Fashionable Nonsense Alan Sokal,Jean Bricmont.2014-01-14 In 1996 physicist Alan Sokal published an essay in *Social Text*--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere narrations or social constructions.

Jan Brueghel the Elder Arianne Faber Kolb.2005 Kolb has produced a thoroughly researched essay on this painting, which is in the Getty Museum. The study focuses on Brueghel's depiction of nature, especially his exacting representation of identifiable species of animals and birds, the names of which are listed. Brueghel's collaboration with other painters, his and other painters' re-use of the same theme and composition, and the history and practice of natural history collection and representation are central themes. The volume, which is printed in a horizontal format (it's 11x8) and heavily illustrated, is written for a general audience, though art historians will also find much of interest.

The History of Terrorism Gérard Chaliand,Arnaud Blin.2016-08-23 This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

Tahiti Nui Colin W. Newbury.2019-03-31 Tahiti Nui is an account of the survival of a Polynesian society in the face of successive settlements of missionaries, traders, and administrators. Beginning with the first explorers and Captain Cook's scientific observations at Point Venus, Dr. Newbury has separated the various strands interwoven in the fabric of Tahitian society, tracing their development and showing how they interacted at successive stages. Missionaries and foreign traders, administrators and Polynesians, planters and immigrant Chinese have all contributed to the distinctive flavor of French Polynesia, with Tahiti and Tahitians becoming increasingly dominant, not just as the focus of the French administration in Pape'ete, but in the social networks and trading patterns that have evolved.

Ancestral Encounters in Highland Madagascar Zoë Crossland.2014-02-17 Nineteenth-century highland Madagascar was a place inhabited by the dead as much as the living. Ghosts, ancestors and the possessed were important historical actors alongside local kings and queens, soldiers, traders and missionaries. This book considers the challenges that such actors pose for historical accounts of the past and for thinking about questions of presence and representation. How were the dead made present, and how were they recognized or not? In attending to these multifarious encounters of the nineteenth century, how might we reflect on the ways in which our own history-writing makes the dead present? To tackle these questions, Zoë Crossland tells an anthropological history of highland Madagascar from a perspective rooted in archaeology and Peircean semiotics, as well as in landscape study, oral history and textual sources.

Displaying the Orient Zeynep & Ccedil Elik,Zeynep Çelik.1992-01-01 Gathering architectural pieces from all over the world, the Paris Universal Exposition of 1867 introduced to fairgoers the notion of an imaginary journey, a new tourism en place. Through this and similar expositions, the world's cultures were imported to European and American cities as artifacts and presented to nineteenth-century men and women as the world in microcosm, giving a quick and seemingly realistic impression of distant places. elik examines the display of Islamic cultures at nineteenth-century world's fairs, focusing on the exposition architecture. She asserts that certain sociopolitical and cultural trends now crucial to our understanding of historical transformations in both the West and the world of Islam were mirrored in the fair's architecture. Furthermore, dominant attitudes toward cross-cultural exchanges were revealed repeatedly in Westerners' responses to these pavilions, in Western architects' interpretations of Islamic stylistic traditions, and in the pavilions' impact in such urban centers. Although the world's fairs claimed to be platforms for peaceful cultural communication, they displayed the world according to a hierarchy based on power relations. elik's delineation of this hierarchy in the exposition buildings enables us to understand both the adversarial relations between the West and the Middle East, and the issue of cultural self-definition for Muslim societies of the nineteenth century. StarBriefs 2001 .2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

Foreign Aid Carol Lancaster.2008-09-15 A twentieth-century innovation, foreign aid has become a familiar and even expected element in international relations. But scholars and government officials continue to debate why countries provide it: some claim that it is primarily a tool of diplomacy, some argue that it is largely intended to support development in poor countries, and still others point out its myriad newer uses. Carol Lancaster effectively puts this dispute to rest here by providing the most comprehensive answer yet to the question of why governments give foreign aid. She argues that because of domestic politics in aid-giving countries, it has always been—and will continue to be—used to achieve a mixture of different goals. Drawing on her expertise in both comparative politics and international relations and on her experience as a former public official, Lancaster provides five in-depth case studies—the United States, Japan, France, Germany, and Denmark—that demonstrate how domestic politics and international pressures combine to shape how and why donor governments give aid. In doing so, she explores the impact on foreign aid of political institutions, interest groups, and the ways governments organize their giving. Her findings provide essential insight for scholars of international relations and comparative politics, as well as anyone involved with foreign aid or foreign policy.

The Genetics of the Pig Max Frederick Rothschild,Anatoly Ruvinsky.2011 The understanding of pig genetics and genomics has advanced significantly in recent years, creating fresh insights into biological processes. This comprehensive reference work discusses pig genetics and its integration with livestock management and production technology to improve performance. Fully updated throughout to reflect advances in the subject,

this new edition also includes new information on genetic aspects of domestication, colour variation, genomics and pig breeds, with contributions from international experts active in the field.

France in Black Africa Francis Terry McNamara.1989 When, in 1960, France granted independence to its colonies in West and Central Africa-an empire covering an area the size of the contiguous United States-the French still intended to retain influence in Africa. Through a system of accords with these newly independent African nations, based upon ties naturally formed over the colonial years, France has succeeded for three decades in preserving its position in African affairs. The course of Franco-African relations in the near future, though, is less than certain. In this book, Ambassador Francis Terry McNamara outlines France's acquisition and administration of its Black African empire and traces the former colonies' paths to independence. Drawing upon that background, the ambassador examines the structure of post-independence Franco-African relations and recent strains on those relations, especially African economic crises and the French tendency to focus on Europe. Because of those strains, he suggests, France alone may be unable to support its former dependencies much longer. He believes that long-term solutions to African problems will have to involve international organizations like the World Bank and International Monetary Fund as well as other nations such as the United States and France's European partners. -- From Foreword.

Historical Dictionary of Madagascar Philip M. Allen,Maureen Covell.2005 Madagascar, widely known as the Great Island, is just off the coast of Africa in the Indian Ocean, but in many ways it hardly resembles its mainland neighbors. Its flora and fauna are quite distinct, and the folkways and culture of its population are intriguingly different from that of the continental countries. This revised and expanded edition fills us in on the changes that have occurred over the past decade while still covering the long and intricate history of the country. It starts with the earliest settlers, continues through the period of French colonial rule, and then describes more intensively the period of independence, with all its aspirations, failures, and renewed hopes. This is done in a broad introduction, an extensive chronology, and hundreds of cross-referenced dictionary entries on significant persons, places, and events; ethnic groups and religions; and economic, social, and cultural aspects. Also included is a bibliography offering further reading.
