Cosmic Order and Divine Power Johan C. Thom.2014-09-18 The treatise *De mundo* offers a cosmology in the Peripatetic tradition which subordinates what happens in the cosmos to the might of an omnipotent god. Thus the work is paradigmatic for the philosophical and religious concepts of the early imperial age, which offer points of contact with nascent Christianity.

The Democracy Sourcebook Robert A. Dahl,Ian Shapiro,Jose Antonio Cheibub.2003-08-15 The *Democracy Sourcebook* offers a collection of classic writings and contemporary scholarship on democracy, creating a book that can be used by undergraduate and graduate students in a wide variety of courses, including American politics, international relations, comparative politics, and political philosophy. The editors have chosen substantial excerpts from the essential theorists of the past, including Jean-Jacques Rousseau, John Stuart Mill, Alexis de Tocqueville, and the authors of *The Federalist Papers*; they place them side by side with the work of such influential modern scholars as Joseph Schumpeter, Adam Przeworski, Seymour Martin Lipset, Samuel P. Huntington, Ronald Dworkin, and Amartya Sen. The book is divided into nine self-contained chapters: *Defining Democracy*, which discusses procedural, deliberative, and substantive democracy; *Sources of Democracy*, on why democracy exists in some countries and not in others; *Democracy, Culture, and Society*, about cultural and sociological preconditions for democracy; *Democracy and Constitutionalism*, which focuses on the importance of independent courts and a bill of rights; *Presidentialism versus Parliamentarism*; *Representation*, discussing which is the fairest system of democratic accountability; *Interest Groups*; *Democracy's Effects*, an examination of the effect of democracy on economic growth and social inequality; and finally, *Democracy and the Global Order* discusses the effects of democracy on international relations, including the propensity for war and the erosion of national sovereignty by transnational forces.

Border as Method, or, the Multiplication of Labor Sandro Mezzadra,Brett Neilson.2013-06-19 Far from creating a borderless world, contemporary globalization has generated a proliferation of borders. In *Border as Method*, Sandro Mezzadra and Brett Neilson chart this proliferation, investigating its implications for migratory movements, capitalist transformations, and political life. They explore the atmospheric violence that surrounds borderlands and border struggles across various geographical scales, illustrating their theoretical arguments with illuminating case studies drawn from Europe, Asia, the Pacific, the Americas, and elsewhere. Mezzadra and Neilson approach the border not only as a research object but also as an epistemic framework. Their use of the border as method enables new perspectives on the crisis and transformations of the nation-state, as well as powerful reassessments of political concepts such as citizenship and sovereignty.

Space Is the Place John Szwed.2020-04-30 Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space Is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space is the place.

On Television (Large Print 16pt) Pierre Bourdieu.2010-11-12 *On Television* exposes the invisible mechanisms of manipulation and censorship that determine what appears on the small screen. Bourdieu shows how the ratings game has transformed journalism - and hence politics - and even such seemingly removed fields as law' science' art' and philosophy. Bourdieu had long been concerned with the role of television in cultural and political life when he bypassed the political and commercial control of the television networks and addressed his country's viewers from the television station of the College de France. *On Television*' which expands on that lecture' not only describes the limiting and distorting effect of television on journalism and the world of ideas' but offers the blueprint for a counterattack.

Time for Equality at Work .2003 This is the fourth global report under the follow-up to the ILO Declaration on Fundamental Principles and Rights at Work. It examines diverse forms of discrimination at work and considers various policy and practical responses to tackle this problem. The book finds that the benefits of eliminating discrimination in the workplace go beyond the individual level and extend to the economy and to society, leading to the efficient use of human resources and diverse talents, improved worker morale and motivation, better labour relations and productivity gains.

Producing Nature and Poverty in Africa Vigdis Broch-Due,Richard A. Schroeder.2000 Drawing on case studies from eight different countries, the contributors to this provocative collection of essays demonstrate quite clearly that environmental programmes often have direct and far-reaching consequences for the distribution of wealth and poverty and that they constitute one of the major forms of foreign and state intervention in contemporary African affairs.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert,Erma Hermens,Marja Peek.1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled *Historical Painting Techniques, Materials, and Studio Practice* at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Anti-Piketty Jean-Philippe Delsol, Nicolas Lecaussin, Emmanuel Martin. 2017-03-01 Thomas Piketty's book *Capital in the Twenty-First Century* has enjoyed great success and provides a new theory about wealth and inequality. However, there have been major criticisms of his work. *Anti-Piketty: Capital for the 21st Century* collects key criticisms from 20 specialists—economists, historians, and tax experts—who provide rigorous arguments against Piketty's work while examining the notions of inequality, growth, wealth, and capital.

Simple Rules Donald Sull, Kathleen M. Eisenhardt. 2015 Outlines an approach to high-performance problem-solving and decision-making that draws on insights from survival guides, pop culture and other sources. Co-written by the award-winning author of *The Upside of Turbulence*. 75,000 first printing.

Annihilating Difference Alexander Laban Hinton. 2002-08-15 Genocide is one of the most pressing issues that confronts us today. Its death toll is staggering: over one hundred million dead. Because of their intimate experience in the communities where genocide takes place, anthropologists are uniquely positioned to explain how and why this mass annihilation occurs and the types of devastation genocide causes. This groundbreaking book, the first collection of original essays on genocide to be published in anthropology, explores a wide range of cases, including Nazi Germany, Cambodia, Guatemala, Rwanda, and Bosnia.

Community Management of Natural Resources in Africa Dilys Roe, Fred Nelson, Chris Sandbrook. 2009 Provides a pan-African synthesis of community-based natural resource management (CBNRM), drawing on multiple authors and a wide range of documented experiences from Southern, Eastern, Western and Central Africa. This title discusses the degree to which CBNRM has met poverty alleviation, economic development and nature conservation objectives.

The Courage of Truth M. Foucault. 2011-04-20 *The Courage of the Truth* is the last course that Michel Foucault delivered at the Collège de France before his death in 1984. In this course, he continues the theme of the previous year's lectures in exploring the notion of truth-telling in politics to establish a number of ethically irreducible conditions based on courage and conviction.

A Short Account of the History of Mathematics Walter William Rouse Ball. 1908

Information Systems Bernd Carsten Stahl. 2008-03-26 *Whilst Information Systems* has the potential to widen our view of the world, it often has the opposite effect by limiting our ability to interact, facilitating managerial and state surveillance or instituting strict hierarchies and personal control. In this book, Bernd Stahl offers an alternative and critical perspective on the subject, arguing that the ongoing problems in this area could be caused by the misconceptualization of the nature and role of IS. Stahl discusses the question of how IS can be used to actually overcome oppression and promote emancipation, breaking the book into four sections. The first section covers the theory of critical research in IS, giving a central place for the subject of ethics. The second section discusses the philosophical underpinnings of this critical research. The third and largest section gives examples of the application of critical work in IS. The final section then reflects on the approach and suggests ways for further development.

Convergent Strabismus L.E. Evens. 2012-12-06 When the Board of Directors of the Belgian Ophthalmological Society, in its session of November 26th 1978, asked me to prepare a report on strabismus to be presented at the joint meeting of the Dutch and Belgian Ophthalmological Societies to be held on June 13th 1981, I felt greatly honored but still more overwhelmed by the immensity of the task. I took advantage of the complete liberty given to me by the Board of Directors, first to limit the work to one particular form of strabismus, i.e. the convergent comitant form; second, to seek the help of what I thought to be the best strabologists in the Low Countries; third, to aim not at an encyclopedic treatise but at a practical volume destined to the general ophthalmologist. This volume is thus limited to the various aspects of convergent strabismus, more accurately of comitant convergent strabismus. The omission of the word comitant is purposely made to avoid the difficulties accompanying the explanation of this term and all the acrobatics needed to explain that most comitant strabismus are not completely comitant. The choice of this particular form of strabismus seems logical. First of all, it is the most common form of strabismus. On the other hand, most principles concerning examination and treatment can with some modifications be applied to other forms of strabismus.

Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law United Nations. Office of Legal Affairs. 1999 The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

Cartesian Theodicy Z. Janowski. 2001-11-30 Almost all interpreters of Cartesian philosophy have hitherto focused on the epistemological aspect of Descartes' thought. In his *Cartesian Theodicy*, Janowski demonstrates that Descartes' epistemological problems are merely rearticulations of theological questions. For example, Descartes' attempt to define the role of God in man's cognitive fallibility is a reiteration of an old argument that points out the incongruity between the existence of God and evil, and his pivotal question 'whence error?' is shown here to be a rephrasing of the question 'whence evil?' The answer Descartes gives in the *Meditations* is actually a reformulation of the answer found in St. Augustine's *De Libero Arbitrio* and the *Confessions*. The influence of St. Augustine on Descartes can also be detected in the doctrine of eternal truths which, within the context of the 17th-century debates over the question of the nature of divine freedom, caused Descartes to ally himself with the Augustinian Oratorians against the Jesuits. Both in his *Cartesian Theodicy* as well as his *Index Augustino-Cartesian, Textes et Commentaire* Janowski shows that the entire Cartesian metaphysics can - and should - be read within the context of Augustinian thought.

Britain, France and the Decolonization of Africa Andrew W.M. Smith, Chris Jeppesen. 2017-03-01 Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.

Survey Methods and Practices Statistics Canada, Statistics Canada. Social Survey Methods Division. 2003 This publication shows readers how to design and conduct a census or sample survey. It explains basic survey concepts and provides information on how to create efficient and high quality surveys. It is aimed at those involved in planning, conducting or managing a survey and at students of survey design courses. This book contains the following information: formulating the survey objectives and design a questionnaire; things to consider when designing a survey (choosing between a sample or a census, defining the survey population, choosing which survey frame to use, possible sources of survey error); determining the sample size, allocate the sample across strata and select the sample; appropriate uses of survey data and methods of point and variance estimation in data analysis; data dissemination and disclosure control; using administrative data, particularly during the design and estimation phases; choosing a collection method (self-enumeration, personal

interview or telephone interview, computer-assisted versus paper-based questionnaires); organizing and conducting data collection operations; processing data (all data handling activities between collection and estimation) and using quality control and quality assurance measures to minimize and control errors during various survey steps; and planning and managing a survey. This publication also includes a case study that illustrates the steps in developing a household survey, using the methods and principles presented in the book.

Notes Toward a Performative Theory of Assembly Judith Butler.2015-11-17 Judith Butler elucidates the dynamics of public assembly under prevailing economic and political conditions. Understanding assemblies as plural forms of performative action, she extends her theory of performativity to show why precarity—destruction of the conditions of livability—is a galvanizing force and theme in today's highly visible protests.

Nanopolitics Handbook Nanopolitics Nanopolitics Group.2014-01-15 The invention of new modes of sensibility is vital to enriching and sustaining political engagements, labours and lives in the situated contexts of urban collectivity. The nanopolitics handbook investigates the neoliberal city and workplace, the politics of crisis and austerity, precarious lives and modes of collaboration - through bodies and their encounters. Starting from the exploration of what bodies can do - with curiosity, courage and care - nanopolitics is a proposal for producing new collective subjectivations. Based on the experiments and experiences of the nanopolitics group, this book proposes exercises, concepts and ideas as little maps and machines for action. Drawing on social movements, grassroots organizing, dance, theatre and bodywork, the reflections and practices here present strategies for navigating and reconfiguring the playing field of 'nanopolitics', activating its entanglement with the major politics of our time--Publisher's description

The New Spirit of Capitalism Eve Chiapello,Luc Boltanski.2018-01-16 In this major work, sociologists Luc Boltanski and Eve Chiapello go to the heart of the changes in contemporary capitalism. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their reorganization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization that was founded on employee initiative and autonomy in the workplace-a freedom that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and Ben and Jerry) arguing that they practice a more successful and subtle-form of exploitation. Now a classic work charting the sociological structure of neoliberalism, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the left's critique of the alienation of everyday life that simultaneously undermined their social critique. In this new edition, the two authors reflect on the reception of the book and the debates it has stimulated.

Theater as Metaphor Elena Penskaya,Joachim Küpper.2019-05-20 The papers of the present volume investigate the potential of the metaphor of life as theater for literary, philosophical, juridical and epistemological discourses from the Middle Ages through modernity, and focusing on traditions as manifold as French, Spanish, Italian, German, Russian and Latin-American.

Islands as Crossroads Tim Curtis.2011-01-01 This book brings together information on various disciplines from the three main island regions of the world - the Caribbean, Indian Ocean and Pacific Ocean - to explore the ways in which the peoples of small islands have lived, and continue to live, in their culturally diverse societies. Leading anthropologists, historians, economists, archaeologists and others provide information on the complexity and dynamics of societies in small island developing states. It reflects the outcomes of a UNESCO symposium held in the Seychelles in 2007.--Publisher's description.

Contingency, Hegemony, Universality Judith Butler,Ernesto Laclau,Slavoj Žizek.2011-01-10 What is the contemporary legacy of Gramsci's notion of Hegemony? How can universality be reformulated now that its spurious versions have been so thoroughly criticized? In this ground-breaking project, Judith Butler, Ernesto Laclau and Slavoj Žižek engage in a dialogue on central questions of contemporary philosophy and politics. Their essays, organized as separate contributions that respond to one another, range over the Hegelian legacy in contemporary critical theory, the theoretical dilemmas of multiculturalism, the universalism-versus-particularism debate, the strategies of the Left in a globalized economy, and the relative merits of post-structuralism and Lacanian psychoanalysis for a critical social theory. While the rigor and intelligence with which these writers approach their work is formidable, Contingency, Hegemony, Universality benefits additionally from their clear sense of energy and enjoyment in a revealing and often unpredictable exchange.

Governing Cyberspace Dennis Broeders,Bibi van den Berg.2020-06-26 Cyber norms and other ways to regulate responsible state behavior in cyberspace is a fast-moving political and diplomatic field. The academic study of these processes is varied and interdisciplinary, but much of the literature has been organized according to discipline. Seeking to cross disciplinary boundaries, this timely book brings together researchers in fields ranging from international law, international relations, and political science to business studies and philosophy to explore the theme of responsible state behavior in cyberspace. . Divided into three parts, Governing Cyberspace first looks at current debates in and about international law and diplomacy in cyberspace. How does international law regulate state behaviour and what are its limits? How do cyber superpowers like China and Russia shape their foreign policy in relation to cyberspace? The second focuses on power and governance. What is the role for international organisations like NATO or for substate actors like intelligence agencies? How do they adapt to the realities of cyberspace and digital conflict? How does the classic balance of power play out in cyberspace and how do different states position themselves? The third part takes a critical look at multistakeholder and corporate diplomacy. How do global tech companies shape their role as norm entrepreneurs in cyberspace, and how do their cyber diplomatic efforts relate to their corporate identity?

Visibility in Social Theory and Social Research A. Mubi Brighenti.2015-12-03 What is social visibility? How does it affect people and public issues? How are visibility regimes created, organized and contested? Tackling both social theory and social research, the book is an exploration into how intervisibilities produce crucial sociotechnical and biopolitical effects.

Organizational Improvisation Miguel Pina E. Cunha,Ken Kamoche.2003-09-02 Confronted with rapid and unpredictable environments, contemporary organizations are becoming more aware of the benefits of improvisation. By improvising, organizations create the capacity to make sudden adaptive moves, thus adapting in real time to unexpected events. Organizational improvisation is thus a new and exciting area in terms of practice and research. Organizational improvisation has important implications for such subjects as product innovation, teamworking and organizational renewal, and this new book brings together some of the best and most thought-provoking papers published in recent years. Organizational improvisation is now emerging as one of the most important areas of organizational science, and this book provides a comprehensive collection suitable for students, researchers and practitioners alike.
