Global Status Report on Road Safety 2018 World Health Organization.2019-01-10 The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years.The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

Instrumentation Reference Book Walt Boyes.2009-11-25 The discipline of instrumentation has grown appreciably in recent years because of advances in sensor technology and in the interconnectivity of sensors, computers and control systems. This 4e of the Instrumentation Reference Book embraces the equipment and systems used to detect, track and store data related to physical, chemical, electrical, thermal and mechanical properties of materials, systems and operations. While traditionally a key area within mechanical and industrial engineering, understanding this greater and more complex use of sensing and monitoring controls and systems is essential for a wide variety of engineering areas--from manufacturing to chemical processing to aerospace operations to even the everyday automobile. In turn, this has meant that the automation of manufacturing, process industries, and even building and infrastructure construction has been improved dramatically. And now with remote wireless instrumentation, heretofore inaccessible or widely dispersed operations and procedures can be automatically monitored and controlled. This already well-established reference work will reflect these dramatic changes with improved and expanded coverage of the traditional domains of instrumentation as well as the cutting-edge areas of digital integration of complex sensor/control systems. Thoroughly revised, with up-to-date coverage of wireless sensors and systems, as well as nanotechnologies role in the evolution of sensor technology Latest information on new sensor equipment, new measurement standards, and new software for embedded control systems, networking and automated control Three entirely new sections on Controllers, Actuators and Final Control Elements; Manufacturing Execution Systems; and Automation Knowledge Base Up-dated and expanded references and critical standards

Dave Barry's Book of Bad Songs Dave Barry.2012-11-06 The humorist asked his readers to share their least favorite tunes and chronicles the hilarious responses. When funnyman Dave Barry asked readers about their least favorite tunes, he thought he was penning just another installment of his weekly syndicated humor column. But the witty writer was flabbergasted by the response when over 10,000 readers voted. "I have never written a column that got a bigger response than the one announcing the Bad Song Survey," Barry wrote. Based on the results of the survey, Dave Barry's Book of Bad Songs is a compilation of some of the worst songs ever written. Dave Barry fans will relish his quirky take. Music buffs too will appreciate this humorous stroll through the world's worst lyrics. The only thing wrong with this book is that readers will find themselves unable to stop mentally singing the greatest hits of Gary Puckett. Praise for Dave Barry's Book of Bad Songs "Barry is his usual puckish self, but the real surprise here is how funny many of the survey respondents are." —Kirkus Reviews "Who can resist such a book?" —Publishers Weekly

Southwestern Desert Resources William L. Halvorson,Cecil R. Schwalbe,Charles van Riper.2023-01-17 The southwestern deserts stretch from southeastern California to west Texas and then south to central Mexico. The landscape of this region is known as basin and range topography featuring to "sky islands" of forest rising from the desert lowlands which creates a uniquely diverse ecology. The region is further complicated by an international border, where governments have caused difficulties for many animal populations. This book puts a spotlight on individual research projects which are specific examples of work being done in the area and when they are all brought together, to shed a general light of understanding the biological and cultural resources of this vast region so that those same resources can be managed as effectively and efficiently as possible. The intent is to show that collaborative efforts among federal, state agency, university, and private sector researchers working with land managers, provides better science and better management than when scientists and land managers work independently.

Global Bariatric Surgery Rami Lutfi,Mariano Palermo,Guy-Bernard Cadière.2018-09-07 This text captures the global standards of bariatric surgery practice at a time of change, excitement, and lots of controversy. The text sheds the light on best practices globally by providing a reliable reference to guide the practicing physician anywhere in the world, and from whatever specialty (surgeon, gastroenterologist or endoscopist) to navigate through the many current options of therapy in this rapidly changing field. The text provides high definition illustrations of these techniques to go with the didactic chapters written by the thought leaders in the field. In addition to the technical part, an important part of the book focuses on quality and outcome measures. The rapid growth and innovations impose the need for strict guidelines and quality control. Thought leaders who created the concept of "Centers of Excellence" shed light on outcome measures and different ways to monitor quality. This will appeal to administrators and different ancillary service providers. The medical section plays a major role as combination therapy seems to be the future. An entire section is dedicated to medical weight management with discussions of the dietary and psychological component of care. The text also provides a dedicated discussion of the metabolic aspect of bariatric surgery, cosmetic surgery and issues of training future surgeons. These features differentiate the book from others that only discuss the surgical component, and will broaden the level of interest to all who are involved in the management of this complex disease.

K. O. Mbadiwe Hollis R. Lynch. 2012-05-03 This book offers a comprehensive political biography of Kingsley Ozuomba Mbadiwe, (1915-1990), a central figure in Nigerian political history for more than forty years. Starting in 1936 as a protégé of Nnamdi Azikiwe, then Nigeria's most renowned nationalist, Mbadiwe himself by the 1950s became a frontline nationalist. And next to Tafawa Balewa from the North who became Prime Minister in 1957, he was the most important figure in the Nigerian Federal Government between 1952 and Nigeria's first military coup in 1966. During this time he held a succession of important Cabinet positions and was Parliamentary Leader of the National Council of Nigeria and the Cameroons (NCNC), which was in a ruling alliance with the Northern People's Congress (NPC). In contrast, his older prominent political contemporaries, Azikiwe of the Eastern Region, Igbo Leader of the NCNC; Obafemi Awolowo of the Western Region, Yoruba Leader of the Action Group (AG); and Ahmadu Bello of the Northern Region, Fulani Leader of the NPC, all carved out their political careers totally or largely at the regional level. Throughout his political career Mbadiwe's focus was always at the national level. Truly, it has been stated that Mbadiwe was one of the founding fathers of the Nigerian State. Nonetheless, Mbadiwe's ambition for himself to lead Nigeria and for his nation to set it on the path to greatness faced insuperable difficulties. In a country of widespread poverty, high illiteracy, and a grossly underdeveloped private sector, there were fierce ethnic and regional conflicts for the control of governments and resources, leading to massive corruption and serious instability. This in turn led to prolonged military rule twenty years in Mbadiwe's lifetime which was often more corrupt and repressive than civilian rule, and was bitterly deprecated by Mbadiwe.

This collection brings together some of the most influential writers in the field to examine the complex connections between tourism and cultural change and the relevance of tourist experience to current theoretical debates on space, time and identity.

Twelve Years a Slave Solomon Northup. 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe.

Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

An extensive bibliography and three appendices give a comprehensive list of magazines published during the time, including dates, places of publication, and names of editors and publishers.
