International Best Practices for Evaluation in the Health Professions William Mcgaghie.2022-02-16

This unique text presents a comprehensive narrative on why and how health professions students need to be evaluated for practice in the 21st century. It systematically addresses current evaluation best practices in the health professions to identify today's evaluation benchmarks, reveal evaluation limits, address improvement pathways, and map a research agenda to boost future evaluation practices. Advancements in information and communication technology, bioscience and behavioral research, and worldwide travel are dissolving barriers that have separated professions, countries, and cultures for centuries. This book both celebrates these achievements and carefully considers next steps. It recognizes the huge improvements made in evaluation practices within the health professions over the past 40 years but asks for more - calling for added reform and better understanding of current practice from different social, cultural, and educational perspectives. International Best Practices for Evaluation in the Health Professions values crossprofessional programs that span boundaries and acknowledge the authority of the future rather than historical baggage. Educators worldwide will be enlightened and inspired by its straightforward, compelling narrative.

Annotated entries contain a short abstract, a table of contents, and information on reviews. Each volume contains an author and subject index, and a periodical is included in Volume Two. This two-volume work is part of a larger project that included publication of a nearly 700-page book titled "United States Relations with South Africa: A Critical Overview from the Colonial Period to the Present" which is a critical overview of relations between the United States and South Africa going nearly as far back as the very beginning of their inception as permanent European colonial intrusions and it not only gives attention to the importance of contributions from nonofficial actors in shaping official relations, but also considers the impact of the geopolitical location of South Africa within southern Africa, where the presence of other nations - particularly Angola, Mozambique, Namibia, and Zimbabwe - looms large.

**Uprooting University Apartheid in South Africa** Teresa A. Barnes.2018-12-07 South Africa continues to be an object of fascination for people everywhere interested in social justice issues, postcolonial studies and critical race theory as manifested by the enormous worldwide attention given to the #RhodesMustFall movement. In this book, Teresa Barnes examines universities' complex positioning in the apartheid era and argues that tracing the institutional legacies left by pro-apartheid intellectuals are crucial to understanding the fight to transform South African higher education. A work of interpretive social history, this book investigates three historical dynamics in the relationship between the apartheid system and South African higher education. First, it explores how the legitimacy of apartheid was historically reproduced in public higher education. Second, it looks at ways that academics maneuvered through and influenced national and international discourses of political freedom and legitimacy. Third, it explores how and where stubborn tendrils of apartheid-era knowledge production practices survived into and have been combatted during the democratic era in South African universities.

While the disruption brought by the quantitative turn has been widely studied by social scientists, legal research on the issue is minimal. This book aims to fill the gap. The essays herein collected explore how performance measurements interact with the law in different regions and sectors, which legal effects they produce, and for whose benefit.
