The Second Self Sherry Turkle.1984 In *The Second Self*, Sherry Turkle looks at the computer not as a tool, but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. Technology, she writes, catalyzes changes not only in what we do but in how we think. First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture-to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners-people confronting machines that seem to think and at the same time suggest a new way for us to think-about human thought, emotion, memory, and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. In the introduction to this edition, Turkle quotes a PDA user as saying, When my Palm crashed, it was like a death. I thought I had lost my mind. Why we think of the workings of a machine in psychological terms-how this happens, and what it means for all of us-is the ever more timely subject of *The Second Self*. Book jacket.

What Stars Are Made Of Sarah Allen.2020-03-31 A Mighty Girl Best Book of 2020! From debut author Sarah Allen comes a pitch-perfect, heartwarming middle grade novel about growing up, finding yourself, and loving people with everything you're made of. Twelve-year-old Libby Monroe is great at science, being optimistic, and talking to her famous, accomplished friends (okay, maybe that last one is only in her head). She's not great at playing piano, sitting still, or figuring out how to say the right thing at the right time in real life. Libby was born with Turner Syndrome, and that makes some things hard. But she has lots of people who love her, and that makes her pretty lucky. When her big sister Nonny tells her she's pregnant, Libby is thrilled—but worried. Nonny and her husband are in a financial black hole, and Libby knows that babies aren't always born healthy. So she strikes a deal with the universe: She'll enter a contest with a project about Cecilia Payne, the first person to discover what stars are made of. If she wins the grand prize and gives all that money to Nonny's family, then the baby will be perfect. Does she have what it takes to care for the sister that has always cared for her? And what will it take for the universe to notice?

A Taste of Power Elaine Brown.2015-05-20 "A stunning picture of a black woman's coming of age in America. Put it on the shelf beside *The Autobiography of Malcolm X*." —Kirkus Reviews Elaine Brown assumed her role as the first and only female leader of the Black Panther Party with these words: "I have all the guns and all the money. I can withstand challenge from without and from within. Am I right, Comrade?" It was August 1974. From a small Oakland-based cell, the Panthers had grown to become a revolutionary national organization, mobilizing black communities and white supporters across the country—but relentlessly targeted by the police and the FBI, and increasingly riven by violence and strife within. How Brown came to a position of power over this paramilitary, male-dominated organization, and what she did with that power, is a riveting, unsparing account of self-discovery. Brown's story begins with growing up in an impoverished neighborhood in Philadelphia and attending a predominantly

white school, where she first sensed what it meant to be black, female, and poor in America. She describes her political awakening during the bohemian years of her adolescence, and her time as a foot soldier for the Panthers, who seemed to hold the promise of redemption. And she tells of her ascent into the upper echelons of Panther leadership: her tumultuous relationship with the charismatic Huey Newton, who would become her lover and her nemesis; her experience with the male power rituals that would sow the seeds of the party's demise; and the scars that she both suffered and inflicted in that era's paradigm-shifting clashes of sex and power. Stunning, lyrical, and acute, this is the indelible testimony of a black woman's battle to define herself. "A glowing achievement." —Los Angeles Times "Honest, funny, subjective, unsparing, and passionate. . . A Taste of Power weaves autobiography and political history into a story that fascinates and illuminates." —The Washington Post

The Importance of Being Little Erika Christakis.2016-02-09 "Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important." --Washington Post What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play. --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

I was so impressed by the results of the assignment that I felt the poems needed to be preserved in a bound document. Thus, this little book. Welding with Children Tim Gautreaux. 2009-01-06 A master storyteller's triumphant, moving collection about lost souls, found love, and rediscovered tradition Tim Gautreaux returns to the form that won him his first fans, with tales of family, sin, and redemption: from a man who realizes his grandchildren are growing up without any sense of right or wrong, and he's to blame; to a camera repairman who uncovers a young woman's secret in the undeveloped film she brings him; to a one-armed hitch-hiker who changes the life of the man who gives her a ride. Each one a small miracle of storytelling and compassion, these stories in *Welding with Children* are a joyous confirmation of Tim Gautreaux's rare and generous talent.

Thinking in Systems Donella Meadows. 2008-12-03 The classic book on systems thinking—with more than half a million copies sold worldwide! This is a fabulous book... This book opened my mind and reshaped the way I think about investing.—Forbes *Thinking in Systems* is required reading for anyone hoping to run a successful company, community, or country. Learning how to think in systems is now part of change-agent literacy. And this is the best book of its kind.—Hunter Lovins In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems* is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor

details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, Thinking in Systems helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.

Into the Deep Abigail Rine Favale. 2018-10-25 *Into the Deep* traces one woman's spiritual odyssey from birthright evangelicalism through postmodern feminism and, ultimately, into the Roman Catholic Church. As a college student, Abigail Favale experienced a feminist awakening that reshaped her life and faith. A decade later, on the verge of atheism, she found herself entering the oldest male-helmed institution on the planet—the last place she expected to be. With humor and insight, the author describes her gradual exodus from Christian orthodoxy and surprising swerve into Catholicism. She writes candidly about grappling with wounds from her past, Catholic sexual morality, the male priesthood, and an interfaith marriage. Her vivid prose brings to life the wrenching tumult of conversion—a conversion that began after she entered the Church and began to pry open its mysteries. There, she discovered the startling beauty of a sacramental cosmos, a vision of reality that upended her notions of gender, sexuality, identity, and authority. *Into the Deep* is a thoroughly twenty-first-century conversion, a compelling account of recovering an ancient faith after a decade of doubt.

Get Up or Give Up Michael Bonner. 2017-10-03 Michael Bonner knew he wanted to be a teacher after his favorite college professor, Dr. Poulson, inspired him. The professor's passion and love for teaching prompted Michael to change his major and his life's direction. But nothing prepared

Michael for the reality of a Title One school. Teaching is fun until a 7-year-old is assaulting you or you're dodging furniture being thrown at you. When you mix the craziness of a classroom with a marriage that was about to implode, anyone might want to quit. Smiling on the outside while feeling dead on the inside took this dedicated teacher to the breaking point. Michael knew he must change what was inside him, in his approach to life, or nothing would change anywhere else. So Michael took matters into his own hands to make four key paradigm shifts that helped him create a world of successful learning for his students and love within both the classroom and beyond. The result has been a transformation that's taken Michael far beyond the classroom as he inspires thousands across the country. Many agree teaching is an amazing profession but there's little discussion why so many teachers are leaving the profession. *Get Up or Give Up: How I Almost Gave Up on Teaching* shines a light into the internal battles and decisions educators face daily, and how we must make a conscious decision either to give in—or push through.

Streams to the River, River to the Sea Scott O'Dell.1986 A young Indian woman, accompanied by her infant and her cruel husband, experiences joy and heartbreak when she joins the Lewis and Clark expedition seeking a way to the Pacific.

The Last Palace Norman Eisen.2019-09-03 A sweeping yet intimate narrative about the last hundred years of turbulent European history, as seen through one of Mitteleuropa's greatest houses—and the lives of its occupants When Norman Eisen moved into the US ambassador's residence in Prague, returning to the land his mother had fled after the Holocaust, he was startled to discover swastikas hidden beneath the furniture in his new home. These symbols of Nazi Germany were remnants of the residence's forgotten history, and evidence that we never live far from the past. From that discovery unspooled the twisting, captivating tale of four of the remarkable people who had called this palace home. Their story is Europe's, and *The Last Palace* chronicles the upheavals that transformed the continent over the past century. There was the optimistic Jewish financial baron, Otto Petschek, who built the palace after World War I as a statement of his faith in democracy, only to have that faith shattered; Rudolf Toussaint, the cultured, compromised German general who occupied the palace during World War II, ultimately putting his life at risk to save the house and Prague itself from destruction; Laurence Steinhardt, the first postwar US ambassador whose quixotic struggle to keep the palace out of Communist hands was paired with his pitched efforts to rescue the country from Soviet domination; and Shirley Temple Black, an eyewitness to the crushing of the 1968 Prague Spring by Soviet tanks, who determined to return to Prague and help end totalitarianism—and did just that as US ambassador in 1989. Weaving in the life of Eisen's own mother to demonstrate how those without power and privilege moved through history, *The Last Palace* tells the dramatic and surprisingly cyclical tale of the triumph of liberal democracy.

Finding Latinx Paola Ramos.2020-10-20 Latinos across the United States are redefining identities, pushing boundaries, and awakening politically in powerful and surprising ways. Many—Afrolatino, indigenous, Muslim, queer and undocumented, living in large cities and small towns—are voices who have been chronically overlooked in how the diverse population of almost sixty million Latinos in the U.S. has been represented. No longer. In this empowering cross-country travelogue, journalist and activist Paola Ramos embarks on a journey to find the communities of people defining the controversial term, "Latinx." She introduces us to the indigenous Oaxacans who rebuilt the main street in a post-industrial town in upstate New York, the "Las Poderosas" who fight for reproductive rights in Texas, the musicians in Milwaukee whose beats reassure others of their belonging, as well as drag queens, environmental activists, farmworkers, and the migrants detained at our border. Drawing on intensive field research as well as her own personal story, Ramos chronicles how "Latinx" has given rise to a sense of collectivity and solidarity among Latinos unseen in this country for decades. A vital and inspiring work of reportage, *Finding Latinx* calls on all of us to expand our understanding of what it means to be Latino and what it means to be American. The first step towards change, writes Ramos, is for us to recognize who we are.

The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education National Academies of

Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine. 2018-07-21 In the United States, broad study in an array of different disciplines—arts, humanities, science, mathematics, engineering—as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The *Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education* examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

What everyone doesn’t know is that specific kinds of practice can increase skill up to ten times faster than conventional practice. • **Ignition** We all need a little motivation to get started. But what separates truly high achievers from the rest of the pack? A higher level of commitment—call it passion—born out of our deepest unconscious desires and triggered by certain primal cues. Understanding how these signals work can help you ignite passion and catalyze skill development. • **Master Coaching** What are the secrets of the world’s most effective teachers, trainers, and coaches?
