It covers a broad range of topics, including applying agile teaching and learning techniques in the classroom, incorporating lean thinking in educational workflows, and using team-based approaches to student-centred activities based on agile principles and processes. Promoting Reading Motivation in Primary School Sarah Junge.2022-01-10 Seminar paper from the

year 2009 in the subject Pedagogy - School Pedagogics, grade: 1,0, University of Koblenz-Landau, language: English, abstract: The ability to read is an important prerequisite for participating in social life. Without it, many areas of daily life are not accessible. It was precisely under this aspect that the results of the Pisa study presented to the public were all the more shocking. The findings regarding the reading motivation of pupils indicated that 42% of the participating German 15-year-olds never read for pleasure, including not only reading books but also newspapers and magazines. However, since my topic is Promoting reading motivation in primary school, one might ask why findings from the PISA study are cited that do not show the performance of primary school students but that of 15-year-old school leavers. The reason is that these poor results are rooted in the beginning of the school years. If primary school teachers do not succeed in conveying reading as something enjoyable and enriching from the beginning, children will not see reading as something personally valuable either and may turn their backs on books already during their primary school years and migrate to other media such as computers or game consoles. The central question of the is which social factors have a promoting and inhibiting effect on children's motivation to read and to what extent primary school can contribute to creating a long-term love of reading among pupils. First, the family environment is discussed as an important influencing factor in the development of a person's reading motivation. The second important influencing factor will be school, whereby I will limit myself to primary school. Starting with motivation problems at the beginning of the initial lessons, through problems in the continuing reading lessons, to the motivation problem among boys. Gender-specific differences in reading behaviour will be explained and attempted explanations given. In addition, school-based solution perspectives are pointed out. The last chapter of this thesis deals with practical support possibilities, i.e. it shows methods that the primary school teacher can

use in class to increase the reading motivation of his pupils.

The Oxford Handbook of Human Motivation Richard M. Ryan.2013-12-15 Motivation is that which moves us to action. Human motivation is thus a complex issue, as people are moved to action by both their evolved natures and by myriad familial, social and cultural influences. The Oxford Handbook of Human Motivation collects the top theorists and researchers of human motivation into a single volume, capturing the current state-of-the-art in this fast developing field. The book includes theoretical overviews from some of the best-known thinkers in this area, including chapters on Social Learning Theory, Control Theory, Self-determination theory, Terror Management theory, and the Promotion and Prevention perspective. Topical chapters appear on phenomena such as ego-depletion, flow, curiosity, implicit motives, and personal interests. A section specifically highlights goal research, including chapters on goal regulation, achievement goals, the dynamics of choice, unconscious goals and process versus outcome focus. Still other chapters focus on evolutionary and biological underpinnings of motivation, including chapters on cardiovascular dynamics, mood, and neuropsychology. Finally, chapters bring motivation down to earth in reviewing its impact within relationships, and in applied areas such as psychotherapy, work, education, sport, and physical activity. By providing reviews of the most advanced work by the very best scholars in this field, The Oxford Handbook of Human Motivation represents an invaluable resource for both researchers and practitioners, as well as any student of human nature.

Scaffolding Language, Scaffolding Learning Pauline Gibbons.2015 The bestselling *Scaffolding Language, Scaffolding Learning* helped tens of thousands of mainstream elementary teachers ensure that their English language learners became full members of the school community with the language and content skills they needed for success. In the highly anticipated Second Edition, Pauline Gibbons updates her classic text with a multitude of practical ideas for the classroom,

supported by the latest research in the field of ELL/ESL. With clear directions and classroom tested strategies for supporting students' academic progress, Gibbons shows how the teaching of language can be integrated seamlessly with the teaching of content, and how academic achievement can be boosted without sacrificing our own vision of education to the dictates of knee-jerk accountability. Rich examples of classroom discourse illustrate exactly how the scaffolding process works, while activities to facilitate conversation and higher-level thinking put the latest research on second language learning into action.

A Mother's Reckoning Sue Klebold.2016 The mother of one of the two shooters at Columbine High School draws on personal recollections, journal entries and video recordings to piece together what led to her son's unpredicted breakdown and share insights into how other families might recognize warning signs.--NoveList.

We Need to Talk About Kevin Lionel Shriver.2011-05-01 The inspiration for the film starring Tilda Swinton and John C. Reilly, this resonant story of a mother's unsettling quest to understand her teenage son's deadly violence, her own ambivalence toward motherhood, and the explosive link between them remains terrifyingly prescient. Eva never really wanted to be a mother. And certainly not the mother of a boy who murdered seven of his fellow high school students, a cafeteria worker, and a much-adored teacher in a school shooting two days before his sixteenth birthday. Neither nature nor nurture exclusively shapes a child's character. But Eva was always uneasy with the sacrifices and social demotion of motherhood. Did her internalized dislike for her own son shape him into the killer he's become? How much is her fault? Now, two years later, it is time for her to come to terms with Kevin's horrific rampage, all in a series of startlingly direct correspondences with her estranged husband, Franklin. A piercing, unforgettable, and penetrating exploration of violence and

responsibility, a book that the Boston Globe describes as “impossible to put down,” is a stunning examination of how tragedy affects a town, a marriage, and a family.

Didaktik und Methodik eines neuropädagogischen Konzepts zum Umgang mit schwierigen Schülern Marcus Damm, Marc-Guido Ebert. 2012-04-01 Schemapädagogik ist ein neuropädagogischer Entwurf, der sich mit der innerpsychischen Vielfalt befasst, den diversen Ich-Bewusstseinszuständen. Schemapädagogik beabsichtigt, Lehrerinnen und Lehrer im Umgang mit herausfordernden Heranwachsenden zu unterstützen. Das integrative Konzept überträgt Grundlagen und ausgewählte Methoden der schemabasierten Psychotherapien (Kognitive Therapie, Schematherapie und Klärungsorientierte Psychotherapie) in die Schulpraxis. In diesem Buch wird das Schemapädagogische Selbstkontroll-

Training© (SSKT©) für die Sekundarstufe 1 vorgestellt. Es beinhaltet einen Fragebogen, Text- und Arbeitsblätter, zahlreiche Arbeitsaufträge sowie diverse Videoclips aus dem Schulalltag, die die Heranwachsenden für ihre eigenen Ich-Bewusstseinszustände und deren Auswirkungen sensibilisieren. Das SSKT© soll speziell 'schwierige' Schüler in emphatisch-konfrontativer Weise in Kontakt mit den Ursachen ihrer herausfordernden Verhaltensweisen bringen und sie zur Selbstkontrolle im Unterricht motivieren. Dem Buch sind – auf einer Daten-DVD – umfangreiche PowerPoint™-Präsentationen inklusive Videoclips und zahlreiche Arbeits- und Textblätter beigelegt. Außerdem werden unterrichtsrelevante Gegenstände aus der Psychoanalyse und Transaktionsanalyse thematisiert und anschaulich dargestellt, unter anderem Abwehrmechanismen, selbstwertdienliche Verzerrungen und Manipulationstechniken (Psychospiele). Das Buch wendet sich an Interessierte und Anwender der Schemapädagogik, vor allem aber an Lehrerinnen und Lehrer der Sekundarstufe 1. Für diese stellt es eine wertvolle und praxisnahe Unterrichtshilfe dar, indem es sie für psychodynamische Schülermanipulationen und Unterrichtsstörungen sensibilisiert und Wege für den professionellen Umgang damit aufzeigt. Marcus Damm und Marc-Guido Ebert haben mit der Entwicklung des SSKTs eine unschätzbare wertvolle Pionierarbeit geleistet. Konstellative Pastoraltheologie Christian Bauer.2016-12-20 Pastoraltheologie bringt heterogene Elemente in eine möglichst kreative Konstellation zueinander: Diskurse, Bilder, Erzählungen, Statistiken und vieles mehr. Es entstehen optionengeleitete Theorieprodukte, die ihren Rezipientinnen und Rezipienten einen diskursiven Freiraum für Eigenes eröffnen. Dieser Prozess wird im vorliegenden Band in unterschiedlichen Einzelstudien exemplarisch erprobt und anhand des Konstellationsbegriffs von Theodor W. Adorno erkenntnistheoretisch rekonstruiert - mit Umberto Eco als offenes Kunstwerk, mit Michel Foucault als strategisches Dispositiv und mit Bruno Latour als

empirisches Netzwerk. Eine konstellativ arbeitende Pastoraltheologie liefert keine neuen Systementwürfe, sondern vielmehr methodologisch reflektierte Erkundungen im Konstellationsraum theologischer Orte. Leitend ist die selbstreflexive Grundfrage: Was tut Pastoraltheologie eigentlich, wenn sie pastoraltheologisch arbeitet?
