Sci-Book Aaron D. Isabelle.2017-12-06 A "Sci-Book" or "Science Notebook" serves as an essential companion to the science curriculum supplement, STEPS to STEM. As students learn key concepts in the seven "big ideas" in this program (Electricity & Magnetism; Air & Flight; Water & Weather; Plants & Animals; Earth & Space; Matter & Motion; Light & Sound), they record their ideas, plans, and evidence. There is ample space for students to keep track of their observations and findings, as well as a section to reflect upon the use of "Science and Engineering Practices" as set forth in the Next Generation Science Standards (NGSS). Using a science notebook is reflective of the behavior of scientists. One of the pillars of the Nature of Science is that scientists must document their work to publish their research results; it is a necessary part of the scientific enterprise. This is important because STEPS to STEM is a program for young scientists who learn within a community of scientists. Helping students to think and act like scientists is a critical feature of this program. Students learn that they need to keep a written record if they are to successfully share their discoveries and curiosities with their classmates and with the teacher. Teachers should also model writing in science to help instill a sense of purpose and pride in using and maintaining a Sci-Book. Lastly, students' documentation can serve as a valuable form of authentic assessment; teachers can utilize Sci-Books to monitor the learning process and the development of science skills.

Science Notebooks Lori Fulton,Brian Campbell.2014 The bestselling first edition of Science Notebooks inspired thousands of teachers to use science notebooks as a powerful way to help students reveal and develop their thinking about scientific concepts, engage in the work of scientists and engineers, and exercise language skills. Lori Fulton and Brian Campbell make the Second Edition even more valuable by showing how science notebooks support implementation of the Next Generation Science Standards as well as the Common Core State Standards for ELA. The authors have also added new material to every chapter, including: strategies to scaffold science notebook instruction how science notebooks help students develop explanations and arguments based on evidence strategies for collecting and analyzing science notebooks for formative assessment new interviews with scientists and engineers that spotlight the use of science notebooks in their work. Student samples and classroom vignettes from a variety of settings illustrate the transformative effect of science notebooks on students' scientific thinking as well as their literacy skills. Science Notebooks Brian Campbell,Lori Fulton.2003 From Galileo to scientists working on cloning, notebooks have been used to document scientific discovery. Science notebooks are also effective tools in the classroom. They make science experiences more meaningful and authentic for students as they observe, record, and reflect on what they've learned. For time-strapped teachers, notebooks offer a natural way to integrate science and language arts. Brian Campbell and Lori Fulton spent four years investigating the use of science notebooks by students, teachers, and practicing scientists. This book not only details what they learned, it serves as a ready resource of strategies and methods for teachers to incorporate science notebooks into their school day. Along the way, the book intersperses additional help: Classroom vignettes demonstrate how science notebooks actually function in class. Student samples allow readers to see student entries at a variety of levels. Thinking points throughout link ideas presented in the book to practice and philosophical beliefs. Connections to standards--both the National Science Education Standards and the Standards for the English Language Arts - reinforce the rationale for using science notebooks to develop scientific concepts AND literacy. Use science notebooks and watch as your students write as scientists do, share their thinking, support their ideas with evidence, and improve their literacy through reading, writing, and speaking.
