**Fast Food Genocide** Joel Fuhrman, M.D., Robert Phillips. 2017-10-17 From the #1 New York Times bestselling author of *Eat to Live* and *The End of Diabetes*, an unflinching, provocative exploration of how our food is killing us and the ways in which we are unwitting participants in an unprecedented and exploding health crisis. Fast food is far more than just the burgers, fries, and burritos served at chain restaurants; it is also the toxic, human-engineered products found in every grocery store across America. These include: cold breakfast cereals; commercial and preserved (deli) meats and cheeses; sandwich breads and buns; chips, pretzels, and crackers; fried foods; energy bars; and soft drinks. Fast foods have become the primary source of calories in the United States and consequently the most far-reaching and destructive influence on our population. The indisputable truth is that our highly processed diet is the source of a national health crisis that is exploding into a genocide with unseen tragic implications. Heart attacks, strokes, cancer, obesity, ADHD, autism, allergies, and autoimmune diseases all have the same root cause - our addiction to toxic ingredients. New York Times bestselling author, board-certified physician, nutritional researcher, and leading voice in the

health field Joel Fuhrman, M.D., explains why the problem of poor nutrition is deeper, more serious, and more pervasive than anyone imagined. *Fast Food Genocide* draws on twenty-five years of clinical experience and research to confront our fundamental beliefs about the impact of what we eat. This book identifies issues at the heart of our country's most urgent problems. Fast food kills, but it also perpetuates bigotry and derails the American dream of equal opportunity and happiness for all. It leaves behind a wake of destruction creating millions of medically dependent and sickly people burdened with poor-quality lives. The solution hiding in plain sight — a nutrient-dense healthful diet — can save lives and enable humans to reach their intellectual potential and achieve successful and fulfilling lives. Dr. Fuhrman offers a life-changing, scientifically sound approach that can alter American history and perhaps save your life in the process.

**The Vegetarian Imperative** Anand M. Saxena. 2011-10-01 We have learned not to take food seriously: we eat as much as we want of what we want when we want it, and we seldom think about the health and environmental consequences of our choices. But the fact is that every choice we make has an impact on our health and on the environment. In *The Vegetarian Imperative*, Anand M. Saxena, a scientist and a vegetarian for most of his life, explains why we need to make better choices: for better health, to eliminate world hunger, and, ultimately, to save the planet. Our insatiable appetite for animal-based foods contributes directly to high rates of chronic diseases—resulting in both illness and death. It also leads to a devastating overuse of natural resources that dangerously depletes the food available for human consumption. The burgeoning population and increasing preference for meat in all parts of the world are stretching planetary resources beyond their limits, and the huge livestock industry is degrading the agricultural land and polluting air and water. Continuing at this pace will bring us to the crisis point in just a few decades—a reality that threatens not only our current lifestyle but our very survival. This book shows us a way out of this dangerous and vicious cycle, recommending a much-needed shift to a diet of properly chosen plant-based foods. Any one of these arguments alone—personal health, worldwide hunger, and environmental degradation—provides reason enough to stop consuming so much animal-based food; taken together, they make an unassailable case for vegetarianism. *The Vegetarian Imperative* will make you rethink what you eat—and help you save the planet.

**The Young and the Digital** S. Craig Watkins. 2009-10-01 In *The Young and the Digital*, S. Craig Watkins skillfully draws from more than 500 surveys and 350 in-depth interviews with young people, parents, and educators to understand how a digital lifestyle is affecting the ways youth learn, play, bond, and communicate. Timely and deeply relevant, the book covers the influence of MySpace and Facebook, the growing appetite for “anytime, anywhere” media and “fast entertainment,” how online “digital gates” reinforce race and class divisions, and how technology is transforming America's classrooms. Watkins also debunks popular myths surrounding cyberpredators, Internet addiction, and social isolation. The result is a fascinating portrait, both celebratory and wary, about the coming of age of the first fully wired generation. From the Trade Paperback edition.

*Food Marketing to Children and Youth* Institute of Medicine, Board on Children, Youth, and Families, Food and Nutrition Board, Committee on Food Marketing and the Diets of Children and Youth. 2006-05-11 Creating an environment in which children in the United States grow up healthy should be a high priority for the nation. Yet the prevailing pattern of food and beverage marketing to children in America represents, at best, a missed opportunity, and at worst, a direct threat to the health prospects of the next generation. Children's dietary and related health patterns are shaped by the interplay of many factors—their biologic affinities, their culture and values, their economic status, their physical and social environments, and their commercial media environments—all of which, apart from their genetic predispositions, have undergone significant transformations during the past three decades. Among these environments, none have more rapidly assumed central socializing roles among children and youth than the media. With the growth in the variety and the penetration of the media have come a parallel growth with their use for marketing, including the marketing of food and beverage products. What impact has food and beverage marketing had on the dietary patterns and health status of American children? The answer to this question has the

potential to shape a generation and is the focus of Food Marketing to Children and Youth. This book will be of interest to parents, federal and state government agencies, educators and schools, health care professionals, industry companies, industry trade groups, media, and those involved in community and consumer advocacy.
