**The Education Gospel** W. Norton Grubb,Marvin Lazerson.2009-07-01 In this hard-hitting history of the gospel of education, W. Norton Grubb and Marvin Lazerson reveal the allure, and the fallacy, of the longstanding American faith that more schooling for more people is the remedy for all our social and economic problems--and that the central purpose of education is workplace preparation. But do increasing levels of education accurately represent the demands of today's jobs? Grubb and Lazerson argue that the abilities developed in schools and universities and the competencies

required in work are often mismatched--since many Americans are under-educated for serious work while at least a third are over-educated for the jobs they hold. The ongoing race for personal advancement and the focus on worker preparation have squeezed out civic education and learning for its own sake. Paradoxically, the focus on schooling as a mechanism of equity has reinforced social inequality. The challenge now, the authors show, is to create environments for learning that incorporate both economic and civic goals, and to prevent the further descent of education into a preoccupation with narrow work skills and empty credentials.

The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. LEANPUB is definitely out of the league as it over here you can either choose to download a book for free or buy the same book at your own designated price. The eBooks can be downloaded in different formats like, EPub, Mobi and PDF. The minimum price for the books is fixed at \$0 by the author and you can thereafter decide the value of the book. The site mostly features eBooks on programming languages such as, JavaScript, C#, PHP or Ruby, guidebooks and more, and hence is known among developers or tech geeks and is especially useful for those preparing for engineering.
