, and notes. Elbow guides the reader through his metaphor of writing as cooking: his term for heating up the creative process where the subconscious bubbles up to the surface and the writing gets good. 1998 marks the twenty-fifth anniversary of *Writing Without Teachers*. In this edition, Elbow reexamines his program and the subsequent

influence his techniques have had on writers, students, and teachers. This invaluable guide will benefit anyone, whether in the classroom, boardroom, or living room, who has ever had trouble writing.

**The Ethics of Writing Instruction** Michael Pemberton.2000 The chapters in this volume recognize that different contexts, sites, and institutional goals will raise different sets of questions and judgements about what constitutes ethical writing instruction, ethical response to written texts, and ethical evaluation of a writers process and products. They do not aim to resolve all the ethical questions that might arise in and about composition classrooms, but they present a panoply of views, arguments, and perspectives on what it means to talk about ethics in the writing classroom and thereby encourage writing teachers to consider the ethical dimensions of their own instructional practices.
